

Geography Scramble Volume 2

United States of America

In this geography scramble, you have fifty states to correctly identify. You have two clues to help you identify them—their size/shape and their capital cities. But to find the name of the capital, you have to do some unscrambling first!

Write the name of the state on the top line beside the number and the name of the capital on the second line.

Have fun, and see how many you can get right!
