1. OUR STORY

2. OUR PLATFORM

3. OUR VISION

4. JOIN THIS WORK

For millennia, humanity has gathered around sound to access the sacred.

Sacred practices of sound connect all religious, spiritual, and cultural traditions. They come in every form imaginable – music, mantra, poetry, prayer, vibration, dance – and so much more.

Today, as faith identities shift and isolation grows, more people than ever are seeking what these sounds have always offered: connection, belonging, and transformation.

These practices are alive and vibrant. They are also difficult to find.

Think of when you first discovered your practice.

Where did you find resources to inform your practice? How did you find others to practice with? For many, the answer is a complicated web of internet searches, word of mouth connections, and lucky encounters.

It's not just hard to *find* practices.

Those passionate about *sharing* their practice juggle a circus of logistics to do so: planning and promoting events, finding host locations, making travel arrangements, managing RSVP's and payments, and raising funds.

There is a better way.

Social platforms have revolutionized how we build community — and popular apps have brought practices like prayer and meditation to millions.

There has never been a platform dedicated to sacred sound communities.

Sacred Sound Circle answers this call.

the Sacred Sound Circle

platform

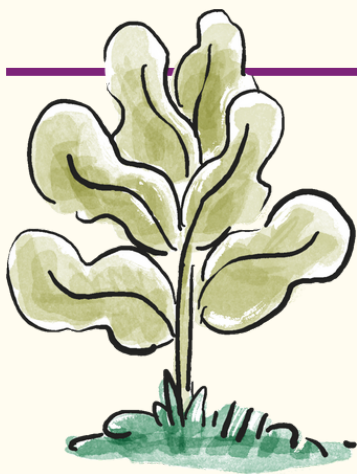

We're building
the world's first
social platform
for sacred
sound.

Where practitioners will find resources, events,
and communities at their fingertips.

Where facilitators will find the tools they need to
share their gifts, build communities, and sustain
their livelihoods.

And where diverse traditions will meet, learn,
and uplift one another – a living network of
interfaith connection and care.

**Development of this platform
is just beginning.**

**You can help bring it to life.
Read on to find out how.**

Our platform will feature four sections.

Discover

Explore posts about sacred sound practices from leaders, practitioners, scholars, and scientists. Learn about diverse traditions, find practice aids and resources to deepen your practice, and share reflections & media.

Connect

Events: Find events or share your own, and manage RSVPs, payments, and notifications.
Chat Groups: Join or create chat groups. Meet others, discuss shared interests, and plan events.
Support Network: Find or post about support, such as venues, accommodations, musicians, sound engineers, and beyond.

Practice in Action

Find or share resources and trainings that inspire greater impact. Learn how to start, build, and nurture community. Develop as a leader and facilitator. Become an interfaith bridge builder. Engage your community in service, justice, and peace work.

Community Exchange

Shop or share creations, fundraisers, and offerings (like sound experiences or lessons). Nurture the financial flourishing of facilitators and organizations, helping them share sacred sound more widely.

How will it work?

Community members can create profile pages, follow accounts, join groups, and message others.

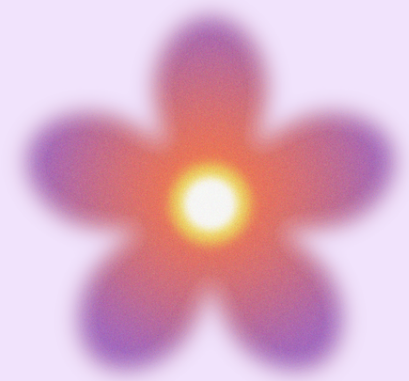

Every community member will be able to post in each of the four sections listed above.

Users can search for posts, or view them in their “Circle Feed,” personalized based on who they follow, what their interests are, and where they are located.

Our team will curate helpful posts into collections for easy access, as well as publish original content.

Our Vision

extends far beyond our social platform:

Expand sacred sound offerings.

Equip communities to share their events more widely. Inspire, train, & support new facilitators and founders. Build a sacred economy of mutual aid to sustain community flourishing.

Nurture the benefits of spiritual practice.

Make practice resources and communities easily accessible to all, fostering deep, meaningful, and consistent practice. Empower sacred communities to engage in service, justice, and peace work.

Build an interfaith, intercultural world.

Educate about the diversity of sacred sound traditions. Ignite greater interfaith participation and collaboration. Uplift dialogue about what beneficial interfaith engagement looks like.

Bring sacred sound to popular awareness.

Use all forms of media to expand awareness about sacred sound practices. Inspire our community members to share their stories. Champion sacred sound events, festivals, workshops, and gatherings.
