About

COAT LENGTH
Short

HOUSE-TRAINED
Yes

HEALTH
Spayed / neutered, special needs. FIV positive; Jessie has only one eye.

Meet Jessie

Jessie was rescued by our team from a farm where he impressed everyone he met with his princely attitude despite his rustic surroundings. He is now looking for that perfect warm lap to cuddle up on after sleeping on hay bales!

With his beautiful black coat and outgoing attitude, he deserves to be treated like a king in a new home.

Jessie has just one eye and also has tested positive for feline immunodeficiency (FIV). He doesn't let his missing eye stop him from being alert to every movement, so don't let FIV stop you from worshipping him as the new royalty in your home!

Research shows that FIV+ pets cats can live long and healthy lives when they have great nutrition and veterinary checkups as needed.

Please ask us for more information about giving an FIV+ cat a home.

HEALTH
Spayed / neutered, special needs. FIV positive; Jessie has only one eye.

Meet Jessie

Jessie came from a barn where no one fed the cats. He lost an eye, and had no one to care for him until we brought him here. Sadly he has tested positive for FIV. This puts him at an additional disadvantage for adoption in the shelter.

He is such a handsome cat and deserves more. Won't you be Jessie's saving grace?

Meet BOB

Hi I'm Bob, the 4-year-old cat! I'm sweet, smart and great with people and other animals. I've got it all! There's just one thing I'm missing: a forever home and one toe. That's right, I lost it in a thumb war match. Seriously! But you should have seen the other guy! He's all right--we're still friends. Pretty much I'm just one finger short of perfection. Let's shake hands at the Pixie Project. I'm neutered and vaccinated.

Rex

Chihuahua & Dachshund Mix · Sugar Grove, IL

Senior · Male · Small · Black , Yellow / Tan / Blond / Fawn

Meet Rex

Greetings good people of the Midwest! My name is Rex and I'm a 8-years old, Chihuahua/Doxie mix (best guess) boy and I weigh a hefty 15lbs!

So, I'm sure you've noticed something about me, and I'm not talking about my smoldering good looks. Ok I'll let the cat out of the bag....I've got no front legs! That's right folks, I was born with no front legs, but that doesn't stop me from being your conventional "normal" dog. I love big and get around like a kangaroo sometimes too. To me, I'm completely normal and while we are at it, what does it mean to be normal anyways?! I see it as just a figure of speech! I get along swell with other dogs, cats and I bond quickly to "my" person but I probably shouldn't live with kiddos younger than 10, since I don't want any accidents. I also want all the attention you have to give! I'm so ready to meet you and make you look 100x better with me on your arm!
