

Microsoft Intelligent Data Platform

Microsoft Intelligent Data Platform is a comprehensive data and AI platform, unifying databases, analytics and governance. Empower faster decision making, improve productivity with AI, and govern all your data – wherever it resides.

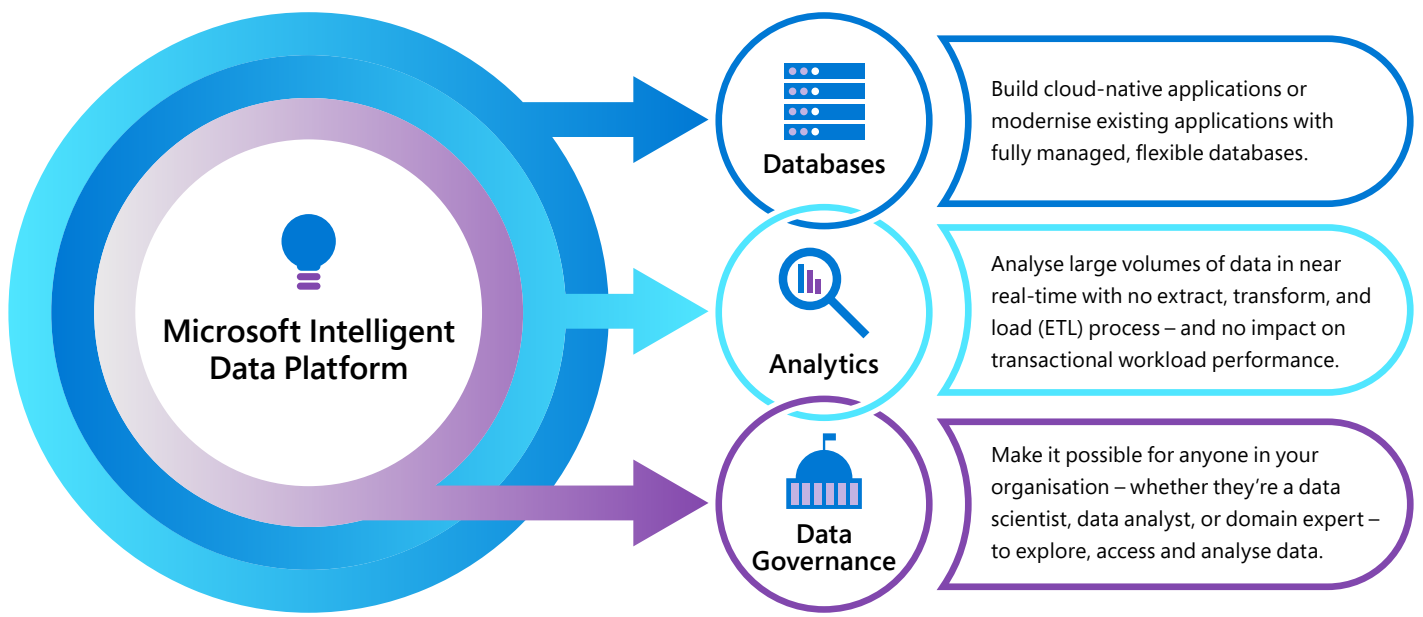

Accelerate innovation

Achieve agility

Build on a trusted platform

Discover a seamless data solution

Move beyond the cost of point solutions and unlock the value of your data with a unified platform for databases, analytics and data governance. [Learn about Microsoft Intelligent Data Platform](#)

- **Azure databases:** Choose among relational, NoSQL and in-memory databases that span proprietary and open-source engines. Fully managed databases automate configuring and managing availability, recovery, backups and data replication across regions, saving you time and money. [Learn about data on Azure](#)
- **Cloud-scale analytics:** Bring all your data together at any scale to deliver impactful insights to end users. Build on that foundation with best-in-class machine learning tools for predictive insights using advanced analytics. Gain real-time insights from live streaming events and IoT data. [Learn about analytics on Azure](#)
- **Unified data governance:** Manage and govern your on-premises, multicloud and Software-as-a-Service data with Microsoft Purview. Easily create a holistic map of your data landscape with automated data discovery, sensitive data classification and end-to-end lineage. [Learn about Microsoft Purview](#)
