

Online learning event

Gender and climate-smart agriculture

February 2014

FAO welcomes everyone interested in climate-smart agriculture and equity to join an online learning event in February 2014! The online learning event will consist of up to three webinars (approx. 90min each) and online discussions on the linkages between gender, agriculture and climate change. The event is organized within the [Community of Practice for Climate Change Mitigation in Agriculture](#) of the MICCA Programme in collaboration with colleagues and partners. Enrolled participants will receive more details prior to the event.

Enrol now for the learning event! bit.ly/1gj8AU5

Topics of the learning event

- ❖ Why is it vital to take gender into account for food security and climate-smart agriculture?
- ❖ What are the available tools that can help gather information on gender and advance gender mainstreaming in climate-smart agriculture?
- ❖ What are best case studies of gender-sensitive climate-smart agriculture practices? What kind of policies and funding structures have led to more equal agriculture?

Key background reading
