Colloquium 2017 — The Health Care of Catastrophes: Innovation Driven by Disaster

Session Description: Catastrophes — from hurricanes to mass shootings to epidemics — present the medical community with care challenges as complex and traumatic as the disasters themselves. Sponsored by the Mensa Education & Research Foundation, this Colloquium will address these health care challenges from the perspective of emerging technology and innovation, as well as evolving policy questions.

Location: Regency Ballroom 1 & 2

Speaker:

Tracks: Foundation

12:00 PM - 1:15 PM

A Prehistory of Music

Session Description: Using art, historical images, ethnographic films and archeological materials, Christopher Kilgore will present a compendium of evidence of early musical performance. Beginning at the dawn of the historical period and working backward, Kilgore will address the cultures of ancient Rome, Greece, China, Egypt, Sumer, Africa and Paleolithic Europe. Topics covered will include the development of music theory, vocal performance, the variety of early musical instruments and the origin of dance. Special attention will be given to the most recent scholarship, including unpublished materials.

Location: Atlantic Ballroom 3

Speaker: Christopher Kilgore

12:00 PM - 1:15 PM

Revolt of the Deplorables: The Inside Story of the Greatest Political Upset in U.S. History

Session Description: The 2016 presidential campaign pitted one of the best-credentialed candidates ever to seek the presidency against a shoot-from-the-lip billionaire whose followers considered themselves part of a worldwide populist movement. The outcome was the greatest upset in U.S. political history. What happened? In this presentation, based on his forthcoming book *Revolt of the Deplorables*, Dr. Steven J. Allen tells the inside story of a grassroots rebellion that changed the course of America and the world. Allen has been called a “digital revolutionary” (the National Journal) and “the Tea Party’s editor in chief” (The Daily Beast/Newsweek). He served as press secretary to Sen. Jeremiah Denton and senior researcher in Newt Gingrich’s presidential campaign. Currently, he is vice president and chief investigative officer of the Capital Research Center in Washington, D.C. A former Membership Officer of Metropolitan Washington Mensa, he coordinated MWM’s Politics SIG for 10 years.

1:30 PM - 2:45 PM

Introverted Intuitives: The Top Four Percent

Session Description: The rarest of the 16 Jungian personality types identified in the Myers-Briggs Type Indicator, Introverted Intuitives make up only four percent of the general population. They are the architects of ideas who live primarily in the internal world of concepts and ideas. In a society that values homogeneity of thinking, IN's often experience covert prejudice and discrimination in education, social situations and in the workplace. (To wit: "You know what's wrong with you? You think too much!") In my corporate and private work, I have worked with more than 1,000 Introverted Intuitives. When IN's see the "map" of their personalities, they report that this information changes their lives for the better. I will also present the similarities and differences between INs and people with Asperger's.

Atheist Meet-and-Greet

Session Description: This atheist, agnostic, humanist, etc. meet-and-greet can be "hosted" by anyone that is motivated to lead the discussions, with Ed You as the default host. This forum is for you, whether you want to discuss atheist reading lists, other atheist groups, the politics of atheism, how religious oppression impedes you from coming out of the atheist closet, or if you simply want to meet others that share atheist/agnostic values.

Location: Room 216

Speaker: Ed You

Tracks: M&G

3:00 PM - 4:15 PM**Florida's Big Dig: The History of the Atlantic Intracoastal Waterway, Jacksonville to Miami, 1881-1935**

Session Description: Bill Crawford provides a detailed account of the development of Florida's Intracoastal Waterway. As early as 1636, canals began to replace the oxcart as the means of transporting goods in Colonial America. But the Constitution granted no power to fund inland waterways. In 1825, the completion of the Erie Canal ignited America's first canal renaissance. In 1881, Florida began building what would be the southernmost section of the Atlantic Intracoastal Waterway. A private company agreed to construct a small canal in exchange for public land and the right to charge tolls. The election of Theodore Roosevelt as president set off a second national renaissance of waterway construction. More than 30 waterway associations coalesced into national advocacy groups to lobby Congress for funding. Mr. Crawford will also cover how the sale of the private waterway became a federal, toll-free inland waterway and the source of funds for the first psychiatric hospital for children in the nation.

Location: Atlantic Ballroom 2

Speaker: William Crawford, Jr., Esq.

Tracks: Speaker

3:00 PM - 4:15 PM**Self-Expansiveness: A Transpersonal Construct and Its Supporting Research**

Session Description: Self-expansiveness is a construct referring to how a person can identify with aspects of the world not usually seen in the West as part of the ordinary self. This construct is accompanied by a scientifically well-validated measure, the Self-Expansiveness Level Form (SELF), which has been used in considerable empirical research. In particular, the SELF's Transpersonal Scale, which focuses on extreme levels of self-expansiveness, such as identifying with all of humanity or even all that exists, provides a model for understanding a number of phenomena related to the outer boundaries of human consciousness. This presentation will explore the construct of self-expansiveness and its accompanying measure, as well as summarize the empirical research supporting it. The many implications of this approach, in terms of both further research and applications, will also be explored.

Location: Regency Ballroom 3

Speaker: Harris Friedman, PhD

Tracks: Speaker

3:00 PM - 4:15 PM**Understanding Surrealist Art**

Session Description: Beginning primarily as a literary phenomenon, surrealism ultimately became the most influential artistic movement of the 20th century. Intimately affecting the development of abstract expressionism, pop art, magic realism and advertising, surrealism has achieved a level of integration into the modern collective consciousness that is historically unprecedented. Utilizing an extensive slide presentation, Christopher Kilgore will present a survey of surrealist art and illuminate the historical, political, philosophical and psychological context in which it developed, orienting surrealism within the prevailing Modernist cultural context. Numerous surrealist artworks will be analyzed in terms of their stylistic precedents, technical approaches, and thematic elements. Kilgore will also discuss many of surrealism's greatest artists and the way in which their personalities, relationships, synergies and conflicts influenced the movement's evolution. A syllabus will be provided.

Data Visualization for Everyone: A Truthful Art

Session Description: Never before has so much data been available to the public. From crime statistics to public school test scores, citizens have the ability to access mountains of data on issues that impact their lives. But having information isn't the same as being informed. How can citizens use data to identify trends or pinpoint new solutions? In the past two decades, visualization—the graphical display of information—has become a skill as important as literacy or numeracy, as it is arguably the most powerful tool to help us derive meaning from the enormous amounts of data produced daily. Join international expert Alberto Cairo to see this tool at work.

Oil and Gas Foundations and Frac(k)ing: Environmental, Surface Use and Other Issues in Shale Plays

Session Description: The horizontal shale boom that began in 2008 thrust domestic oil and gas production to a level never before anticipated. Apart from the shift in international markets, this paradigm raised important questions related to this new technology: What are the effects of hydraulic fracturing? What is the impact on surface use and encroachment to other developments? What are the implications for federal lands? Is this technology safe and clean? Are state and federal laws equipped to handle these drilling techniques? How do these fossil fuel technologies related to the ongoing green energy movement? This presentation will inform the attendee on the full range of thought of the above questions with an apolitical approach, while presenting thoughtful analysis and context from the unique position of a practicing oil and gas attorney who is also a public health practitioner.

The Cuban-American Transition: From Little Havana Exiles to Transnational Expats

Session Description: Since their initial and, many thought, temporary arrival in the United States after the Cuban Revolution in 1959, Cuban Americans have continued to come to Miami. But the Cubans that came as exiles in the 1960s and the Cuban Enclave of Little Havana are diminishing in number, even as new layers of Cubans establish themselves on the foundations stones set by the earliest arrivals. The new Cuban immigrants did not leave Cuba for the same reasons as the earlier waves and have a different view of how the diaspora should relate to the Cuban people and the Cuban government. This presentation presents some of the key elements of this transition from exiles to

transnational expats.

What Senior Terrorists Say About Why They Want to Destroy Our Way of Life

Session Description: Beliefs drive behavior. Gain an eye-opening look into the minds of the Islamic terror masterminds seeking to destroy America. Explore their motives and beliefs with the clinical psychologist who, as an interrogator in the controversial CIA Enhanced Interrogation Program, went head-to-head for years with 1 of the most senior terrorists in U.S. custody, including Khalid Sheikh Mohammed the mastermind behind the Sept. 11, 2001, terror attacks. Learn what they told him first-hand about why attacks by violent Islamists are far from over, and why they view many of our freedoms and protections as weaknesses placed in our minds by God to make it easier for them to conquer us. Examine how the lessons learned from these insights can be used to make us safer.

Eating What You Cook: The Importance of Self-Investment

Session Description: Would you eat food from a chef who doesn't even eat what he cooks? Exactly. Matthew Sullivan an innovator in creative networks and popularly known as MC Kenna, will expound upon the essentiality of self-investment, or Eating What You Cook, in the world of entrepreneurship. Constantly revisiting the chef analogy, Sullivan's presentation humorously highlights checkpoints like finding your niche, investing in others and what money really means. Hear it straight from the horse's mouth. At only 18, the young Matthew Sullivan, an information systems student, has founded three businesses: BeautiFlorida, a creative opportunity platform; FloridaRapMerch, a drop-shipping system to help creatives fund their careers; and Connect The Dots, a color-coded networking event that will soon make its way to Texas, Denver, New York and more.

10:30 AM - 11:45 AM

Law Not War

Session Description: My address will deal with the recognition that the illegal use of armed force in violation of the UN Charter should be deterred by being punishable as a crime against humanity for which the leaders responsible will be held to account criminally and civilly in any competent court of law. From the AG Program Chair: We are proud to host Ben Ferencz, an honored Harvard Law graduate, who served three years as a combat soldier in World War II. Toward war's end, he became a war crimes investigator collecting evidence of Nazi atrocities. He became Chief Prosecutor in one of the subsequent Nuremberg trials where 22 high-ranking defendants were convicted of murdering more than one million men, women, and children. He was then 27 years old. Now, at 88, he has spent practically his whole life trying to deter illegal war-making. His work to prevent crimes against humanity has been recognized throughout the world. (See: benferencz.org)

The Security Profession in the 21st Century

Session Description: The world of cyber has rapidly expanded the amount and portability of data in the hands of people. The crown jewels of governments, industries, organizations and citizens have never been more vulnerable than they are today. Elections are decided, power centers altered and all the time human and personal contact becomes more and more remote, distant and electronic. Yet all the while the traditional security industry has its routes solidly in the physical world and its eyes on the digital and virtual. Crime and terror know no ground rules for theft, exploitation or ransom so how does this profession adapt, adjust, and remain relevant to the communities we serve?

12:00 PM - 1:15 PM

Hurricanes and Global Warming: Expectations Versus Observations

Session Description: Climate variability and any resulting change in the characteristics of tropical cyclones (tropical storms, subtropical storms and hurricanes) have become topics of great interest and research recently. Some scientific articles have reported a large increase in tropical cyclone energy, numbers and windspeeds in the last few decades in association with warmer sea surface temperatures. These increases have been linked to man-made greenhouse gas changes. I do not dispute that anthropogenic forcing caused at least a substantial portion of observed 20th century warming. It is likely that some increase in tropical cyclone peak windspeeds have occurred and will occur if the climate continues to warm. However, whether greenhouse gas warming is related to increased tropical cyclone activity is not the most relevant question. More important, what is the sensitivity of tropical cyclone intensity and activity to greenhouse gas forcing? These questions and others will be addressed in the talk.

Large-scale Neural Networks of the Brain at "Rest"

Session Description: Functional magnetic resonance imaging (fMRI) originally focused on mapping brain activation in response to an external task (i.e., task-based fMRI) such as language processing or face perception. Traditionally, it was thought that brain activation unrelated to a specific external task would be unstructured and random, and therefore not informative of brain function. However, research now demonstrates that spontaneous

brain activity acquired with fMRI when participants simply lie in the scanner and rest is structured and can provide meaningful information about brain function. This talk will describe methods used to identify large-scale neural networks in the brain at rest and how differences in such resting-state brain networks may help to characterize clinical disorders, such as autism spectrum disorder.

Betrayal of Valor: An Expose of Horrors at the Veterans Administration by a High Profile Advocate

Session Description: You've seen the recent Veterans Administration scandals where service-injured veterans are literally dying while awaiting medical and other benefits as bureaucrats delay-till-they-die to keep reporting numbers up! An ongoing scandal with egregious case studies by the score. Eric Gang's new book Betrayal of Valor, due out mid-July, exposes the VA's massive failures that set tens of thousands of vets on a downward cycle of drugs, family breakups, unemployment and homelessness. He's a veteran's advocate and is deeply involved on the good side of the VA scandals on behalf of service men and women disabled during their service. You likely saw in Time Magazine that he just got medical benefits approved (retroactively) for a 90 year old (a 20 year fight!) who, as a young soldier, guarded a U.S. toxic weapons dump with no warnings or safeguards. President Trump and Congress promise reform. Will it happen? Get a state-of-the-VA report and forecast from American veterans' most visible advocate.

4:30 PM - 5:45 PM

Have There Always Been Addicts?

Session Description: Although humankind has had access to intoxicating preparations for at least 15,000 years, if not longer, evidence of addiction does not appear in human literature until about 1550. Before that approximate time, none of the ancient writings attributed chronicity to people who occasionally got drunk. Repeatedly, the ancients

warned against drunkenness as a troublesome excess, but they did not call anyone a drunkard. That would have implied habitual drunkenness, where people repeatedly got into trouble because of frequent intoxication. The ancient authors' observations of drunkenness provided cautionary tales about its dangers, but they did not warn against forming a habit. Expressions of alarm over the behavior of drunken men in public began to increase in frequency during the late-17th and early-18th centuries, and these expressions coincided with the wildfire spread of rum, gin, brandy and whiskeys throughout the British Isles and elsewhere.

4:30 PM - 5:45 PM**Looks And Sounds Like a Winner: How Perceptions of Competence in Candidates' Faces and Voices Influence How We Govern Ourselves**

Session Description: Why are some societies paralyzed by violence while others are peaceful? Why is the gap between the rich and the poor astronomical in some societies, but less so in others? The answers to these fundamental questions are tied directly to how we choose our leaders. The standard approach to studying this important topic has been to examine the demographic characteristics of the voter. For example, Democrats tend to vote for Democrats, and Republicans for Republicans. While this line of inquiry has greatly informed our understanding of how we govern ourselves it negates the role of biology in human decision-making. More specifically, while modern-day politics might seem to be in the domain of high-level cognitive decisions, it is important to realize that our behaviors are also influenced by our biology. In this seminar we will address how two biological signals — vocal and visual — influence voters.

4:30 PM - 5:45 PM**Quiddler Tournament**

Session Description: Quiddler is a card game that combines the word-building of Scrabble with rummy-like rules. Players must combine progressively larger hands of cards into words, with the goal of earning the most points. Although it may appear that the person who knows the most words would consistently win, this isn't the case. There's an element of strategy — players must choose whether to go out or wait to increase the odds of getting the bonus for longest word or most words. Novices are welcome, but they're advised to study up on two- and three-letter words if they want to be competitive.

The Paper Chase: A Comical Story Of One Man's Race to Beat the Clock

Session Description: In January 2009, on a weekend that saw windchills fall below zero, 00 Jewish people were attending a conference at a resort in the Catskills when the heat went out. Among the many challenges that arose was the need to procure disposable plates, bowls, cups and cutlery to feed those 00 cold people for three meals all within the two hours left before sunset. What followed was a frenzied race around upstate New York that proved to make for a great story filled with twists and turns, suspense and a whole lot of laughs. This story has been told in print, to audiences in person and now, attendees at the AG can not only hear it firsthand from a pretty darn good storyteller but also learn a little about the Jewish laws governing the Sabbath and keeping kosher. An equally entertaining slide show accompanies the story.

6:00 PM - 7:15 PM**Companies that Kill: Auto, Pharma — Execs Weigh Cost to Fix a Defect Versus Cost to Pay Injured or Dead**

Session Description: John Uustal and Bob Kelley expose companies whose products kill or seriously injure people — often knowingly, balancing the cost to repair a known danger or defect against the cost to pay off the families of victims. Their stories come straight from the headlines, where they were often the lawyers for victims. GM decided to save \$2.20 per car by skipping fire protection between the gas tank and the passenger compartment — one of the largest companies-that-kill verdicts in history. Bob was the victims' lawyer. Nissan rollovers, defective seatbelts and other products where cost to repair a known defect was more than the cost of lives lost, so companies just went forward — John was the lawyer for victims. This value of human life versus corporate greed calculation still happens every day in health care, pharmaceuticals, autos, consumer products. Learn what you can do, how to stay safe and the next big corporate threats from two pros who live on the front lines of the worst of corporate conduct.

6:00 PM - 7:15 PM**Debate Room: "Controlling Costs in U.S. Health Care"**

Session Description: Both ObamaCare and TrumpCare are about paying for health care, not much about controlling costs. Whether supported by taxes or insurance premiums, costs are on a steady rise. How can that trend be stopped or reversed? Would a national drug plan like Canada rein in drug costs? Can we switch from fee-for-service to something else, and if so, what? Can hospitals survive without charging \$25 for aspirin tablets? Debate Room is not a heated debate, but a fast-paced moderated discussion where everyone gets to be heard, and the most interesting speaker gets a prize!

Location: Diplomat Ballroom 5

Speaker:

6:00 PM - 7:15 PM**Intelligent Design and Natural Law**

Session Description: It is the contention of this presentation that Intelligent Design theory adheres to natural law, and therefore is scientific according to the historical definition of the term, whereas Darwinian Evolution, as applied by most beginning with Darwin himself, is not scientific. Darwinian Evolution is inherently philosophical, even religious, due to its commitment to an unsubstantiated belief that all things are possible through natural means. No matter what biology encounters, it developed by natural means to achieve

what it is today. The lack of a generally accepted theory of evolution contradicts this, as does the lack of evidence in the fossil record, as does biological structures that are irreducibly complex, as does the complex information content of DNA, and as does common sense. Intelligent Design theory accepts and applies known natural laws, which Darwinism does not, and therefore Intelligent Design should be recognized as science, whereas Darwinism should not.

Should I Graduate from High School Early? Pros and Cons of Radical Acceleration

Session Description: Grade-skipping is becoming more common for gifted kids, and gifted teens are often eager to leave high school far behind. But did you know that you have to be at least 16 to live in a college dorm? And why early graduates are often not competitive at Ivy League schools? Come learn the benefits and pitfalls of graduating at a young age or in less than four years. Using case studies of actual 14- and 15-year-old graduates, we'll discuss how residential early college programs, early college high schools, deferred entrance programs and gap years can ease the transition to higher education and why even the brightest 12-year-old can't get into Stanford.

Location: Regency Ballroom 3

You're the Right Caller! How to Win Radio Contests Like a Pro

Session Description: Broadcasting companies make money based on how many people listen to their stations. To get you to tune in, they bribe you with the chance to win stuff. Pompei will share secrets of how to maximize your chances of it being you to win these prizes. Pompei has been participating in radio contests for over 20 years, and has won money, countless concert tickets and even a trip. He will discuss the different common types of contests, deciding which contests to pursue, preparation and setup prior to the contest, dialing techniques (including use of multiple phones), effective use of telephone and electronic services and resources and things that can go wrong and how to prevent

Any President but Donald Trump

Session Description: When writing *The Presidential Book of Lists*, Ian Randal Strock calculated the "average president" and the extremes. But the election of Donald Trump apparently broke the mold. Or did it? While it's true that President Trump is very far from the average set out by his 43 predecessors, in many respects he may not be as unique as you might think. This look at how Trump compares to the other 43 men we've called president will be non-partisan, but that doesn't mean you won't see the presidents in a new light or have some of your preconceived notions confirmed.

7:30 PM - 8:45 PM

Can the Death Penalty Be Anything but Cruel and Unusual Punishment?

Session Description: We will briefly explore the gory historical methods of judicial and judgmental execution, to the present day attempts at humane execution. We will engage audience participation on key questions that surround the death penalty. For instance, is

capital punishment an effective judicial remedy for heinous crimes? What defines “effective”? Does it serve as an actual deterrent to crime? Is there racial discrimination at the highest levels of our States? Is it a fiscally sound policy to dispatch the perpetrators of crimes worthy of the death penalty? If disparity in the application of the death penalty exists, can it be deemed justice? Audiences will be able to converse intelligently at cocktail parties everywhere whether the current method of execution (lethal injection) is a violation of our eighth amendment, guaranteeing there will be no cruel or unusual punishment? How does our use of the death penalty compare to others around the world? Is the death penalty an option worth exercising in our society?

7:30 PM - 8:45 PM

Eugenics: Improving the Human Race, or Scientific Validation for Racism? (Adults Only)

Session Description: In medically beneficial, societally harmful and ethically specious ways, eugenics-based practices are still being used in the U.S. This workshop aims to educate on eugenics history, contemporary practices and how the history of eugenics is intertwined with contemporary sexual health and rights. This workshop starts conversation about eugenics-based practices so we can remove the stigma from the word while honoring its complex reach in reproductive and sexual justice and recognize harmful eugenics-based practices in action. This workshop contains discussion of coercive reproductive practices; racial, gender and ability-based discrimination; white supremacy; and cis heterosexism. The way we talk about sexual and reproductive rights can be potentially traumatic if we, as educators, are not informed about the historical context of eugenics-based practices.

7:30 PM - 8:45 PM

Painting Across Generations: The Legacy of the Florida Highwaymen

Session Description: To know and enjoy Florida history, one must review this unique phenomenon: a group of African American artists whose mid-20th century paintings revolutionized their lives and turned the art world on its head. Working in broad strokes, these untrained but savvy artists took typical Florida images – colorful sunsets, egrets, the ocean, palm trees, the Everglades – and captured the beauty and fragility of the state on Upson board instead of canvas. The quickly realized (still wet sometimes) paintings were then inexpensively sold to those traveling Highway 1 – the tourists had a piece of Florida to display in their northern homes and the Highwaymen made their livings through art and

commerce instead of working the orange groves and factories.

9:00 PM - 10:15 PM

Reclaiming Sexuality and Narrative After Sexual Trauma

Session Description: According to the National Sexual Violence Resource Center, one in five women and one in 11 men will be sexually assaulted at some point in their lives and 10 percent of those assaults will be committed by someone whom the survivor knows. At its root, sexual violence is committed as a way of exerting power and control over someone — so what does it mean when that violence is committed by someone whom you know and trust? In this workshop, we will discuss the emotional landscapes after sexual violence, ways that sexual violence impacts desire, fantasy, and sexuality, and how survivors can reclaim their sexualities and personal narratives after trauma. This workshop is grounded in an empowerment model and will include information and tools relevant for both survivors and their loved ones.

9:00 PM - 10:15 PM

Star in Your Universe — Shining Light on Unique Contributors for Professional and Personal Growth

Session Description: Star in Your Universe — Shining Light on Unique Contributors for Professional and Personal Growth examines how unique individuals with high capability can both identify and frame their talents and standout qualities to enable success in career and life. Learn how to pinpoint exactly what sets you apart from the competition, and then how to leverage those skills and attributes. Discuss how to brand yourself, including how to turn negative stereotypes from potential weaknesses into untapped strengths. Discover how to maximize your inner circle — among whom you're already known — to build stronger circles of recognition and broaden your reach. Learn about the pieces of strategic communication that can elevate you among peers and supervisors in professional settings, and friends and acquaintances in social settings. Everyone wants to shine, but make your shining star the one to which everyone wants to be hitched.

Infant-directed Singing: What Does It Sound Like and Why Is It Important?

Session Description: Infant directed (ID) singing is the unique way mothers sing to infants as part of caregiving. Due to its ubiquitous presence and historical background, ID singing is identified as a universal caregiving behavior, and thus may impart some advantage to infants, and possibly mothers as well. Through ID singing, mothers direct infant attention and modulate infant arousal, thus providing opportunity for infant self regulation. This presentation will present descriptive research findings regarding infant response to ID singing, in both typical and clinical populations, including mothers with post partum depression, and infants with Down syndrome. Additional data will be provided to identify the prominent acoustic parameters of ID singing for both clinical populations. Implications will be presented for using ID singing as therapeutic intervention to promote self regulation.

The Bay of Pigs: A Participant's Perspective

Session Description: The Bay of Pigs invasion of Cuba, was a failed military operation undertaken by the CIA sponsored Brigade 2506 on April 17, 1961, at the height of the "Cold War." Brigade 2506 was the armed wing of the exile Cuban community's "Democratic Revolutionary Front," and the invasion was intended to overthrow the communist government of Fidel Castro. Dr. Bayas Bazán participated in the invasion as a frogman and was one of the first six men to land at Girón beach. On the third day of the operation he was wounded in his right knee and captured. Dr. Bayas Bazán subsequently spent a year in a Cuban prison, before being ransomed by the U.S. government, along with 59 other wounded prisoners that needed urgent medical attention. He will share his personal experience in, and perspective of, the fateful Bay of Pigs debacle.

A History of the UFO Phenomenon

Session Description: Governments around the world have had to deal with the UFO phenomenon for a good part of a century. This presentation provides an overview of how the United States government has dealt with the phenomenon, beginning in World War II. The seriousness with which the military and the U.S. intelligence communities approached the UFO phenomenon internally is also discussed. At the same time, the story reveals how a subject with such apparent depth of experience and interest became treated as if it were a triviality. Some of the more interesting UFO case histories are touched upon. Also discussed is how other governments have dealt with the phenomenon. As stated in 1952 by the Air Force Chief of Intelligence, Major General John Samford, "Credible people have seen incredible things." For more information see explorescu.org, or contact Robert at robertmaxpowell@gmail.com.

Sports Analytics 101

Session Description: Michael Lewis's Moneyball, published in 2003, documents the success of the Oakland Athletics under the direction of General Manager Billy Beane. Beane eschewed popular but primitive approaches to scouting and in game strategy in favor of a seemingly radical approach, heavily reliant on advanced statistical analysis, and sparked a revolution within the world of sports. This presentation addresses the key elements of this revolution to this point, and offers a glimpse into the future of our favorite sports. Specifically, this presentation discusses how number crunchers have played an increasingly prominent role in sports in the 21st century. In addition to decisions related to player personnel decisions and on field strategy, those in the sports world use analytics now more than ever for marketing, player safety, playing rules, etc. Still, statisticians seek to address flaws in these analytics models flaws that have fueled sports' ongoing old school vs. new school debate.

Leading Difficult People: The Role of Emotional Intelligence

Session Description: We all know people we find challenging. The good news is you can still work effectively with these people – if you choose to do so. This session is designed to explore the foundation of Emotional Intelligence and provide participants with tools to better understand and lead others. EQ – not IQ – is the strongest predictor of leadership success. That's because emotional intelligence helps us understand and manage our relationships with others. Self-awareness is the foundation of emotional intelligence. This interactive session will help participants develop greater self-awareness, and thus a greater capacity for emotional intelligence. Through reflection and small group interaction, participants will come to understand how to use emotional intelligence to create better relationships with others. This session is designed for anyone who wants to become more effective in working with other people. For more information: kapelaleadershipsolutions.com

Session Description: Have you ever wanted to know if the prison life in "the movies" is real or fictional? Have you ever wanted to learn what the day-to-day life and struggles of correctional staff are? Come join Mensa's own Jason DeNolfo as he describes to you the culture of prison life as he has experienced it for the last 11 years as a correction officer in the Connecticut Department of Corrections. Discover how a career in corrections can affect an individual not only behind prison walls, but how it affects one's personal life outside. What is the experience of an individual who has been accused and is just entering prison? How does a correctional staff member address all the ethical dilemmas that are faced on a daily basis? This no-holds-barred presentation will address these controversial topics and more.

Polyamory from A to MTINYBTYIOK (How Giving a TED Talk Helped Me Fix Everyone Else's Relationships)

Session Description: Polyamorous relationships consist of individuals of multi-partner relationships and families. Leon offers an insight through his journey in finding polyamory as the means to creating intimate, valuable relationships with multiple people. Through his journey and explanation, Leon debunks myths and presents the values of polyamory. He will be screening his TED Talk video, then lead a discussion on polyamory and related topics. He is currently working on his first book, with the working title matching this talk's.

Preparing Your Student for College: What to Look for and How to Get in!

Session Description: Competition for acceptance to colleges and universities is at an all-time high. Getting accepted into highly selective colleges has become more and more difficult due to a rapidly growing applicant pool. Parents and middle and high school students are invited to get real and practical answers to crucial questions about what students need to know about preparing for the college admissions process. Seminar topics will include: what should my student do now to prepare for college? how can my student get into the college of his or her choice? how early should my child start the college admission process? what should my student look for when choosing and visiting a college? what role do grades, standardized tests, course load and extracurricular activities play in college admissions? and more.

The Auschwitz Album and an Auschwitz Survivor's Testimony

Session Description: This presentation deals with: 1 The Auschwitz Album, the only surviving visual evidence of the process leading to the mass murder at Auschwitz - Birkenau. It's a unique document that portrays the story of the passengers of one deportation transport that arrived at Auschwitz -Birkenau concentration camp, on May 2 , 1 44. This album introduces the use of photographs as historical documents that, together with additional sources such as letters and testimonies, help create a comprehensive view of a certain historical event, and to put a human face on it's victims. 2 Testimony and Q A with Auschwitz survivor Julius Eisenstein.

Location: Atlantic Ballroom 3

Speaker: Julius Eisenstein, Stacey Nowack

3:00 PM - 4:15 PM

An Immigrant's Journey Into The Cosmos

Session Description: Dr. Nebil Misconi will discuss his recent book, An Immigrant's Journey Into The Cosmos. A summary of the political upheavals in Baghdad, Iraq and the Middle East as he was growing up will be presented. He will describe his T experience in Baghdad with one hair-raising moment. He chronicles his unique ourney into astronomy in the .S. and his solar system research in Interplanetary Dust Dynamics, comets and asteroids. His laser-particle levitation experiment will be explained in an attempt to simulate IDD in space, and his involvement in the 1 s Star War program as a spin-off research. Later on, he also conducted the first rocket launch in Mexico's history to observe the total solar eclipse, and another NASA launch from the Wallops Island Facility. Dr. Misconi will also describe his idea of destroying comets or asteroids that may destroy our civili ation. He had interesting dialogues with astronaut Bu Aldrin and other famous astronomers and astrophysicists.

3:00 PM - 4:15 PM

Debate Room: "Do You See a Movie for the Names or the Story?"

Session Description: Hollywood's star system was built on the idea that a film's big draw was the recognizable faces on the screen, from Myrna Loy to Elizabeth Taylor. More recently the word "bankable" has been applied to directors as well as to actors. Does that theory hold up in your experience or do you put more weight on the title or the genre or on the critical verdicts? Debate Room is not a heated debate, but a fast-paced moderated discussion where everyone gets to be heard, and the most interesting speaker gets a prize.

Location: Diplomat Ballroom

Speaker:

3:00 PM - 4:15 PM

Neither Here nor There: Children of the First Immigrants from Castro's Cuba

Session Description: As millions of Cubans have settled into Florida, and beyond, in the last years, few remember the pioneers who paved the way for this mass exodus not only establishing the largest Cuban enclave in the world, but enabling immigration from all Latin American countries. They were a distinct group of middle class professionals, entrepreneurs and white and blue collar workers who stopped looking back. Their children, absorbing their parent's nostalgia, were the first to bridge a divided identity that left them embracing and re-ecting their Cubanness and their Americanness at once. Cecilia M. Fernandez, author of Leaving Little Havana: A Memoir of Miami's Cuban Ghetto, discusses the bilingual, bicultural, binational state of limbo for many of those perceived to have had no choice in coming to a foreign land. The CIA's Magician: The Case of the Top Secret Magic Spy Manuals

Session Description: In 1953, the newly formed Central Intelligence Agency created the now infamous research division MK Ultra. That same year, MK Ultra secretly contracted with renowned magician John Mulholland to write two manuals teaching spies how to use magic to deliver information, poison or other drugs to their "audience." The scholarly and urbane Mulholland never revealed this project to his colleagues in the magic community. In 1973, CIA Director Richard Helms ordered all MK Ultra documents destroyed. In 2007, one copy of each of the two magic spy manuals was discovered. In 2010, these manuals were made available to the public. Life Member Neil Caesar, a serious magic nut, was stunned by these revelations. He will share this fascinating confluence of the worlds of magic and espionage. Secrets will be revealed! Be sure your security clearances are in place. The Magicians' Oath will be administered onsite.

Turn Your Life Experience Into Income Through Infopreneurship

Session Description: Mensans have many talents we have honed over the years. Whether they are hobbies we've taught ourselves, skills learned from work or knowledge garnered from education, nearly all of us are experts at something, and we want to share with the world. Do all Mensans realize, though, that you don't have to become a college professor to share that life experience with others, or to profit from it? "Infopreneurship" is a type of business ownership that allows any individual, regardless of credential, age, title or any other demographic, to create informational products like ebooks, online courses, virtual summits and more to establish themselves as an expert, spread their message, teach others and make income. So whether it's knitting, medicine, marketing, watercolor painting, astronomy, board games or something else entirely, you have the power in today's digital world to spread that life experience through infopreneurship.

GeekJobPal: Taking an Idea and Making It Happen

Session Description: In 2014, Annika spoke at the American Mensa Annual Gathering about MProve: an employment initiative for Mensans. As getting employed in an increasingly competitive job market can seem like an incredibly daunting task, Annika proposed MProve to provide Mensans with employment skills in an online course run by Mensans, for Mensans. When it became clear that a nonprofit did not have the necessary resources needed to provide these services, Annika took a different approach to the problem. Starting GeekJobPal and TechJobPal, Annika hopes to provide people with interviewing tips, resume writing advice, soft skills and navigating social cues, information on how to network, and the ability to make the perfect presentation. People learn differently, so JobPal offers one-on-one sessions, practical skills workshops, webinars and more. Come hear the story so far, what the programs look like and what the future for the JobPal family holds.

Leadership Opportunities in Mensa

Session Description: "Should you put Mensa on your resume?" It's one of the most popular questions members ask. The general consensus is: "It depends on the company, but you definitely can if you are talking about your volunteer or leadership experience!" During this session, we will go over the many different roles available at the local and national level, the time commitment and work involved, qualifications needed and expectations of Mensa volunteers. You will find out what it takes to successfully lead a population of Extremely Smart People, as well as learn about the support you can get from the National Office. This session is highly recommended for members new and old who want to give back to the organization through their skills, expertise and enthusiasm.

4:30 PM - 5:45 PM

Legendary American Political Operative Roger Stone

Session Description: An in-depth review of how the 2016 election played out during the primaries and general election. How did this election compare to past contests and how it was dramatically different? Was it the toughest race we have seen in our lifetimes? Key elements of what made the Donald Trump campaign successful and what the post-election radicalism really means to American democracy. Examination of the efforts by the media and Democrats trying to manufacture a "Russian Connection" between Trump and top allies... is this the new McCarthyism? How will President Trump deliver on his promises to secure the border, revamp our economy, improve our armed forces and take care of our veterans? Presentation would conclude explaining why the mainstream media will be extinct or irrelevant in the coming years.

Speaker: Rick Magnus

Tracks: SIG

6:00 PM - 7:15 PM

Muon Monitoring

Session Description: The current Standard Model of fundamental Particles has been able to describe in a single mathematical pattern all visible matter (4 percent of the mass of the universe). It thus states that this matter consists of six electron-like leptons and six quarks making known nuclei and atoms and many unstable particles created in high-energy particle collisions. The remaining 96 percent of the Universe is made from a still mysterious set of "dark matter" and "dark energy." The muon, an unstable lepton particle, is effectively a massy version of the electron. Muons are present in the secondary cosmic ray showers in the atmosphere, and are one of the few particles to reach in large numbers a sea level environment. They decay into three other leptons: an electron and two neutrinos, which in our experiment escape undetected. The speaker will explain her experiment, which registers the arrival and stopping of a muon as a voltage pulse, and how it could be used in applications for modern-day society.

6:00 PM - 7:15 PM

Quantum 101: An Introduction to Quantum Mechanics and Quantum Computers

Session Description: Strange things happen in the quantum world. Information moves across the universe instantly. Particles travel backward in time to change experimental results. Electrons jump through walls whenever they feel like it. And today, scientists are taking this weird science and building weird computers that will someday process a trillion bits of information in just a few seconds. In the future, our government will be able to use quantum computers to decrypt all data on the Internet. In this session we will look at quantum computers and the quantum mechanics needed to make them work. The talk is 50 percent history lesson, 50 percent science lecture and 100 percent fun. It's appropriate for all ages, and no scientific knowledge skill is required.

Location: Regency Ballroom 3

6:00 PM - 7:15 PM

The First Astronomers: The Paleolithic Synthesis of Visual Art, Myth and Natural Science

Session Description: France's Lascaux Cave contains many of the most spectacular and well-known works of Paleolithic art. These Cro-Magnon paintings, more than 17,000 years old, include the most intriguing and enigmatic of all cave art – the Shaft Scene. These fragile paintings at the bottom of a well in the depths of the cave seem to have an implicit narrative, but scholars disagree as to its meaning. Is it allegorical or literal? Does it represent a masked shaman in trance, surrounded by dream figures? Or perhaps an unfortunate hunter dead at the feet of his mortally wounded prey? Chris Kilgore's revolutionary interpretation answers these questions definitively, elucidating the images

as the earliest evidence yet found of astronomical knowledge. Kilgore will demonstrate that the insights captured in these fragile paintings have survived, encoded as myth. Preserved in a sophisticated pre-literate mnemonic system, these astronomical insights spread throughout the prehistoric world and survive to this day.

Location: Atlantic Ballroom 3

Speaker: Christopher Kilgore

Hitler, Satan and Me: A Love Story

Session Description: This presentation is an account of evil at work. Setting the stage with a look at Hitler's indoctrination of German boys, Anderson takes us through 25 years of marriage to a former Hitler Youth and the subtle aftermath of their divorce. She lays open the increasing combat with demonic forces. Pranks, physical injuries and attempts to kill her target her as she remains determined to shine light on this lurking, invisible evil force. With anecdotes from her Fringe Festival play of the same name and her memoir, "Standing in Deep Water: Overcoming the Infectious Legacy of the Hitler Youth," she takes us through her dark valley to ultimate victory. Those who have a father or grandfather who belonged to Hitler Youth will learn about their own heritage and its consequences. Those who believe in the devil will discover how to recognize and counter his subtle slithering in their lives.

Jesus' Insights vs. Christianity's Fallacy

Session Description: Jesus spoke of a Kingdom within and illustrated this state of mind in his parables. But the primitive, superstitious mindset of the first century turned his insights into blatant myth and fantasy with miracles and phony claims of divine impregnation and deified status. Tom shows just what Jesus meant as he illustrated the functional Oneness of Consciousness with reality in allegorical terms—the only possibility of communicating advanced concepts to the primitive peasant which was his audience. Tom will provide background on Jesus' contemporary setting—first century Judea—and the common mindset of his peers, awash in superstition and powerlessness. And he'll explain, as detailed in his third book, The Illusion of "Truth", how Christianity grew out of myth and lore about an exaggerated, fantasized Jesus while ignoring the real teachings of the actual man, Yeshua.

Two Years in the Red-light District of Tijuana — A Photo Ethnography

Session Description: The red-light district of Tijuana, Mexico, has an enforced no-photos policy but photographer Lily J. Noonan has spent the past two years there openly shooting daily life. Her photos document many rarely captured moments in the Zona Norte, including the homes of prostitutes, deportees, the drug culture, in-room sessions and street life. For each person she photographs, she learns their story and will share their lives with the audience. Due to the graphic nature of some photographs, this presentation is for mature audiences.

Location: Agency Ballroom 1

Speaker: Lily J. Noonan

9:00 PM - 10:15 PM

Video 101

Session Description: In today's world we are surrounded by video and have to make decisions about how to deal with it. How do I view TV Broadcast, satellite, cable or just use the web Do I use DVD, Blu-ray or video files And what are all those formats What do 20p, 10 0i and 10 0p mean Why is this picture the wrong size Why can't I buy a HiDef TV anymore what's this HD instead I shot great video, but when I post it on the web it looks like crap. What happened Let a professional video engineer explain it. There is something for everyone: Goths (blacker than black), criminals (illegal colors), psychics (prediction) and SciFi fans (backward through time).

Yoga "all levels" Vinyasa class with a spiritual intention. Bring a mat/towel. Fitness attire.

Session Description: Ken Heptig, author of "Yoga Secrets", will lead you through a series of yoga poses. He will give modifications for less or more to keep everyone challenged. Bring a mat or large towel and your sense of humor. Fitness attire recommended. This is not an introduction to yoga class. Ken believes the spiritual intentions are the most valuable part of yoga and can help you find a better life. Yoga studios throughout the United States use his book Yoga Secrets: 52 Life-Changing Secrets. Ken refined the intentions in his book while teaching thousands of yoga classes. He improved the intentions for simplicity and clarity until his students could absorb the intentions while practicing different levels of yoga. The book is suitable for anyone with or without a physical practice of yoga. Use the intentions on your own or add them to a group activity like sporting events, classrooms, and yoga classes. <http://goalyoga.com>

9:00 AM - 10:15 AM

Banking on Brainpower in the 21st Century

Session Description: The human brain is the last biological frontier. We have learned much about the human brain in the last 20 years, but the answers can't come fast enough. Brain diseases affect an estimated 50 million Americans. Starting at age 5, the risk of dementia doubles every five years. By age 55, between 25 and 50 percent of people show signs of Alzheimer's disease. The CDC estimates that one in 100 boys are born today with a diagnosis of autism.

9:00 AM - 10:15 AM

Nursing Home Horrors: A Reversible Epidemic – Shocking Stories and Powerful Solutions

Session Description: Nursing home abuse is a massive problem nationally, and it's getting worse as baby boomers are entering a seriously flawed long-term care infrastructure. CNN chronicled the national epidemic of sexual assault, a congressional study revealed 1 in 3 nursing homes were cited for abuse, and advocate/attorney Donald J. Fann tells us the vast majority of reports are ignored by officials as the imaginings of dementia patients. Donald shares his formula and actions for aggressive repair, plus the legal (and DIY) tools for stopping the horrors, using illustrative stories from today's headlines. Learn about heroic whistleblowers, hidden cameras, elders fighting back and how victims' families and advocates shine a spotlight on reprehensible conduct to stop the uncaring, the malicious and the head-in-the-sand company leaders that employ them while ignoring their conduct in profit's name. Shocking and useful for anyone who is coming of nursing home age or knows an elder in a long-term care facility.

Debate Room: "Globalization: Threat or Opportunity to the U.S.?"

Session Description: Globalization means U.S. products can be sold anywhere (assuming we produce competitively), but also that your I.T. job could migrate to India in a second. In some quarters the 2016 election was cast as a struggle between the internationalist vision and American exceptionalism. Which strategy will improve the lives of Americans across the country? Debate Room is not a heated debate, but a fast-paced moderated discussion where everyone gets to be heard, and the most interesting speaker gets a prize.

Location: Diplomat Ballroom 5

Speaker:

Tracks: Debate

10:30 AM - 11:45 AM

Escaping the Infinite Loop in Your Relationship

Session Description: Due to life experiences, you may have developed patterns of relating to others that make relationships difficult and elicit the very responses you fear. In your relationship, when each person's response to disconnection inadvertently alarms the other and increases the distance between you, a painful vicious circle ensues. This emotional disconnection can also contribute to recurring arguments about seemingly minor, unrelated issues. Underlying these disagreements are vulnerable hidden questions: Do I matter to you? Can I reach you? Can I count on you if I need you? Using concepts from emotionally focused therapy, you can step out of the negative cycle in which you are stuck, make sense of the expectations, emotions and unmet needs that are driving it and then express your needs and emotions in a way that feels safe to the other person. Once you both feel safely connected, it is easier to resolve your other issues.

10:30 AM - 11:45 AM

Gen Y Leadership Session

Session Description: The GenY SIG is for Mensa members born on or between the years of 1977 - 1997. Are you the GenY Coordinator for your Local Group? Do you want to be? Our goal is to have more GenY representation in local groups around the country and the world. Come to the planning session and learn about volunteer opportunities. Share your ideas for making GenY SIG an active force for good and fun in Mensa.

Location: Diplomat Ballroom

Speaker: Henri Buccine-Schraeder

Tracks: SIG

10:30 AM - 11:45 AM**Harnessing Ocean Current Power with the Deep Ocean Current Generator**

Session Description: The technology associated with ocean current power generation is presently much less developed than either tidal or wave energy. Because the most concentrated sources of ocean current energy are typically found 100 meters below the ocean surface and in waters with bottom depths of 1,000 meters or more, the technology required to convert ocean currents' hydrokinetic energy into electricity is inherently more complex and requires innovative and sophisticated solutions. Patrick Lahey is co-founder and president of Triton Energy Systems, LLC. Triton, founded in 2012 to design, engineer, fabricate, promote and advance the Deep Ocean Current Generator, the key component of a system developed to generate electric power from deep ocean currents. Lahey will discuss the development of the DOCG and its planned application to delivering energy to on-shore consumers.

10:30 AM - 11:45 AM**How Can We "Give Back" as Mensans?**

Session Description: How can we give back? As Mensans, it is understandable that most of us look at the world, and the problems it presents, through a somewhat different set of lenses. It is recognized that, with our high IQ, we have been blessed with acute reasoning and problem-solving abilities. In this ever-changing world in which we live, where there are both for- and not-for profits that have hit a brick wall and need someone to turn to, could we offer discretionary help? Like the knowledge and expertise to encourage prosperity and stewardship of existing resources within organizations that have the greatest need and whose mission is to provide a positive impact to the well being of society? And, in doing so, could we also become a catalyst for open discussion and encouragement, a light on a hilltop that, through our actions, sends ripples to inspire other organizations to initiate conversations on how they can give back?

The Step: Behind the Scenes of the Brilliant Apollo Launch Team That Made Landing a Man on the Moon Possible

Session Description: Fasten your seat belts and journey back to the 1960s for a front-row seat as Lemasters recollects in amazing detail the brilliant engineers, analysts, technicians and administrative staff that made up the IBM launch support team at Cape Kennedy. The Apollo team faced challenges and temptations like anyone else in the 1960s: divorce, affairs, deaths, three shifts of work but they knew how to have fun along the way. A chorus was formed humorous skits brought laughs to facility dinners and tennis bets of a lifetime played out on the Apollo stage. The story captures the human side of the team amid their dedication and focus. If you are a space pioneer, a space fan, or a woman who wants to move through the professional net, this presentation will mesmerize you. What was it like to be a part of these history-making events of launching our astronauts to the moon hear it from someone who experienced it all.

Aguadilla, Puerto Rico 2013: An Unknown Flying Object Detected by Homeland Security

Session Description: On April 25, 2013, at about 9:20 p.m. local time, an unknown object at low altitude flew directly across the Rafael Hernandez airport runway at Aguadilla, Puerto Rico, causing a delayed departure of a commercial aircraft. There was no squawking transponder signal to alert the aircraft tower, nor was there any communication with the tower to prevent a dangerous situation with departing and arriving aircraft. Fortunately an airborne U.S. Customs and Border Protection aircraft captured the object on infrared video. This presentation is a summary of an analytical evaluation of that video as well as witness statements and radar data of the incident. For more information see explorescu.org or contact Robert at robertmaxpowell@gmail.com.

12:00 PM - 1:15 PM

How I Came to Write "Shall Not Perish From the Earth"

Session Description: Alternate history is a genre of fiction in which one or more historical events occur differently, causing the world as we knew it to evolve differently. It can be a rigorous exploration of how the world came to be. Randal Strock wrote the short story "Shall Not Perish From the Earth" for the alternate history anthology "Altered States of the Union." For the story, he made a seemingly minor change to the Constitution at the founding of the United States of America and then explored what would happen during Abraham Lincoln's administration, three-quarters of a century later. In this talk, he'll delve further into the facts and changes of the story, as well as place it within the wider realm of alternate history.

Location: Atlantic Ballroom 3

Speaker: Randal Strock

Location: Room 21

Speaker: Jon Gruebele

Tracks: M&G

12:00 PM - 1:15 PM**Spirituality Explained by a Materialistic Three Agent Model of Consciousness**

Session Description: A new "three-agent model" of consciousness is used to explain spirituality and spiritually enlightened states. The three separate-but-interconnected proposed agents are the "Thinker," "Doer" and "Experiencer." The Thinker is the conscious agent in the normal modern human. In non-human animals, the Doer is the conscious agent. Spirituality arose during the transition from being a conscious Doer to being a conscious Thinker. The very useful Thinker allowed humans to dominate the world by developing science, technology and modern civilization. However, the Thinker also causes suffering for individual modern humans since it amplifies and prolongs negative emotions such as resentments and fears. Spirituality and spiritual practices, such as meditation and prayer can decrease identification with the Thinker and alleviate some of that suffering. Finally, spiritually enlightened states occur when there is no identification with the Thinker and, instead, life is lived as an Experiencer only.

Location: Atlantic Ballroom 2

Speaker: Frank Heile Ph.D.

12:00 PM - 1:15 PM**The Evitable Connection Between Intelligence and Expertise**

Session Description: Insight comes from repeated application of experience in similar circumstances. The opportunity to accomplish that comes from focus, all of which yields pattern matching, which is the essence of intelligence. But turning that insight and intelligence into an entrepreneurial venture requires something very different, and there is no inevitable connection between insight and making money from it. Let's talk about how that happens. David has written five best-selling books and speaks widely around the world. This is based in part on my fifth book, arriving in late April, called The Business of Expertise: How Entrepreneurial Experts Convert Insight to Impact Profit, RockBench Publishing Corp, Nashville. Foreword by Dan Pink.

Location: Atlantic Ballroom 1

Speaker: David Baker

Tracks: Speaker

12:00 PM - 1:15 PM**Whistleblowers — Big Cash Rewards for Low Profile People Exposing Corporate Misconduct and Health Care Cheats**

Session Description: Corporate misconduct is rampant — banks cheat customers, defense contractors double or triple bill the U.S., major pharma companies knowingly sell subpar or defective drugs, and health care providers from hospitals to ambulance companies cheat Medicare while patients suffer the consequences and U.S. taxpayers foot the bill for fraud. Author Brian Mahany is an expert at helping people expose these cheats, stop the fraud and earn large cash rewards provided for in several little-known U.S. laws. Learn how whistleblower heroes, often employees, stand up to mega banks, big pharma, evil defense contractors, and health care providers gone rogue. Shocking stories from the headlines: Brian's \$16 billion win vs. Bank of America for their role in the mortgage crisis, drugs we all buy at the pharmacy adulterated at overseas factories yet sold anyway in the name of profit, a doc telling healthy patients they have cancer to sell chemo, etc. Intriguing insights from U.S. whistleblower expert Mahany.

1:30 PM - 2:45 PM

Seeing the Marine Environment through Microbial and Genomics Lenses

Session Description: DNA comprises the genetic code and common thread of all life on the planet. Our NSU molecular genomics laboratory focuses on the genomic sequences from marine organisms and essential microbes in diverse projects. For example, we are trying to better understand food webs and microbial distributions in the deep ocean through the DEEPEND project after the Deewater Horizon oil spill (see deependconsortium.org) to "symbiotic" interactions between host and beneficial microbes living together. For example, see bioluminescent symbionts of anglerfish at ocean.si.edu/ocean-news/meet-tiny-bacteria-give-anglerfishes-their-spooky-glow, to supporting the Global Invertebrate Genomics Alliance or GIGA (see GIGA-cos.org), which helps study the genomes and evolutionary origins of diverse marine animals (such as invertebrate sponges and corals) that help make up the tree of life.

Vera Rubin's Presentation to the Mensa Colloquium: "Revolution in Cosmology"

Session Description: Astronomer Vera Rubin passed away in 2016. A decade prior, 300 of us had the pleasure of meeting her and hearing her "The Universe of Galaxies" presentation at our Colloquium in Albany, N.Y. That presentation was videotaped and will be shown at this presentation. Here is her abstract from that presentation: "Every civilization, from the time of the earliest humans to the present day, tells stories about the universe. What is known in each epoch reflects mostly the available technology. Today astronomers know that bright galaxies and clusters of galaxies populate the universe, but make up less than 10% of its matter. The remaining matter is dark, and is inferred by its gravitational effect on the bright matter that we study. Following a brief discussion of the early history, I will tell the story of the bright universe that we know, and the dark universe that is obscure."

You Be the Investigator

Session Description: Criminal fraud investigators (the real ones, not ones on TV) seldom win in an hour or even what constitutes a television season. Sure, smoking guns and a dozen eye witnesses can happen, but it's a rarity. In this session, Cookie intends to take full advantage of the tens of thousands of I points in the audience as she presents one of her real death case investigations as of this writing unsolved "beyond a reasonable doubt" and then opens the mic to &As and full audience participation/suggestions. Please, no young children. Mature teens accompanied by a parent allowed, but be advised that discussion content can be graphic/disturbing. Caveat: Names and locations will be changed to protect the victims and the suspects.

3:00 PM - 4:30 PM

Dancing Like They Did on the Silver Screen

Session Description: Learn how to glide across the floor with grace and style. Find out how to do those romantic turns, and feel comfortable and look great when you do it. That's right. Learn the secrets of dancers like Fred Astaire, Debbie Reynolds, Gene Kelly and Rosemary Clooney, to name a few. No, you won't look quite like them at the end of the class, but you'll understand and be able to do the basic techniques that made them look wonderful and will help you look great at the dance. Gain the confidence. Lose the fear. No partners required, just a desire to have fun and meet other Mensans.

Location: Great Hall 1 & 2

Speaker: Don Jacobs

3:00 PM - 4:15 PM**Discovery and Protection of Deep-water Coral Reefs: Vulnerable Deep and Mesophotic Coral/Sponge Ecosystems.**

Session Description: This presentation covers the discovery and protection of deep-sea and mesophotic coral reefs in the northwest Atlantic Ocean and the Gulf of Mexico. It covers the processes for their discovery, including a summary of the deep-water platforms, the type of data collected and the remarkable coral and sponge species that make up these vulnerable habitats, including some that have been shown to fight cancers. Also covered: how we use the extensive research to protect the deep-coral habitats by creating and expanding Marine Protected Areas (MPA) like the Oculina Habitat Area of Particular Concern (HAPC), the first deep-sea coral reef MPA in the world and the Deep-Coral HAPC, the largest deep-water coral reef MPA covering about 2 ,000 miles just off the coast of Florida. Also possibly covered: our month-long cruise to survey with an ROV the deepwater reefs of Cuba, scheduled for May 201 .

3:00 PM - 4:15 PM**Five and a Half Years in the Hanoi Hilton: Triumph of the Human Spirit!**

Session Description: Retired Navy pilot Dave Carey tells the story of how he and his fellow prisoners of war survived more than five years in the prisons of North Vietnam. He analyzes the strengths and strategies that made their survival possible and shows how these forms of faith in self, others, country and God can carry everyone through personal and business crises. Capt. Carey brings a positive and up-beat message about being your best doing your best, using the power we each have. He relates in a down-to-earth yet profound way. Here are keystones to a meaningful life. Stressing that each of us has the opportunity and the power to make every day a little better, in spite of not because of the events in our lives. Success not as a result of overcoming adversity, but rather using it creatively. Together, we'll find humor in emotional chaos, the power of humor in our lives and keeping the faith in yourself, others, your country and in God.

Location: Regency Ballroom 3

Penguins, Not Polar Bears: Travel to the End of the World

Session Description: Join Marcia and Steve on their expedition to Antarctica, South Georgia and the Falkland Islands. There are, of course, no polar bears in the Antarctic. But there are hundreds of thousands of penguins and albatrosses, as well as petrels and other birds, seals, whales, ice-covered mountains and sculpted icebergs. Marcia will take you on visits to rookeries and an old whaling station, snow covered trails and the notorious Drake Passage. You'll learn what to expect on a trip to the frozen continent, what to pack and the difference between an expedition and a cruise. Best of all, Marcia will share stunning photos of all of these experiences.

3:00 PM - 4:15 PM

Who is Al Capone?

Session Description: "I am a Capone." So begins Deirdre Marie Capone's recently published account of her life, family and relationship with one of America's most notorious gangsters. In the past, this admission of identity did not come easy to Deirdre, who was discriminated against simply because of her last name. Now, she shares little-known stories about the family who raised her and kept Chicago stocked with liquor during the Prohibition. Although Uncle Al passed away in 1947, his legacy—both good and bad—remains with Deirdre. The course of her own life has been affected by the Capone family name, including losing her father to suicide at the age of 10. Over time, the Capone name has become ensconced by myth and legend, but Deirdre alone knows truly intimate details. As the only surviving Capone member who has first hand accounts of interactions with her notorious family members, she seeks to clear up rumors and allegations that have accumulated over the past 60 years.

Deep-sea Corals and Methane Seep Communities of Atlantic Submarine Canyons

Session Description: Submarine canyons are massive geological features that funnel currents and nutrients between the continental shelf and abyssal plane. Deep-sea canyons are dark, turbid and cold, with strong currents that scour sediments to expose the underlying rocks, which are colonized by extensive communities of deep sea corals and their associates. Atlantic Deepwater Canyons project was a multidisciplinary study of two canyons in the U.S. Mid-Atlantic region. This presentation will show the results of exploration and research in these massive and remarkable features, including the first descriptions of methane seep communities in the region. Human impacts on these vulnerable natural resources will also be discussed, together with options for their management.

Non-dualism: Fact or Fiction

Session Description: There seems to be one common core that lies at the heart of most of the world's great religions and spiritual philosophies. Often called the "perennial truth," this ancient cross-cultural belief holds that all perceived separation is illusory and that, instead, everything that you're experiencing (including the belief in a separated "you"), is, quintessentially, really the same one, unbroken, seamless and all-pervasive Consciousness. Obviously, the implications of what non-dualism is pointing at are far beyond staggering. After all, how can you live in a dream world where you're always questioning the very nature of reality, itself? Who really are you, anyway? So, if you're ready to venture down this cosmic rabbit hole, then come and discover what astounding Truth lies within your own heart-of-hearts.

The Big Bang Theory: There's Something Funny About Scientists

Session Description: Something astonishing keeps cropping up on TV's The Big Bang Theory—namely, actual science. The hugely popular sitcom, an extended riff on the "gifted and geeky" stereotype, is peppered with real-life scientific references. Characters chat about cutting-edge and classical experiments; historic formulae adorn background whiteboards; and famous science educators guest-star as themselves. So when did CBS become BS? Science humorist Dave Coverly argues that The Big Bang Theory plays a vital, if non-traditional, role in science education. Its ongoing celebration of scientific inquiry lays the groundwork for viewer conversations about science, technology, math, even philosophy. And that's a gift to every science geek... or science denier.

The Science of Racial Inequality and a Dream for Racial Equality

Session Description: One young Mensan makes the case for why liberals, not just racists, should accept the taboo science of genetically-rooted psychological racial differences, including intelligence. He wants to bust the white nationalist monopoly on a field of biology that is accurate, even if it should be false, as the science can be used for both liberal ends and anti-liberal ends, but denouncing it or ignoring it can only be anti-liberal. It is only by accepting the science that racial equality can ever be achieved. The first hour will be a presentation of the scientific evidence, and the second hour will be a discussion of the related politics. He wishes to provoke thought, not umbrage, so please leave your tomatoes in Hospitality.

7:30 PM - 8:45 PM**Equity Crowdfunding — Exciting New Funding Programs Recently Legalized**

Session Description: After the 1929 stock market crash, the Congress passed the Securities and Exchange Act of 1933 and made it all but impossible for small companies to raise money by public offering of securities. In 2016 that changed, and new law allows limited sale of securities to the public up to \$1 million per year, domestically. Also, most states have new legislation which allows public offerings which do not cross state lines. Companies can raise up to \$1 Million per year in an SEC-licensed Reg-CF public offering of securities only via licensed crowdfunding portals. This is not Kickstarter. You can keep 100% control by selling non-voting stock or bonds. By contrast, angel investors and VCs typically demand a large equity stake and even controlling interest in the company. The SEC rules allow for any type of security to be sold, like bonds, debt instruments, stocks, warrants, debentures or anything else. One can even invent new securities, like revenue sharing notes.

The Mystic Experience – Intrinsic Meaning and Indications as to the Nature of Human Consciousness

Session Description: While in San Diego to speak at the AG in 2016, I presented to the local group of the Institute of Noetic Sciences a tribute to Edgar Mitchell — the sixth astronaut to walk on the moon and founder of IONS. I looked at the Mystic Experience as Mitchell had had while in space returning from the moon and as I experienced as a young man hitch-hiking around Europe. That same perspective should be of great interest to Ms. I'll first show the 20-minute video I produced on the topic [youtube.com/watch](https://www.youtube.com/watch)

v AqQY tomn0 , and then continue to delve into implications of the Mystic Experience as indications of the nature of human consciousness. This involves recognizing how beliefs and accepted definitions distort perception. And it will illustrate the functional oneness of self with experienced reality, an awareness of which is masked by common notions — religious, scientific and traditional luck, fate, etc. — as to causality.

The Role of Pardons and Clemency, Sentence Commutation in Today's Criminal Justice System

Session Description: More than 6 million Americans have a criminal record and thousands are incarcerated each year with sentences disproportionate to the criminal behavior. For individuals with criminal records problems bleed from criminal into civil and have economic and social ripple effects that last beyond any sentence. A criminal record affects employment, housing, licensing and immigration — areas that impact not only the person convicted of the crime but also their families. Even short periods of incarceration can have a lifelong impact on individuals and their families. They are saddled with an economic death sentence long after the sentence is completed. Pardons and commutation of sentences play an important role in the criminal justice system by enabling many individuals to remove this economic death sentence and go on to live productive, crime free lives. Presentation will focus on how and why these programs are granted.

10:30 PM - 11:59 PM

Double Deck Cancellation Hearts Tournament — Final Round

Session Description: Table winners from Wednesday's First Round will compete in this final round.

Location: Great Hall 6

Speaker: Stan Ward

Tracks: Tournament

10:30 PM - 11:45 PM

Debate Room: "'Public Land' or 'Government Land'?"

Session Description: Are the U.S. National Parks the public's land or the government's land? By what right does the government assert control over park and monument acreage, and by what right do citizens demand access to that same land for private purposes? Who is overreaching? Debate Room is not a heated debate, but a fast-paced moderated discussion where everyone gets to be heard, and the most interesting speaker gets a prize.

9:00 AM - 10:15 AM

Becoming a Cultural Genius

Session Description: The world in which we live is getting smaller. As we come together, Mensans can be on the cutting edge of bringing people together, rather than tearing each other apart. The key to this can be cultural awareness. If we can find common ground using our intelligence and our ability to make connections, we can bring the togetherness this world desperately lacks. Learn and discuss how to use religion, shared values, food, family and other cultural factors to find that common ground. You have a lot in common with others all over the world. We have to find out how to talk to one another but, more importantly, how to really listen. I think there are tried and true methods we all can work on to get to the things that bring us together. You will be the hit of every party and an agent for positive change.

Chasing the Enterprise: How Star Trek's Vision of a Humanistic Future Can Be Achieved

Session Description: Gene Roddenberry's vision of an ideal humanistic future was played out in Star Trek, and that vision is still endearing 50 years later. But while some find that vision unrealistic and unachievable, the fact is that there are hints of humankind's future potential in our Paleolithic past.

10:30 AM - 11:45 AM

Beale's Cipher: Code or Humanitarian Project?

Session Description: Beale's Cipher was a cipher describing treasures brought back from the west by Thomas Jefferson Beale in the early 1800s. It is famous in cryptographic circles as an example of a book cipher, consisting of three pages with numbers. The second page was deciphered, after great effort, with the Declaration of Independence. But, was it really a description of an early expedition to the west, or a scam

Developing the Moon with a Lunar Space Elevator

Session Description: A Lunar Space Elevator [LSE] can be built today from existing commercial polymers manufactured, launched and deployed for less than \$2B. A prototype weighing 48 tons with 100-kg payload can be launched by three Falcon-Heavy's, and will pay for itself in 50 sample return cycles. It reduces the cost of soft landing on the moon at least threefold and sample return at least ninefold. Many benefits would arise. A near side LSE can mine valuable resources and ship to market in cislunar space, low Earth orbit and Earth's surface. A far-side LSE can support a super sensitive radio astronomy facility.

10:30 AM - 11:45 AM

M-LDS SIG Meet-and-Greet

Session Description: Worship service conducted by members of The Church of Jesus Christ of Latter-day Saints. One Sunday each month, in connection with optional fasting and prayer on behalf of the needy, LDS members sing hymns, partake of the sacrament (bread and water) if appropriate and are invited to share their testimonies of the gospel of Jesus Christ, as the Spirit moves. All are welcome. Reverence requested.

Location: Room 216

Speaker: Jessica Mathews

Sunday

10:30 AM - 11:45 AM

The Scientific Search for Life in the Universe

Session Description: This lecture explores the current state of the scientific search for extraterrestrial life. It includes background so the audience will understand why and how serious scientists attack this important topic. I will discuss life on Earth, the search for radio waves from extraterrestrial civilizations and the problem of UFOs. All topics are discussed in a scientific context including the latest information and observations.
