

MOSQUITO MAYHEM

AMERICAN
HEARTWORM
SOCIETY™
EST. 1974

heartwormsociety.org

1 **CLIMATE CHANGE** may be expanding the mosquito/heartworm "season" in colder climes, making "safe" months impossible to predict.

5 Heartworms are **ON THE MOVE** and are regularly diagnosed in desert locales.

5 Facts about Mosquitoes, Heartworms & Your Pet

2 A hungry infected mosquito can drink 3X her weight in blood—and transmit heartworms **WITH EVERY BITE.**

3 At least **80 SPECIES OF MOSQUITOES** transmit heartworms worldwide.

4 Different mosquito species feed at different times of day, so there's **NO SAFE TIME** for pets to venture outside.

PROTECT YOUR PET 12 MONTHS A YEAR. TEST YOUR PET EVERY 12 MONTHS.
