Overland Park Chamber™

2026 State Legislative Priorities

WORKFORCE

Recognizing that workforce issues continue to be a major priority for businesses from all sectors, the Chamber supports policies that address workforce needs while minimizing burdensome requirements that directly and indirectly increase costs to the employer.

HOUSING

New home construction and home remodeling projects are economic drivers that create jobs and increase the property tax base to support local schools and communities. The Chamber supports policies that maintain a healthy, diverse housing industry, allowing residents to access high-quality and attainable housing.

CHILDCARE

Access to and affordability of childcare is a barrier to full employment, and as such, solutions must be identified and implemented to increase the talent pipeline.
