Aid in Danger Bi-Monthly News Brief

Insecurity Insight identified 14 incidents where people waiting for humanitarian aid convoys in Gaza were shot at by Israeli forces, often in tanks and helicopters between 02-15 March. Most incidents took place at or near the Al Kuwaiti or Al Nabulsi roundabouts in Gaza city. In addition, four other incidents involved air-dropped humanitarian aid causing civilian harm or damage. At least five people were killed, including a five-year-old boy and many injured, and solar panels at the NGO Al-Ahli Baptist Hospital destroyed when they were hit by air-dropped humanitarian aid. In another incident, a Palestinian man was killed when ropes of an aid parachute wrapped around his neck and choked him to death while he was running towards the aid drop. See below for more details.
