---

A blurred digital screen with the word "Security" in a light blue, pixelated font. To the left of the word is a circular icon containing a shield. Below the word, a hand cursor is visible, pointing towards the text. The background is dark and textured, suggesting a computer monitor or tablet.

Security

**METHODOLOGY & TAKE-AWAYS**

# METHODOLOGY

- This survey was conducted by Ipsos on behalf of the Centre for International Governance Innovation (“CIGI”) between December 21<sup>st</sup>, 2018 & February 10<sup>th</sup>, 2019.
  - All online economies were fielded between December 21<sup>st</sup>, 2018 & January 4<sup>th</sup>, 2019.
  - Below are the field dates, for the offline economies:
    - Pakistan: Jan 14<sup>th</sup> – Feb 10<sup>th</sup>
    - Tunisia: Jan 24<sup>th</sup> – 31<sup>st</sup>
    - Kenya: Jan 28<sup>th</sup> – Feb 7<sup>th</sup>
    - Nigeria: Jan 25<sup>th</sup> – Feb 7<sup>th</sup>
- The survey was conducted in 25 economies—Australia, Brazil, Canada, China, Egypt, France, Germany, Great Britain, Hong Kong (China), India, Indonesia, Italy, Japan, Kenya, Mexico, Nigeria, Pakistan, Poland, Russia, South Africa, Republic of Korea, Sweden, Tunisia, Turkey and the United States—and involved 25,229 Internet users. Twenty-one of the economies utilized the Ipsos Internet panel system while four (Kenya, Nigeria, Pakistan & Tunisia) utilized face-to-face interviewing, given online constraints in these economies and the length of the poll.
- The average LOI (length of interview) of the online survey was ~10 minutes. The average LOI for the face-to-face interviews was around 20 minutes, or more.
- In the US and Canada respondents were aged 18-64, and 16-64 in all other economies.
- Since 2018, the economies of Russia and South Africa have been included in the BRICS definition, which previously only included Brazil, India, and China (BIC). For analytical purposes, the BRICS data is tracked against the BIC data from previous surveys, though the comparison is not direct.
- Approximately 1,000+ individuals were surveyed in each economy and are weighted to match the population in each economy surveyed. The precision of Ipsos online polls is calculated using a credibility interval. In this case, a poll of 1,000 is accurate to +/- 3.5 percentage points. For the face-to-face interviews, the margin of error is +/-3.1, 19 times out of 20.

**BRICS = Brazil, Russia, India, China, South Africa**

**APAC = Asia Pacific**

**LATAM = Latin America**

# FIVE KEY TAKE-AWAYS

- 1 Eight in ten global citizens concerned about their online privacy as majority says they're more concerned than last year. Concern is highest in developing economies. (slides 8-13)
- 2 One in five say it's getting harder to surf the internet with the confidence that content is not being censored. On balance, people in many economies say it's getting worse, not better, including Russia, US, Sweden and Great Britain. (slides 85 to 88)
- 3 Driving increased concern in online privacy, more are pointing the finger at governments, both foreign and domestic, as a culprit. (slides 25-32)
- 4 One in four global citizens don't trust in the internet. Distrust increasingly fueled by social media, governments and search engines. (112 to 132)
- 5 Distrust in the internet is causing global citizens to disclose less information online, use the internet more selectively, and make fewer online purchases among other precautions. (slide 136)

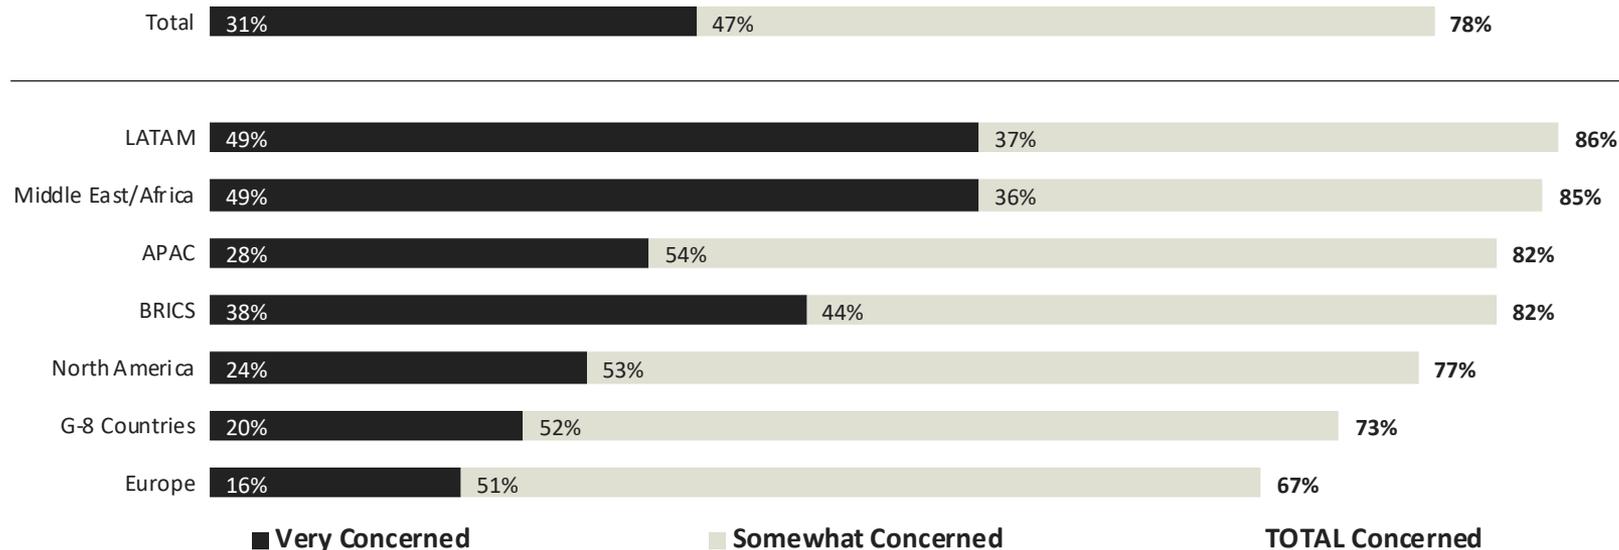

**PRIVACY & SECURITY**

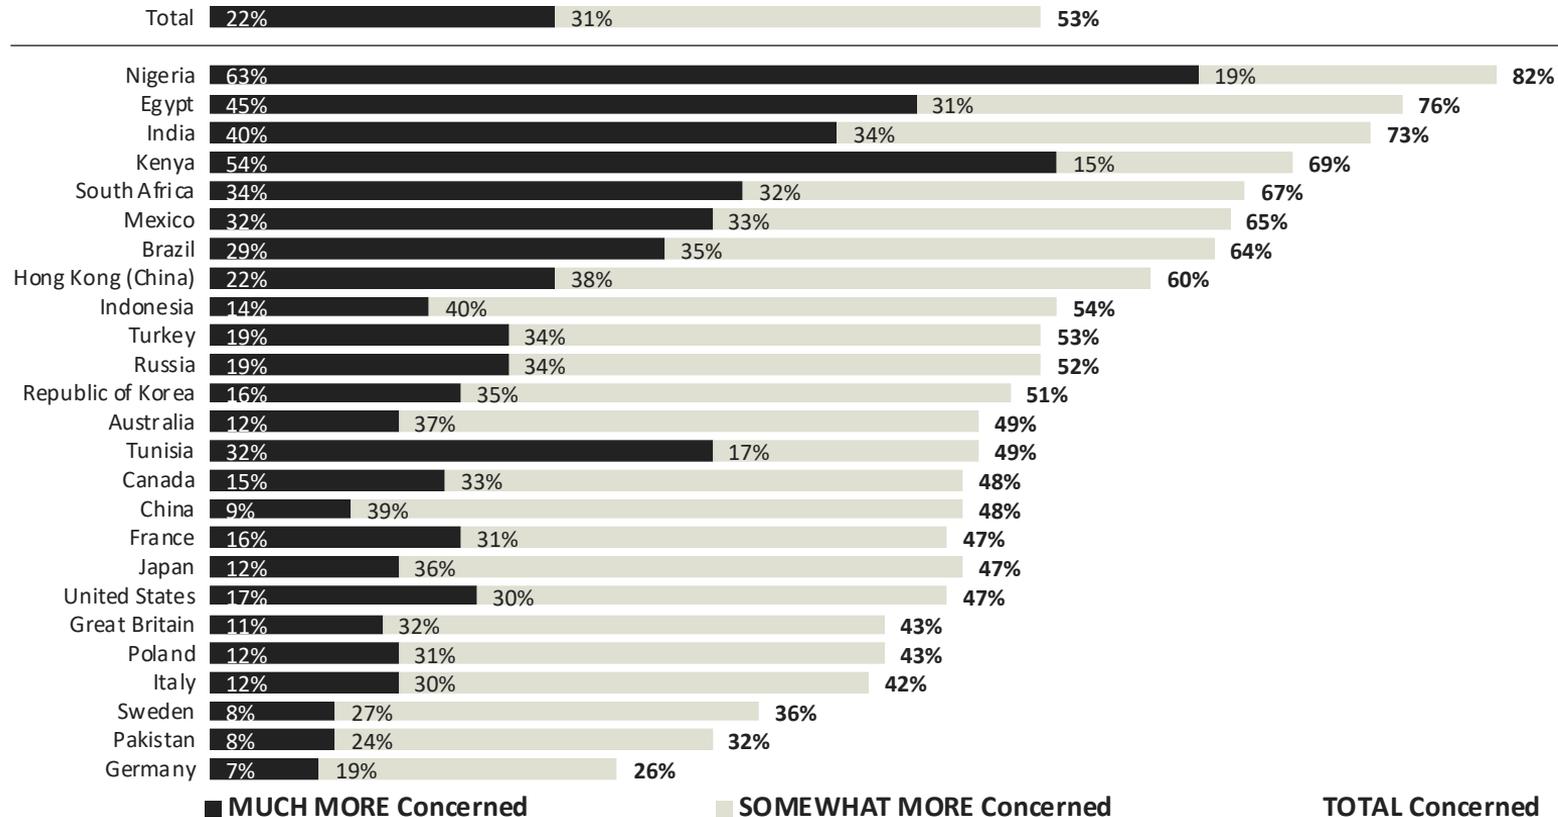

Three in four (78%) global citizens are at least *somewhat concerned* about their online privacy. Concern is highest in Egypt & Hong Kong (China), where virtually all citizens (96% in both economies) are concerned about their online privacy, including seven in ten (71%) Egyptians who are *very concerned* about this. Kenya is the only economy in which less than half (44%) are concerned about their online privacy.

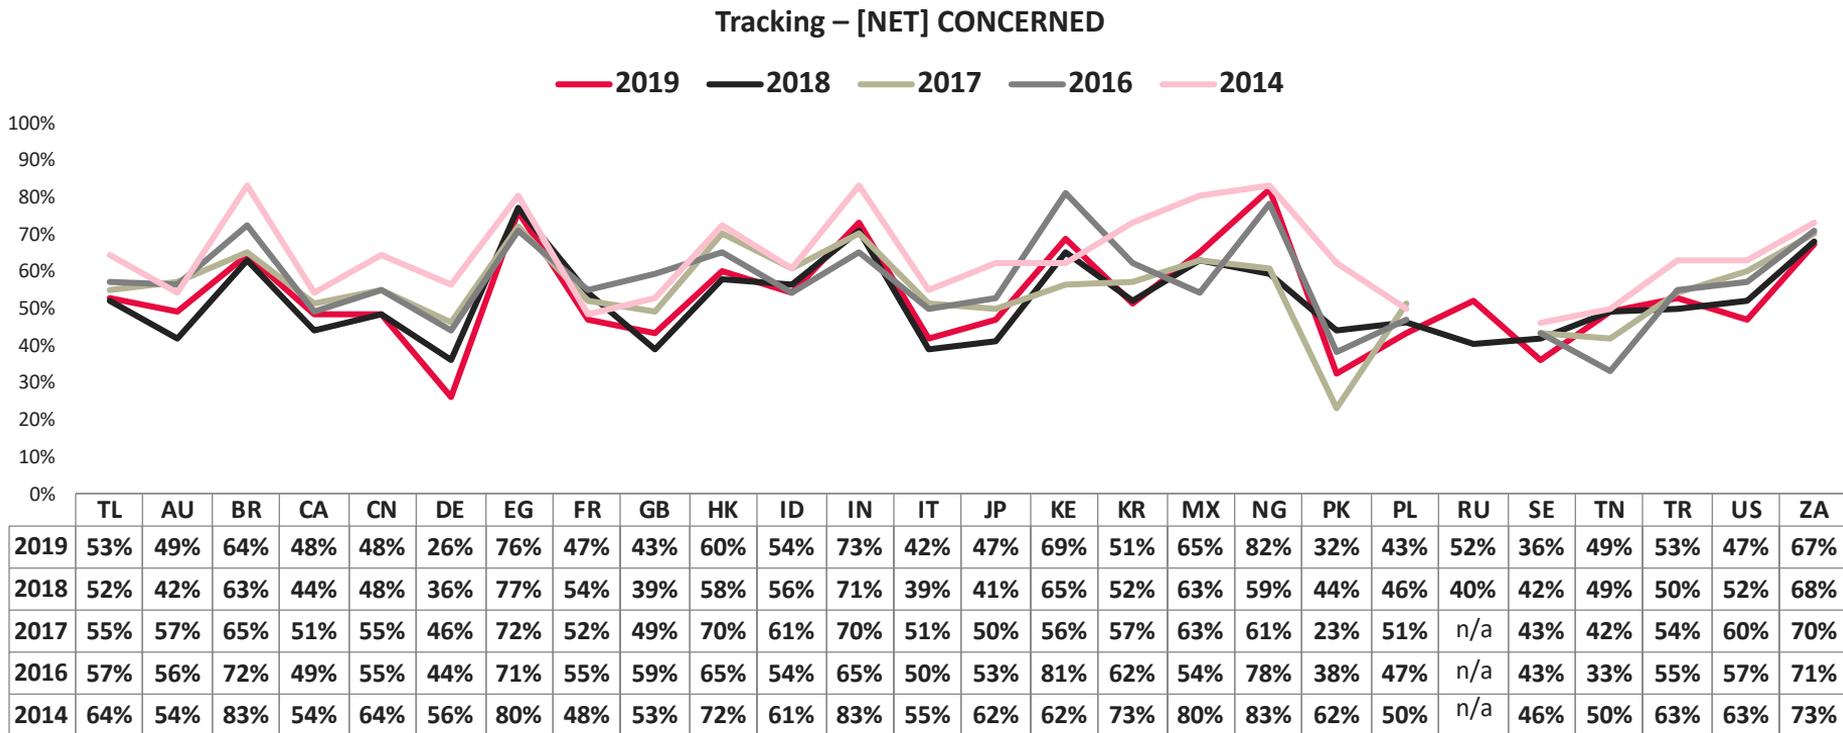

Across all regions, most have at least some degree of concern when it comes to their online privacy, with those living in developing economies being significantly more likely to express at least some level of concern. Europeans are least concerned.

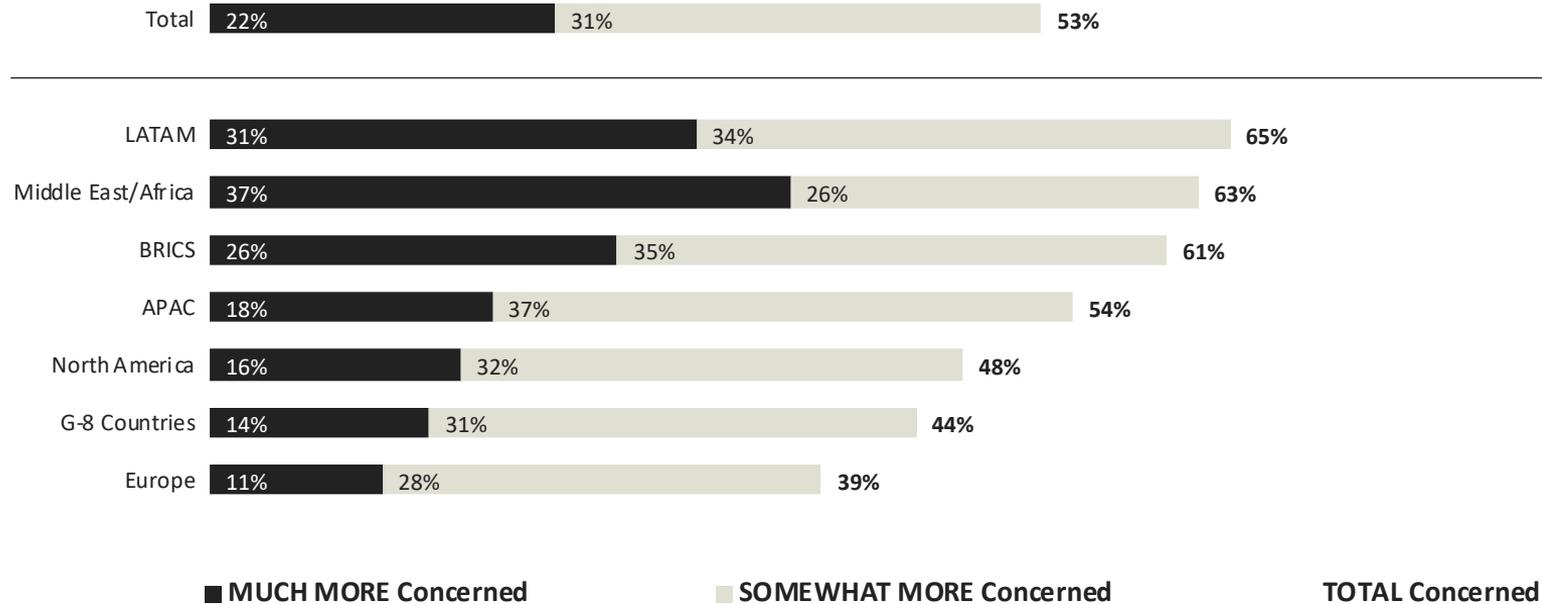

Overall, a majority (53%) are more concerned about their online privacy, compared to a year ago (up 1 point). Nigerians (at 82%) are by far the most concerned about their online privacy, compared to a year ago, and are about three times more likely to express concern, compared to Germans (26%), who are least likely to have growing concern.

Just over half (53%) of global citizens are more concerned about their online privacy, up just one point from last year, but the first time the rate of growing concern has increased since the study began, even if just marginally.

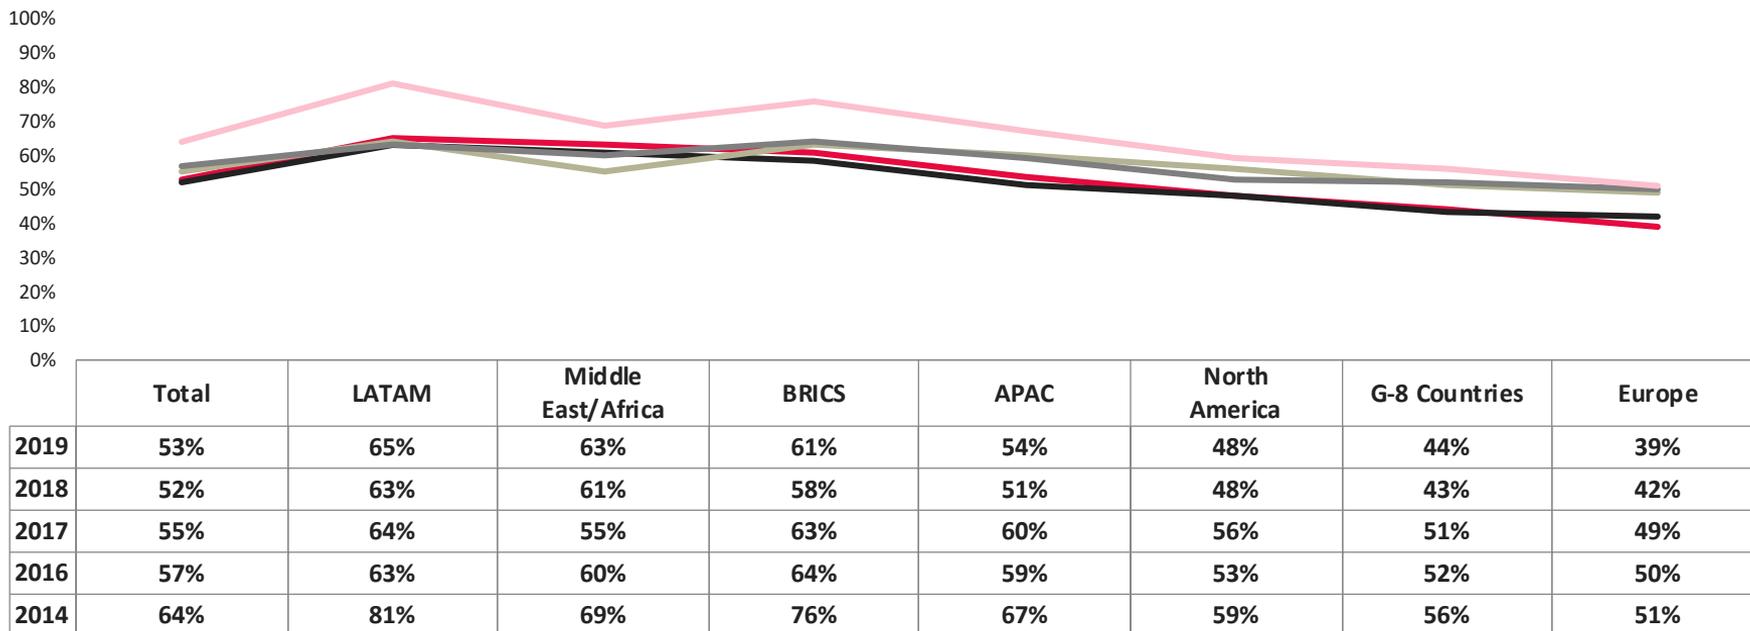

Growing concerns towards online privacy are less pronounced in developed economies. More specifically, less than half in Europe (39%), North America (48%) & the G-8 more generally (44%) say they're more concerned than last year, but a majority in LATAM (65%), The Middle East (63%), BRICS (61%) and APAC (54%) cite a growing concern.

Concern with respect to online privacy is largely unchanged across most regions of the world, compared to the 2018 survey, and continues to be higher in the developing economies.

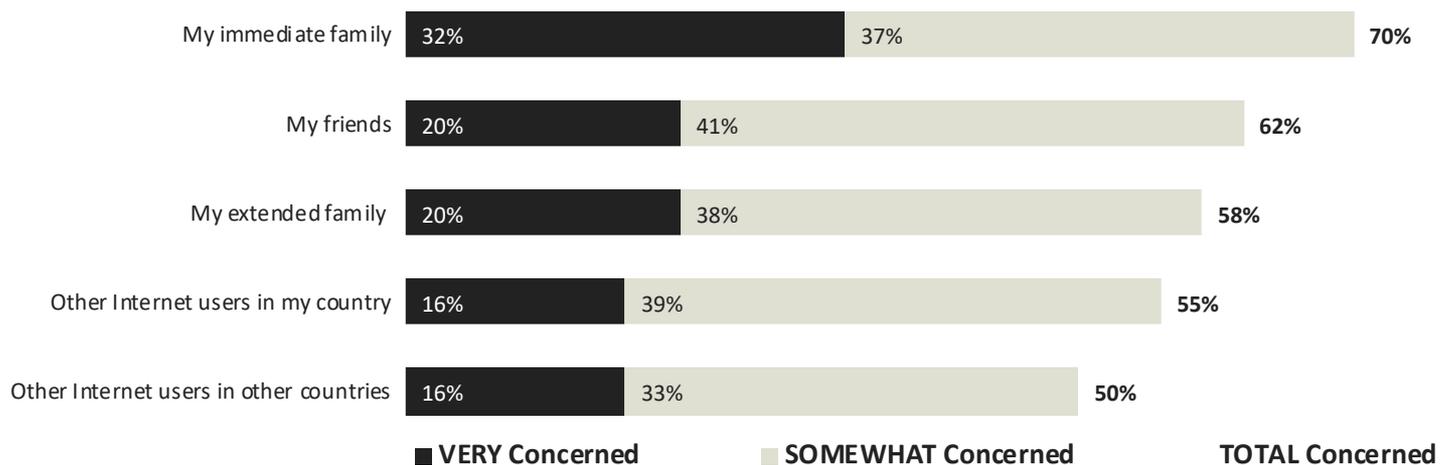

### Tracking – [NET] CONCERNED

— 2019 — 2018 — 2017 — 2016 — 2014

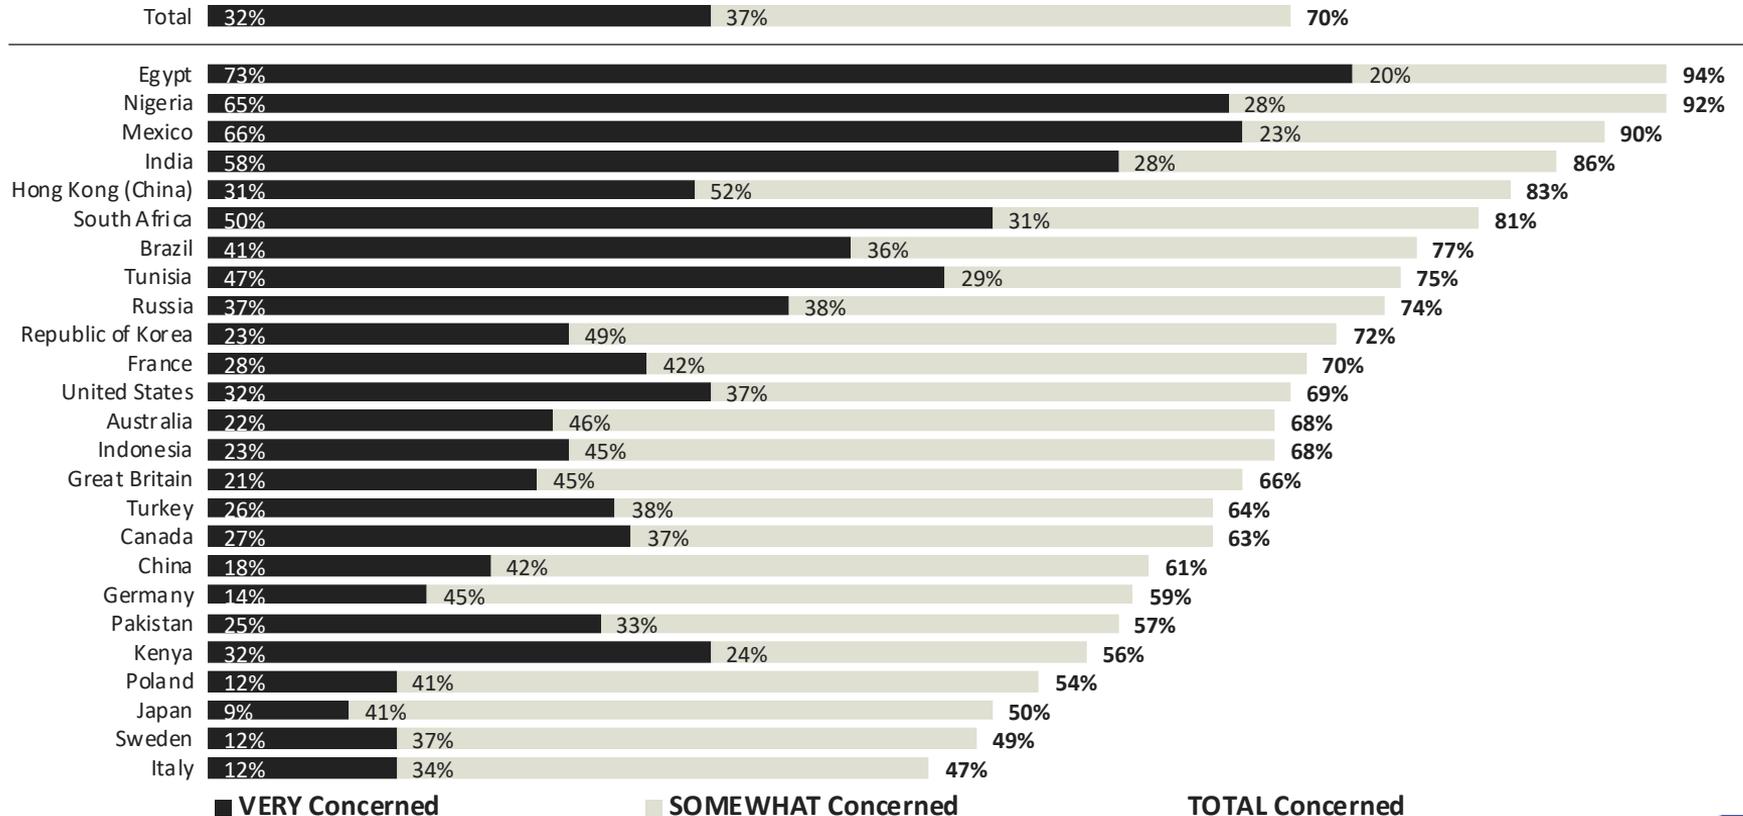

Overall, and perhaps not surprisingly, global citizens are most concerned about the online privacy of their immediate family (70% concerned) and friends (62%).

### Global Total

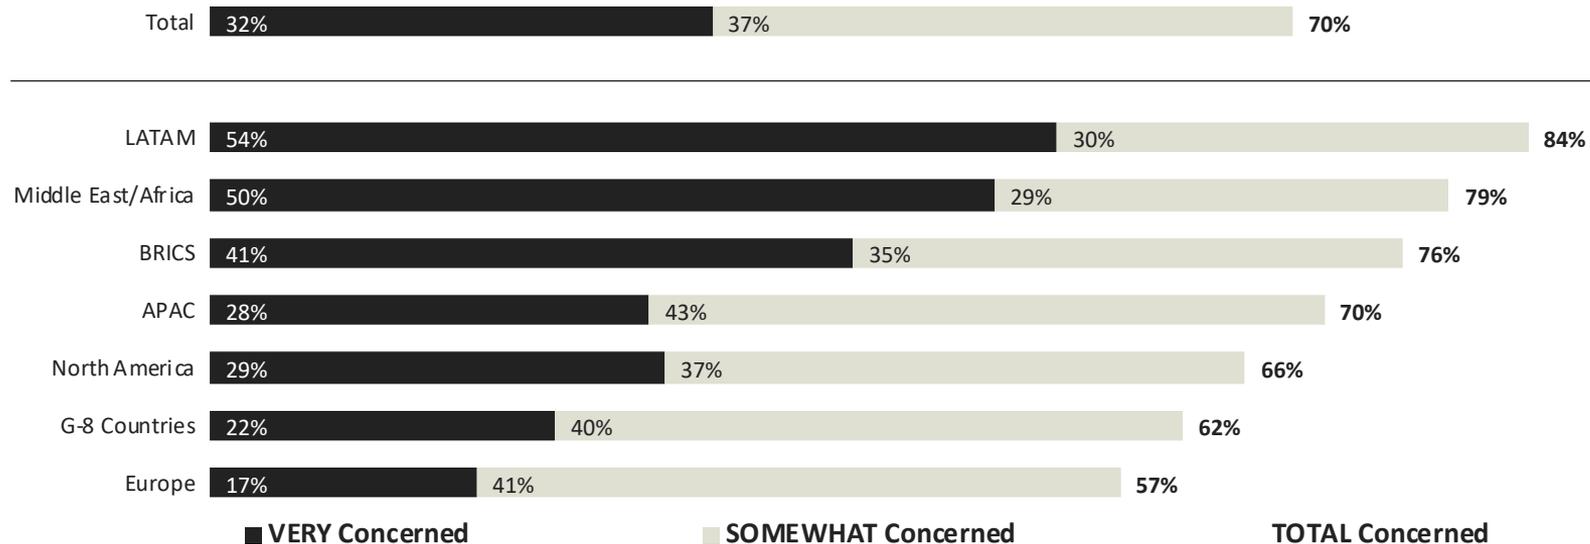

## CONCERN FOR ONLINE PRIVACY OF IMMEDIATE FAMILY

Seven in ten (70%) global citizens are concerned about the online privacy of their immediate family, the highest proportion out of all actors surveyed.

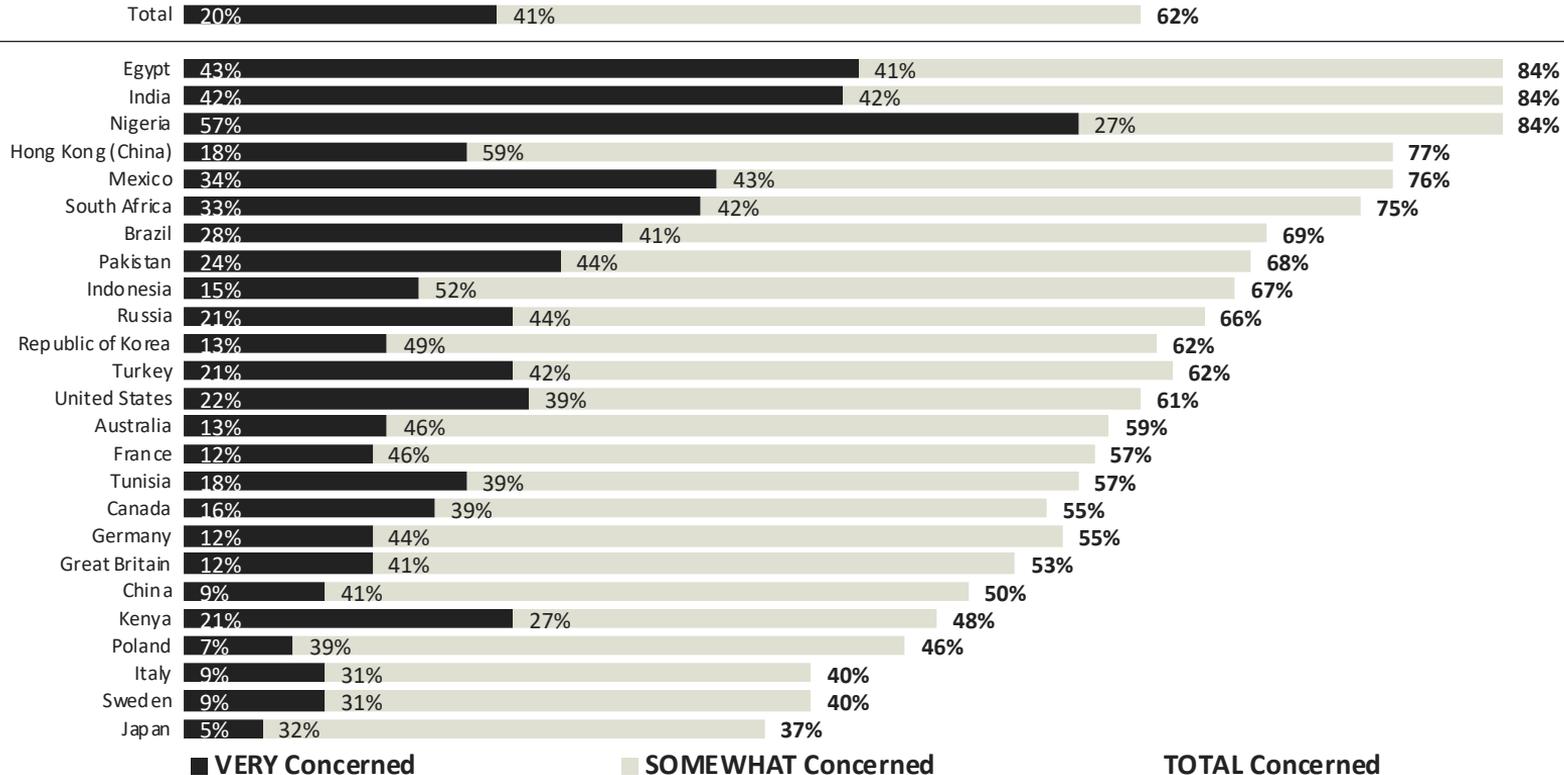

## CONCERN FOR ONLINE PRIVACY OF IMMEDIATE FAMILY

Online privacy concerns related to one's immediate family are higher in developing economies, and comparatively lower in the developed world.

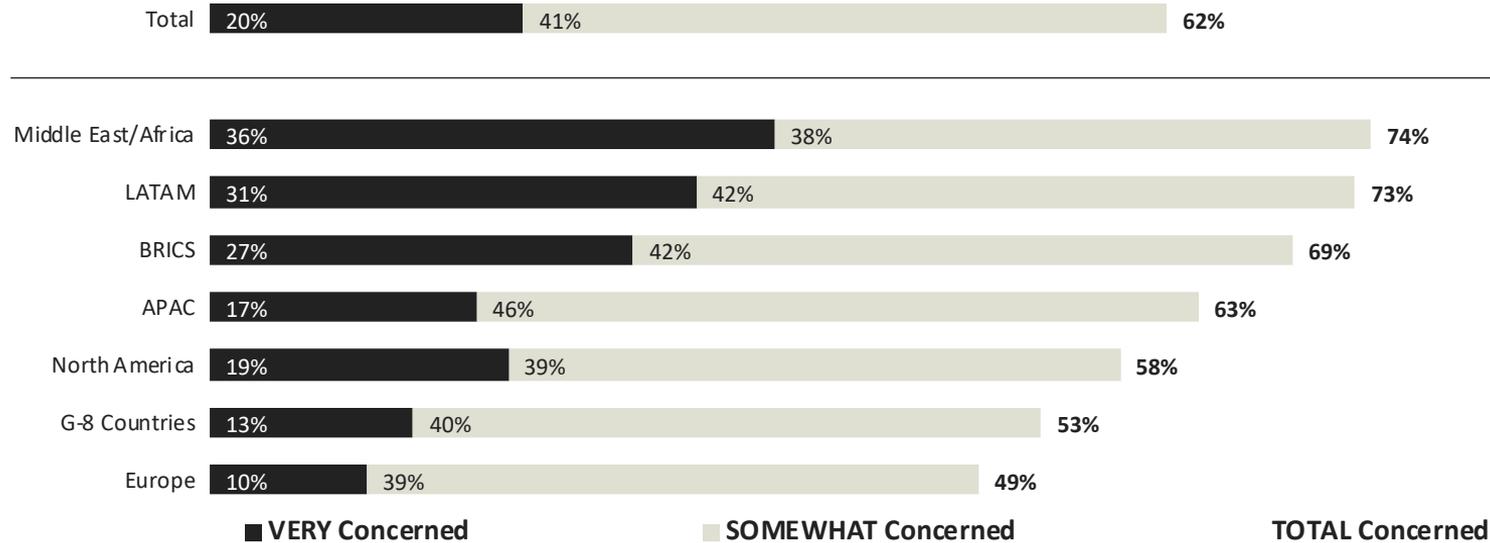

## CONCERN FOR ONLINE PRIVACY OF FRIENDS

Egyptians, Nigerians & Indians (84%) are among the most concerned about the online privacy of their friends and are more than twice as likely to express concern, compared to citizens living in Japan (37%), Sweden (40%) & Italy (40%).

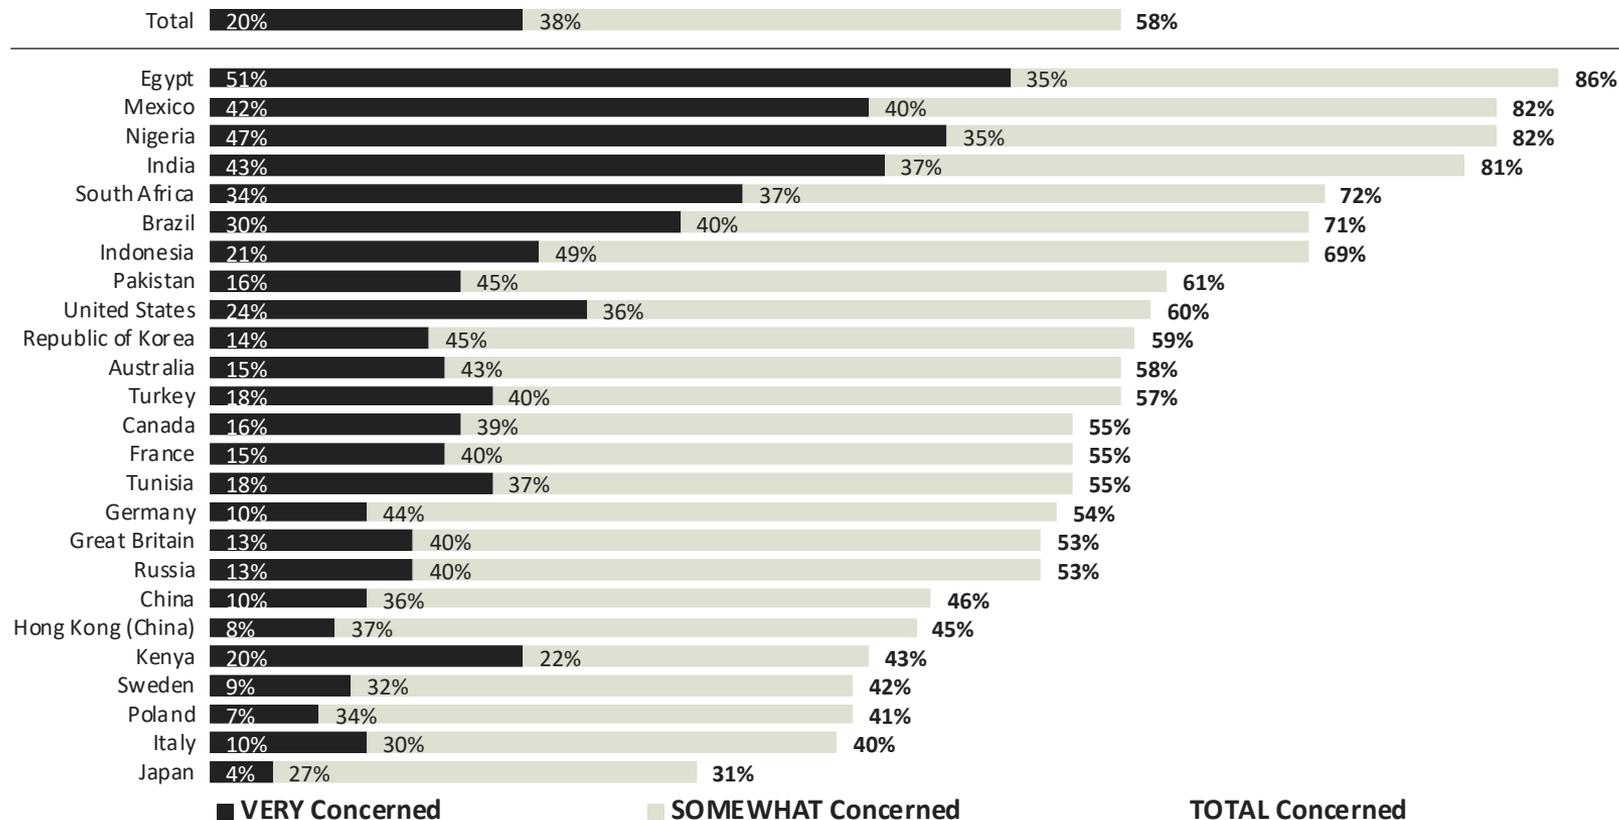

## CONCERN FOR ONLINE PRIVACY OF FRIENDS

In all economies, save for Europe, majorities indicate that they are concerned about the online privacy of their friends.

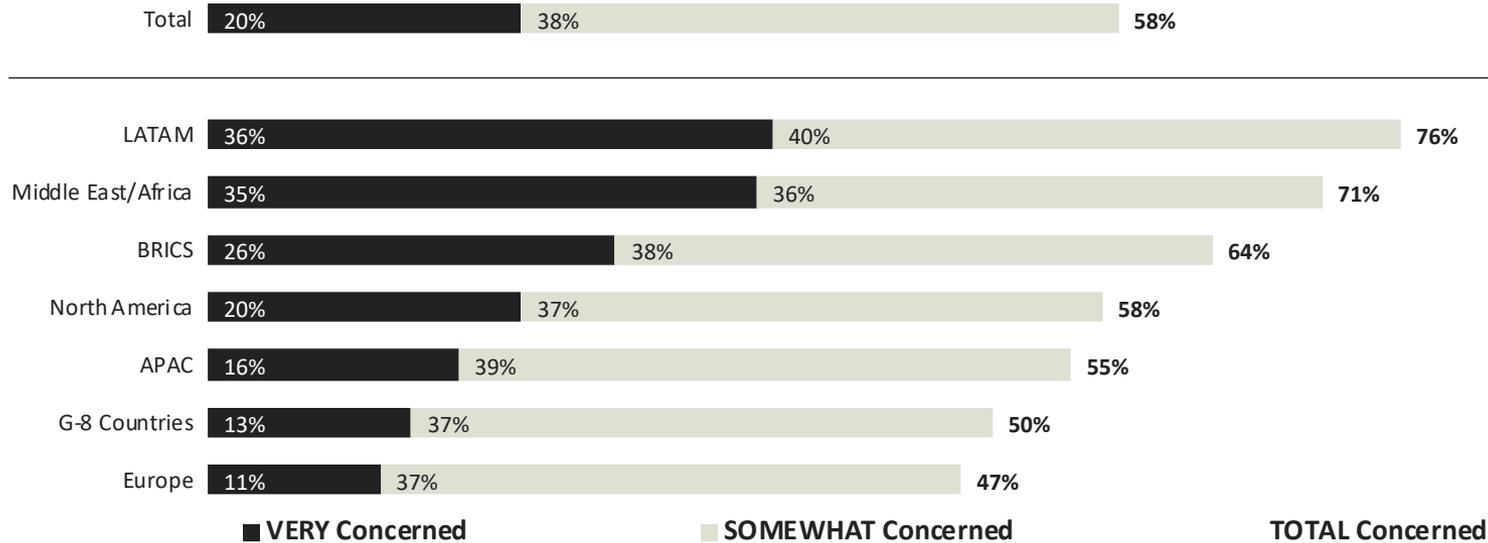

## CONCERN FOR ONLINE PRIVACY OF EXTENDED FAMILY

Overall, three in five (58%) are concerned about the online privacy of their extended family. At the high end, Egyptians (86%) are most concerned and at the low end, the Japanese (31%) are least concerned.

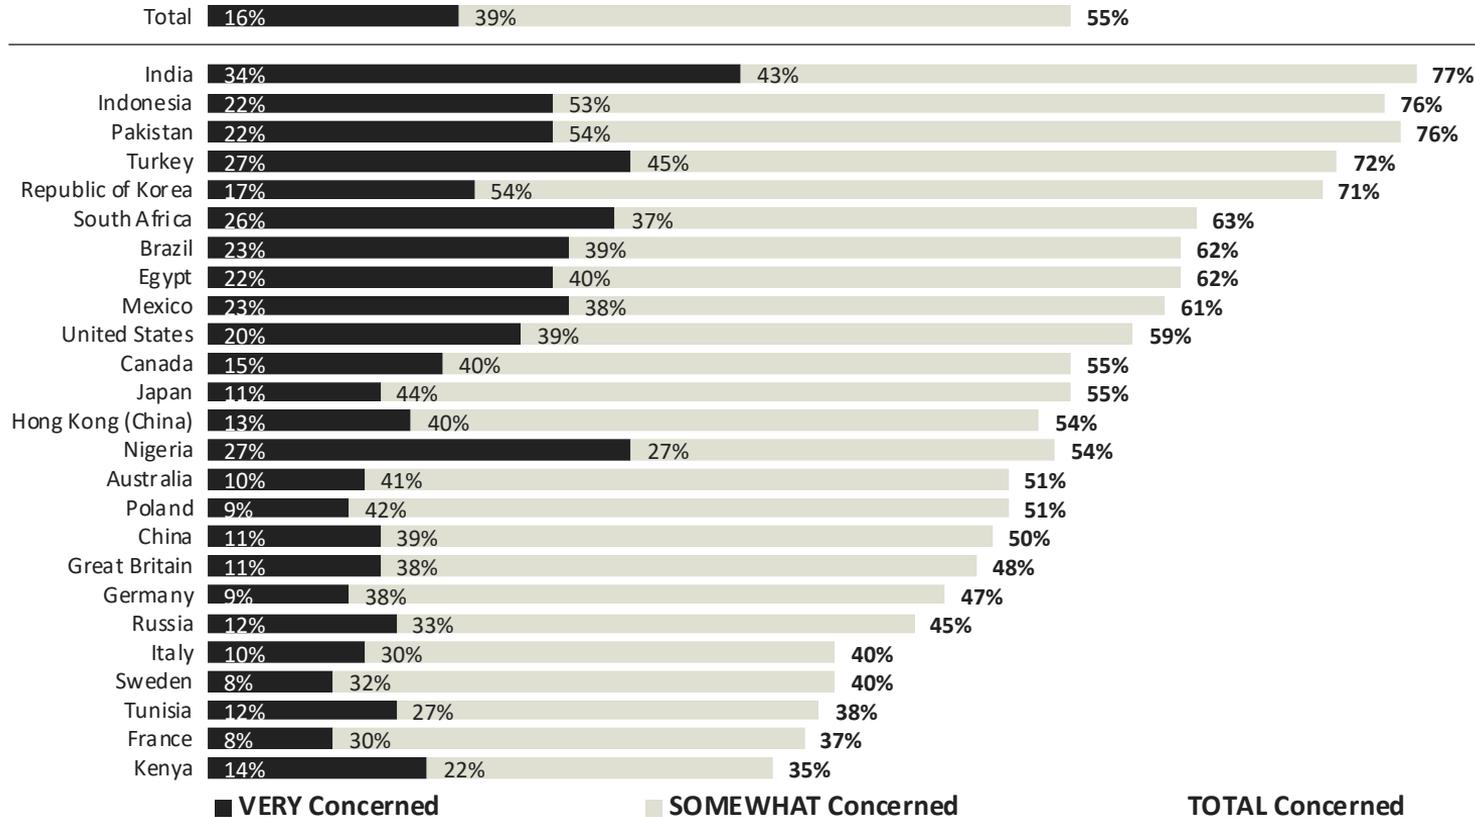

## CONCERN FOR ONLINE PRIVACY OF EXTENDED FAMILY

Consistent with other metrics, concerns about the online privacy of one's extended family are highest in the LATAM, Middle East & Africa regions and lowest in Europe.

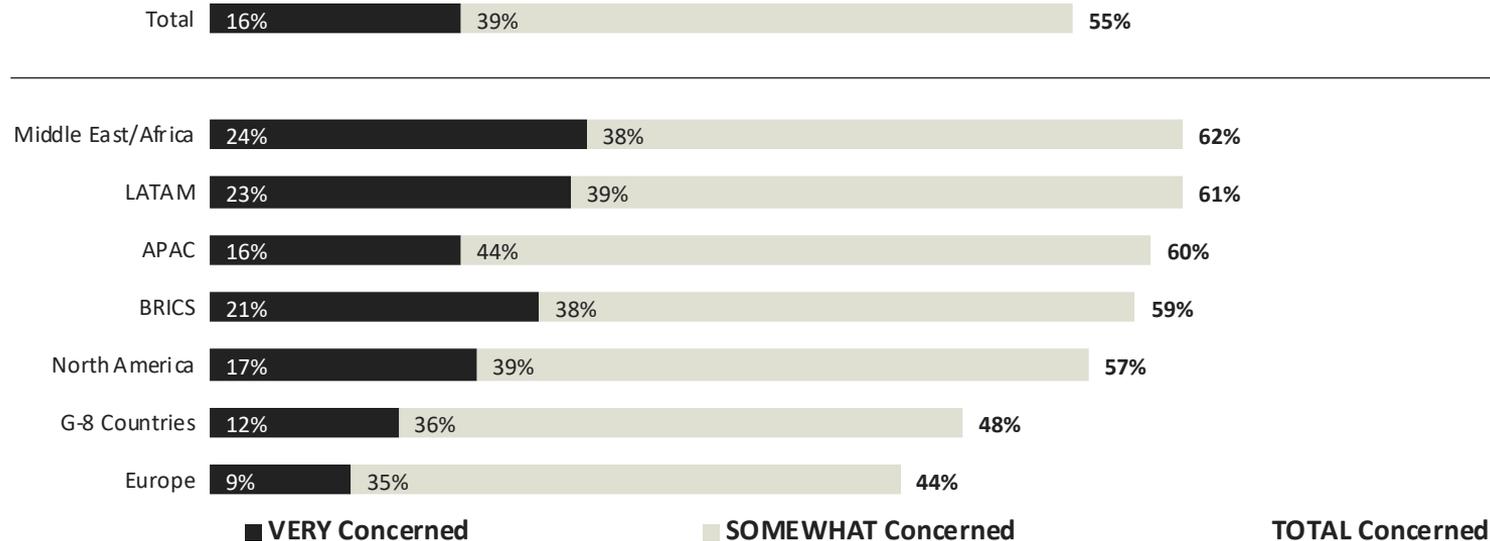

## CONCERN FOR ONLINE PRIVACY OF OTHER INTERNET USERS IN ECONOMY

A majority (55%) of global citizens indicate concern for the online privacy of other Internet users in their economy, ranging from three quarters in Pakistan (76%), Indonesia (76%) & India (77%) to one in three (35%) in Kenya.

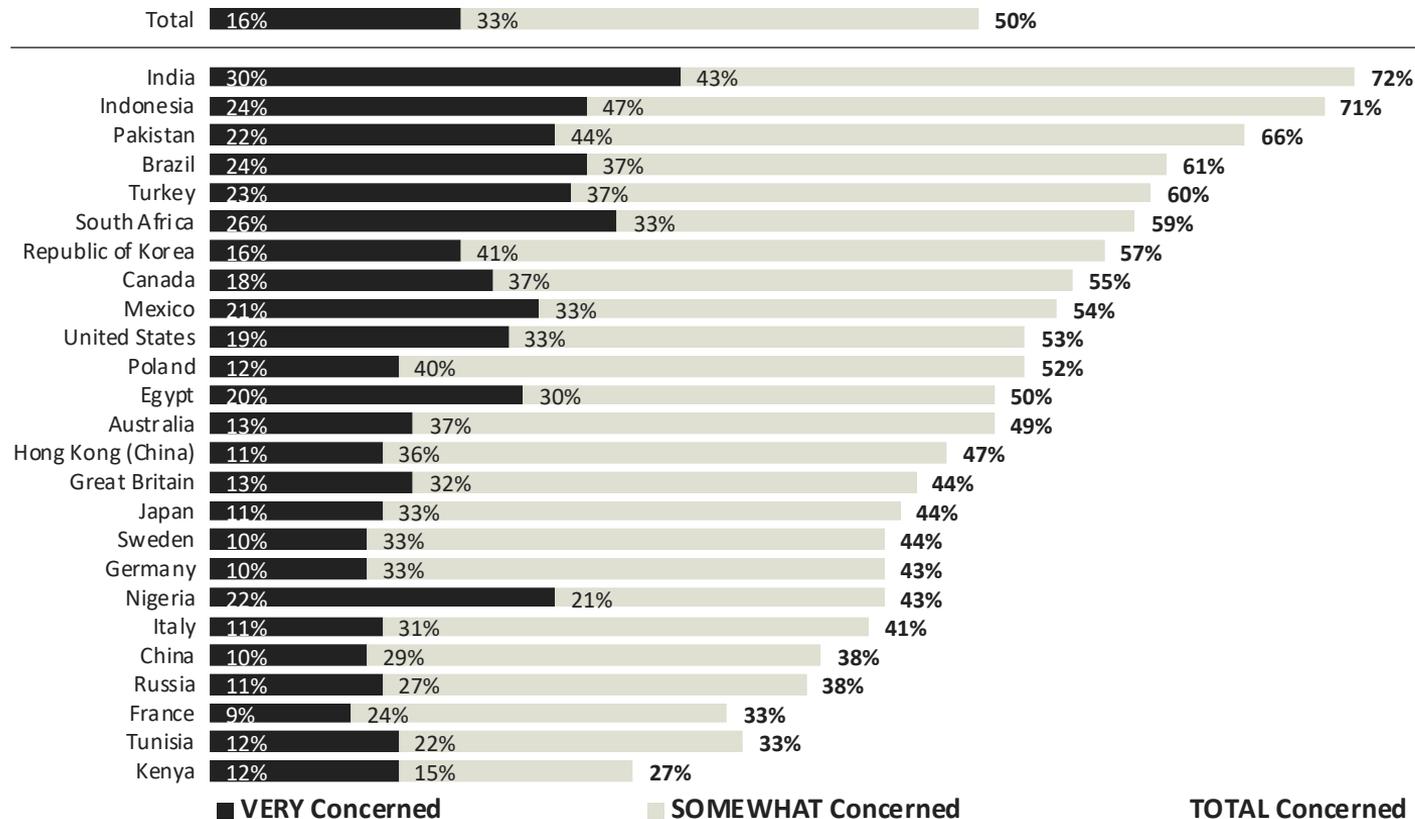

## CONCERN FOR ONLINE PRIVACY OF OTHER INTERNET USERS IN ECONOMY

Well under half (44%) of Europeans are concerned about the online privacy of other Internet users in their economy, the lowest proportion out of any of the economies surveyed.

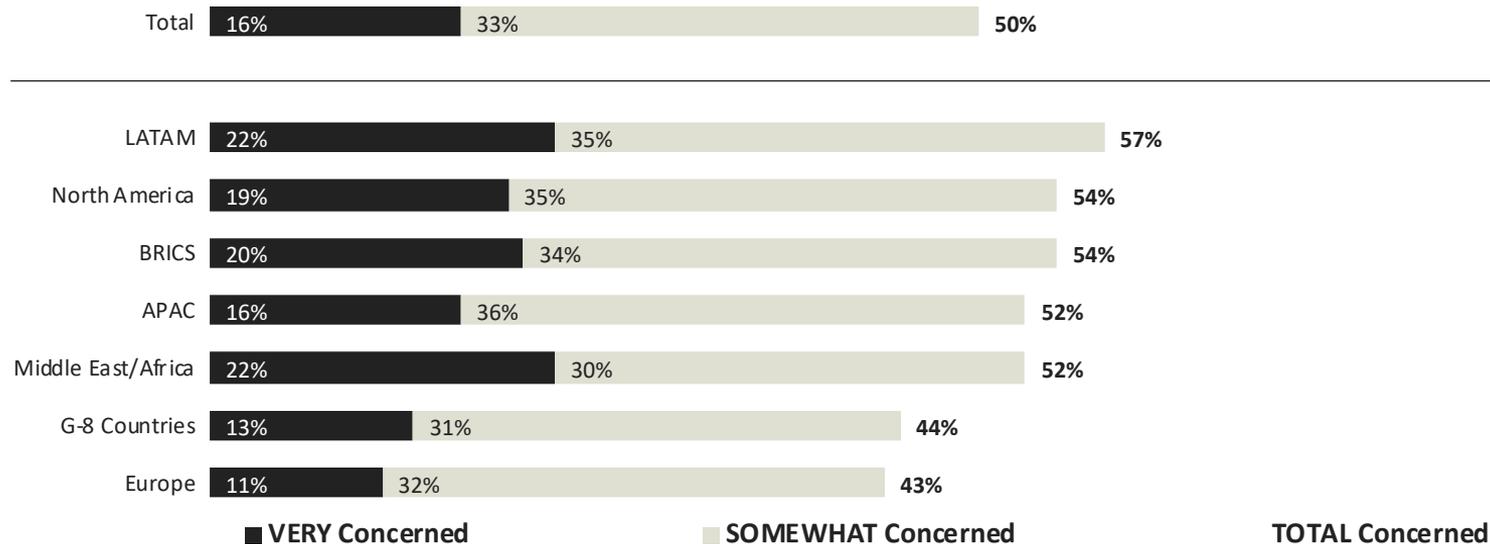

## CONCERN FOR ONLINE PRIVACY OF OTHER INTERNET USERS ABROAD

Half (50%) of global citizens are concerned about the online privacy of others living abroad. Concern is exceptionally low in Kenya (27%), and is highest in India (72%) & Indonesia (71%) who express the most concern about others.

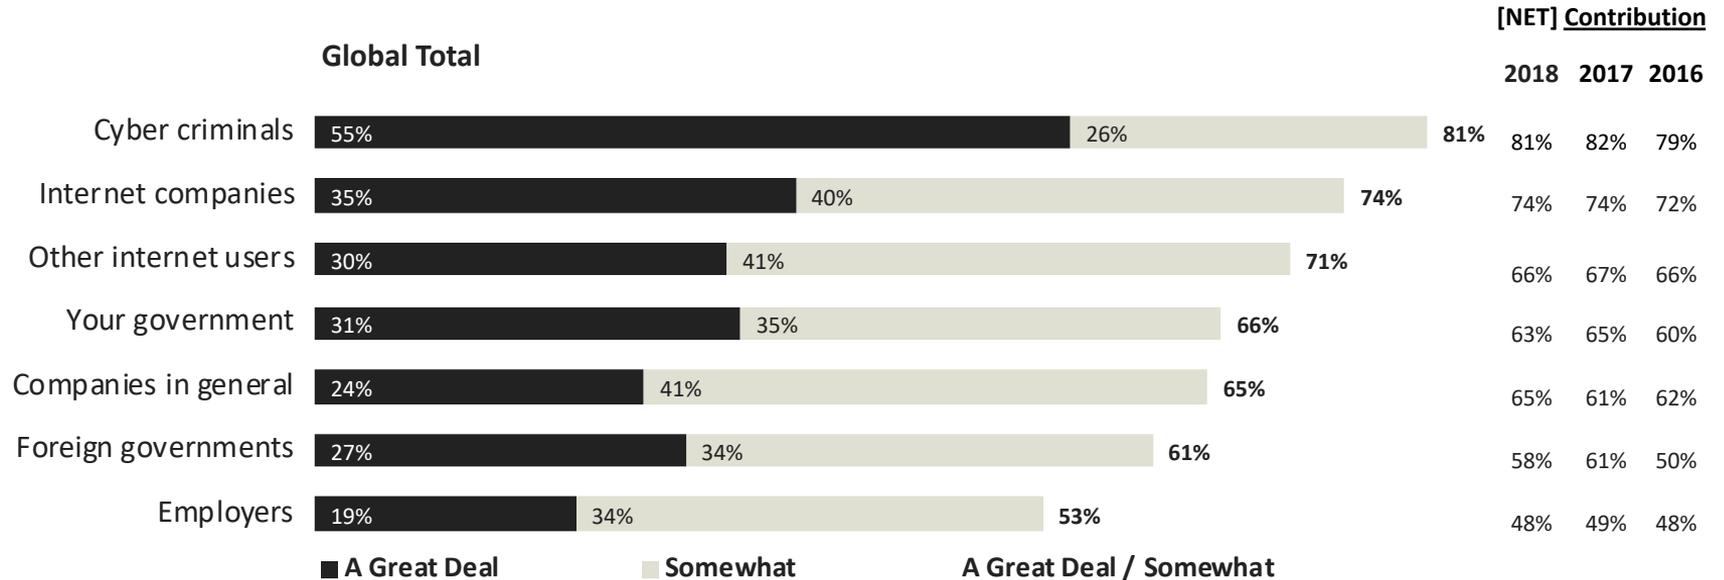

## CONCERN FOR ONLINE PRIVACY OF OTHER INTERNET USERS ABROAD

Once again, those living in the LATAM, Middle East & Africa regions are among the most concerned when it comes to the online privacy of others living abroad. Less than half of Europeans (43%) and those living in G-8 Countries more generally (44%) feel concerned about this.

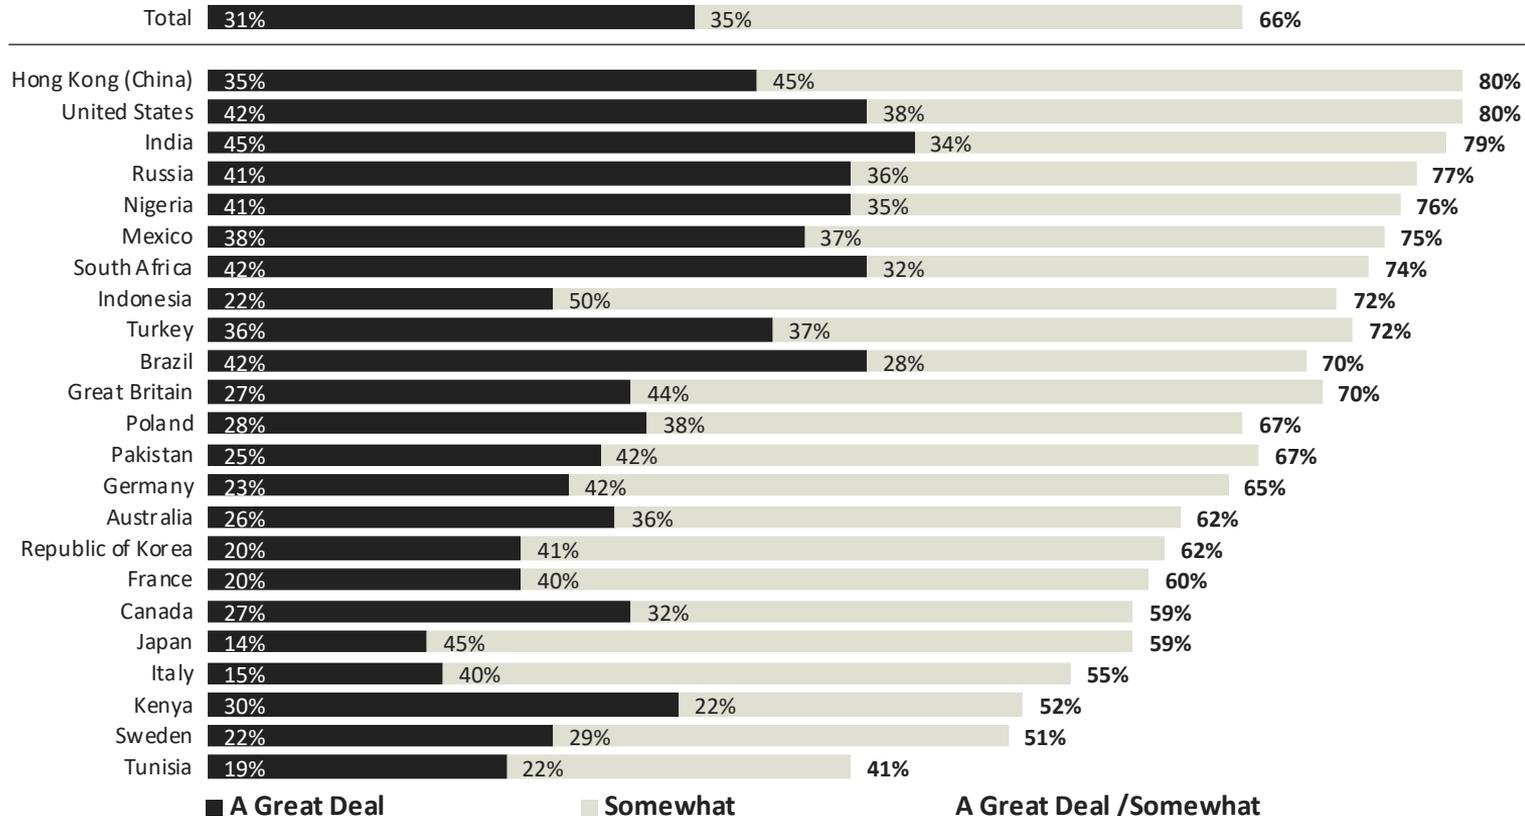

Among those who claim to be at least *somewhat more concerned* about their online privacy, compared to a year ago, cyber criminals are the leading factor that has contributed to their increased levels of concern. However, since 2016, concerns about governments, both domestic and foreign, have grown the most.

## OWN GOVERNMENT

Majorities in all economies, save for Tunisia (41%), think that their own government contributes, at least somewhat, to heightening online privacy concerns.

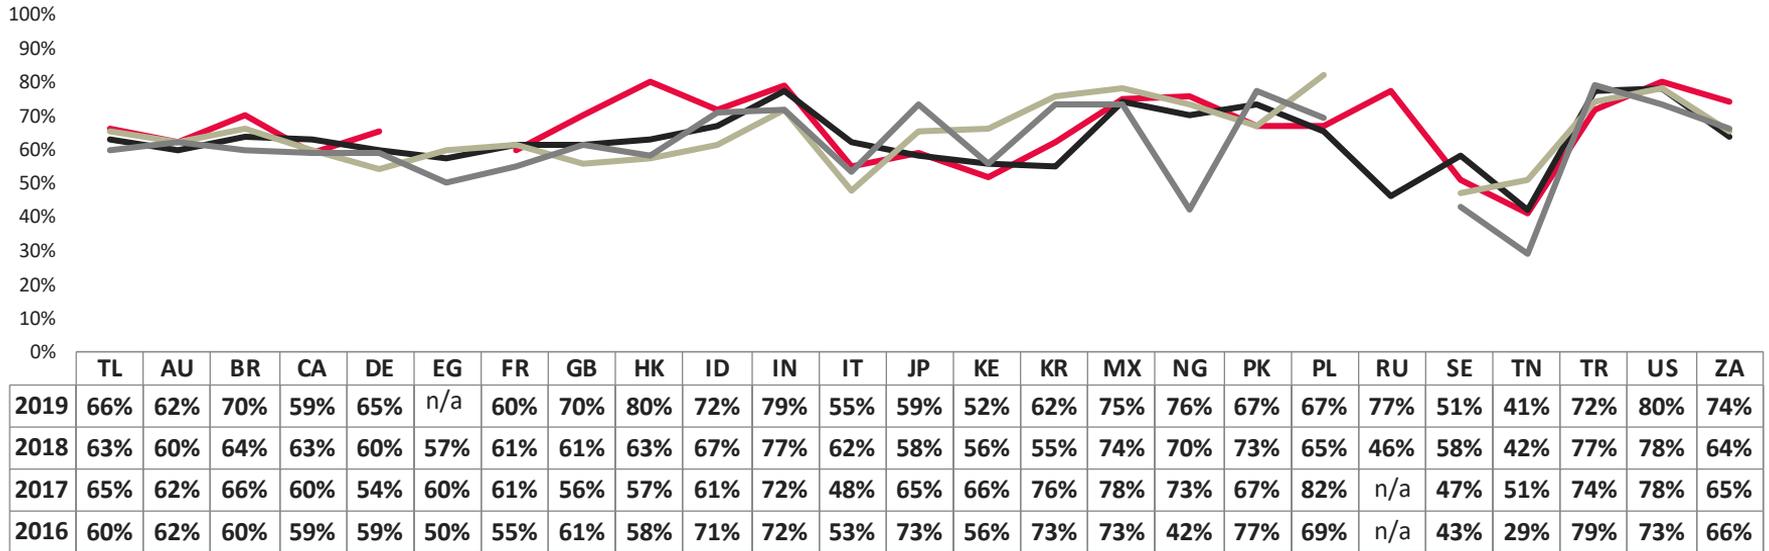

## OWN GOVERNMENT

Compared to 2018, global citizens are more likely (+3 pts) to claim that their government has contributed, at least *somewhat*, to increased levels of concern about online privacy, with Russians (+31) & Hong Kong (China) residents (+17) leading much of the increase. Concern about one's own government (66%) is higher this year than in any previous survey year.

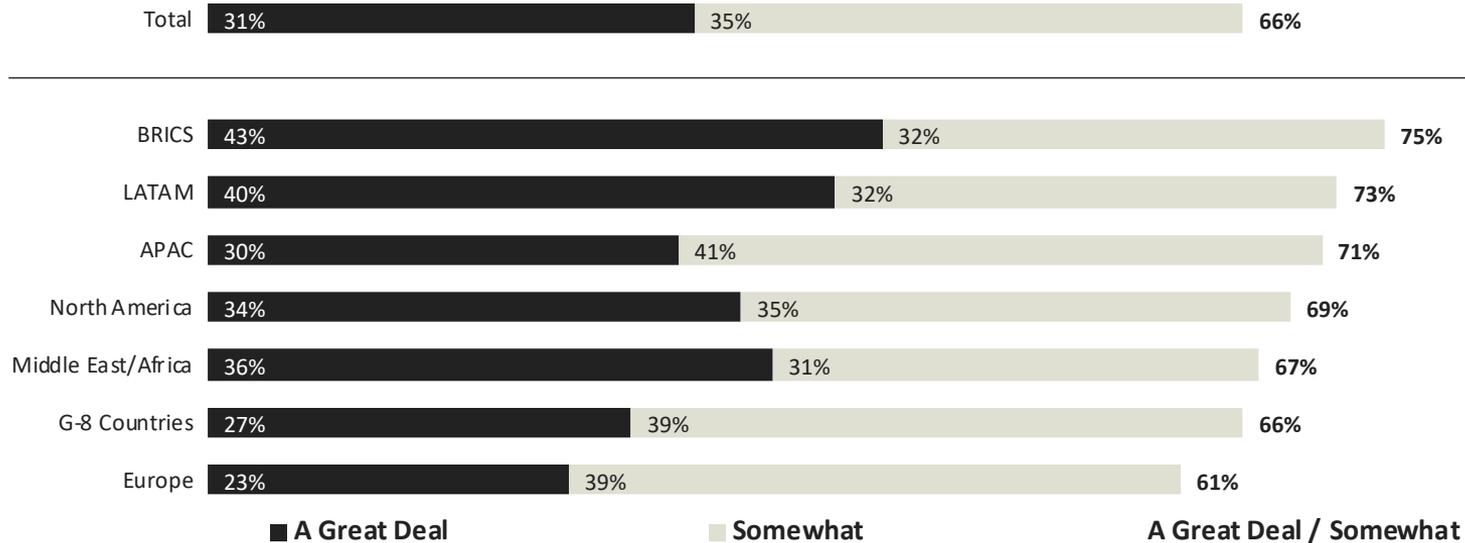

Tracking – [NET] A GREAT DEAL/SOMEWHAT

— 2019 — 2018 — 2017 — 2016

## OWN GOVERNMENT

Across all regions, a majority of global citizens think that their government has contributed, at least *somewhat*, to their increased levels of concern, with respect to online privacy.

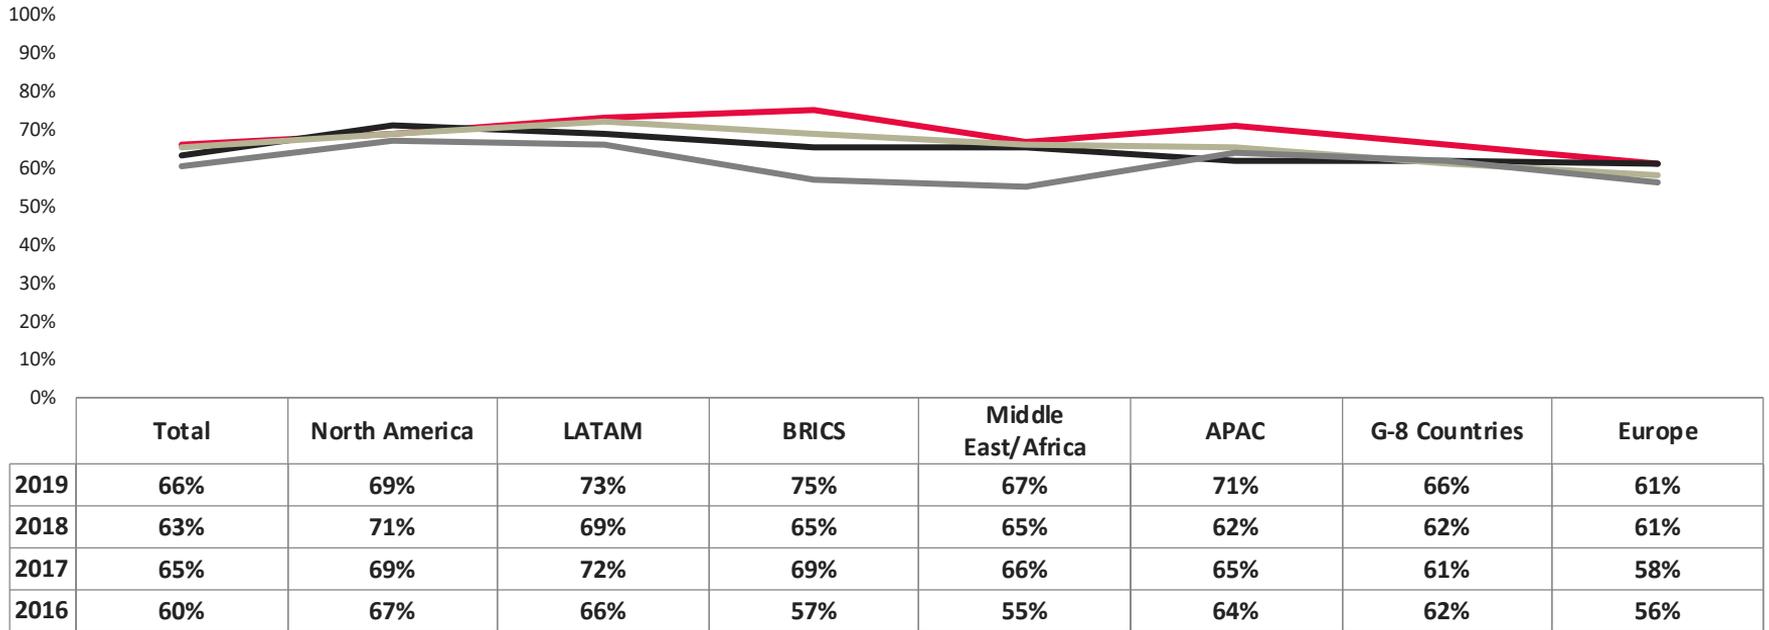

## OWN GOVERNMENT

In each region, save for Europe & North America, global citizens are more likely to feel as though their government has contributed, at least *somewhat*, to their increased online privacy concerns, relative to the 2018 survey.

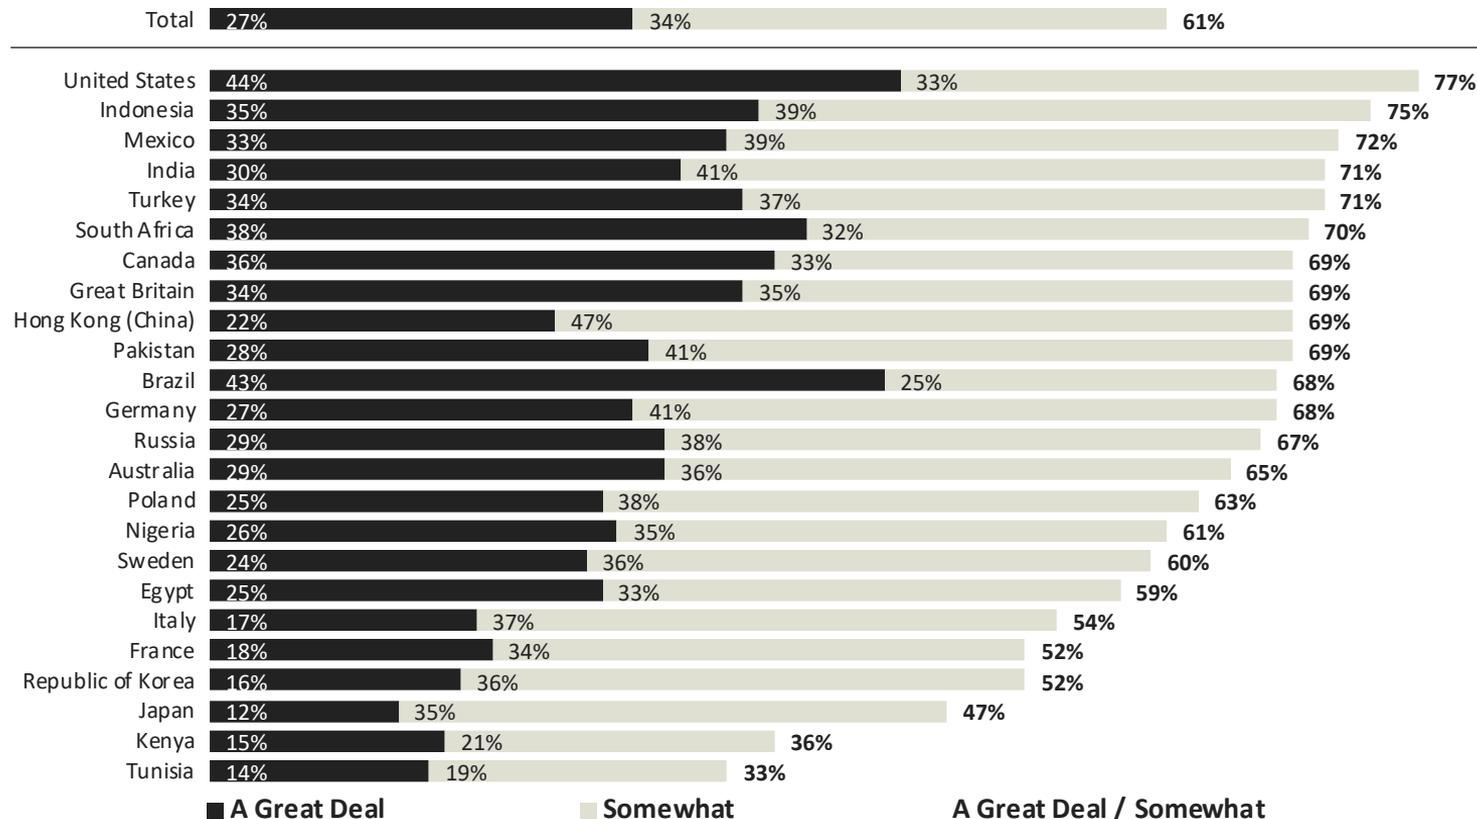

### Tracking – [NET] A GREAT DEAL / SOMEWHAT

— 2019 — 2018 — 2017 — 2016

## FOREIGN GOVERNMENTS

Overall, three in five (61%) of those who feel more concerned about their online privacy would attribute at least some of this concern to foreign governments.

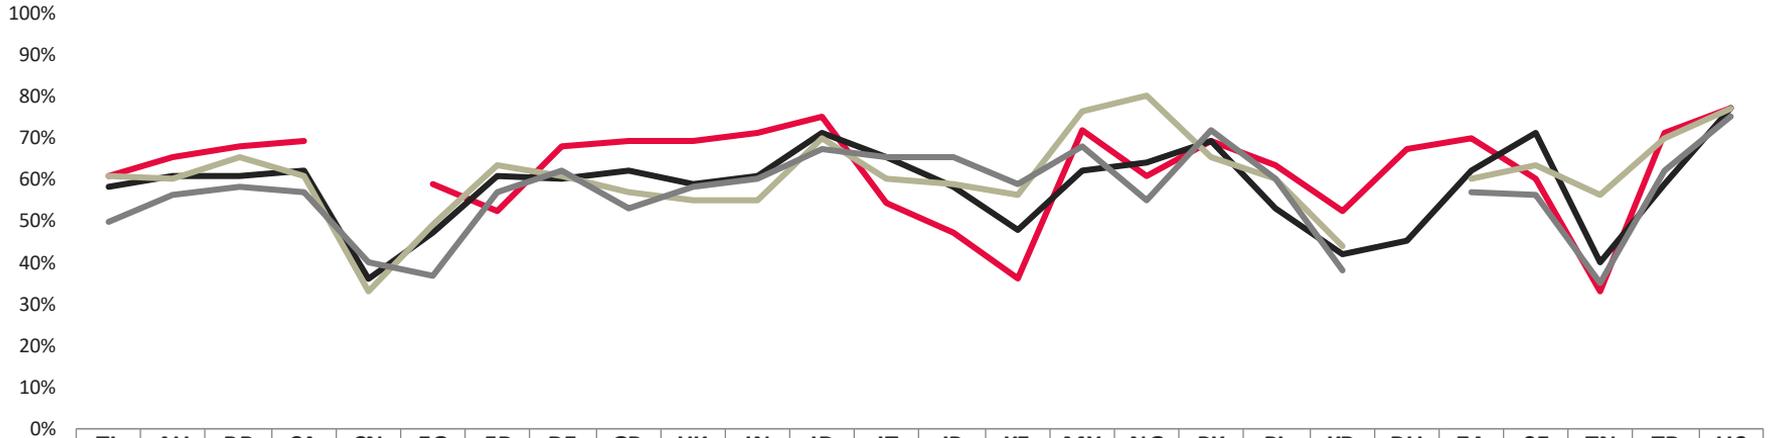

## FOREIGN GOVERNMENTS

Global citizens are more likely, compared to a year ago, to indicate that foreign governments have contributed to increased levels of online privacy concerns (+3 pts), with much of the increase being driven by Russians (+22).

## FOREIGN GOVERNMENTS

Opinions vary only slightly as a majority, regardless of the economy, are inclined to blame foreign governments for their heightened concerns regarding online privacy.

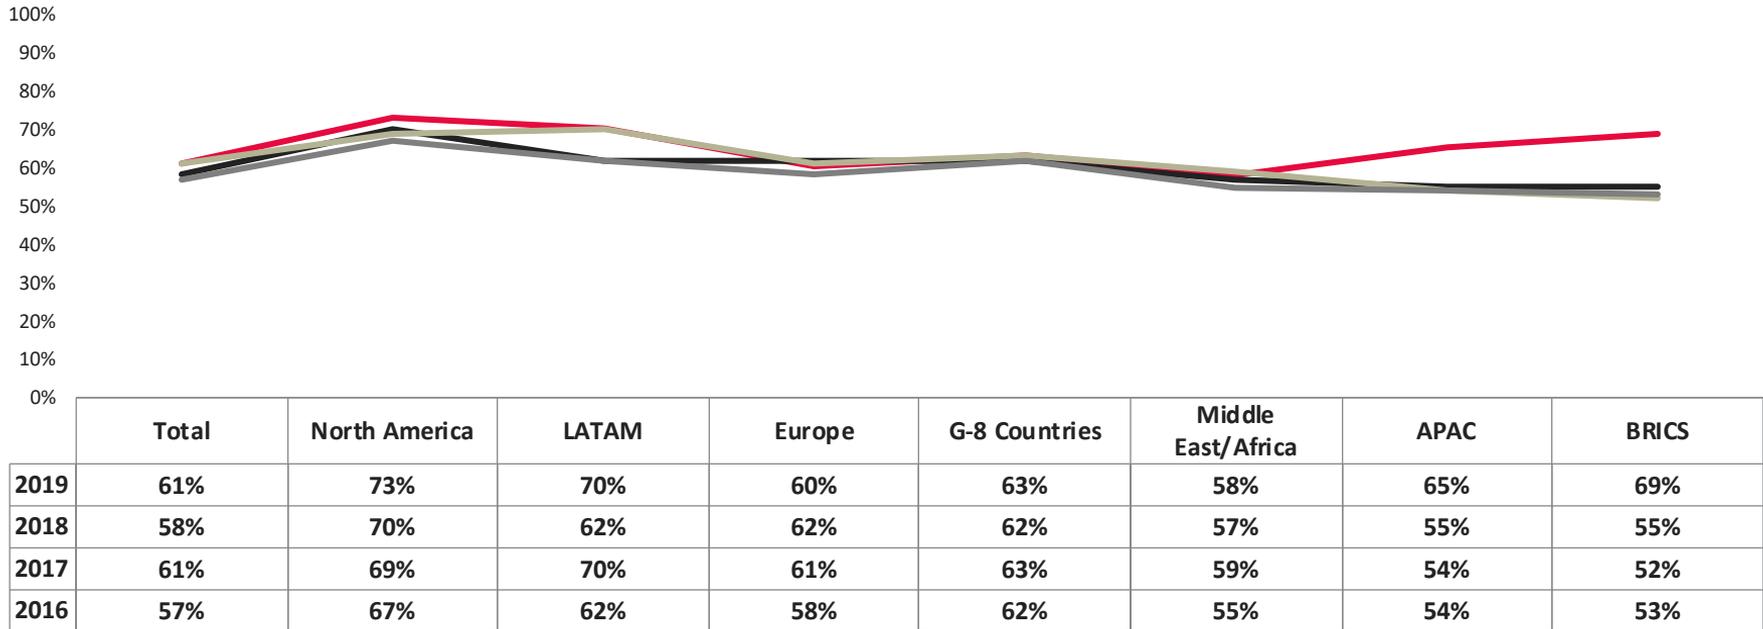

## FOREIGN GOVERNMENTS

There has been a sizeable increase in the proportion of BRICS (+14 pts), APAC (+10) & LATAM (+8) citizens who believe that foreign governments are at least *somewhat responsible* for heightening their privacy concerns.

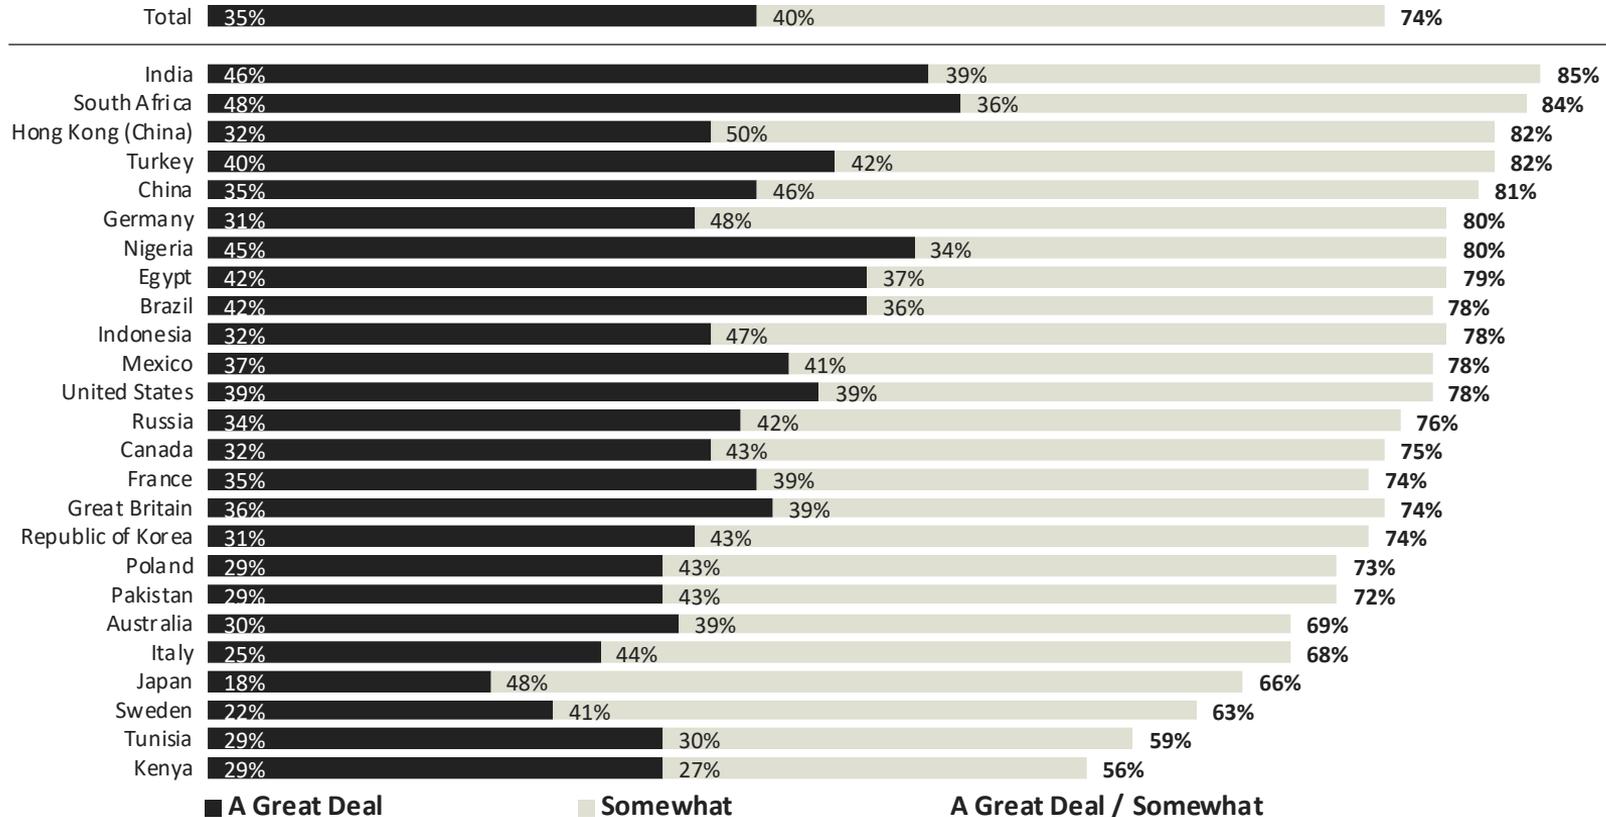

### Tracking – [NET] A GREAT DEAL / SOMEWHAT

— 2019 — 2018 — 2017 — 2016

## INTERNET COMPANIES

Three quarters (74%) of global citizens feel as though Internet companies have been part of the problem when it comes to increasing concerns about online privacy.

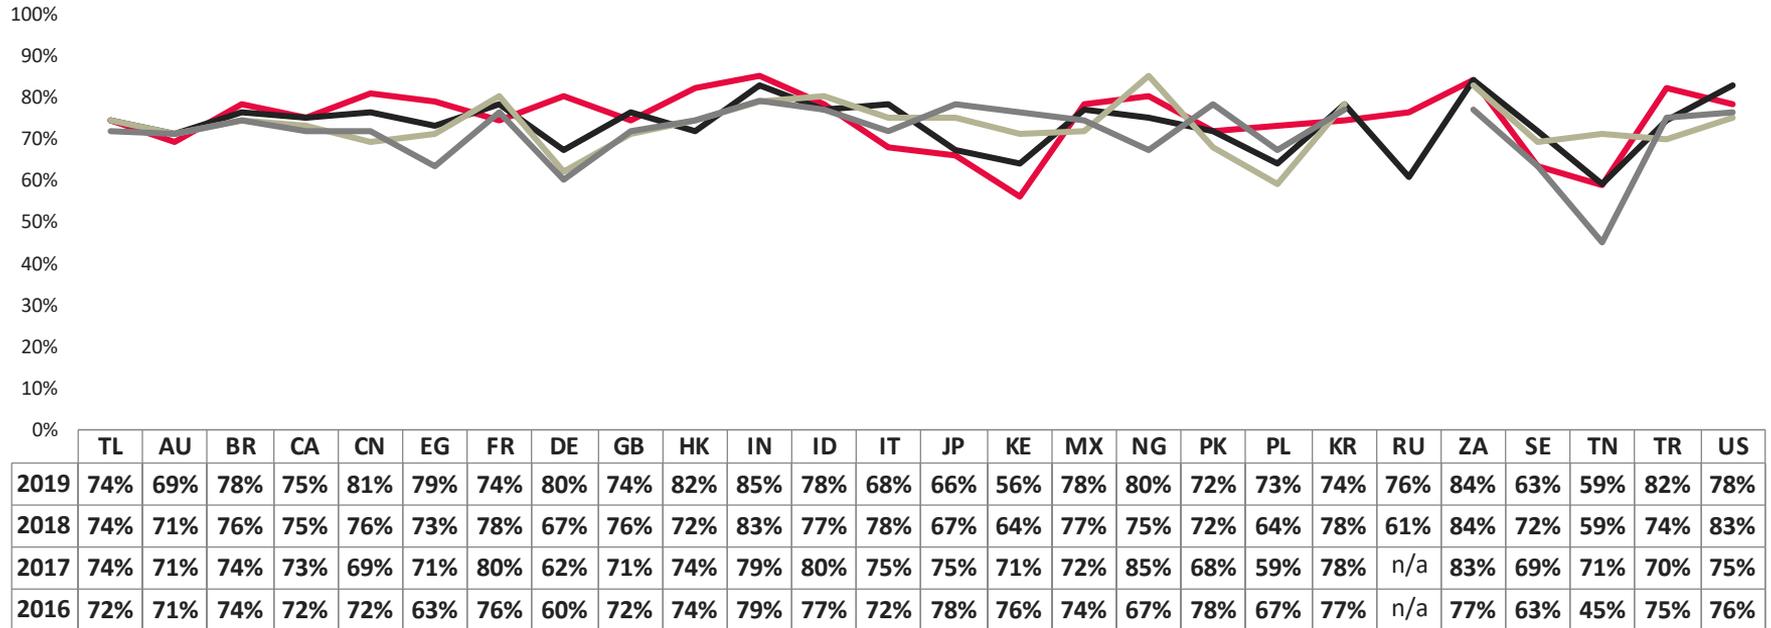

## INTERNET COMPANIES

Relative to the 2018 survey, opinions are unchanged as three in four (74%) continue to ascribe at least some responsibility to Internet companies.

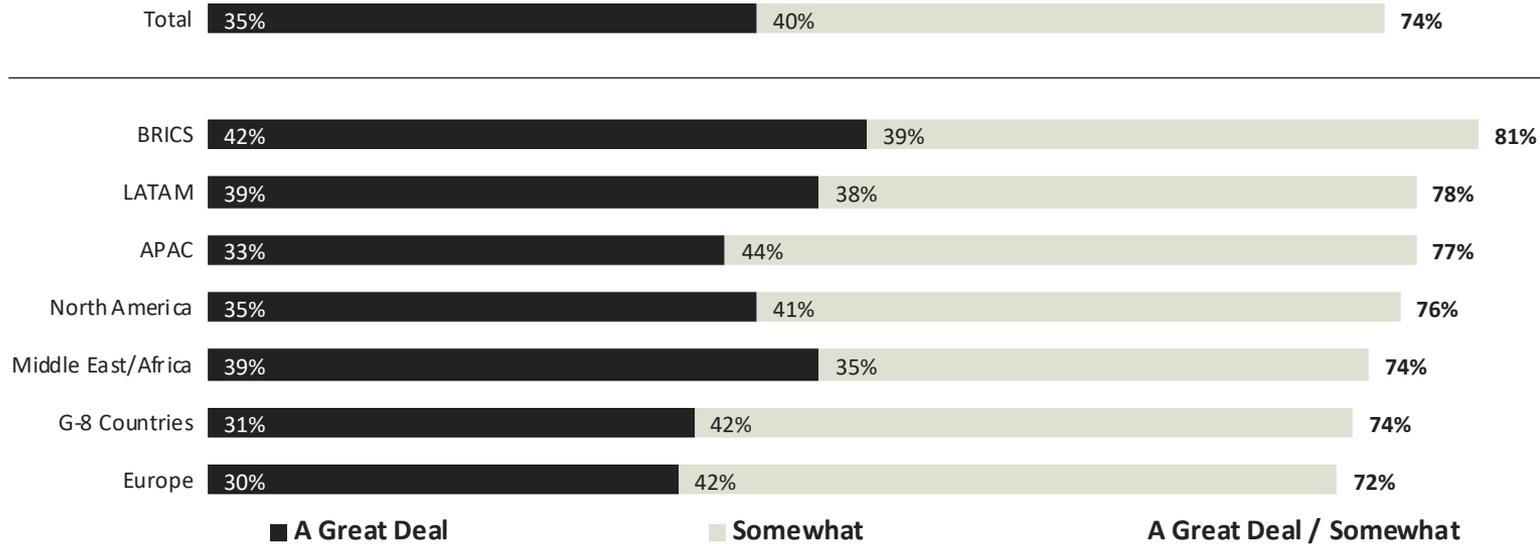

Tracking – [NET] A GREAT DEAL/SOMEWHAT

— 2019 — 2018 — 2017 — 2016

## INTERNET COMPANIES

There is less regional variation, with between seven & eight in ten across all regions acknowledging that Internet companies are at least *somewhat responsible* for increasing their online privacy concerns.

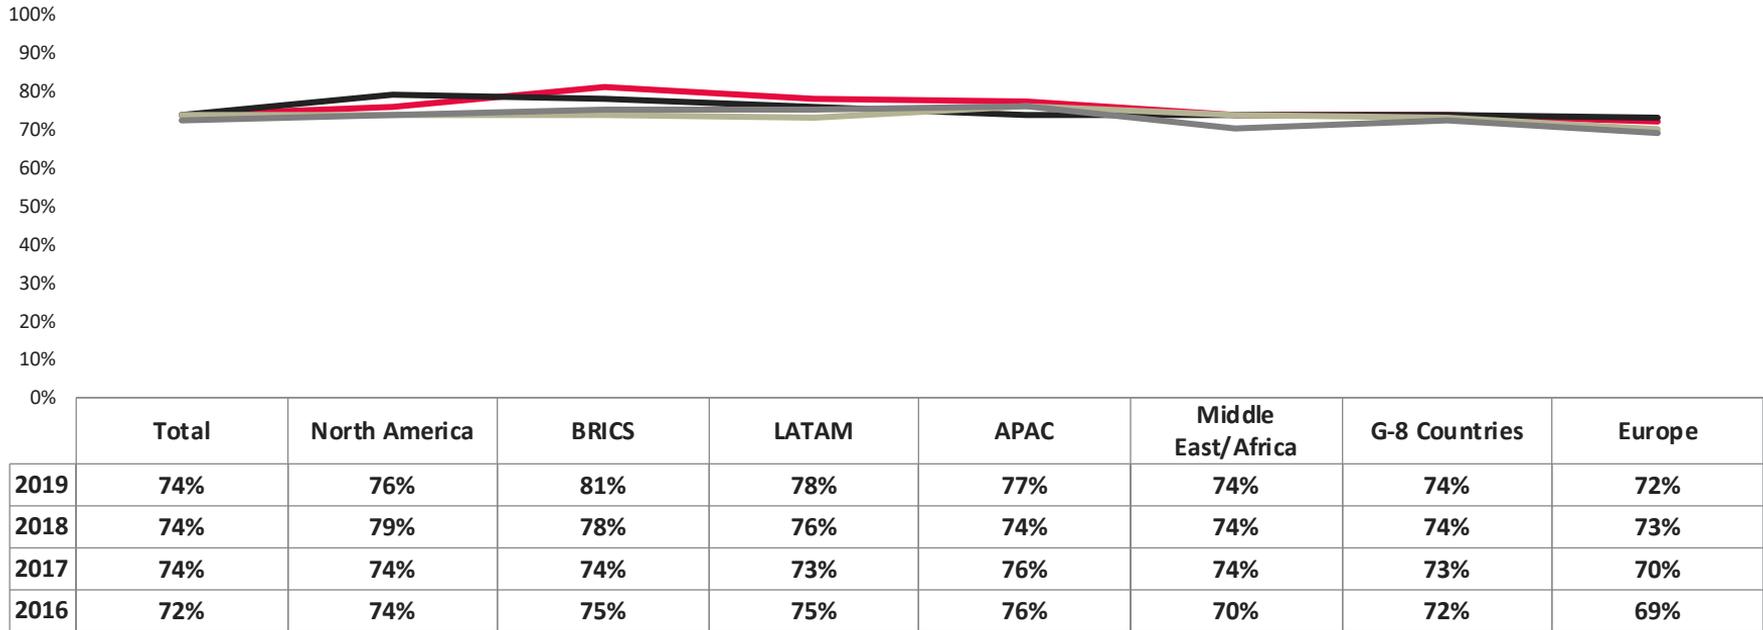

## INTERNET COMPANIES

Over the past year, there has been limited regional movement on this metric.

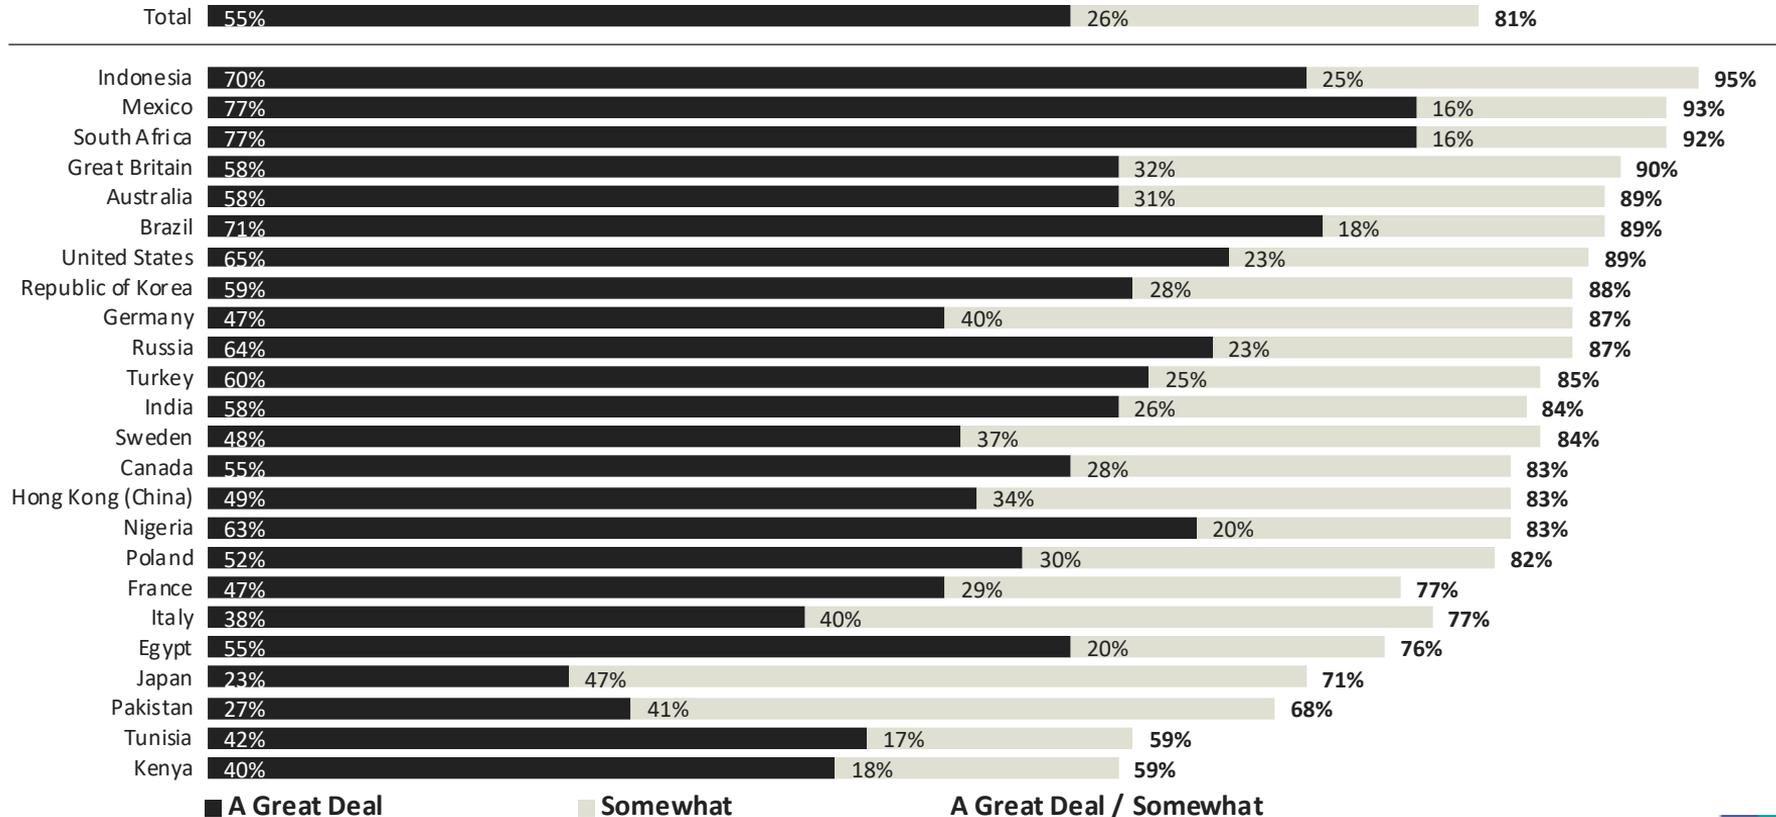

### Tracking – [NET] A GREAT DEAL / SOMEWHAT

— 2019 — 2018 — 2017 — 2016

## CYBER CRIMINALS

The vast majority (81%) of global citizens think that cyber criminals have contributed, at least *somewhat*, to increasing their online privacy concerns, including virtually all Indonesians (95%).

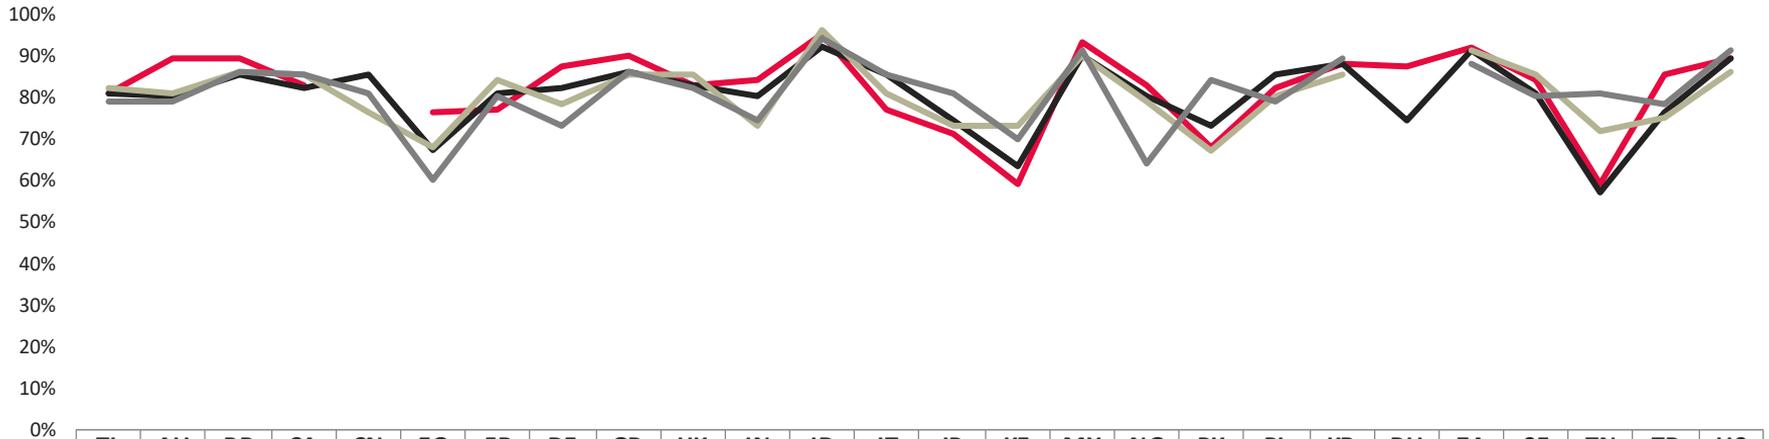

## CYBER CRIMINALS

Regarding cyber criminals, the greatest year-over-year shifts in opinion occurred in Russia (+13 pts), Turkey (+9), Egypt (+9), Australia (+9), and Italy (-8).

## CYBER CRIMINALS

Once again, there is limited regional variation in opinion, though concerns are more pronounced in LATAM (91% say their opinions have been influenced by cyber criminals) and less so in the Middle East & Africa (76%).

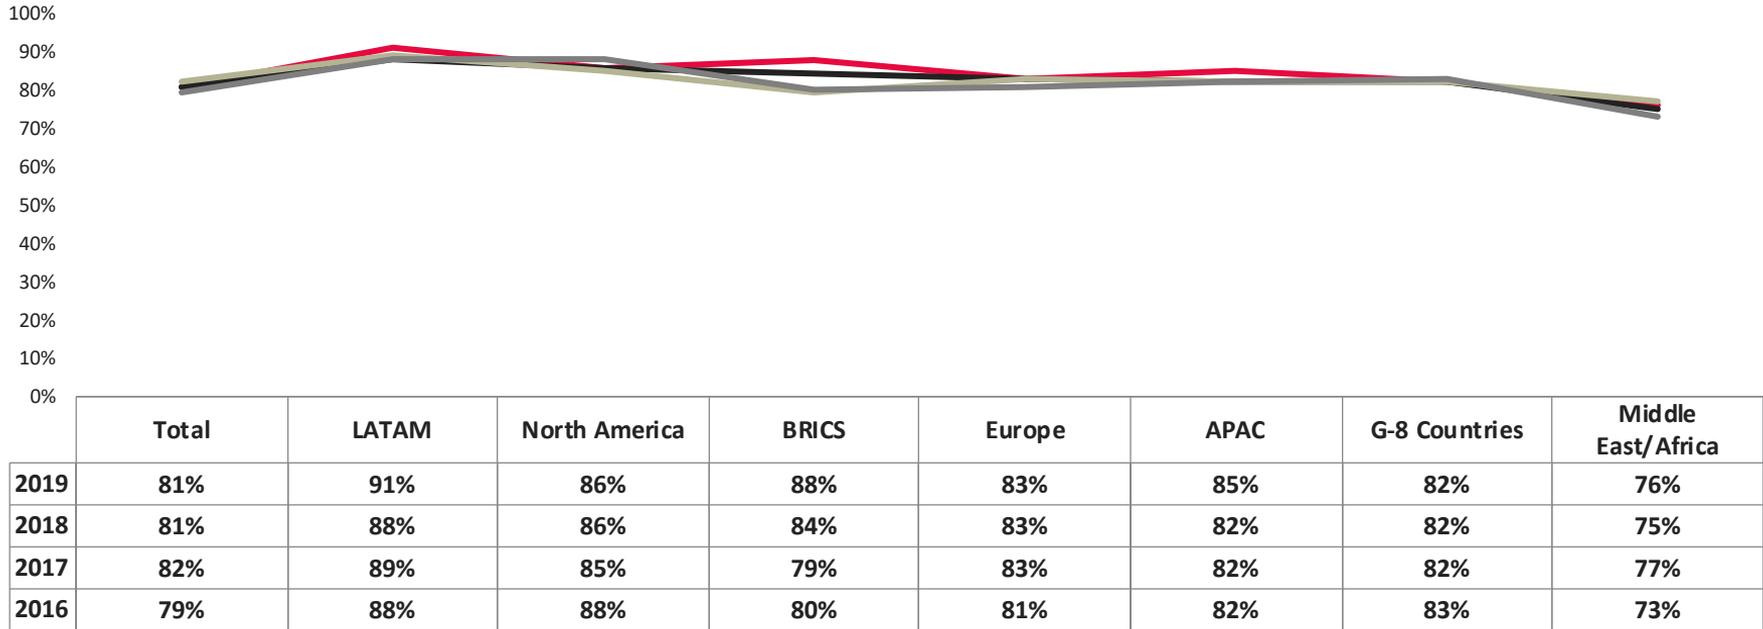

## CYBER CRIMINALS

Compared to a year ago, there has been limited movement in opinion, across all regions.

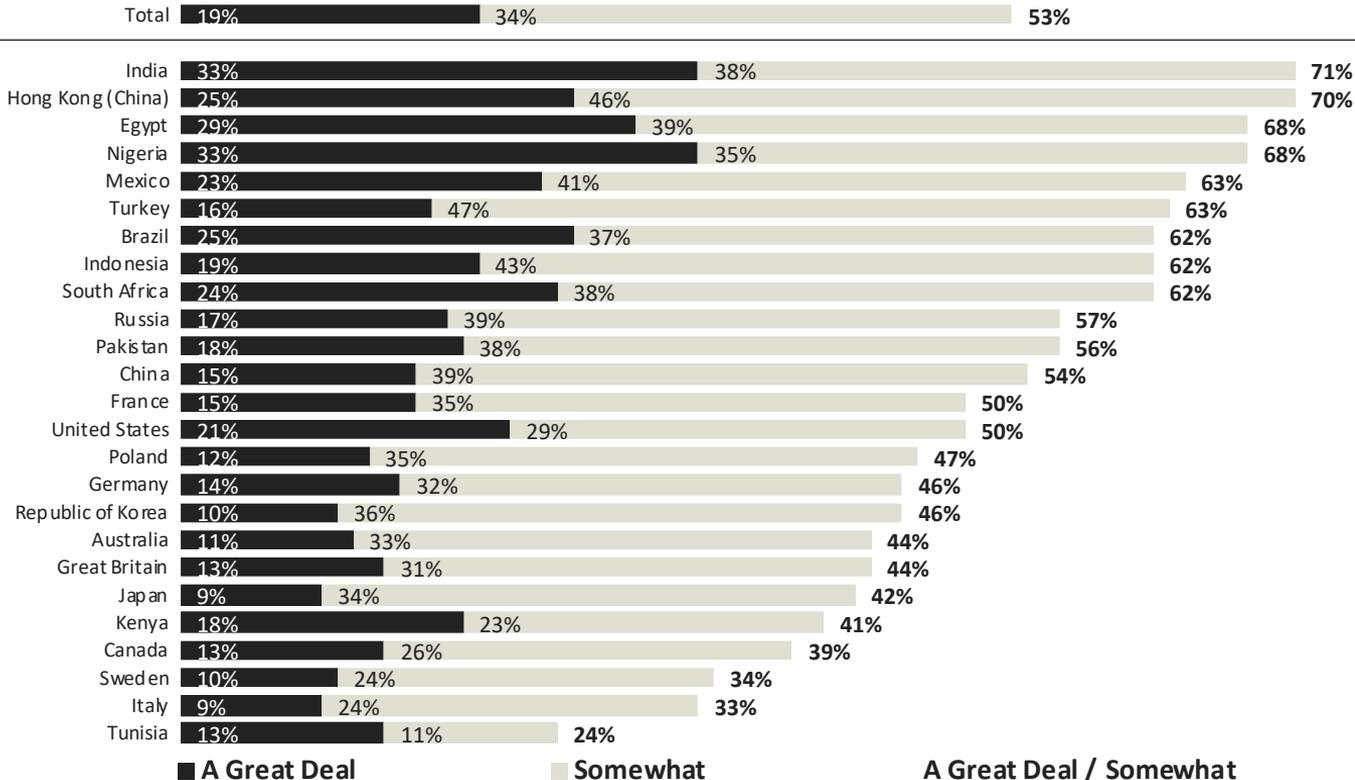

### Tracking – [NET] A GREAT DEAL / SOMEWHAT

— 2019 — 2018 — 2017 — 2016

## EMPLOYERS

A majority (53%) cite their employer as a contributing factor when it comes to online privacy concerns, ranging from seven in ten in India (71%) & Hong Kong (China) (70%) to just one quarter (24%) in Tunisia.

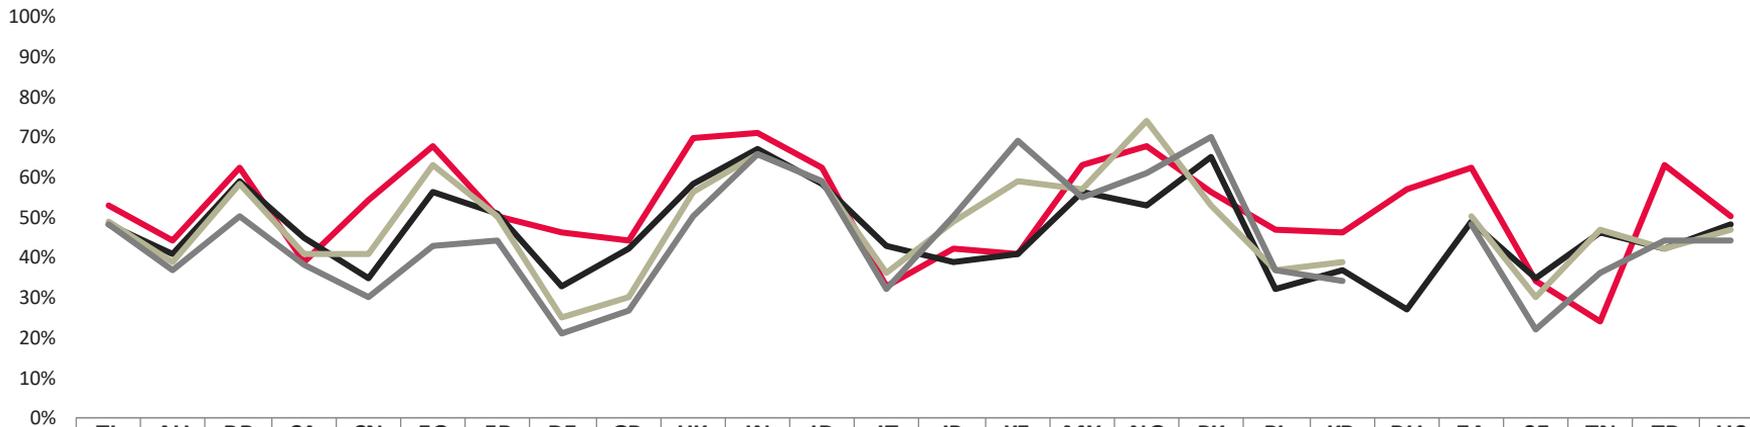

A Great Deal / Somewhat

## EMPLOYERS

There has been a significant increase (+5 pts) in the incidence of global citizens who are concerned about their employer jeopardizing their online privacy, with the largest increases occurring in Russia (+30), Turkey (+21), and China (+19). Somewhat interestingly, Tunisia (-22) registers a sizeable drop on this metric.

## EMPLOYERS

Online privacy concerns as they relate to employers tend to be much higher in developing economies.

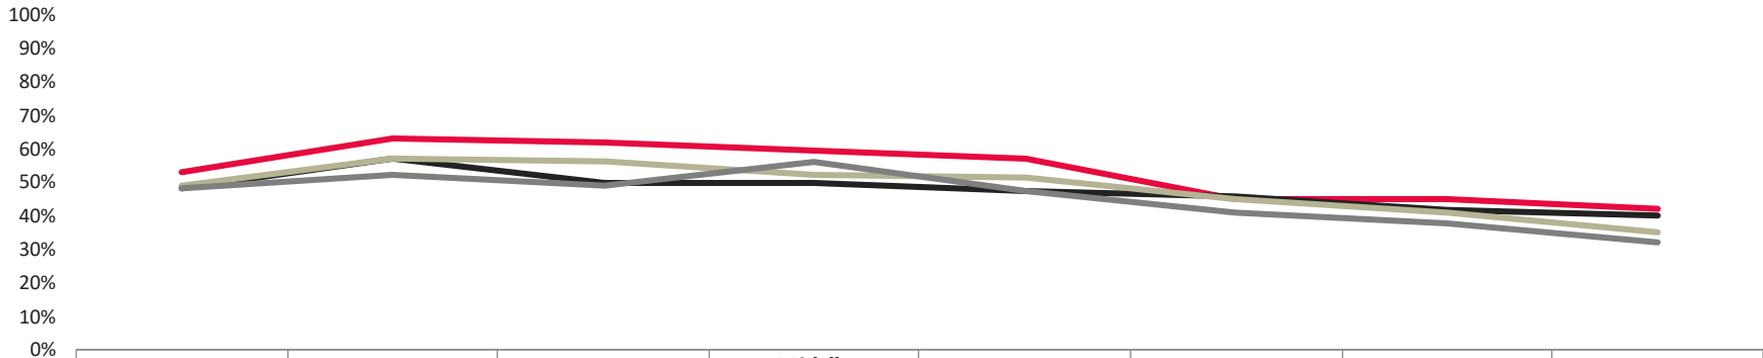

## EMPLOYERS

Across all regions, save for North America, there has been an increase in the proportion who assign at least some blame to their employer, for increasing their online privacy concerns. The greatest shifts in opinion are in the BRICS (+12 pts), APAC (+10), and the Middle East & Africa (+9).

### Tracking – [NET] A GREAT DEAL / SOMEWHAT

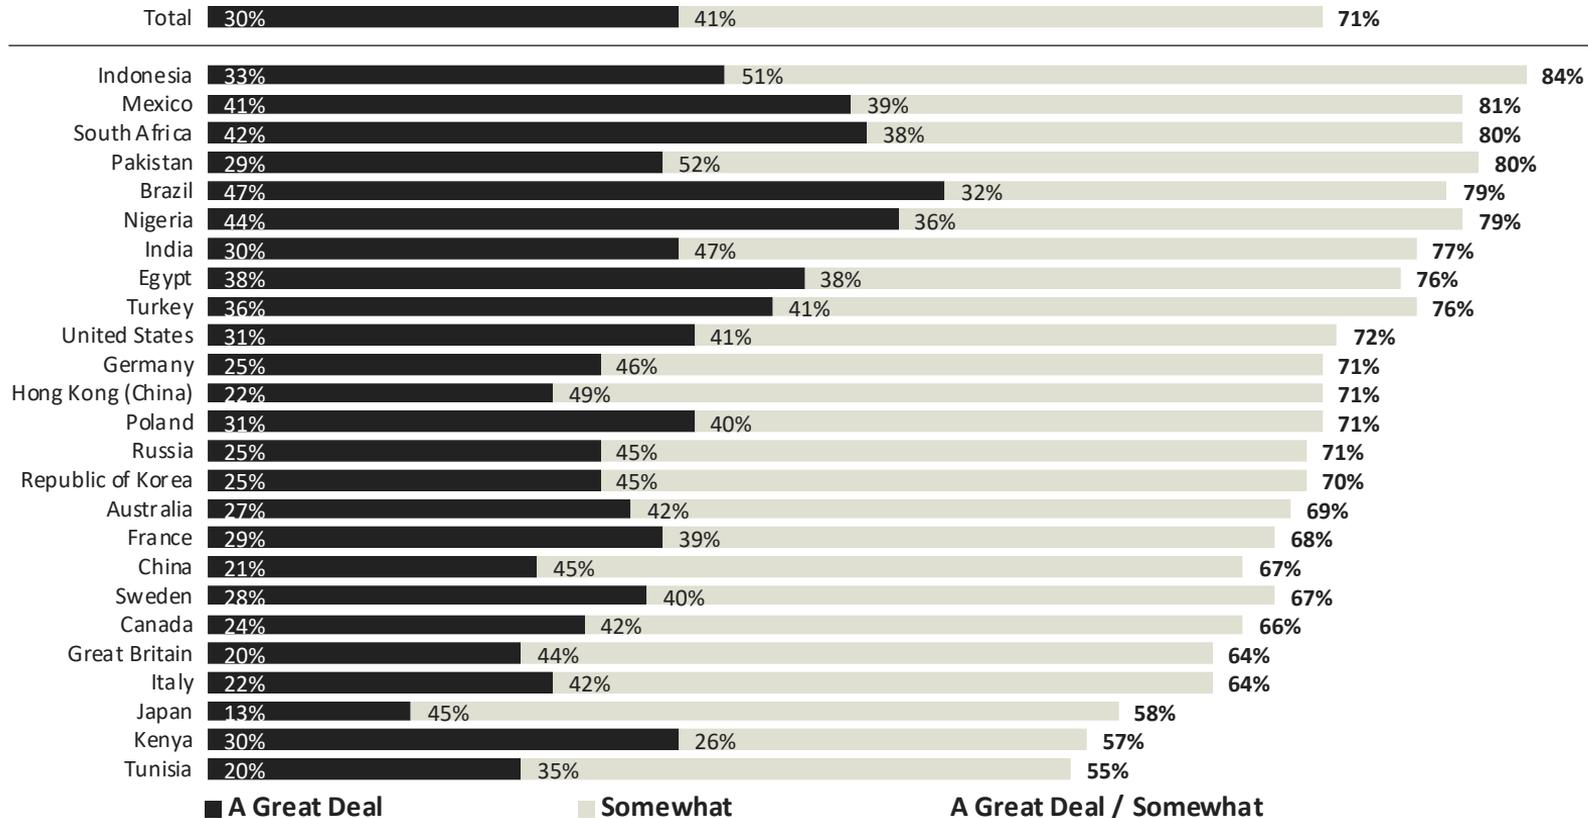

— 2019 — 2018 — 2017 — 2016

## OTHER INTERNET USERS

Citizens living in developing economies tend to be more inclined to think that other Internet users are contributing to their online privacy concerns.

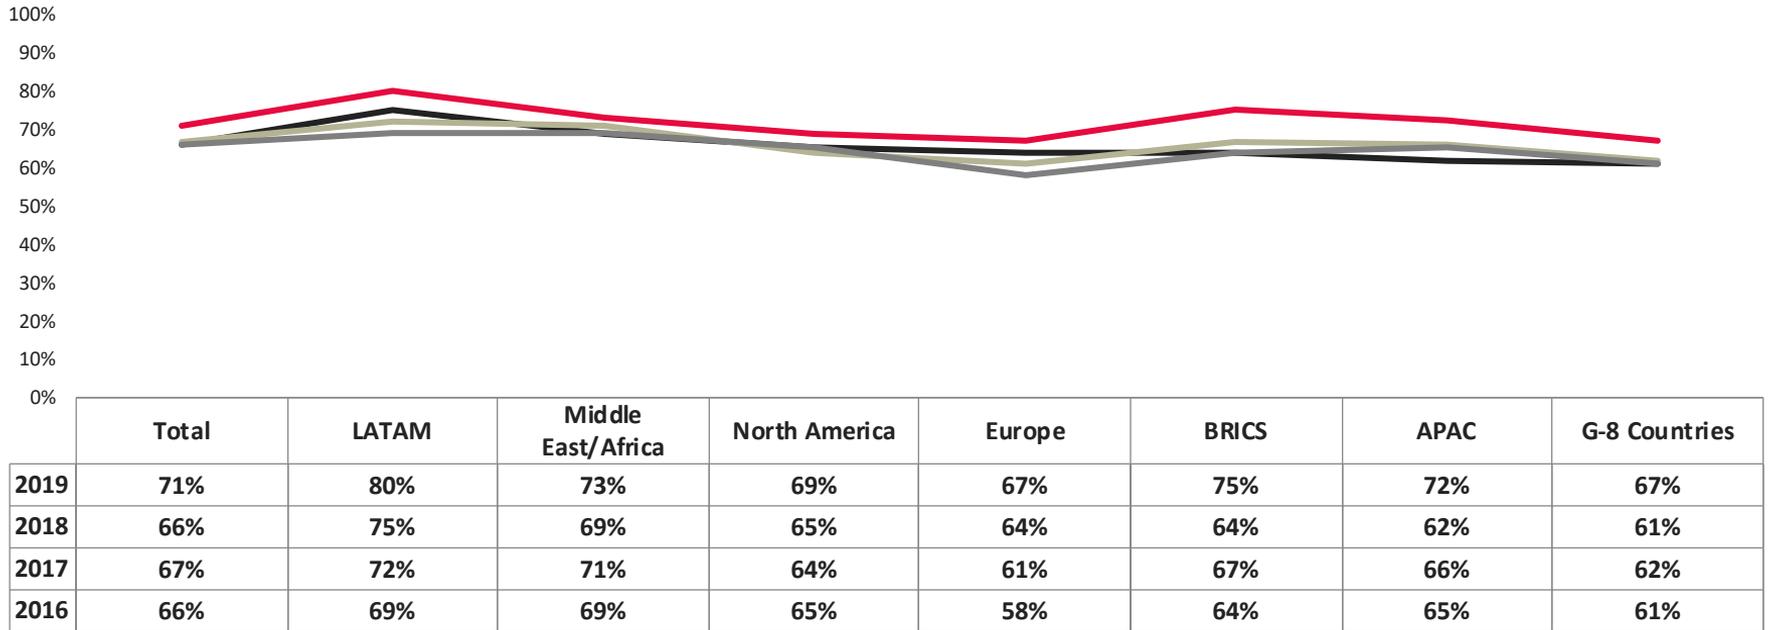

## OTHER INTERNET USERS

Across all regions, a higher proportion think that other Internet users contribute to online privacy concerns, compared to a year ago, with the largest increases occurring in the BRICS (+11 pts) & APAC (+10) economies.

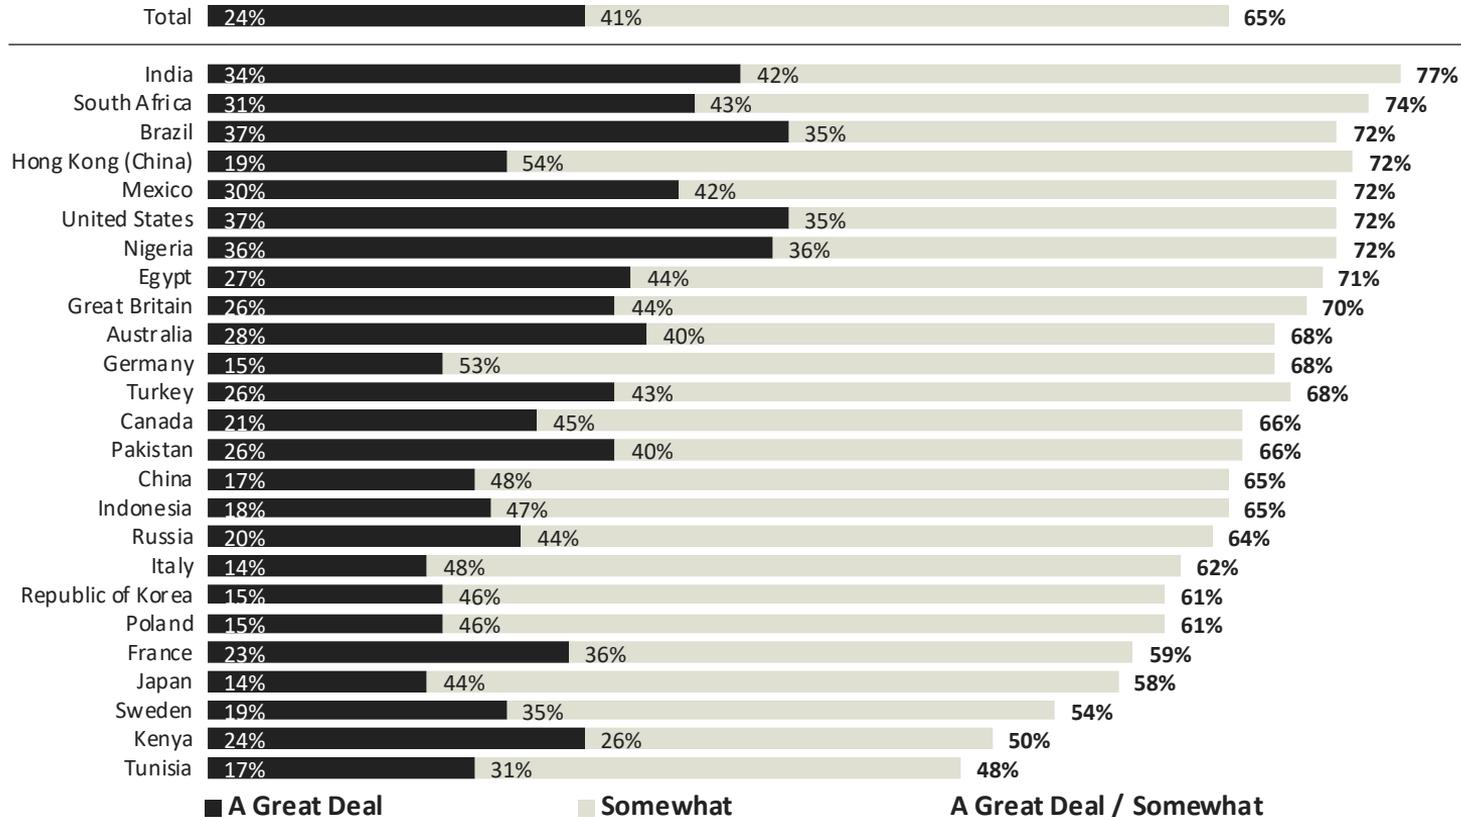

### Tracking – [NET] A GREAT DEAL / SOMEWHAT

— 2019 — 2018 — 2017 — 2016

## COMPANIES IN GENERAL

Two-thirds (65%) of global citizens think that private companies are at least *somewhat responsible* for their online privacy concerns. Aside from Tunisia & Kenya, however, majorities in all economies feel this way.

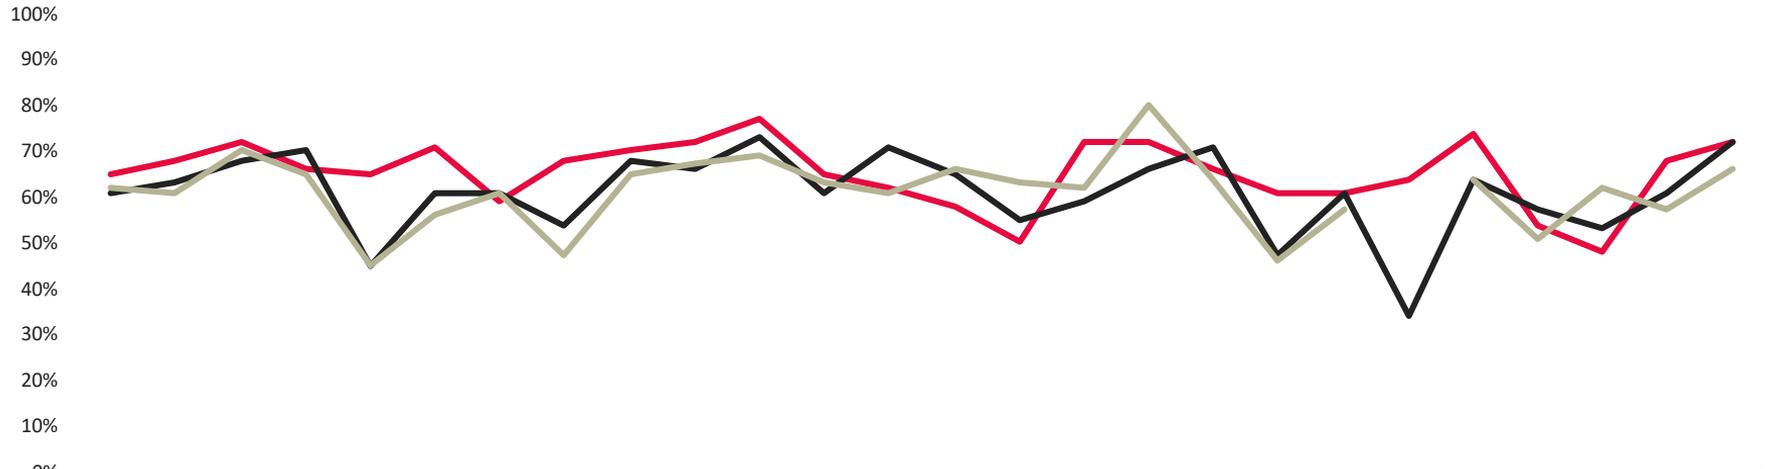

## COMPANIES IN GENERAL

Over the past year, there has been an increase (+4 pts) in the proportion of global citizens who think that private companies are contributors, a figure which is largely driven by those living in Russia (+30) & China (+20).

## COMPANIES IN GENERAL

Regionally, there is limited variation, with most assigning at least some responsibility to companies in general in each of the regional economies surveyed.

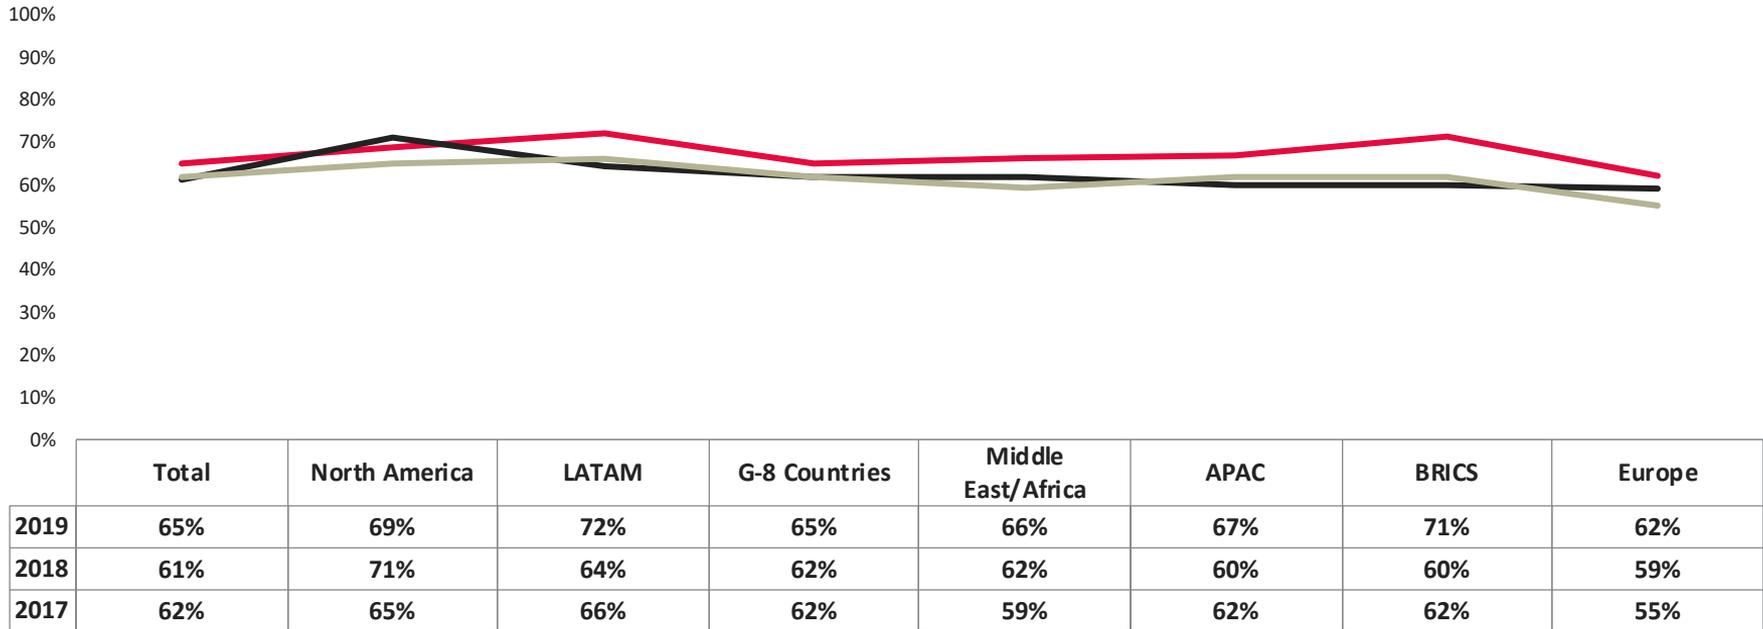

## COMPANIES IN GENERAL

Since 2018, the proportion who view companies as being at least partially responsible has increased in all regions, save for North America (-2 pts), with the BRICS economies registering the largest increase (+11), over the previous wave.

# ONLINE BEHAVIOUR CHANGES

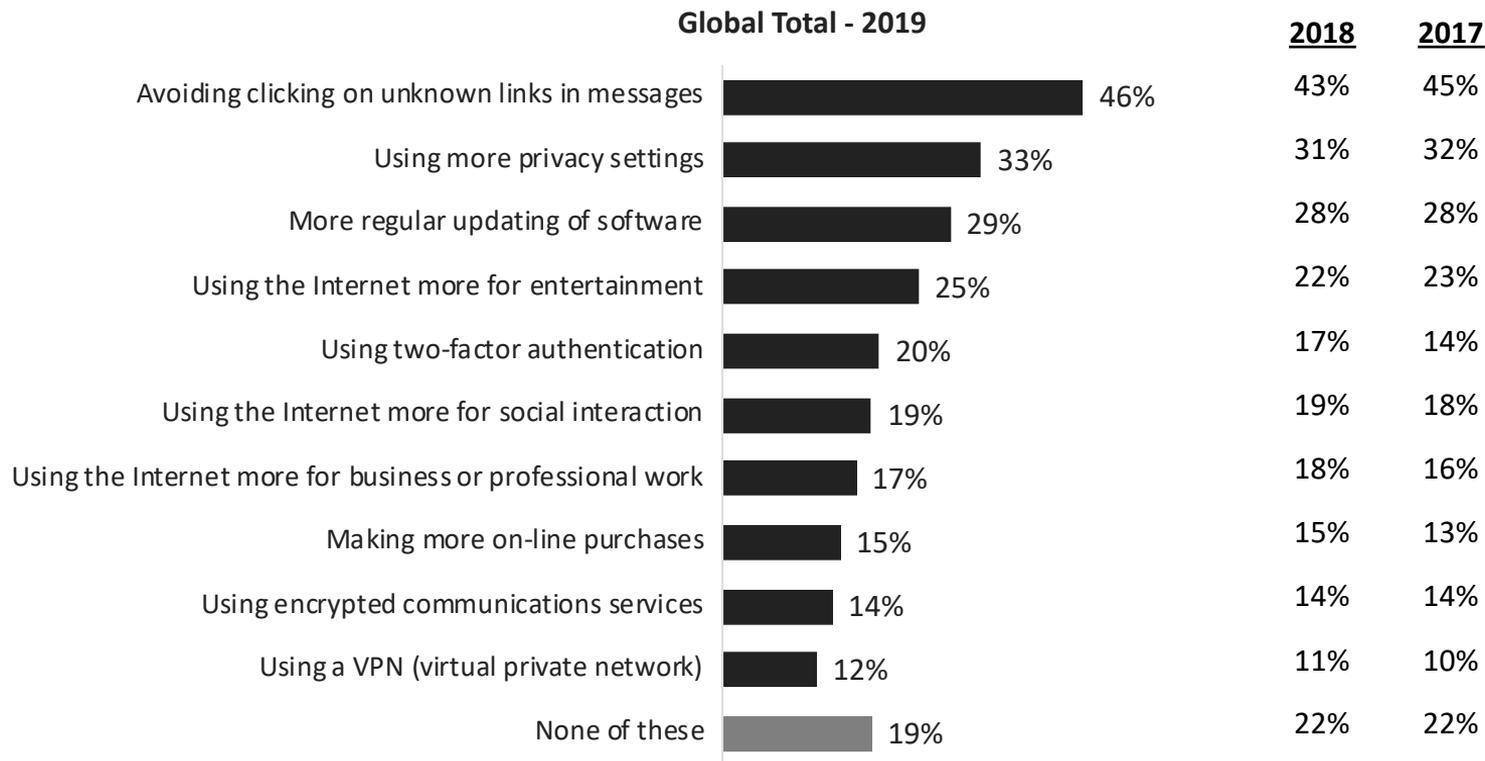

Global citizens are a little more likely to have taken most protective actions, over the past year, save for making fewer online purchases.

## Behavioural changes tend to be more pronounced in the developing economies of the world.

Consistent with the previous wave, avoiding clicking on unknown links & using more privacy settings continue to be the most frequently cited protective online behaviours by global citizens (and growing), when asked to describe how they have changed their online behaviours, over the past year. Two-factor authentication (20%) has grown the most since 2017.

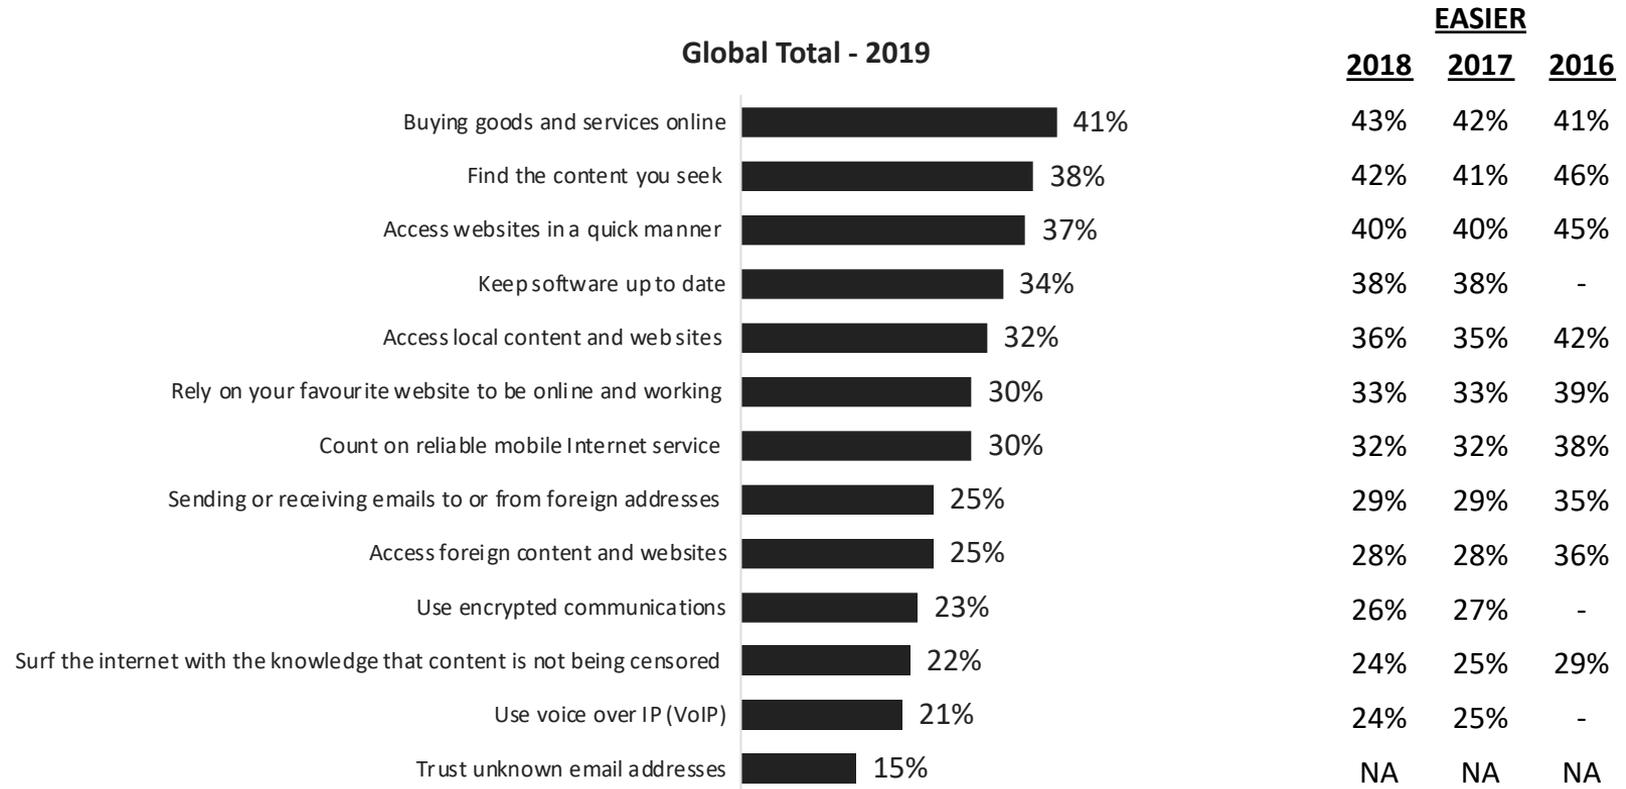

Those living in the BRICS economies are more likely to indicate that they are changing their behaviours in most of the below ways.

|   | REGIONS        |               |               |               |               |               |               |                    |

# INTERNET ACCESS VS. ONE YEAR AGO

Overall, fewer global citizens indicate that it has become *easier* for them to do each of the below activities on the Internet, compared to a year ago, and the longer-term trend appears downwards. For example, only 32% say it's easier to access local content and websites than a year ago – down 10 points since 2016.

## ACCESS FOREIGN CONTENT AND WEBSITES

The vast majority (86%) of global citizens think that it is *easier* (25%) or about *as easy* (61%) to access foreign content online, compared to a year ago. Despite this, a greater proportion in the US, China, Japan, Australia, the Republic of Korea, Russia & France actually think that accessing such content has become *harder* instead of *easier*.

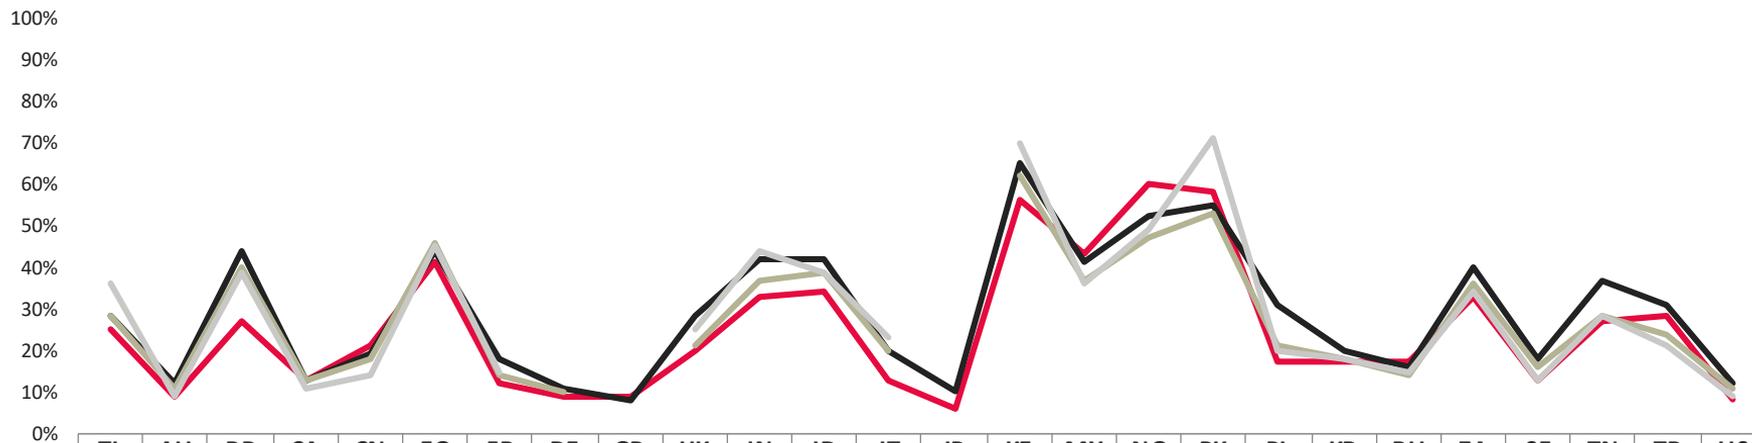

## ACCESS FOREIGN CONTENT AND WEBSITES

Global citizens are less likely to perceive foreign content as being *easier* to access (-3 pts since 2018 and -11 since 2016).

## ACCESS FOREIGN CONTENT AND WEBSITES

Citizens in the Middle East & Africa are over four times more likely, compared to those in Europe, North America & the G-8, to think that it is *easier* to access foreign content & websites, compared to a year ago. This is perhaps not surprising, given growing internet penetration rates in those markets.

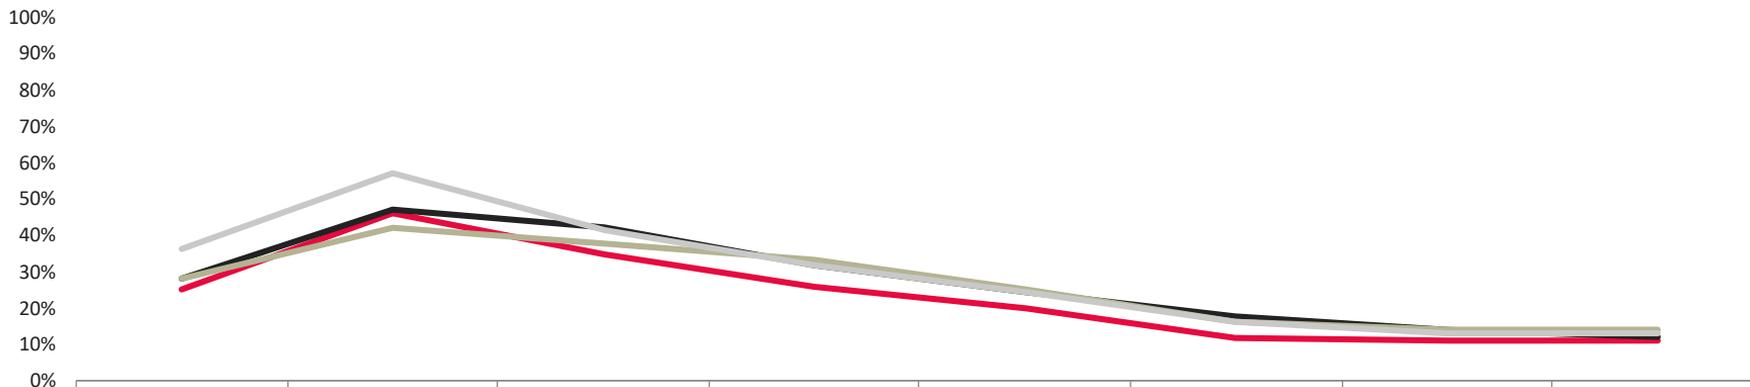

## ACCESS FOREIGN CONTENT AND WEBSITES

Across all regions, scores are down (-3 since 2018, -11 since 2016), with the most substantial drops since last year occurring in LATAM (-7 pts), BRICS (-6) & Europe (-6). This is due to more citizens feeling as though ease of access is about the *same*.

Tracking – EASIER

## ACCESS LOCAL CONTENT AND WEBSITES

Well over nine in ten (93%) global citizens think that it is *easier* (32%) or about *as easy* (61%) to access local content online, compared to a year ago.

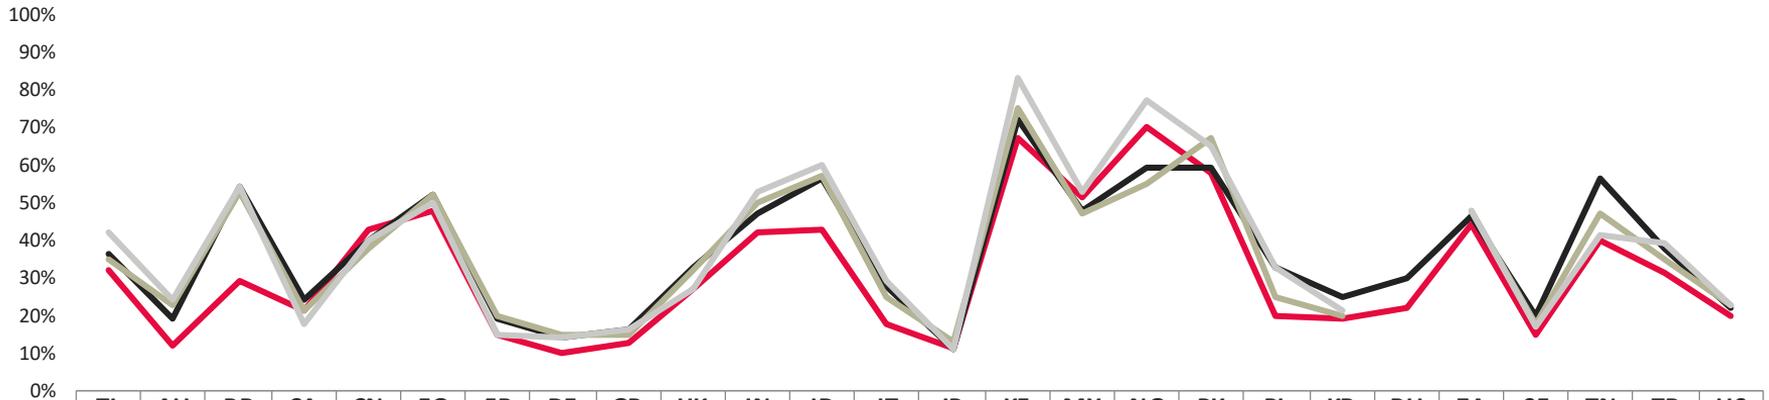

## ACCESS LOCAL CONTENT AND WEBSITES

There has been a drop since last year (-4 pts) in the share of global citizens who think that local content has become *easier* to access (-10 since 2016), with the steepest wave-over-wave decline occurring in Brazil (-25 pts). This is, again, not surprising, as more now rate access as being about the *same*.

## ACCESS LOCAL CONTENT AND WEBSITES

Regardless of economy, few think that access to local content & web sites has become more restrictive, over the past year.

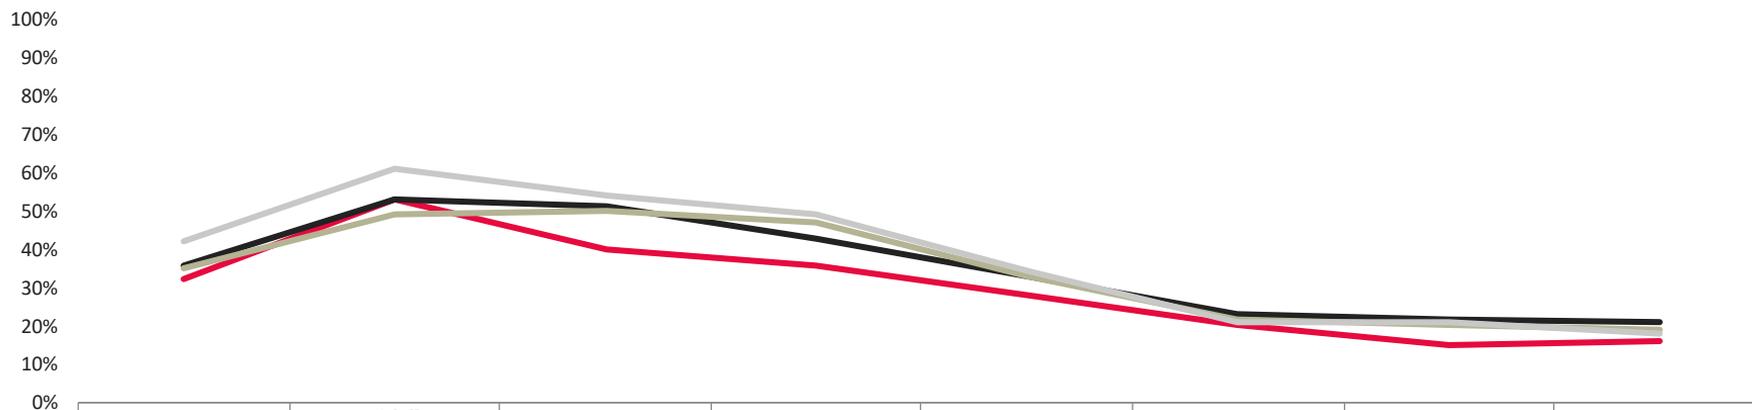

## ACCESS LOCAL CONTENT AND WEBSITES

Scores are lower across the board, with LATAM registering the largest drop (-11 pts), wave over wave. Again, this has more to do with ease of access stagnating than a perception that it has become more difficult.

Tracking – EASIER

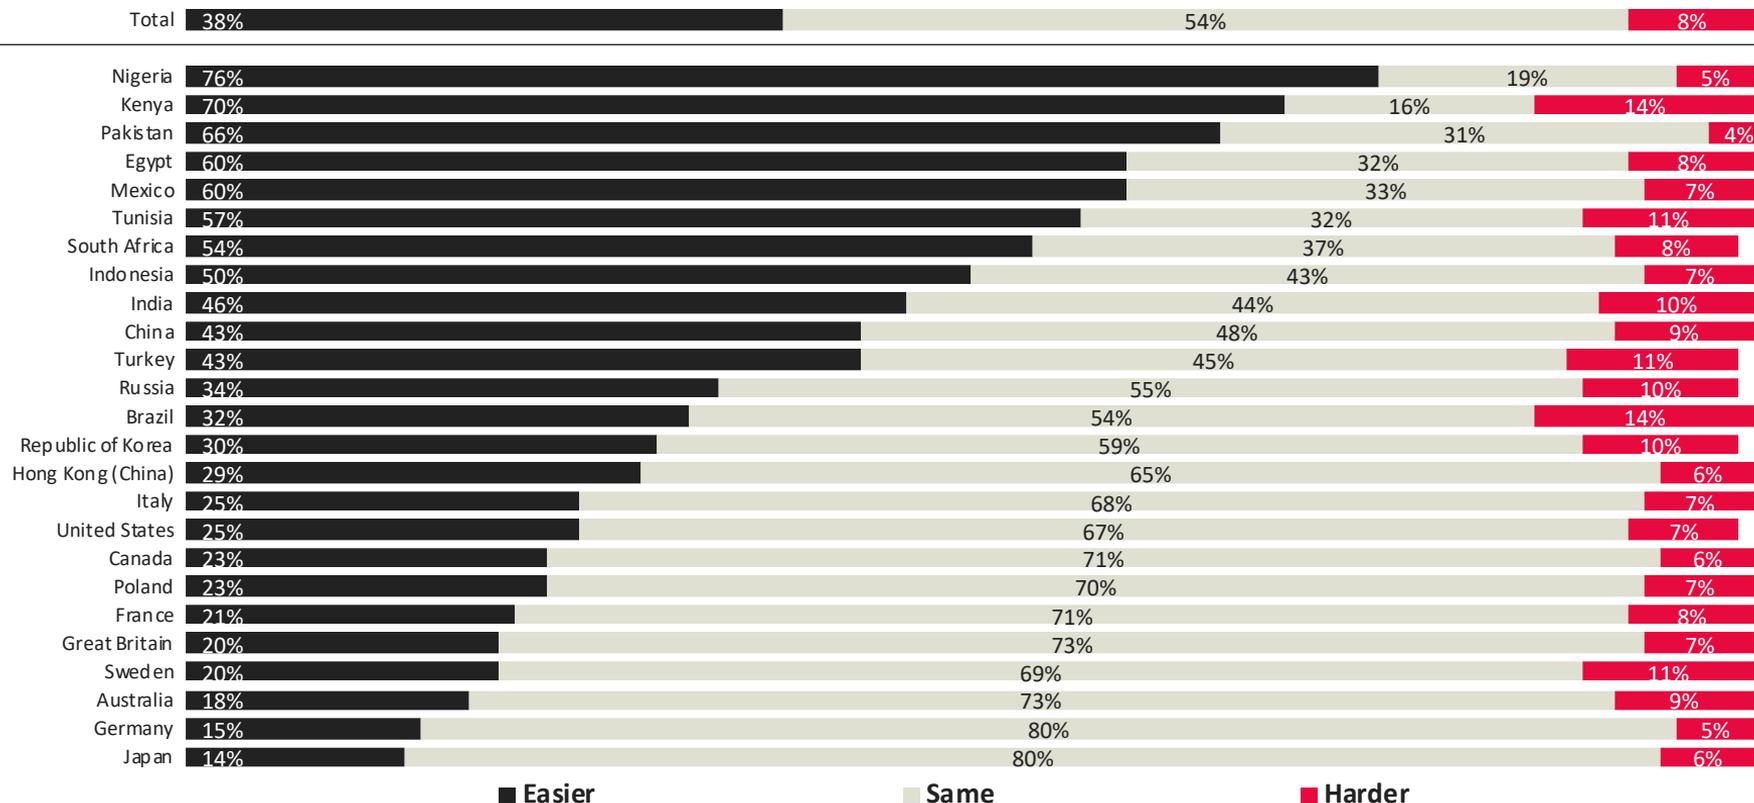

— 2019 — 2018 — 2017 — 2016

|      | Total | Middle East/Africa | LATAM | BRICS | APAC | North America | Europe | G-8 Countries |
|------|-------|--------------------|-------|-------|------|---------------|--------|---------------|
| 2019 | 32%   | 53%                | 40%   | 36%   | 28%  | 20%           | 15%    | 16%           |

## FIND THE CONTENT YOU SEEK

Well over nine in ten (92%) global citizens think it is as easy (54%) or *easier* (38%) to find the content they seek, compared to a year ago. Regardless of economy, few perceive this as being *harder* to do than in 2018.

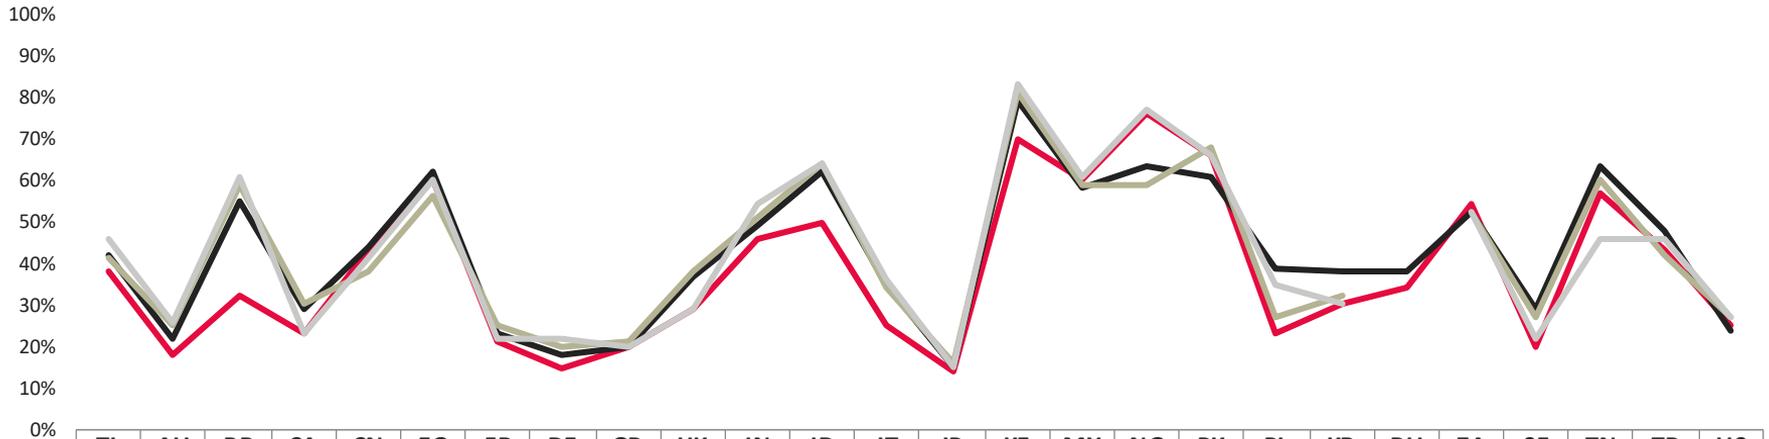

## FIND THE CONTENT YOU SEEK

Overall, global citizens are less likely to indicate that it is easier to find the content they seek (-4 since 2018, -8 since 2016), compared to the previous wave, as more now rate it about the *same*, a figure which is consistent with recent trends.

## FIND THE CONTENT YOU SEEK

Citizens living in developing economies tend to think that it is *easier* to find the content they seek, compared to a year ago. On the other hand, those living in more developed economies mostly rate this as being unchanged.

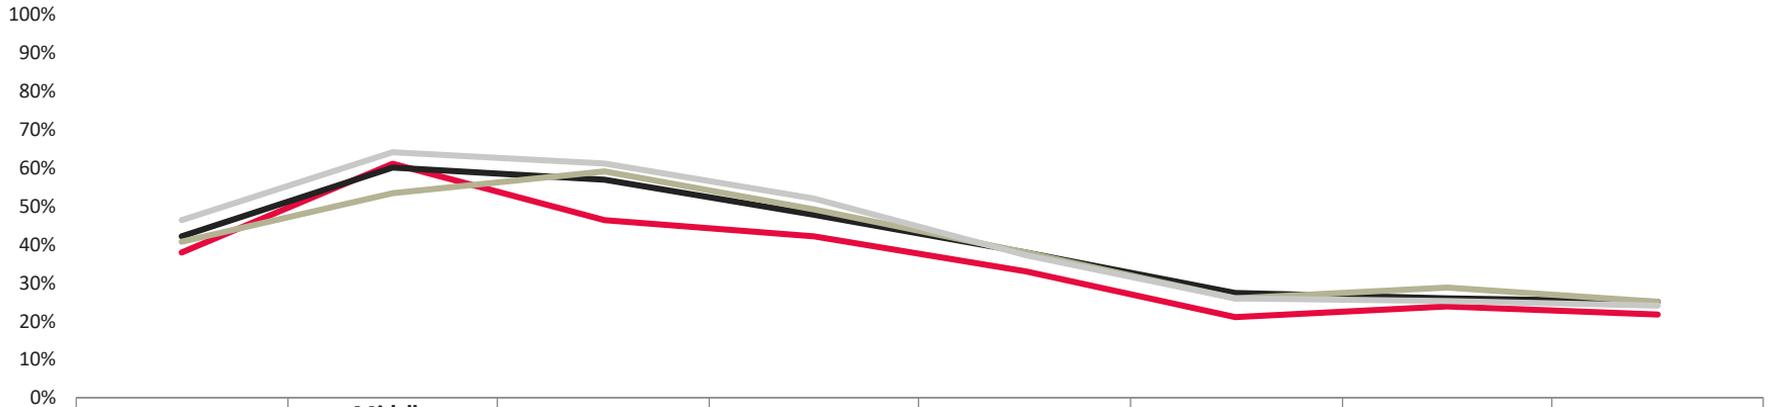

## FIND THE CONTENT YOU SEEK

Overall, a lower proportion of global citizens think that it is easier to find the content they seek, compared to last year's survey (-4 pts). This is because a higher share of global citizens would describe their ease of access as being relatively unchanged, over the past year.

## ACCESS WEBSITES IN A QUICK MANNER

Those living in developing economies, such as the Middle East, Africa & LATAM, tend to be among the most likely to think that it has become *easier* to access websites in a quick manner, over the past year.

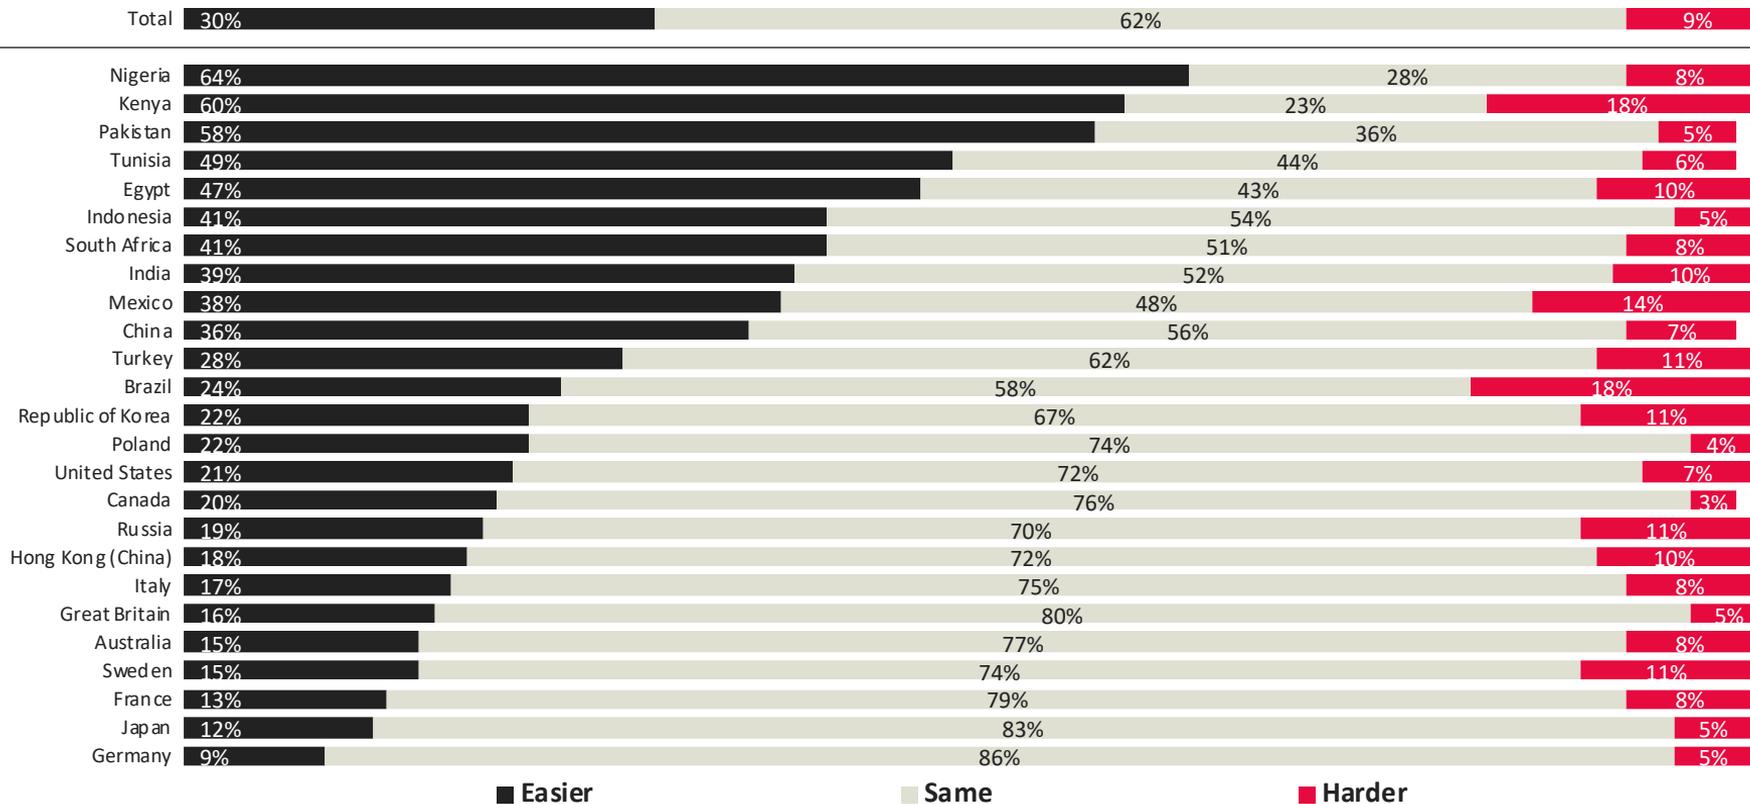

## ACCESS WEBSITES IN A QUICK MANNER

The LATAM economies (-10 pts) have registered the greatest wave-over-wave movement in opinion on this metric.

## RELY ON YOUR FAVOURITE WEBSITE TO BE ONLINE AND WORKING

Similarly, around nine in ten (92%) indicate that it is *easier* (30%), or about as easy (62%), for them to rely on their favourite website to be online and working.

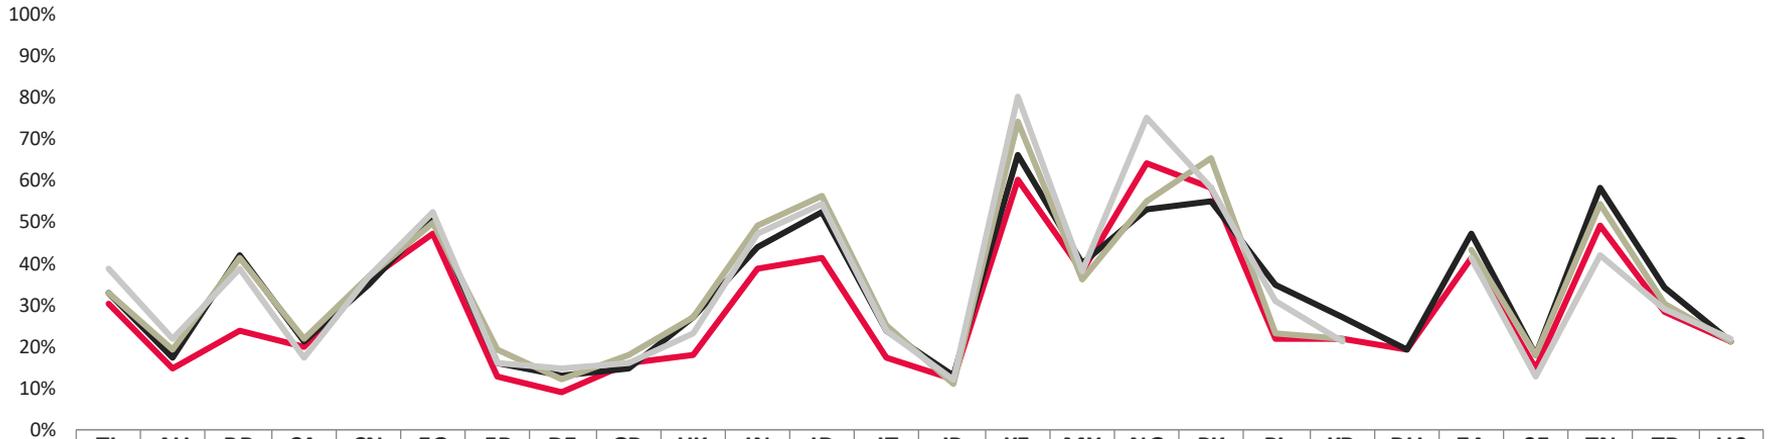

## RELY ON YOUR FAVOURITE WEBSITE TO BE ONLINE AND WORKING

While global citizens are less likely to indicate that it is *easier* to rely on their favourite website (-3 since 2018, -9 since 2016), this is generally because more of them would now describe the ease of difficulty as being about the *same* as it was, a year ago. Brazil registers the greatest wave-over-wave shift in opinion on this metric (-18 pts).

## COUNT ON RELIABLE MOBILE INTERNET SERVICE

Those living in the Middle East & Africa are nearly three times more likely, compared to Europeans, North Americans & G-8 citizens, to claim that it has become *easier*, relative to a year ago, for them to count on reliable mobile Internet service.

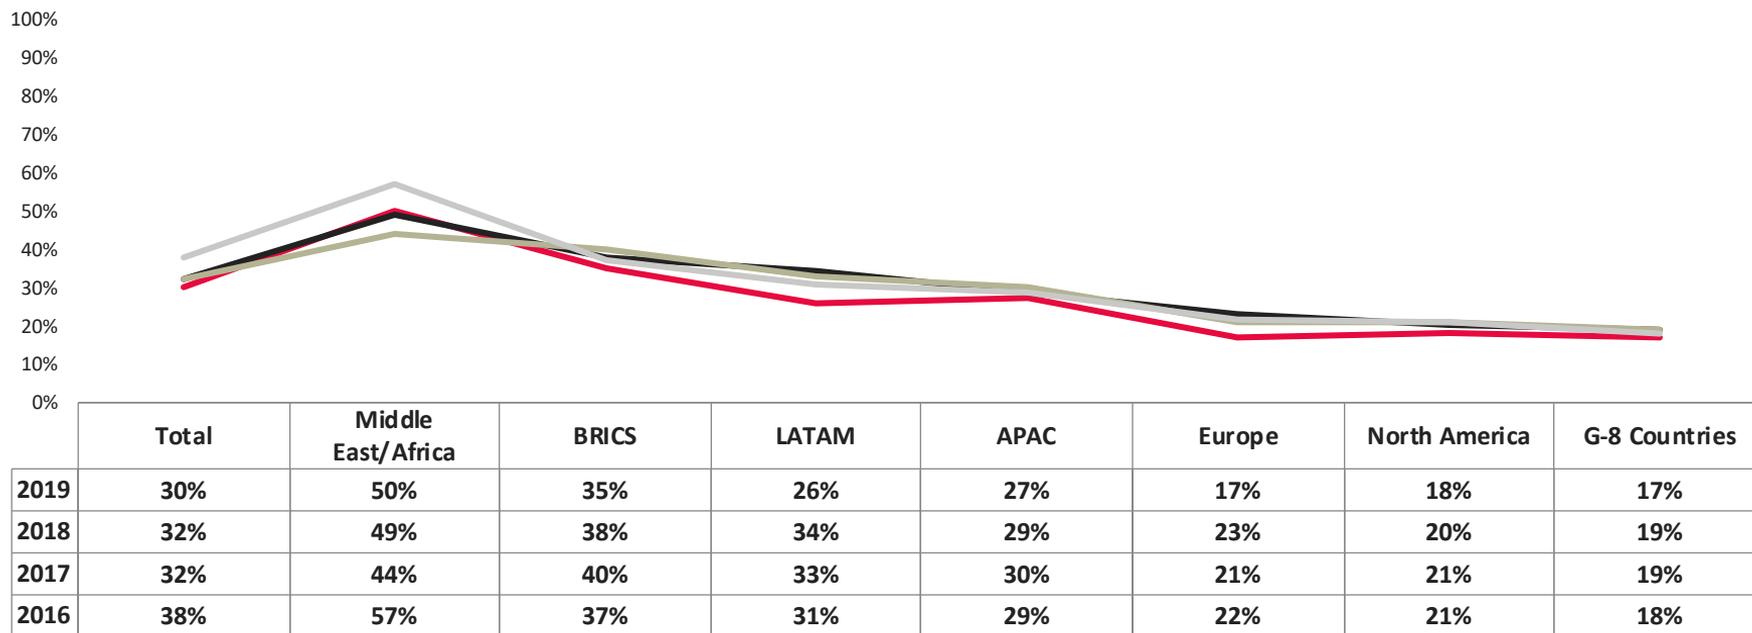

## COUNT ON RELIABLE MOBILE INTERNET SERVICE

Overall, a lower proportion of global citizens feel that it is easier to count on reliable Internet service, compared to last year (-2 pts), and down 9 points since 2019. This is because a higher share of global citizens would describe their ease of access as being relatively unchanged, over the past year.

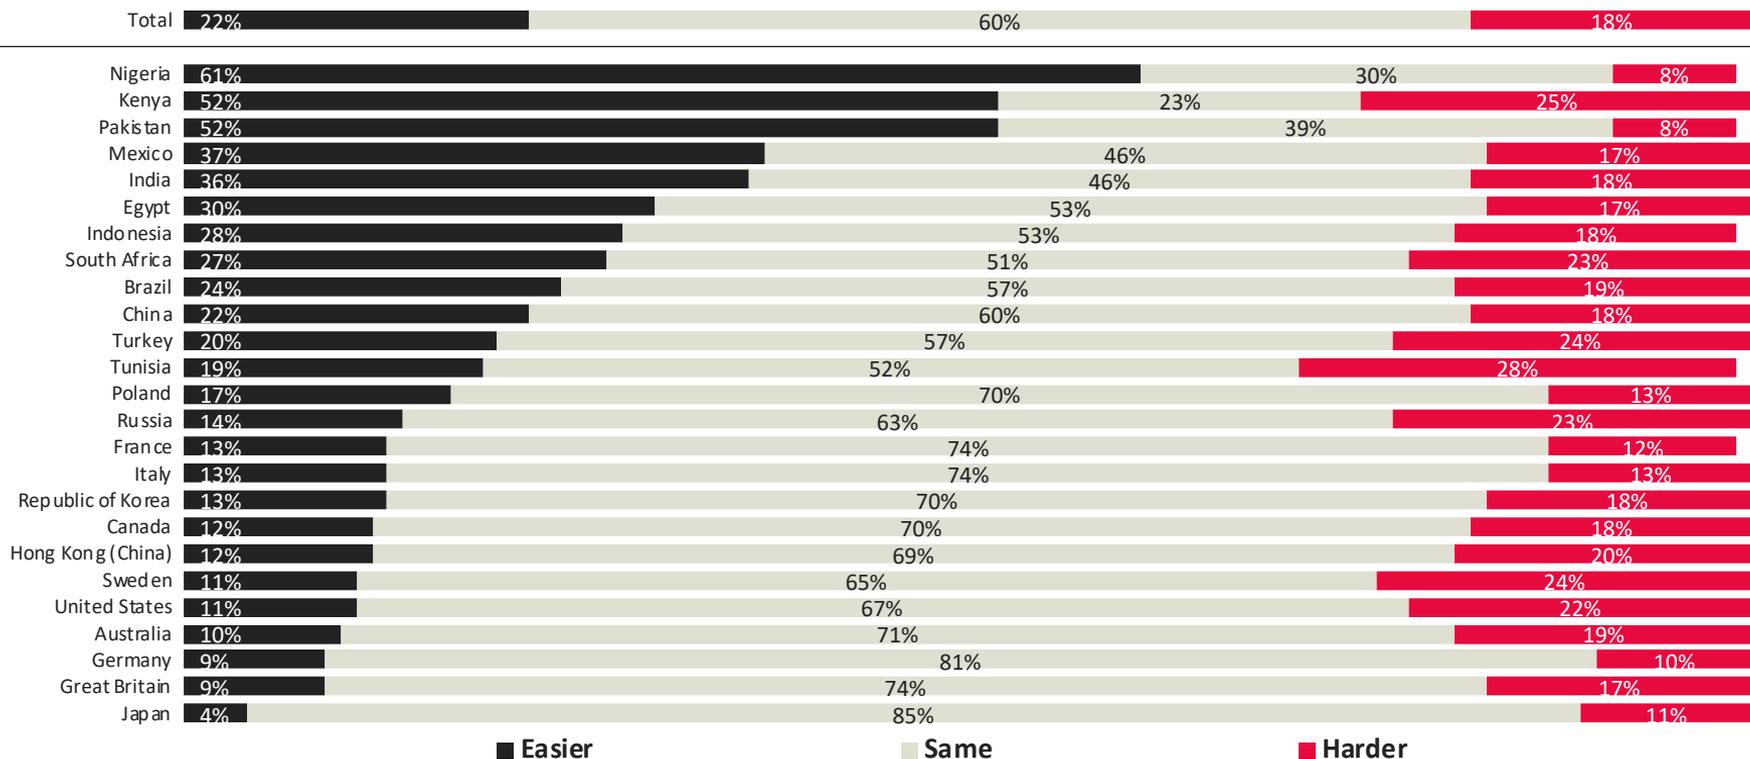

Tracking – EASIER

— 2019 — 2018 — 2017 — 2016

## SURF THE INTERNET WITH THE KNOWLEDGE THAT CONTENT IS NOT BEING CENSORED

Just 22% say it's becoming easier to surf the net with the knowledge that content is not being censored. This compares to a similar proportion (18%) who say it's actually getting harder, particularly in places like Tunisia (28%), Russia (23%), Sweden (24%) and the United States (22%).

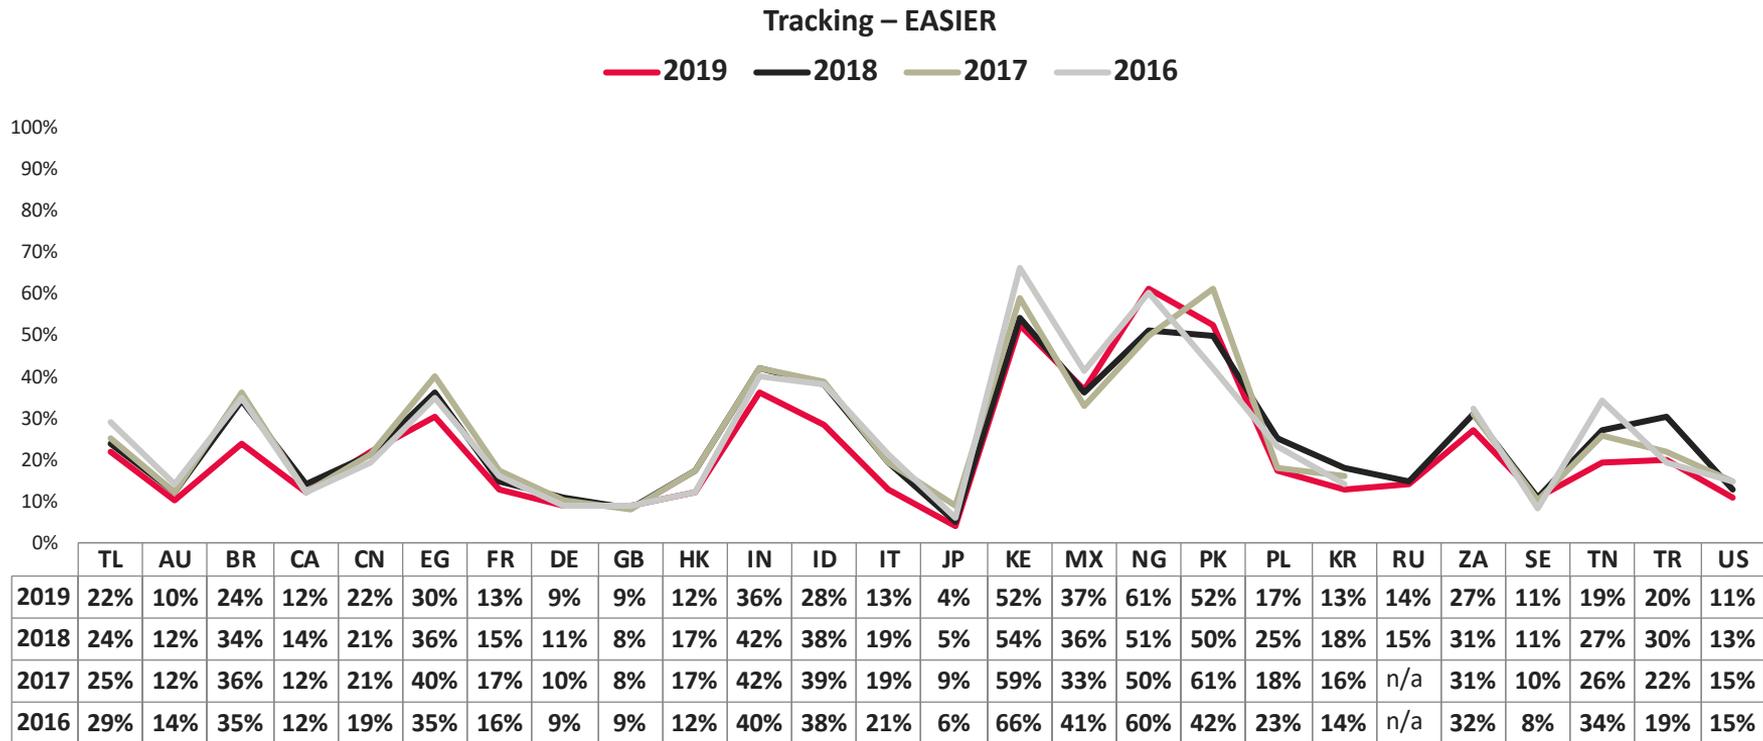

Q5. Compared to one year ago, would you say that it is easier or harder to do the following things on the internet:

[Surf the internet with the knowledge that content is not being censored]

Base: All Respondents Total 2019 (n=25,229) Total may not sum to 100% as DK/Refuse not shown

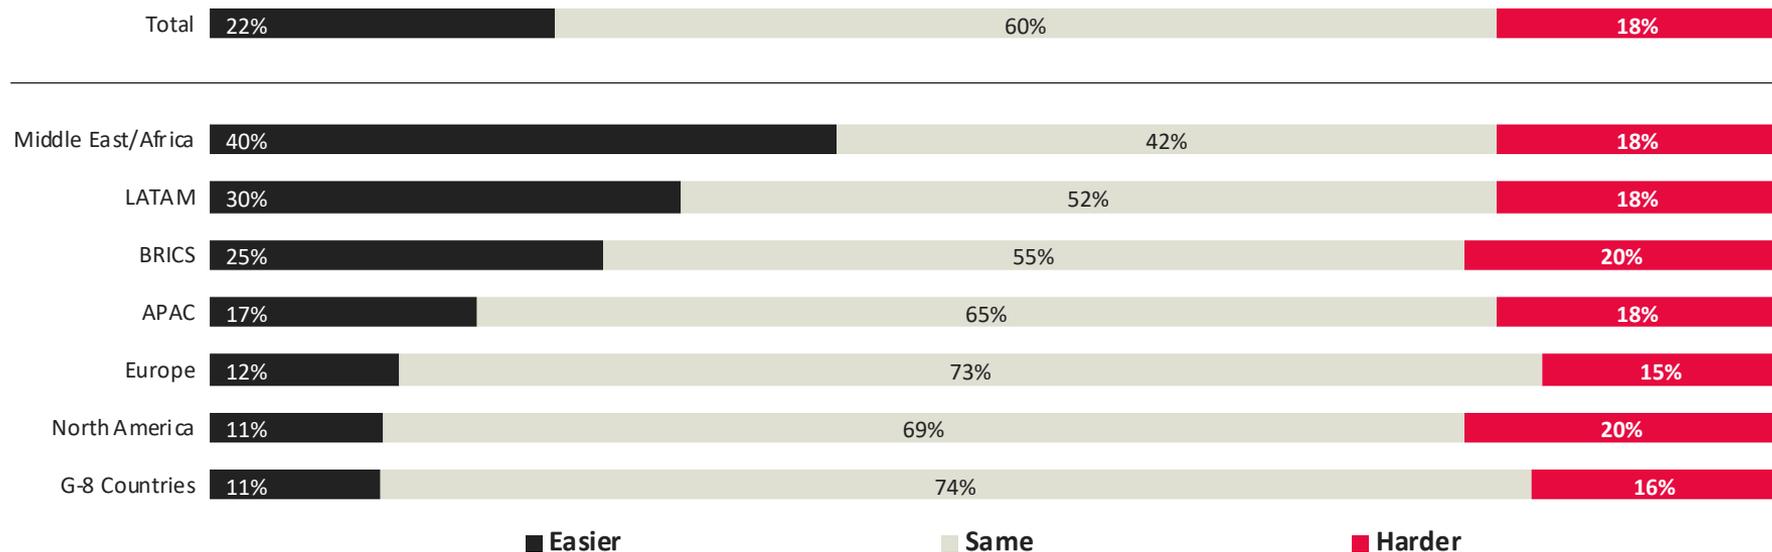

## SURF THE INTERNET WITH THE KNOWLEDGE THAT CONTENT IS NOT BEING CENSORED

The greatest year-over-year shifts in opinion have occurred in Nigeria (+10 pts), Indonesia (-10), Brazil (-10), Pakistan (-10) & Turkey (-10).

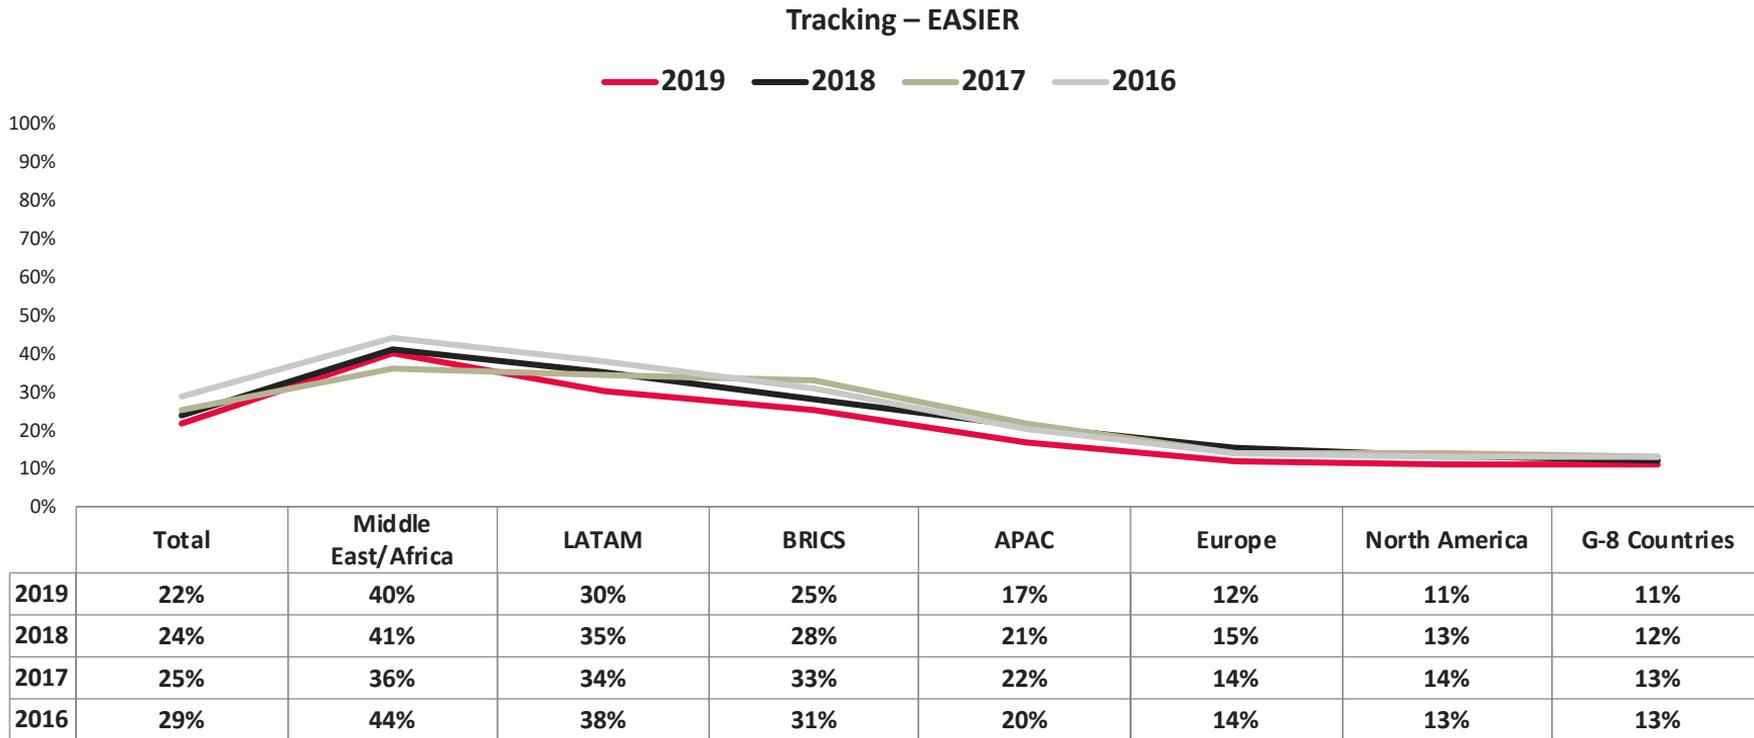

## SURF THE INTERNET WITH THE KNOWLEDGE THAT CONTENT IS NOT BEING CENSORED

A greater proportion of citizens in more developed economies, such as Europe, North America, APAC & the G-8 Countries, actually think that it has become *harder*, as opposed to *easier*, to surf the Internet with knowledge that content is not being censored.

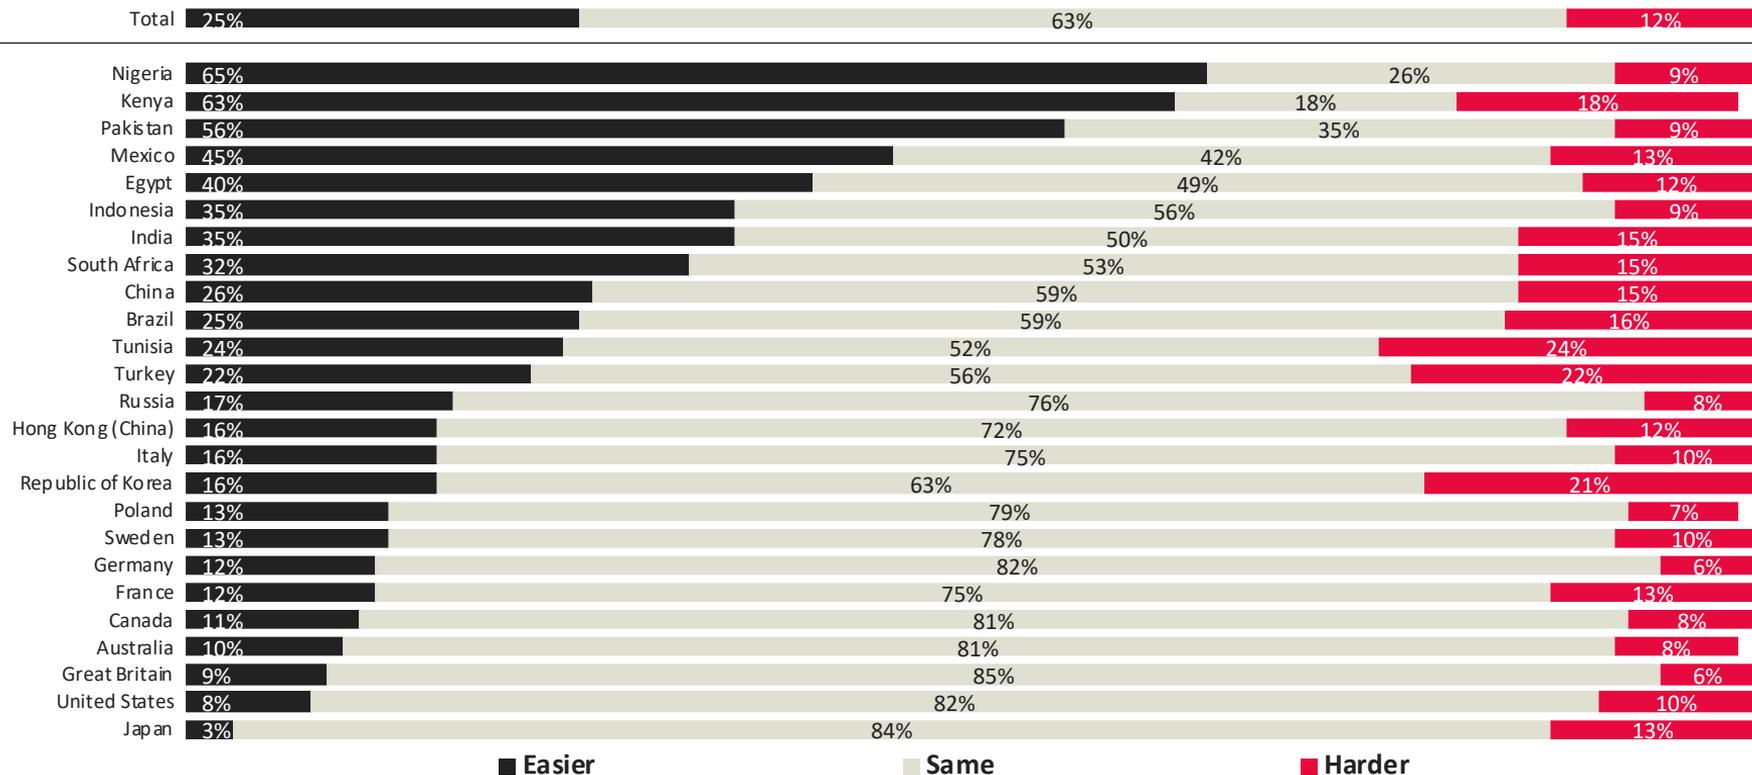

## SURF THE INTERNET WITH THE KNOWLEDGE THAT CONTENT IS NOT BEING CENSORED

In every region, a lower proportion of citizens think that it has become *easier* to surf the Internet with knowledge that content is not being censored, compared to the 2018 survey.

## SENDING OR RECEIVING EMAILS TO OR FROM FOREIGN ADDRESSES

A higher proportion of American, Korean, French & Japanese citizens think it has become *harder*, rather than *easier*, to send or receive emails to or from foreign addresses.

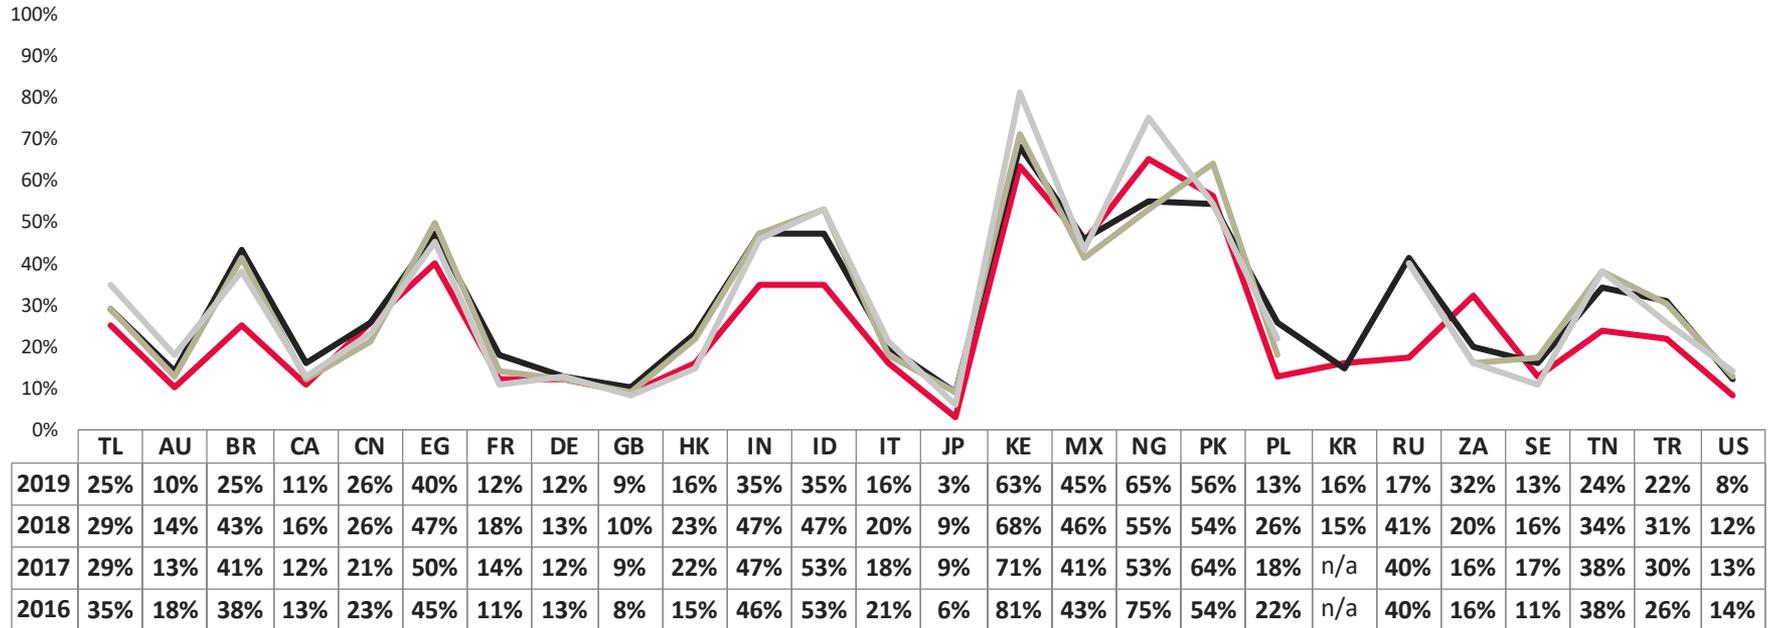

## SENDING OR RECEIVING EMAILS TO OR FROM FOREIGN ADDRESSES

With the exception of South Africa (+12 pts), Pakistan (+2), the Republic of Korea (+1) & China (unchanged), a lower proportion feel that it is *easier* to send or receive emails to or from foreign addresses, relative to the 2018 survey. Changes since 2016 are more pronounced, overall.

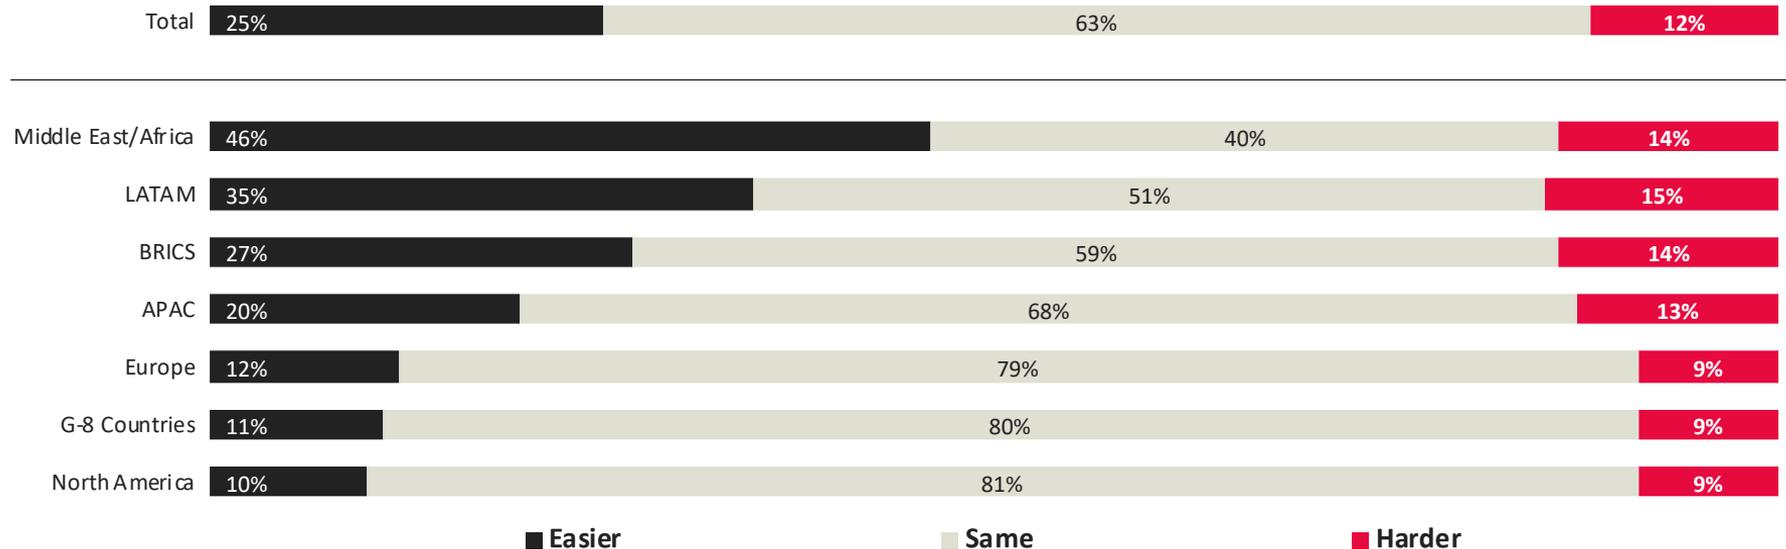

### Tracking – EASIER

— 2019 — 2018 — 2017 — 2016

## SENDING OR RECEIVING EMAILS TO OR FROM FOREIGN ADDRESSES

Despite some variance by economy, on balance, a higher proportion in each region feel that it has become *easier*, not *harder*, to send or receive emails to or from foreign addresses, over the past year, but those in developed markets are more on the fence than those in developing economies.

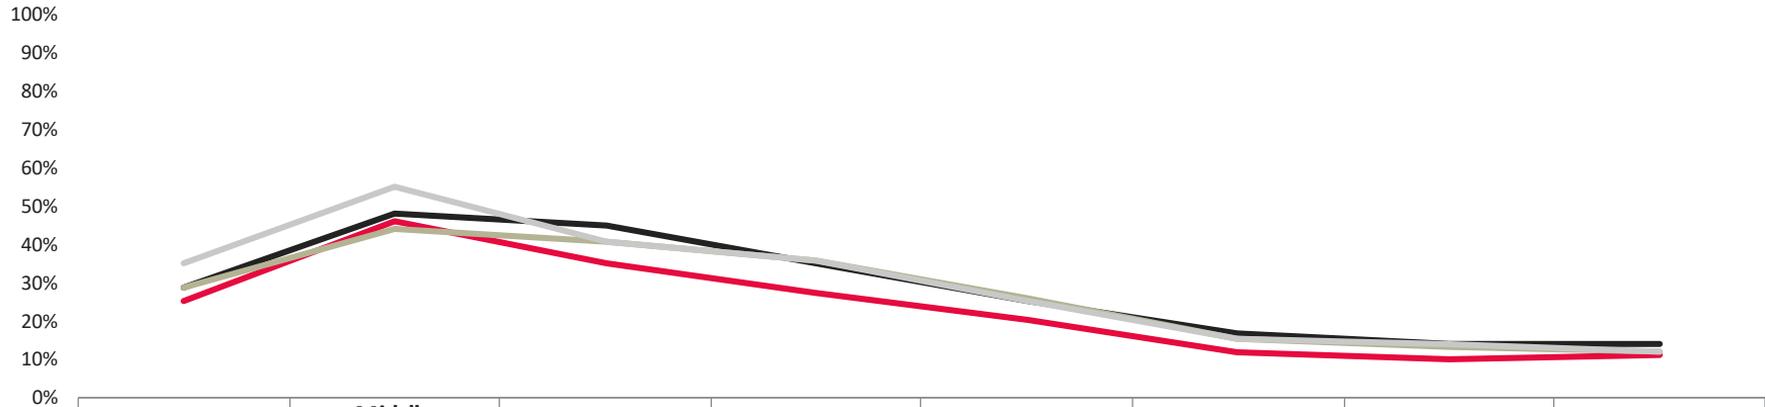

## SENDING OR RECEIVING EMAILS TO OR FROM FOREIGN ADDRESSES

In each of the regions, a smaller proportion think that sending or receiving emails to or from foreign addresses has become *easier*, compared to the 2018 survey.

## USE ENCRYPTED COMMUNICATIONS

In all economies, save for Australia, Tunisia & France, a greater proportion feel as though it has become *easier* to use encrypted communications, as opposed to *harder*, in the past year.

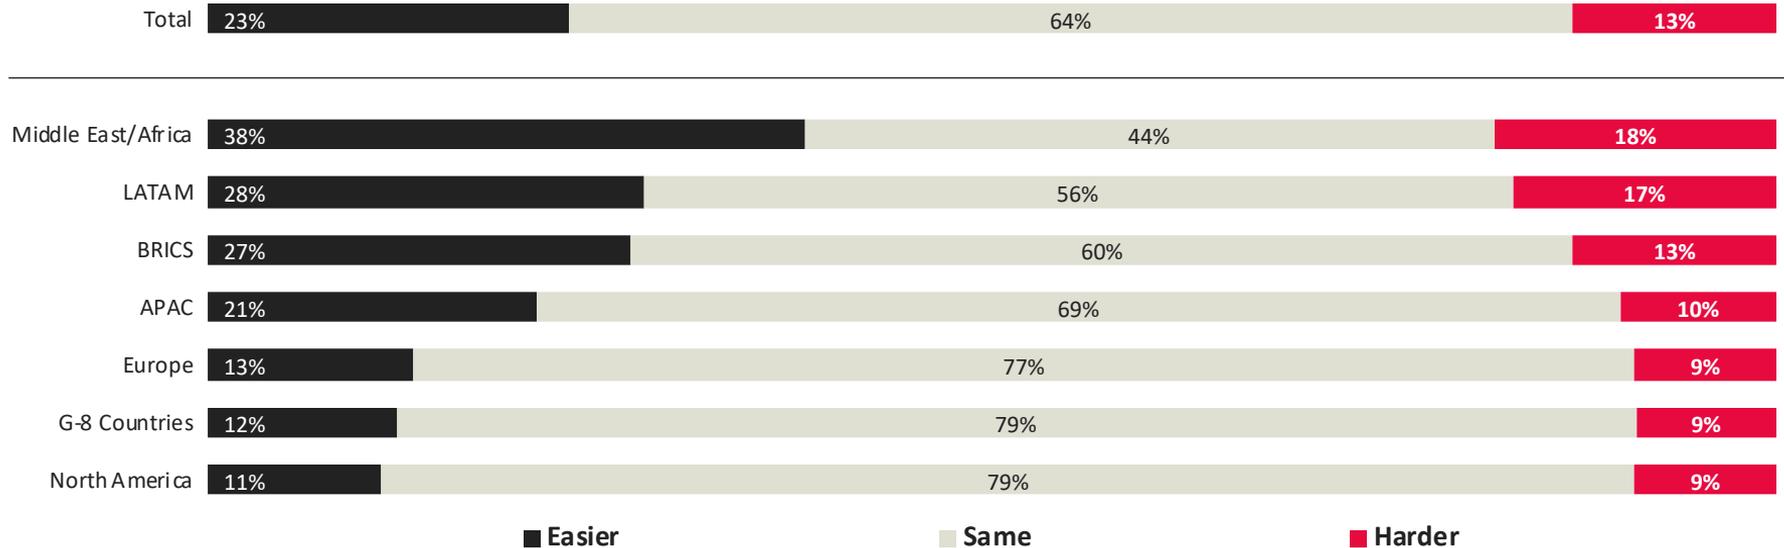

## USE ENCRYPTED COMMUNICATIONS

Wave over wave, a lower proportion of global citizens feel that it has become *easier* to use encrypted communications. Once again, this is a result of the Internet's maturity & more specifically, a higher proportion of global citizens perceiving their ease of use as being about the *same*, relative to the 2018 survey.

## USE ENCRYPTED COMMUNICATIONS

A much higher share of citizens living in less developed economies think that it is *easier* to use encrypted communications, compared to a year ago. Conversely, nearly four in five of those living in developed economies perceive the ease of use as being relatively unchanged versus a year ago.

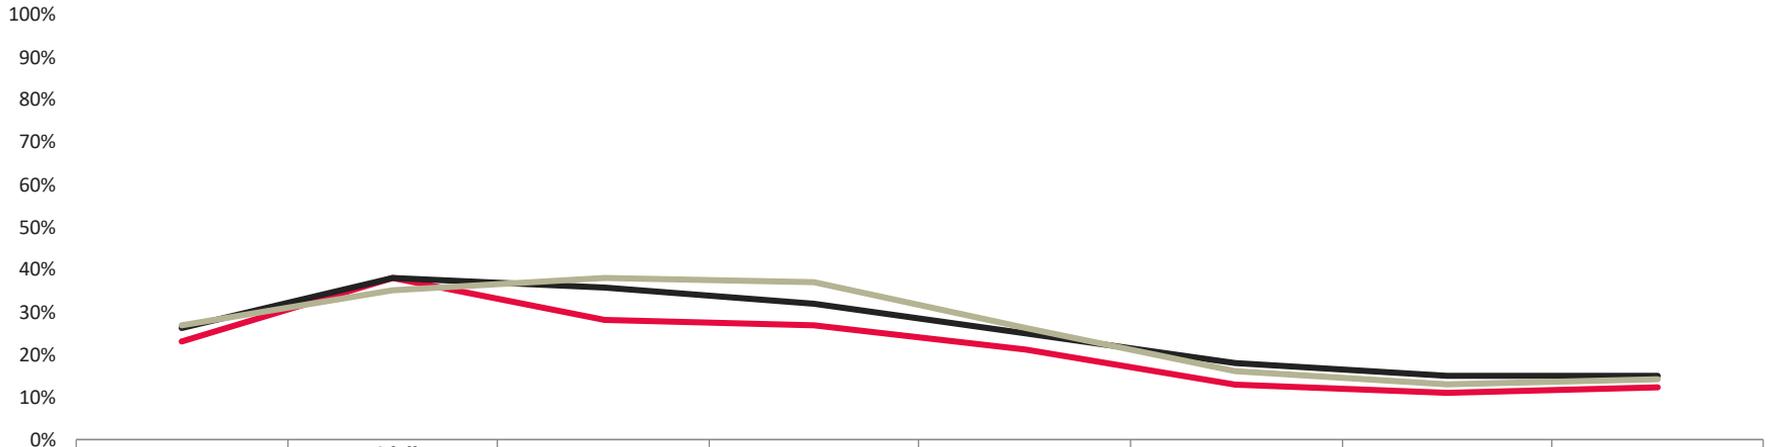

## USE ENCRYPTED COMMUNICATIONS

Across all regions as many or fewer would describe using encrypted communications as becoming *easier*, compared to the previous iteration of this survey a year ago. Again, this can mostly be attributed to the Internet's development, and the fact that most feel as though nothing has really changed.

Tracking – EASIER

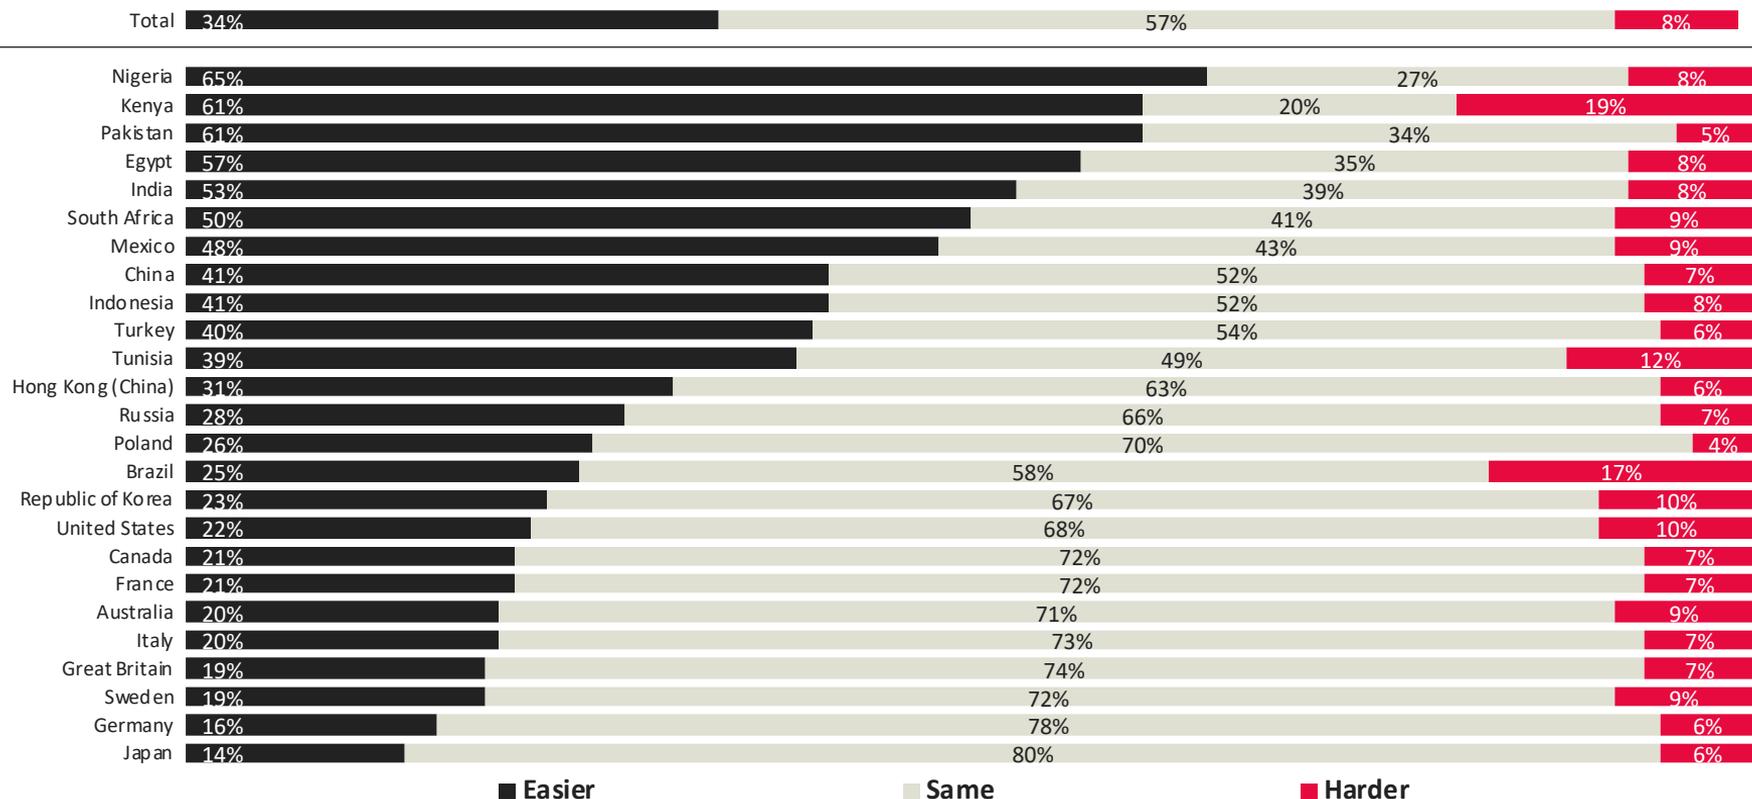

— 2019 — 2018 — 2017

## KEEP SOFTWARE UP TO DATE

The vast majority (91%) of global citizens report that it is *easier* (34%) or about as easy as it was a year ago (57%) for them to keep their software up to date.

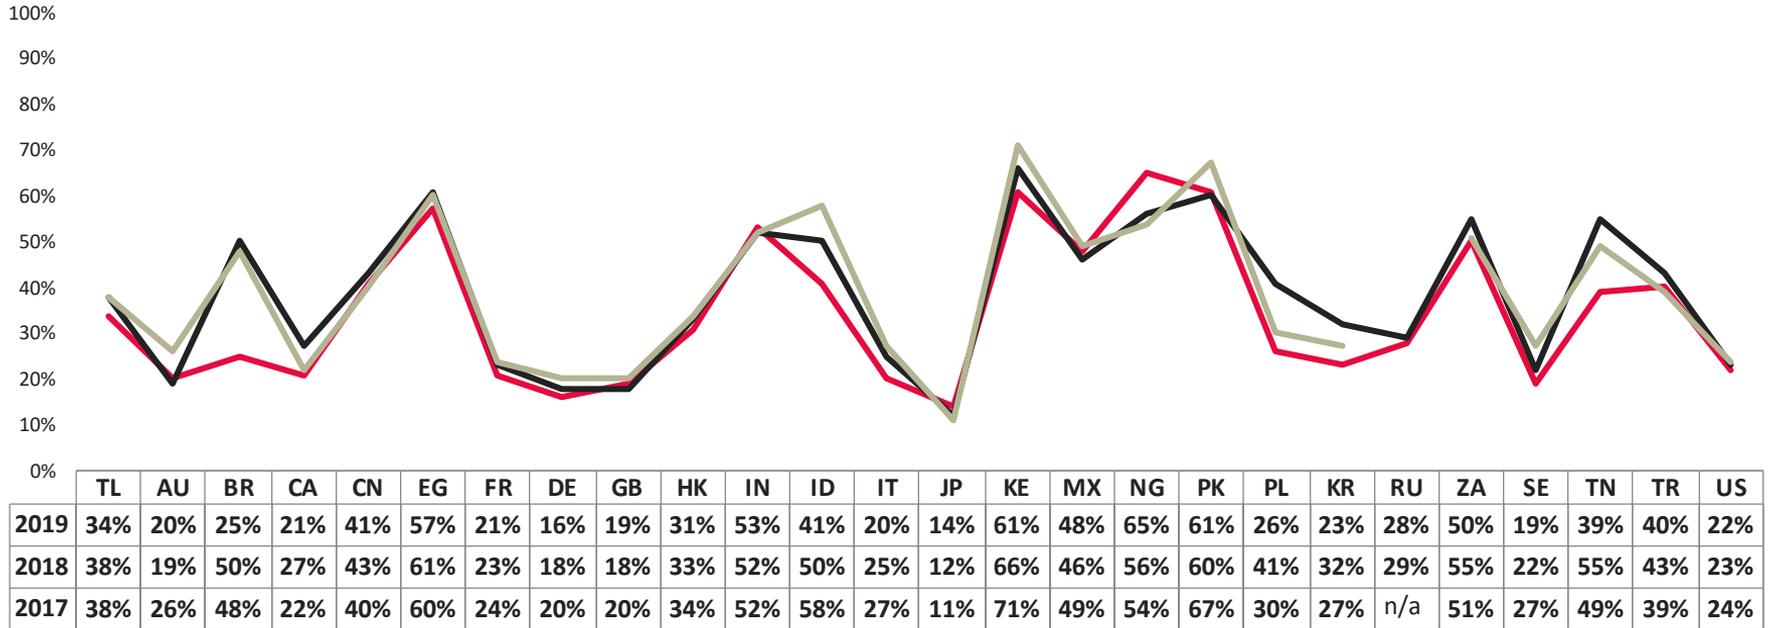

## KEEP SOFTWARE UP TO DATE

Relative to the 2018 survey, a lower proportion of global citizens think that it has become *easier* to keep their software up to date (-4 pts). The most sizeable drop occurred in Brazil (-25).

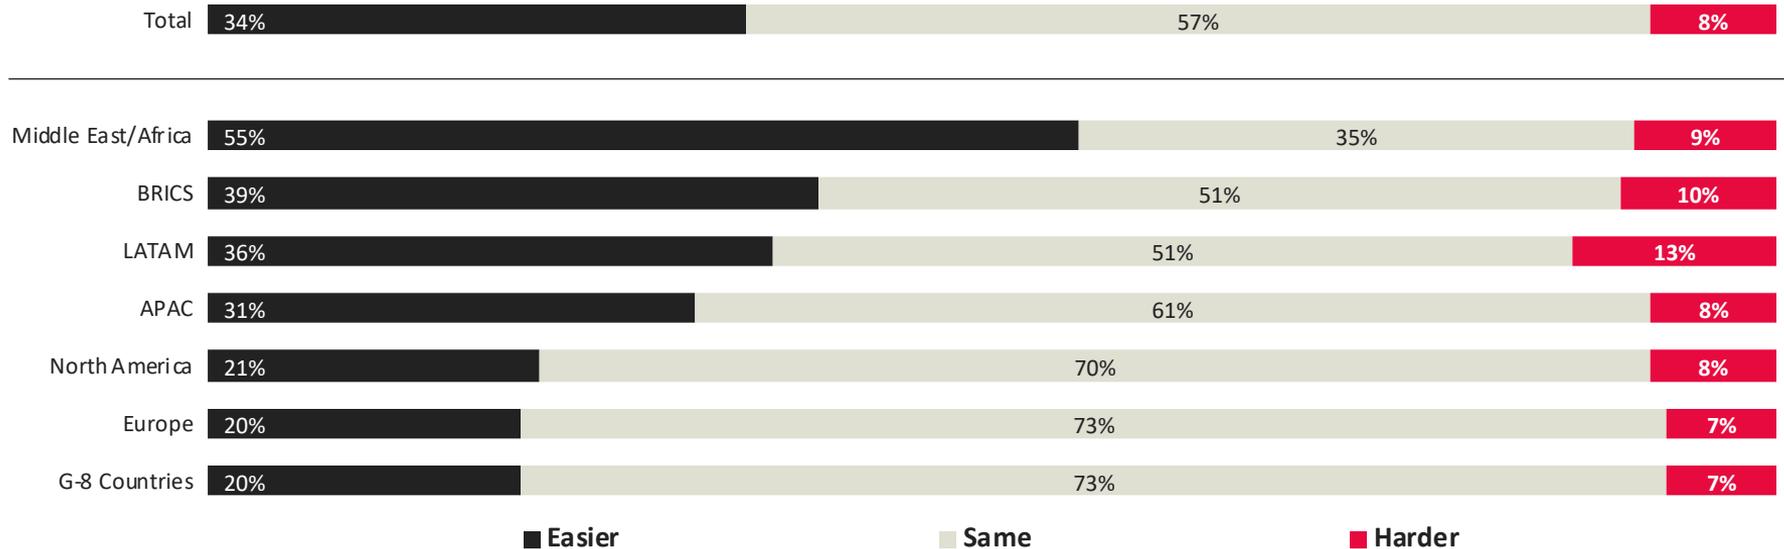

### Tracking – EASIER

— 2019 — 2018 — 2017

## KEEP SOFTWARE UP TO DATE

Consistent with other metrics, citizens living in developing economies tend to be more likely to think that keeping software up to date has become *easier*, over the past year, including most (55%) in the Middle East & Africa.

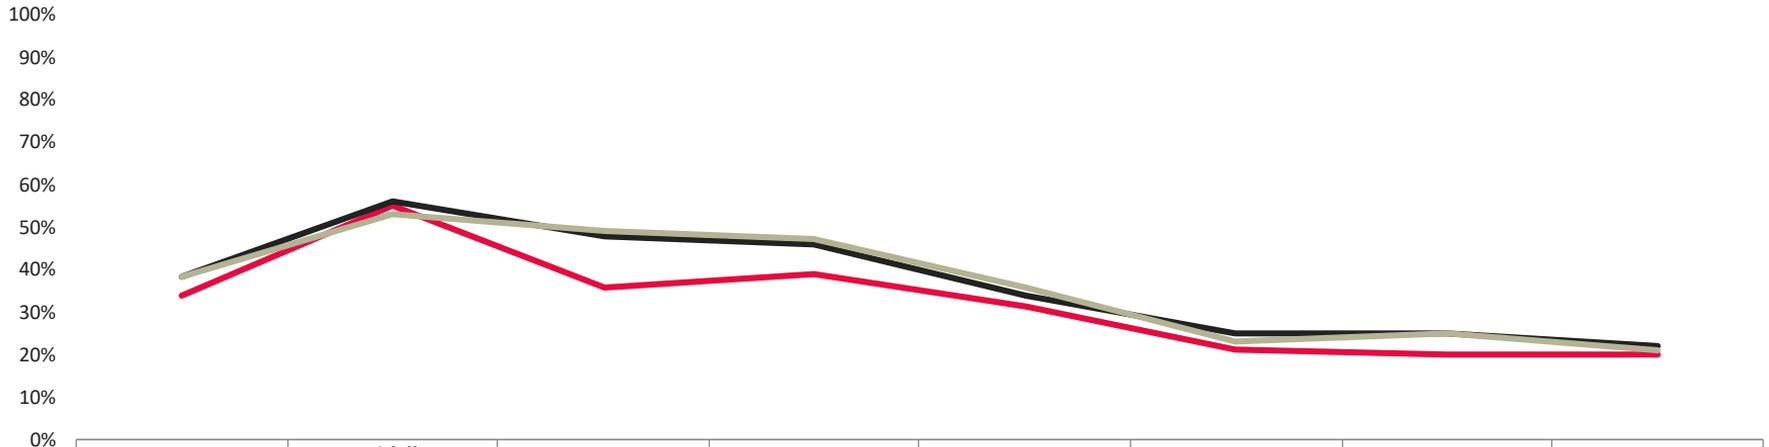

## KEEP SOFTWARE UP TO DATE

Similar to most other metrics, a lower proportion in each of the regional economies would say that it is *easier* to keep software up to date, relative to 2018. This, again, likely has more to do with the Internet's maturity than anything.

### Tracking – EASIER

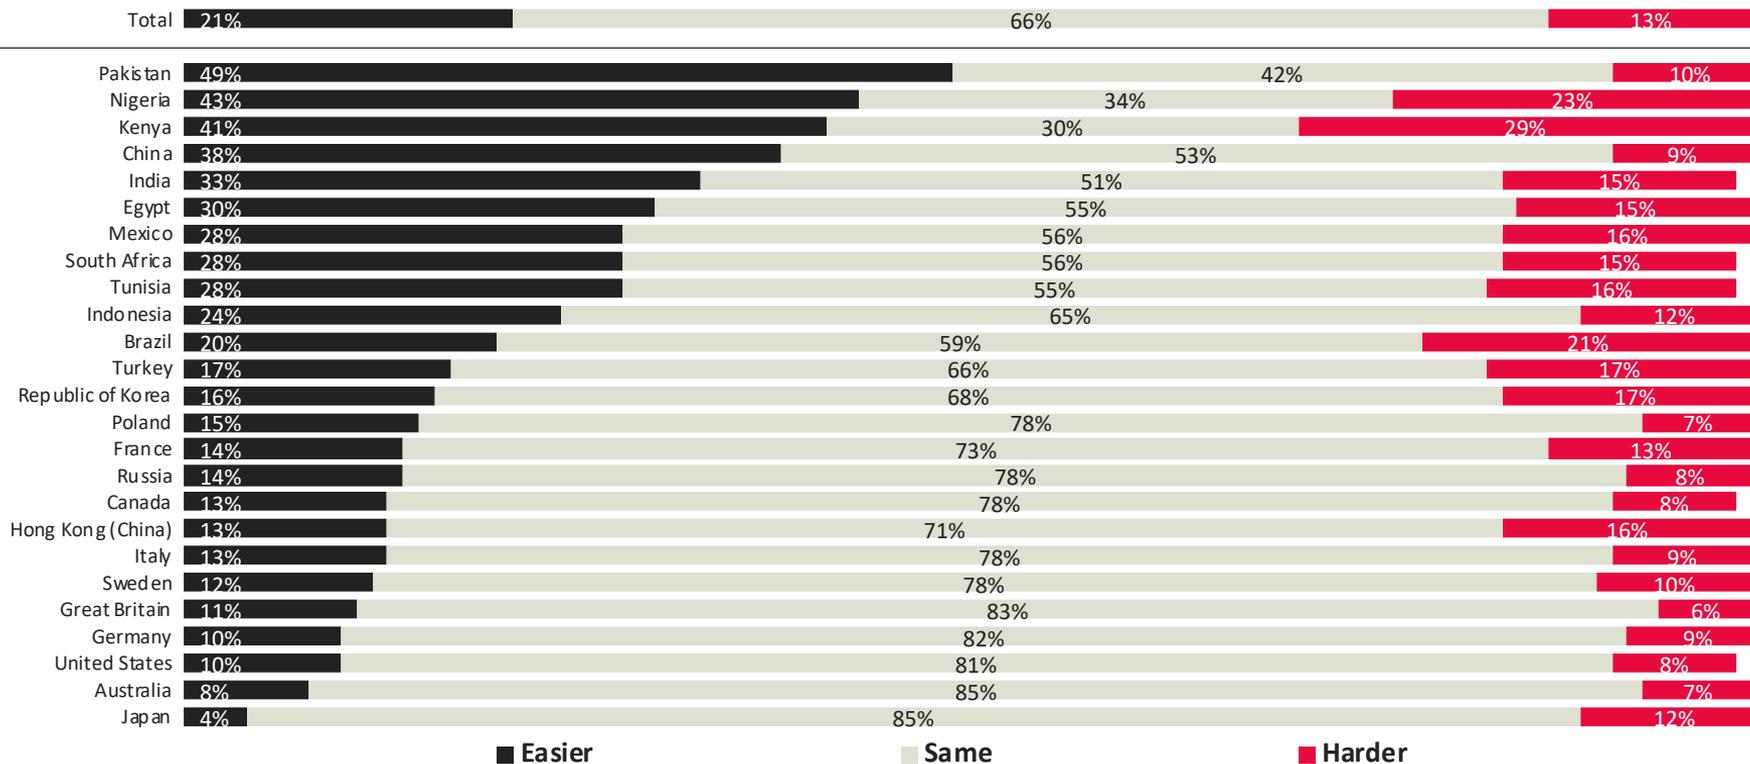

— 2019 — 2018 — 2017

## USE VOICE OVER IP (VOIP)

Outside of Pakistan, Nigeria & Kenya, majorities in all other economies would describe the ease of using VoIP as being about the *same*, compared to a year ago.

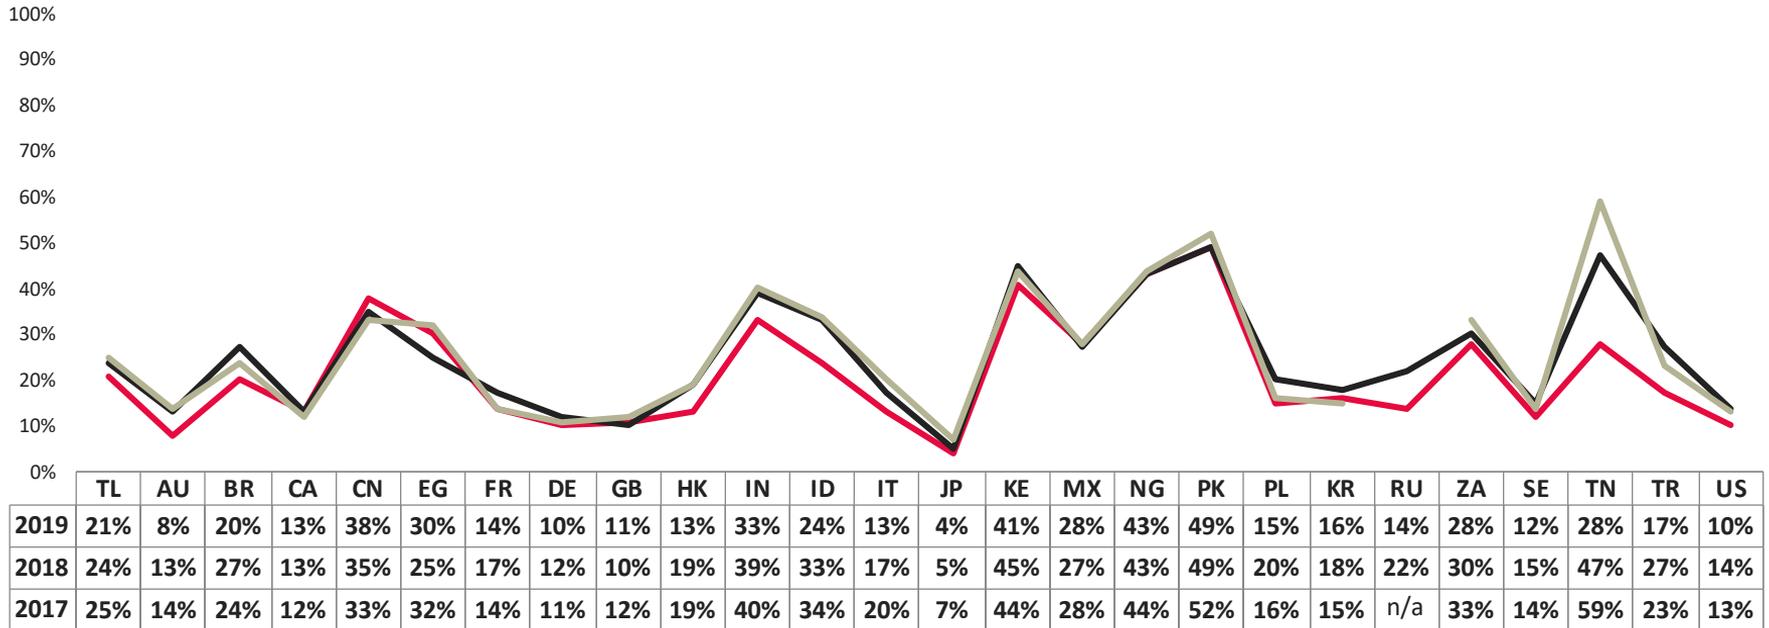

## USE VOICE OVER IP (VOIP)

On balance, fewer (-3 pts) think that it has become easier to use VOIP, over the past year, relative to the 2018 survey, with much of the drop occurring in Tunisia (-19).

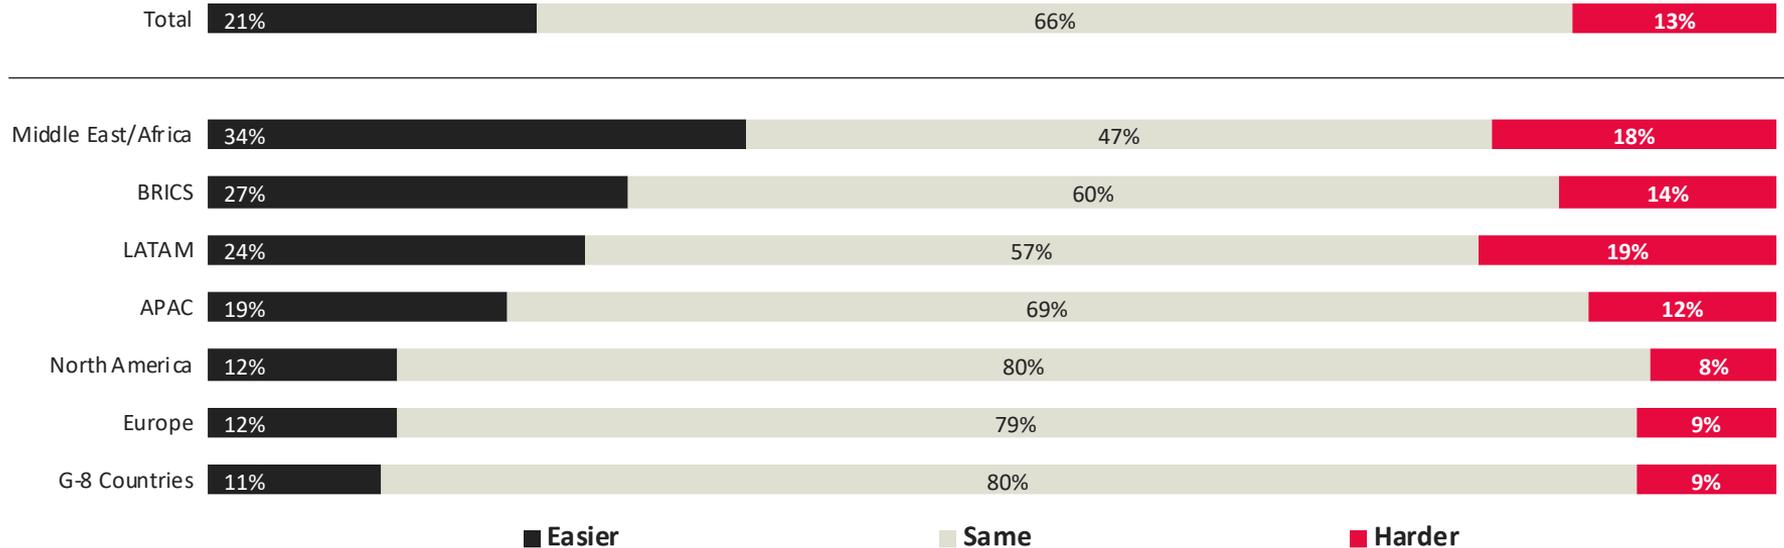

### Tracking – EASIER

— 2019 — 2018 — 2017

## USE VOICE OVER IP (VOIP)

Like other metrics, a greater share of citizens in less developed nations think that it has become *easier* to use VOIP, in the past year.

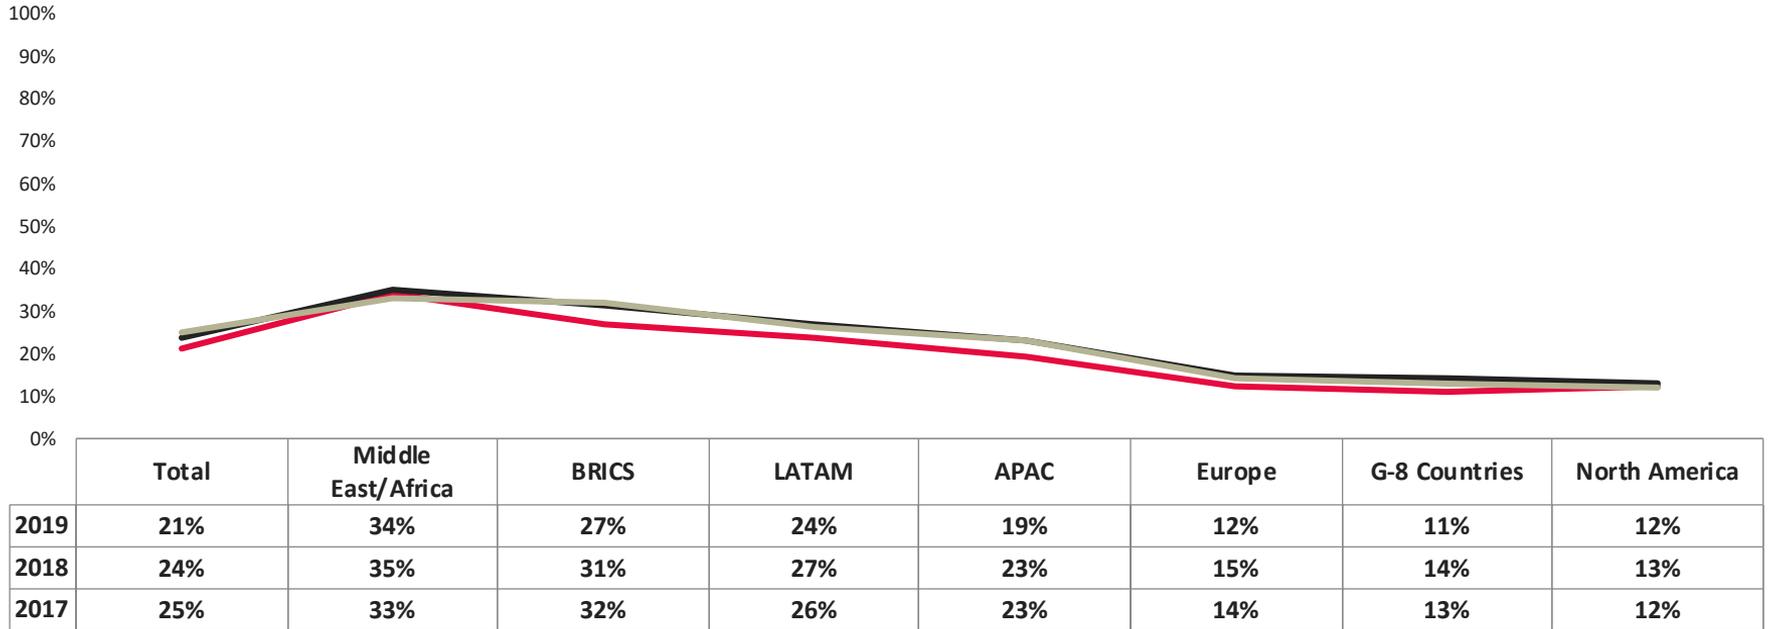

## USE VOICE OVER IP (VOIP)

Once again, across all regional economies a lower proportion (-3 pts) think that it is *easier* to keep software up to date, relative to 2018.

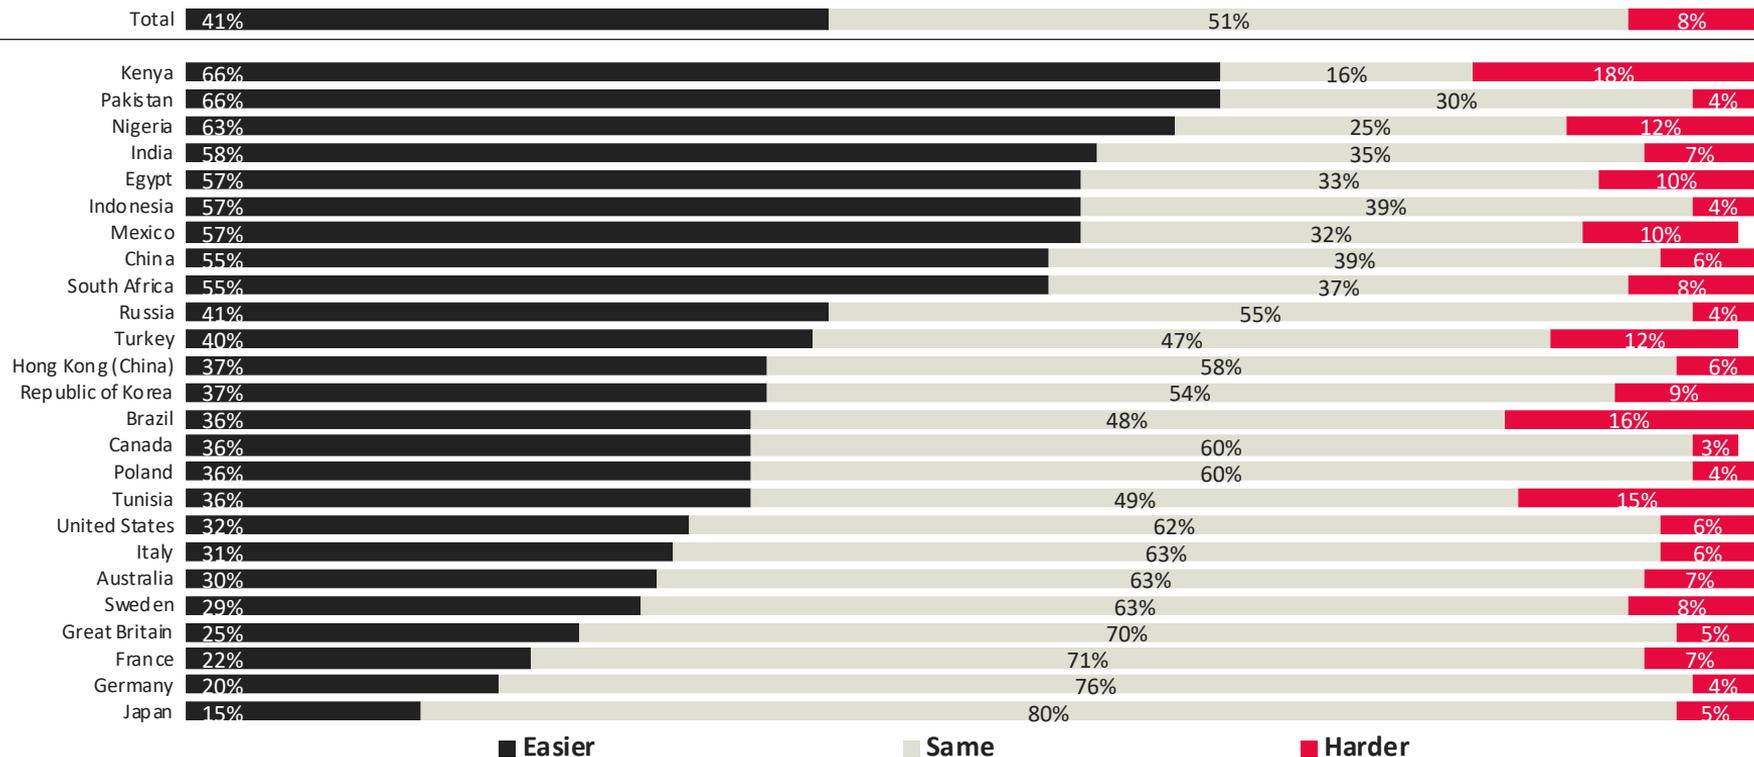

### Tracking – EASIER

— 2019 — 2018 — 2017

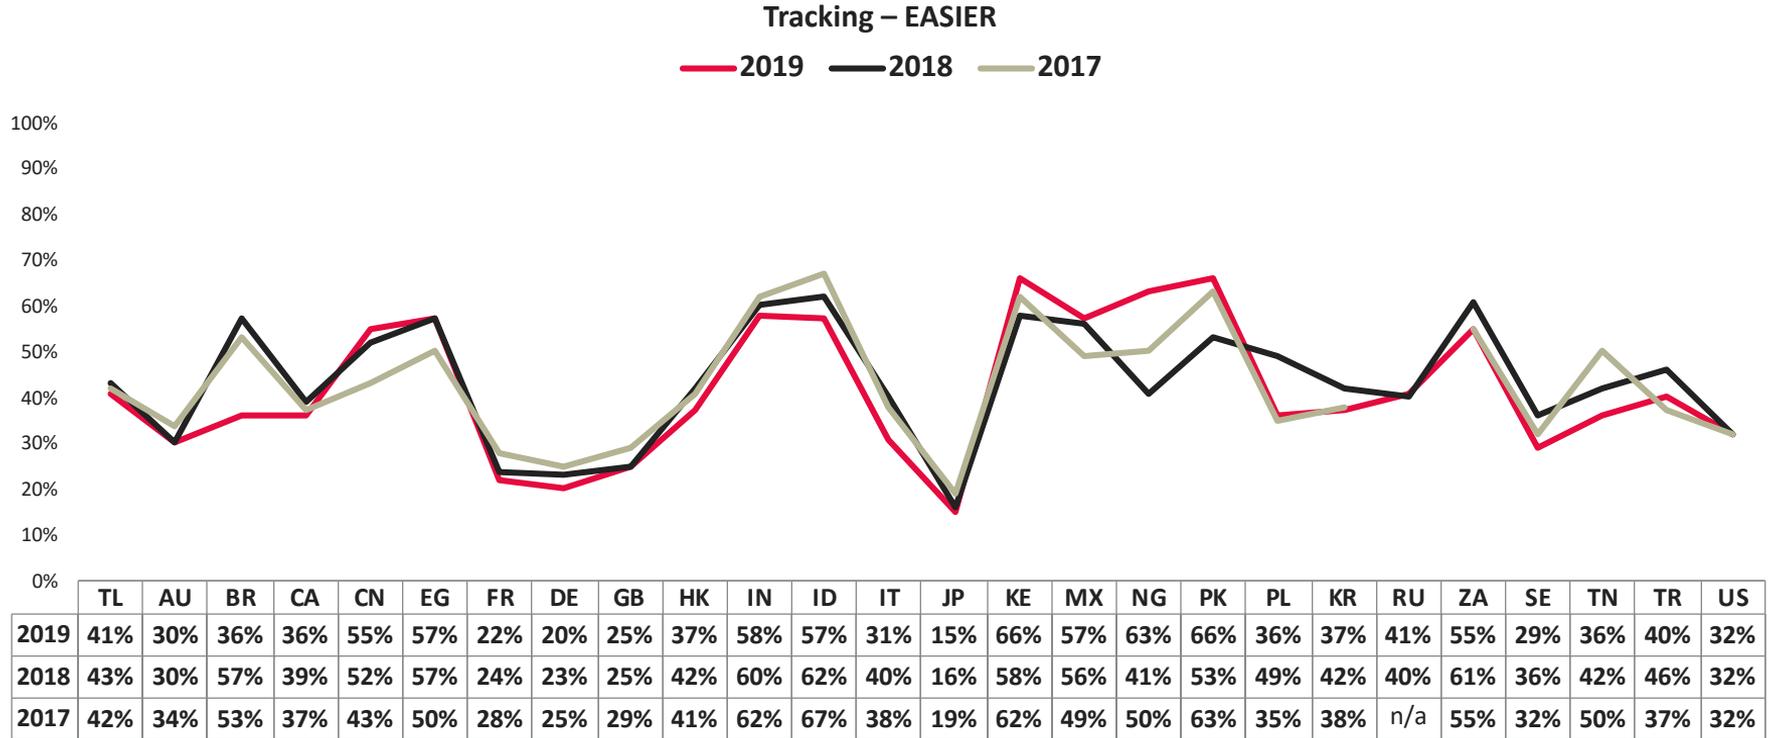

## BUYING GOODS AND SERVICES ONLINE

Over nine in ten (92%) feel that it as easy (41%) or *easier* (51%) to buy goods & services online, compared to a year ago, including majorities in Kenya, Pakistan, Nigeria, India, Egypt, Mexico, Indonesia, China & South Africa who think that it has become *easier*.

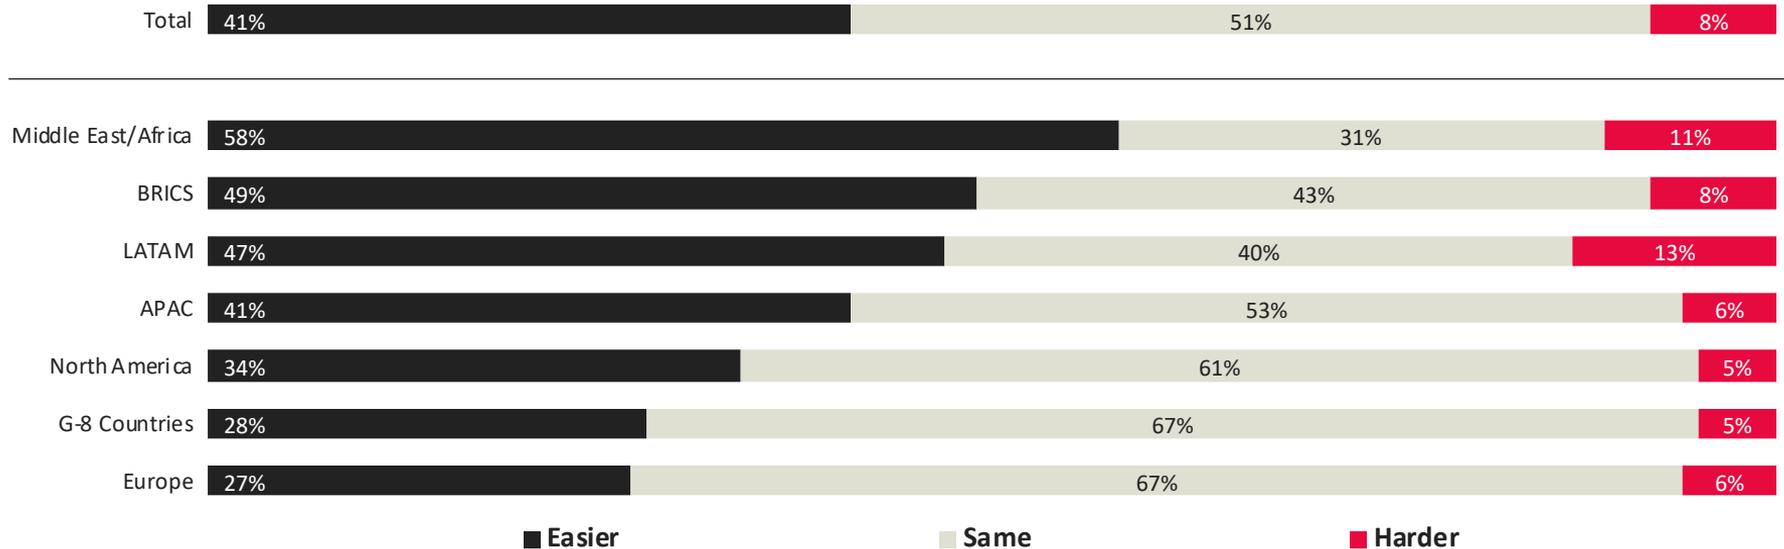

## BUYING GOODS AND SERVICES ONLINE

As is the case with most other metrics, a lower proportion (-2 pts) think that it has become *easier* to buy goods and services online, over the past year.

## BUYING GOODS AND SERVICES ONLINE

Similar trends prevail when it comes to buying goods & services online, as a higher proportion of those living in developing economies tend to think that it has become *easier*, over the past year.

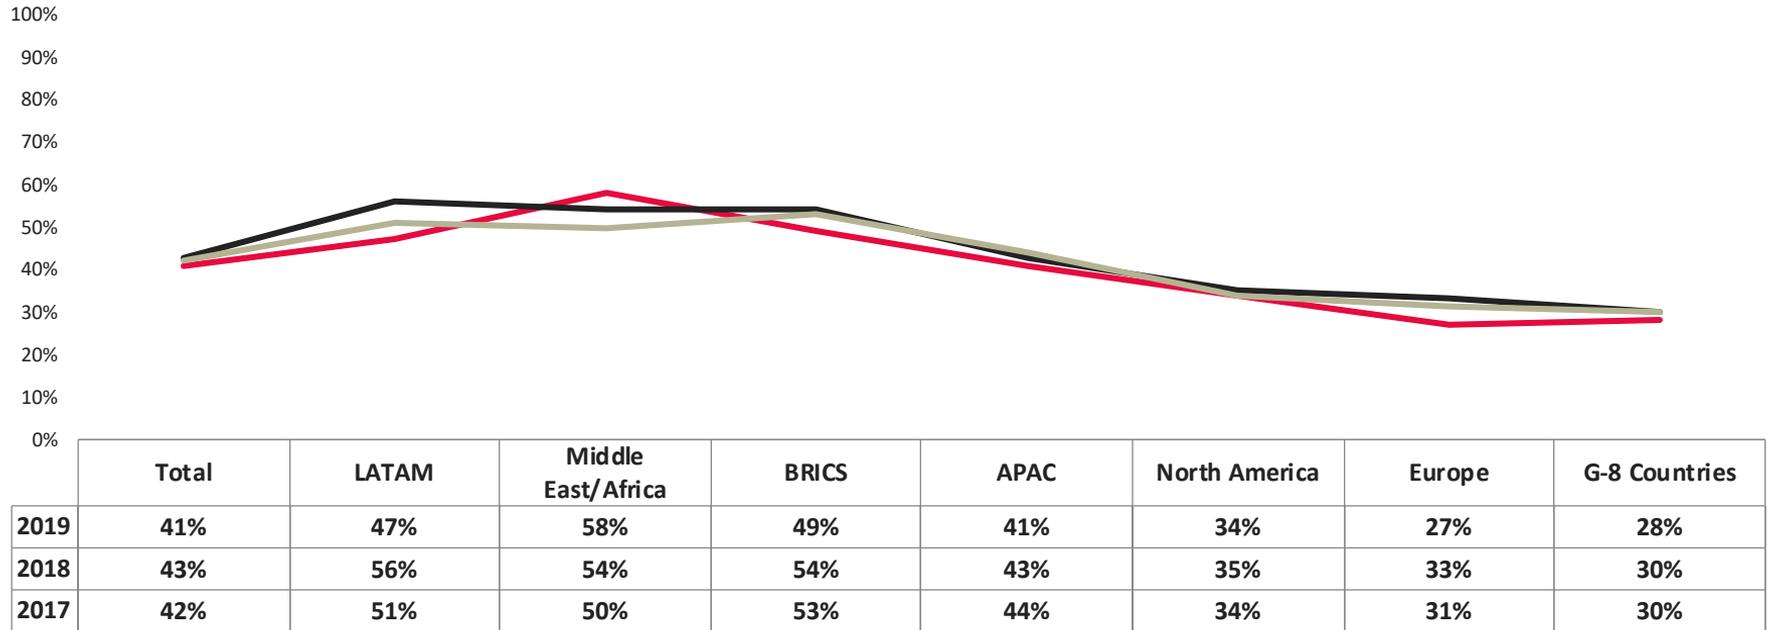

## BUYING GOODS AND SERVICES ONLINE

In each region, save for the Middle East & Africa (+4 pts), there has been a drop in the share of citizens who feel that it is becoming *easier* to buy goods & services online, as more would rate this as being about the *same*, relative to the 2018 survey.

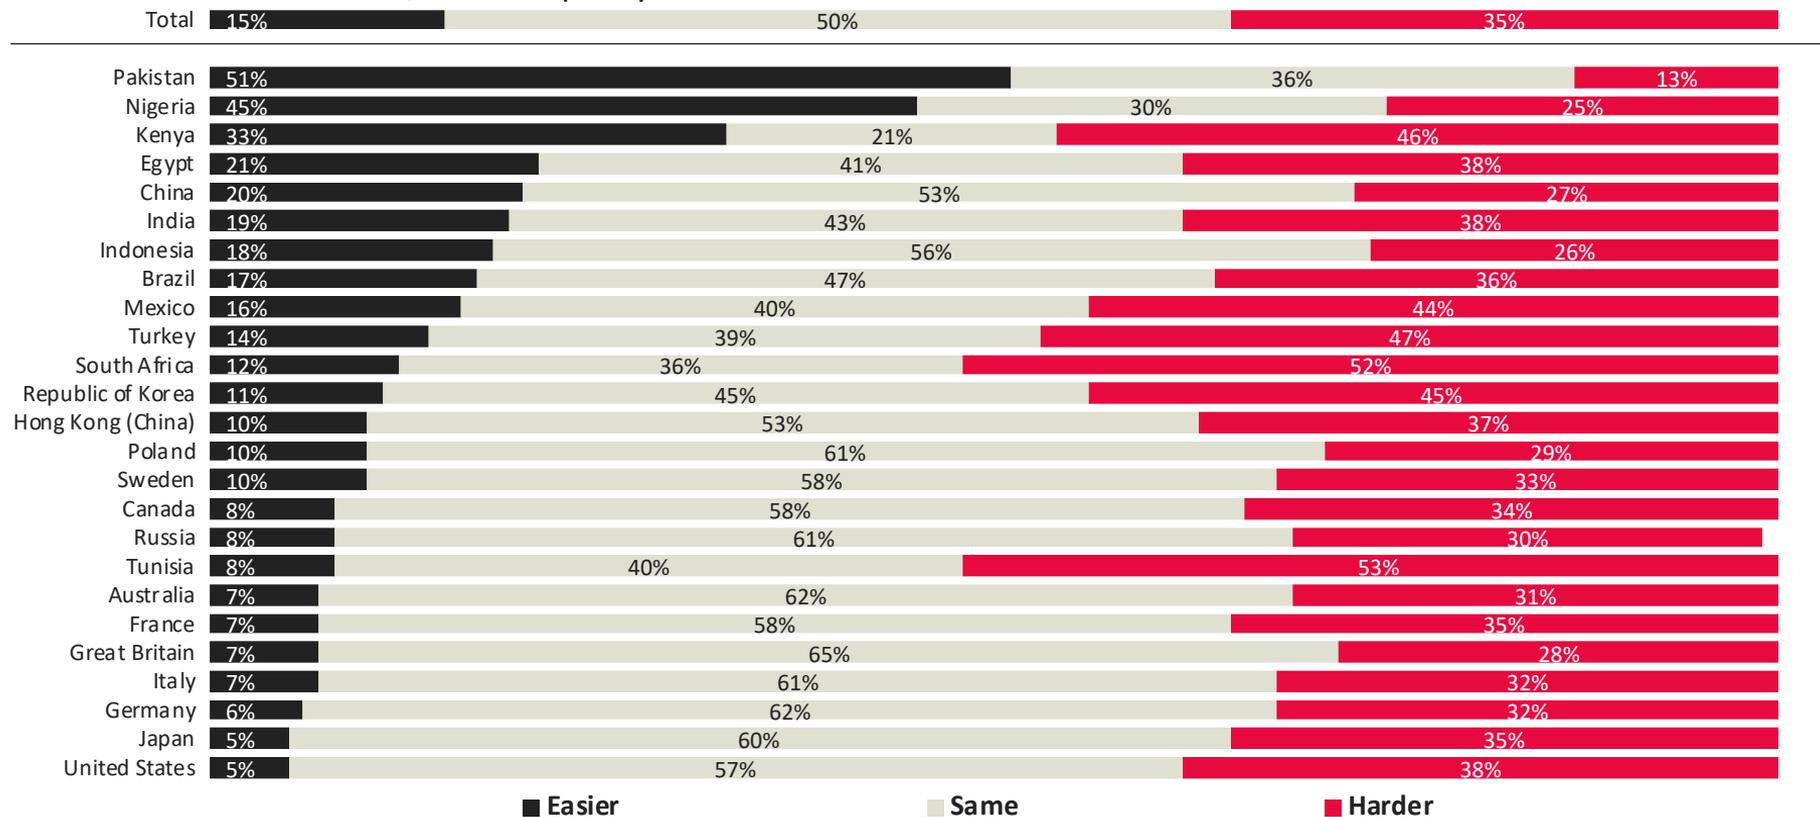

Tracking – EASIER

— 2019 — 2018 — 2017

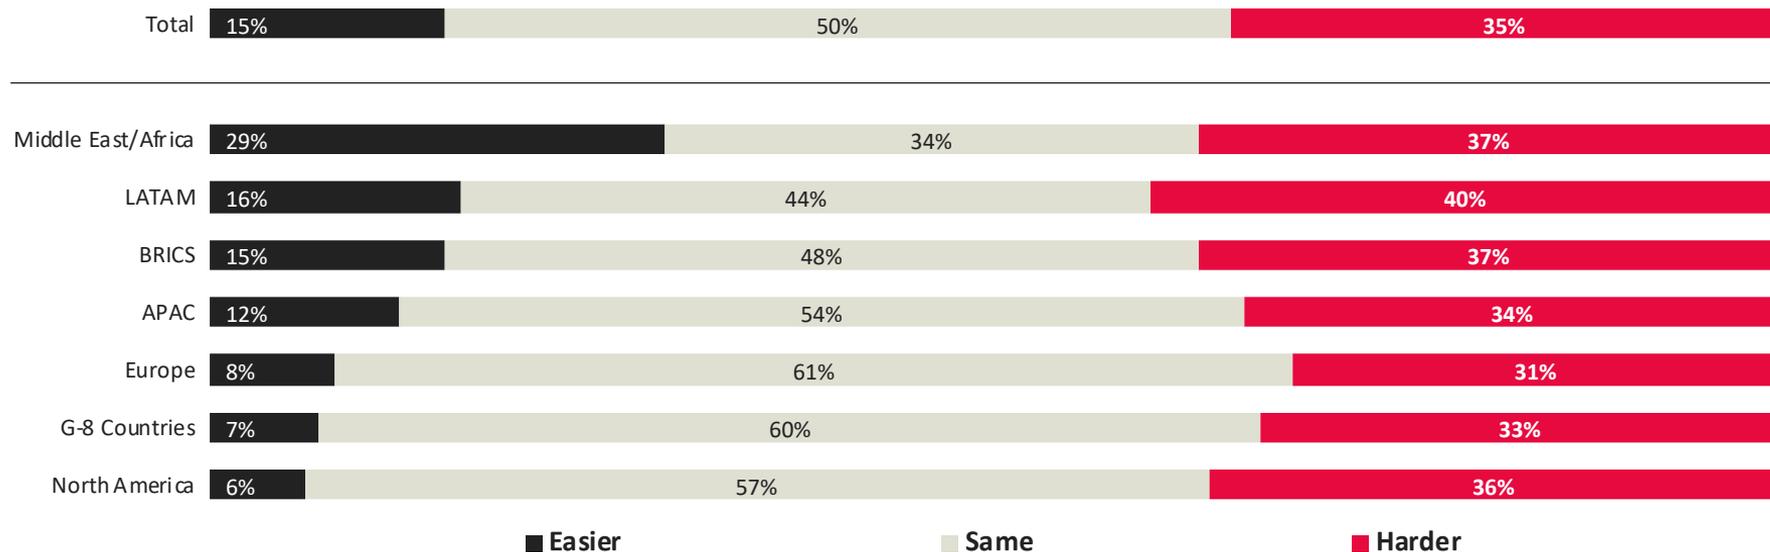

## TRUST UNKNOWN EMAIL ADDRESSES

Overall, global citizens are more than twice as likely to think that it has become *harder*, as opposed to *easier*, to trust unknown email addresses, over the past year.

## TRUST UNKNOWN EMAIL ADDRESSES

In all regions, considerably more think that it has become *harder* as opposed to *easier* to trust unknown email addresses, in the past year.

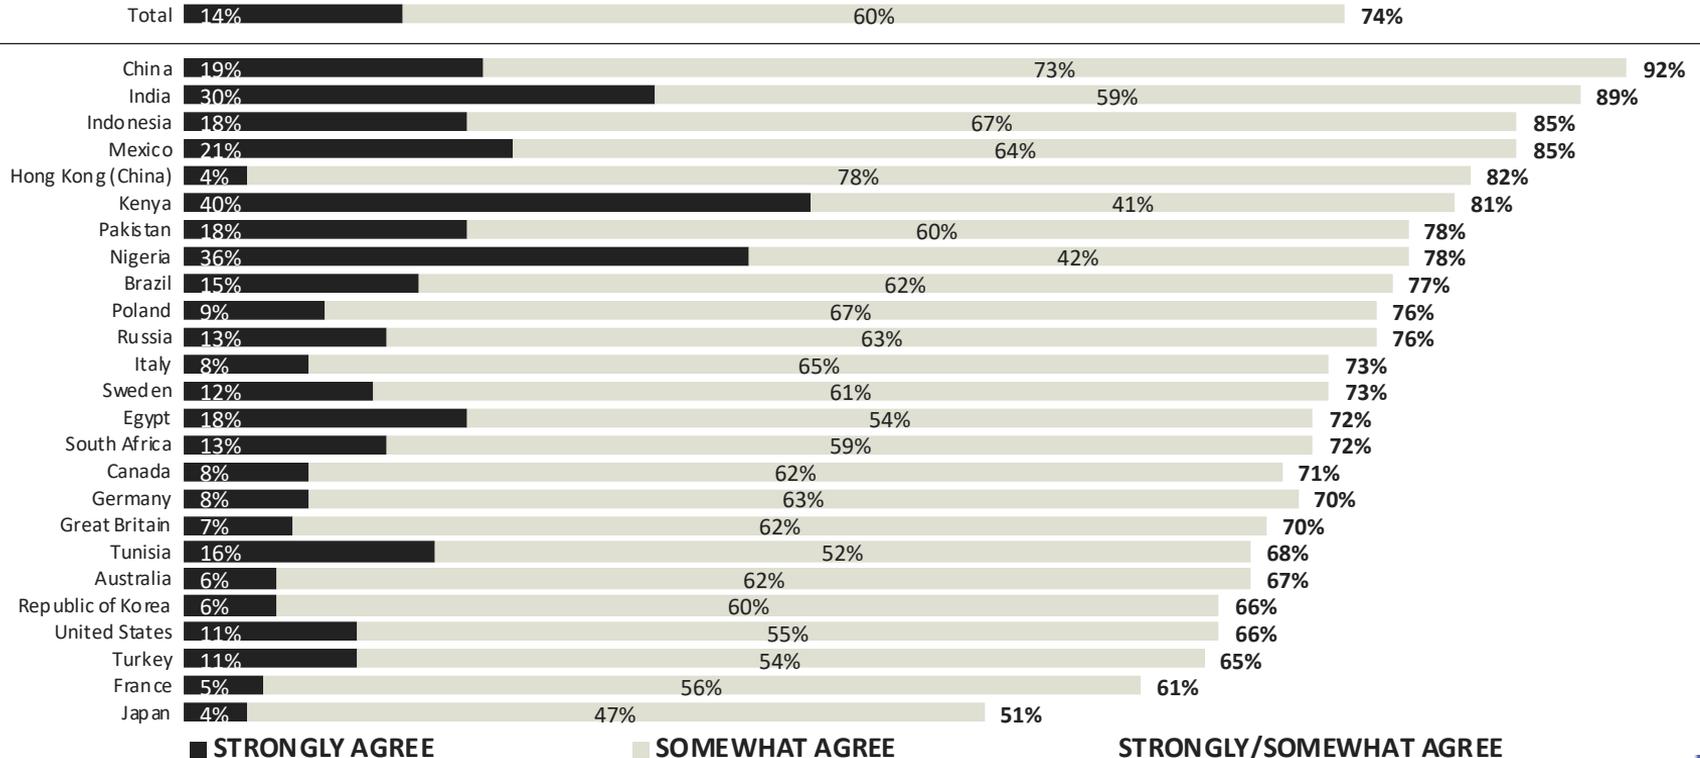

# TRUST IN THE INTERNET

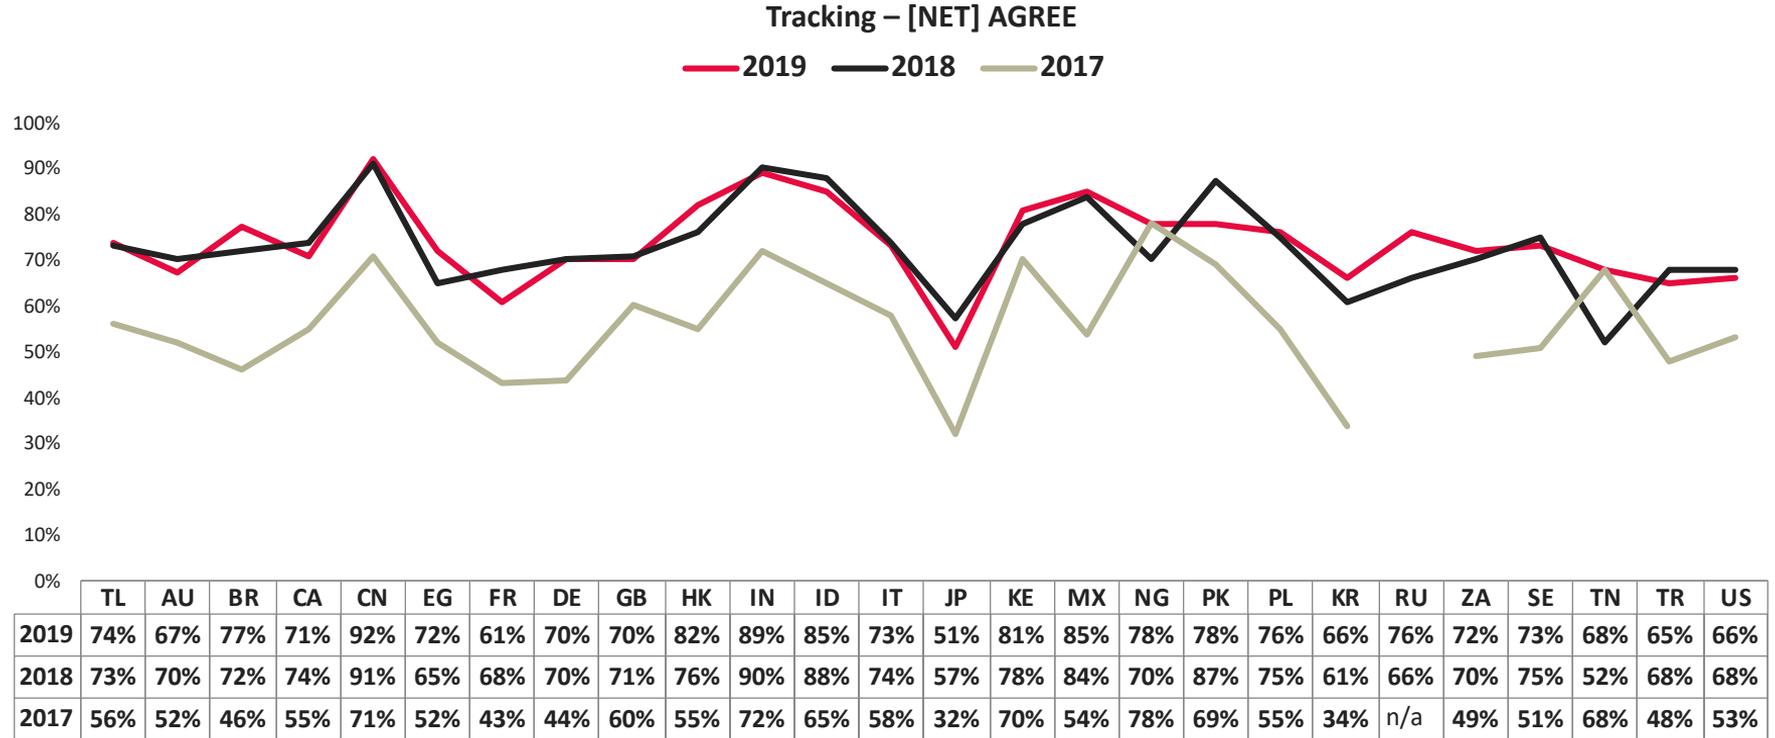

## Overall, I trust the Internet— By Economy

Overall, three in four (74%) trust the Internet. Citizens of China (92%) & India (89%) are among the most trusting of the Internet, whereas barely half (51%) of Japanese citizens *agree* (4% strongly; 47% somewhat) that, on balance, they trust the Internet.

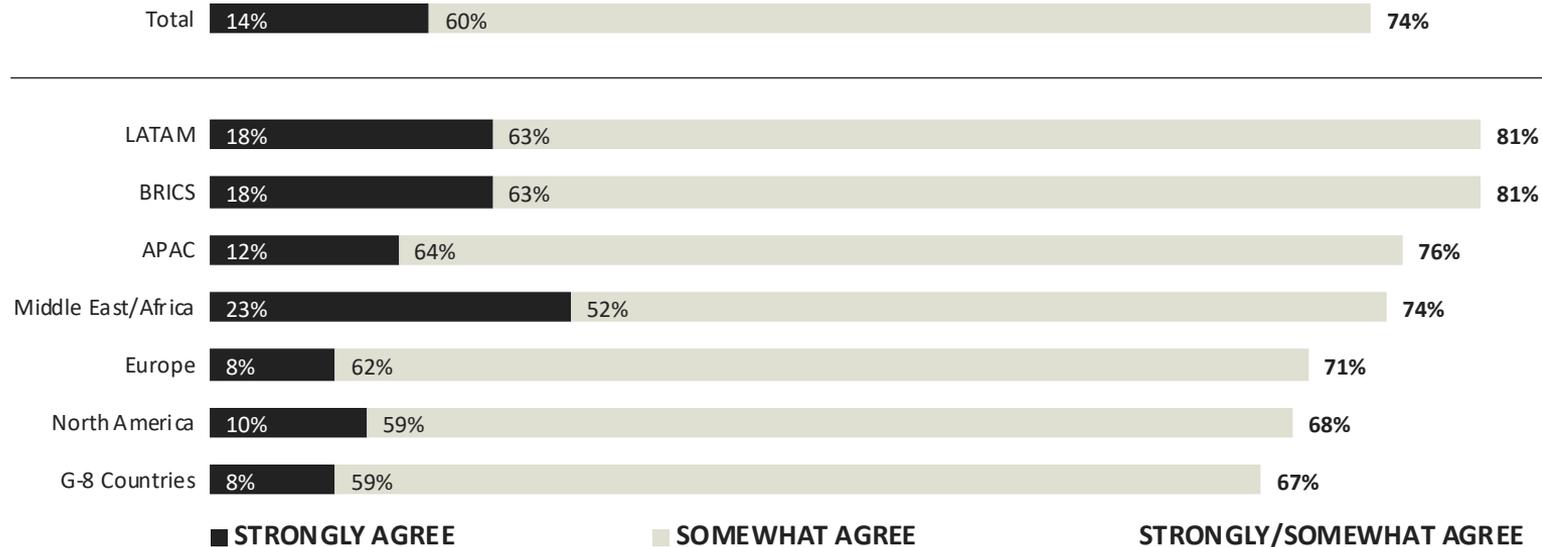

## Overall, I trust the Internet— By Economy

Since last year, global citizens are no more, or less, likely to *agree* that they trust the Internet. The greatest upward movement occurs in Tunisia (+16 pts). Pakistan (-9) saw the largest drop.

## Overall, I trust the Internet— By Regional Economy

Regionally, a high of four in five BRICS (81%) & LATAM (81%) citizens trust the Internet, compared to a low of two in three in North America (68%) & the G-8 (67%).

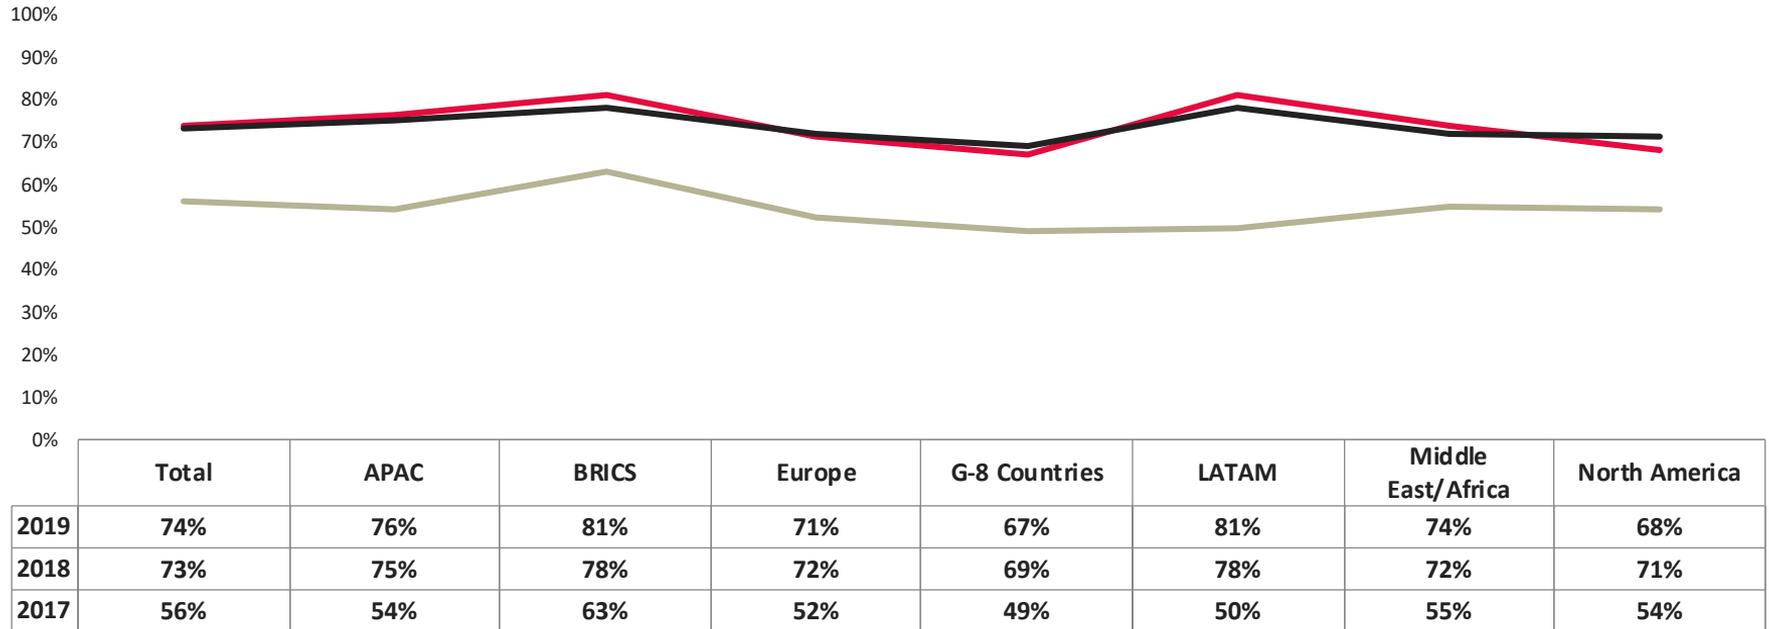

## Overall, I trust the Internet— By Regional Economy

Relative to the 2018 survey, trust has increased the most in BRICS (+3 pts) & LATAM (+3). North America (-3 pts) has experienced the greatest drop, wave over wave.

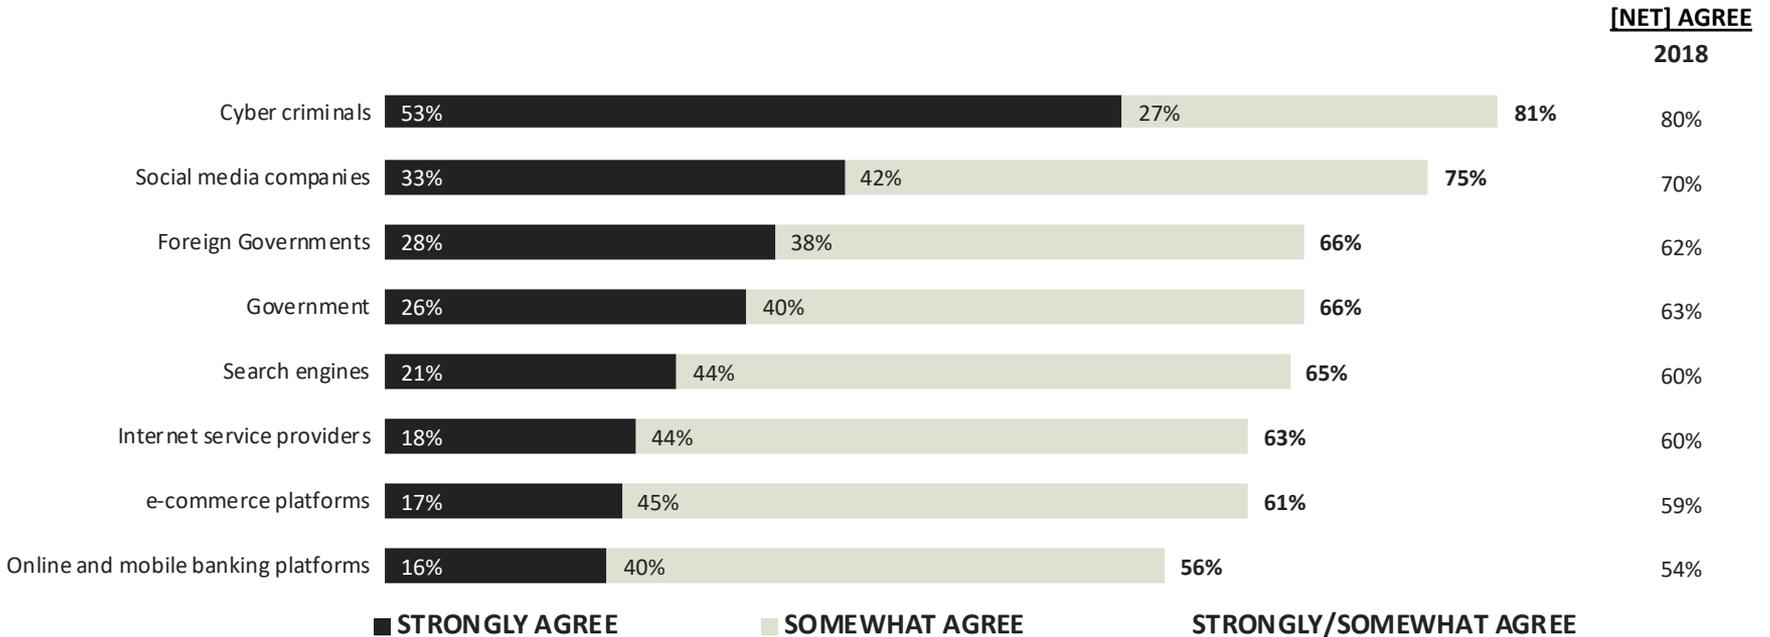

Tracking – [NET] AGREE

— 2019 — 2018 — 2017

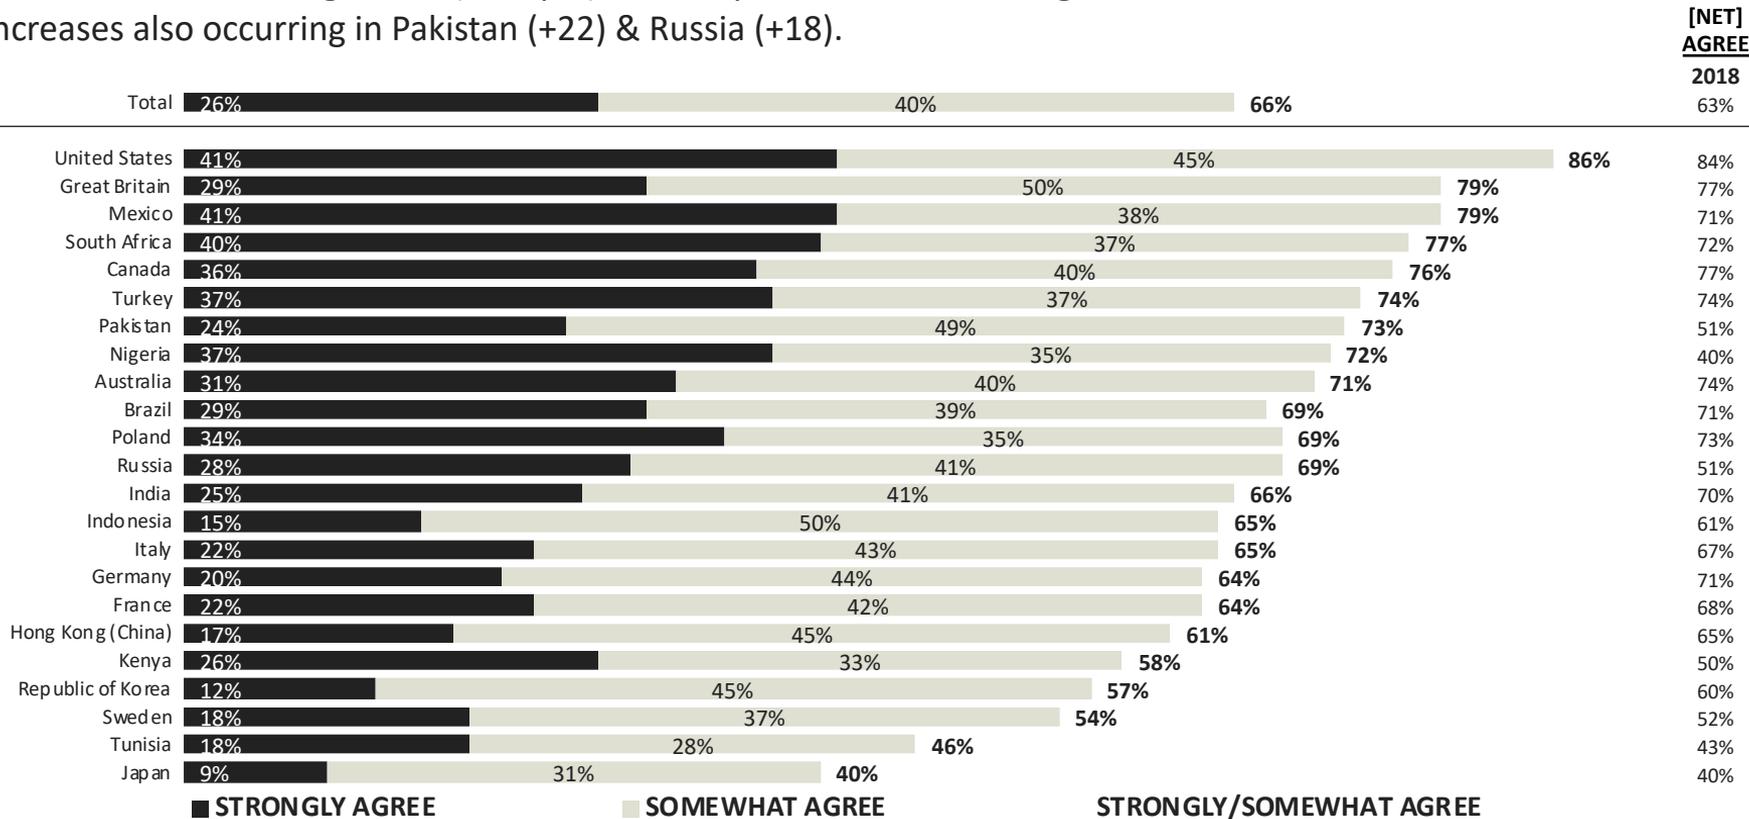

## Factors Contributing to Distrust

Among those who distrust the Internet, more *agree* that each factor has contributed to their distrust, wave over wave. At eight in ten (81%) cyber criminals continue to be the leading reason for Internet distrust, holding steady, but other factors are growing, most notably social media (+5) and search engines (+5).

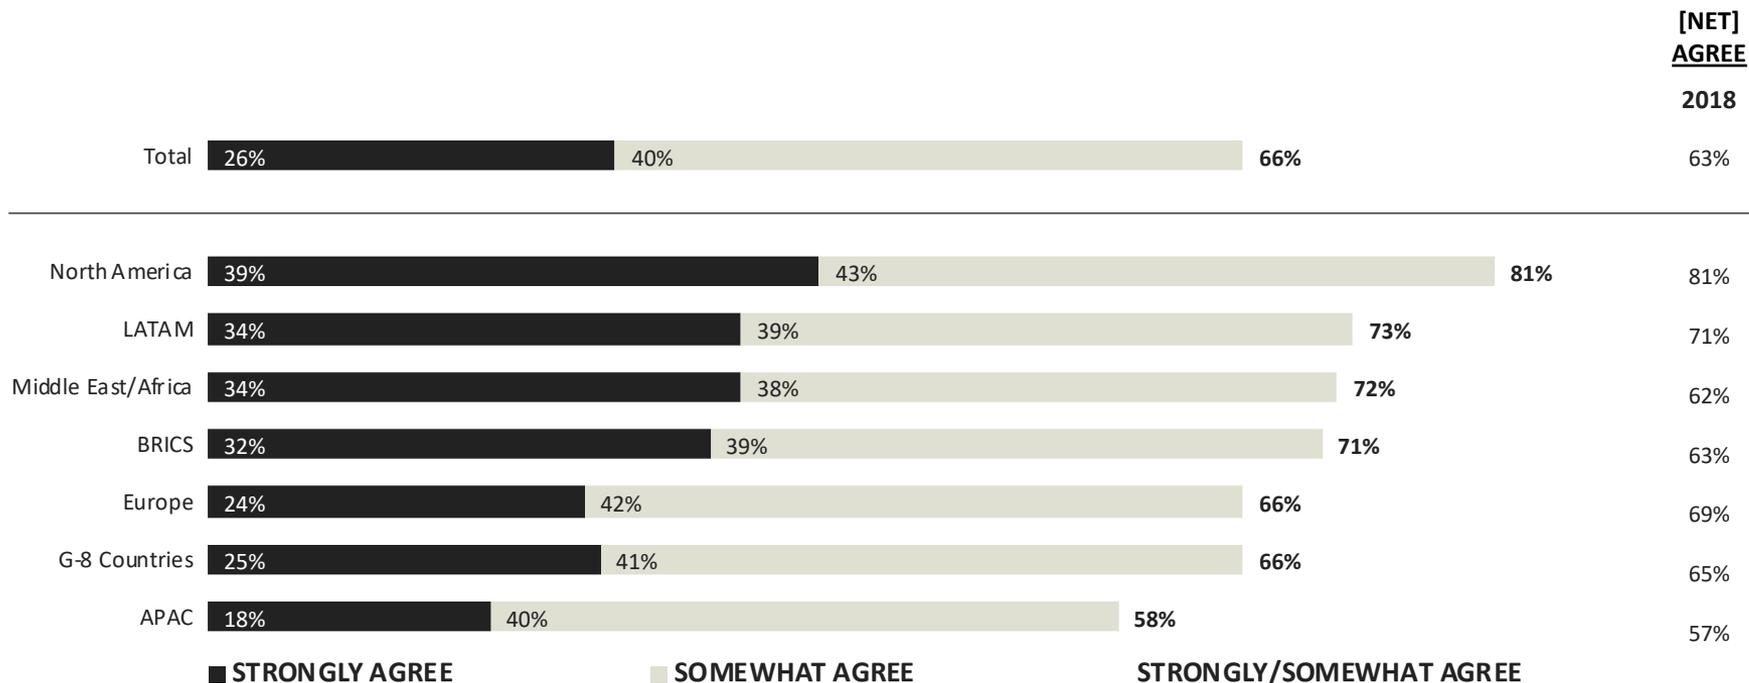

## GOVERNMENTS

Consistent with 2018, Americans continue to be the most likely to *agree* (86%) that government contributes to their distrust. However, Nigerians (+32 pts) are responsible for the largest wave-over-wave increase, with sizeable increases also occurring in Pakistan (+22) & Russia (+18).

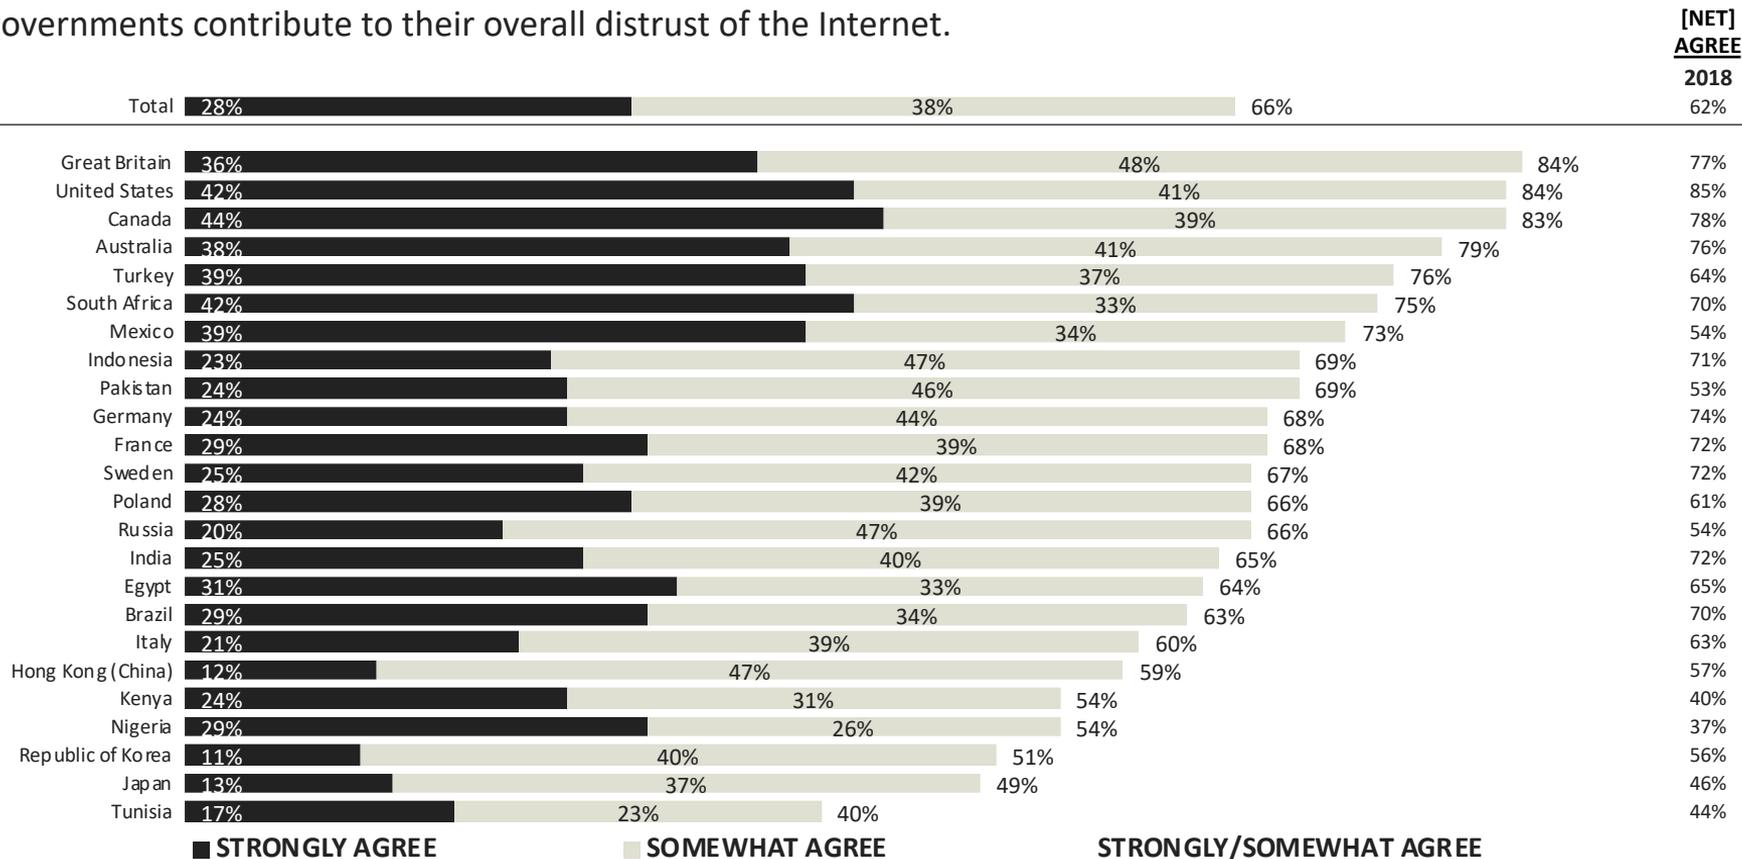

## GOVERNMENTS

North Americans (81%) continue to be more likely to list government as a source of their distrust, with notable wave-over-wave movement occurring in the BRICS (+8 pts), Middle Eastern & African (+10) economies, specifically.

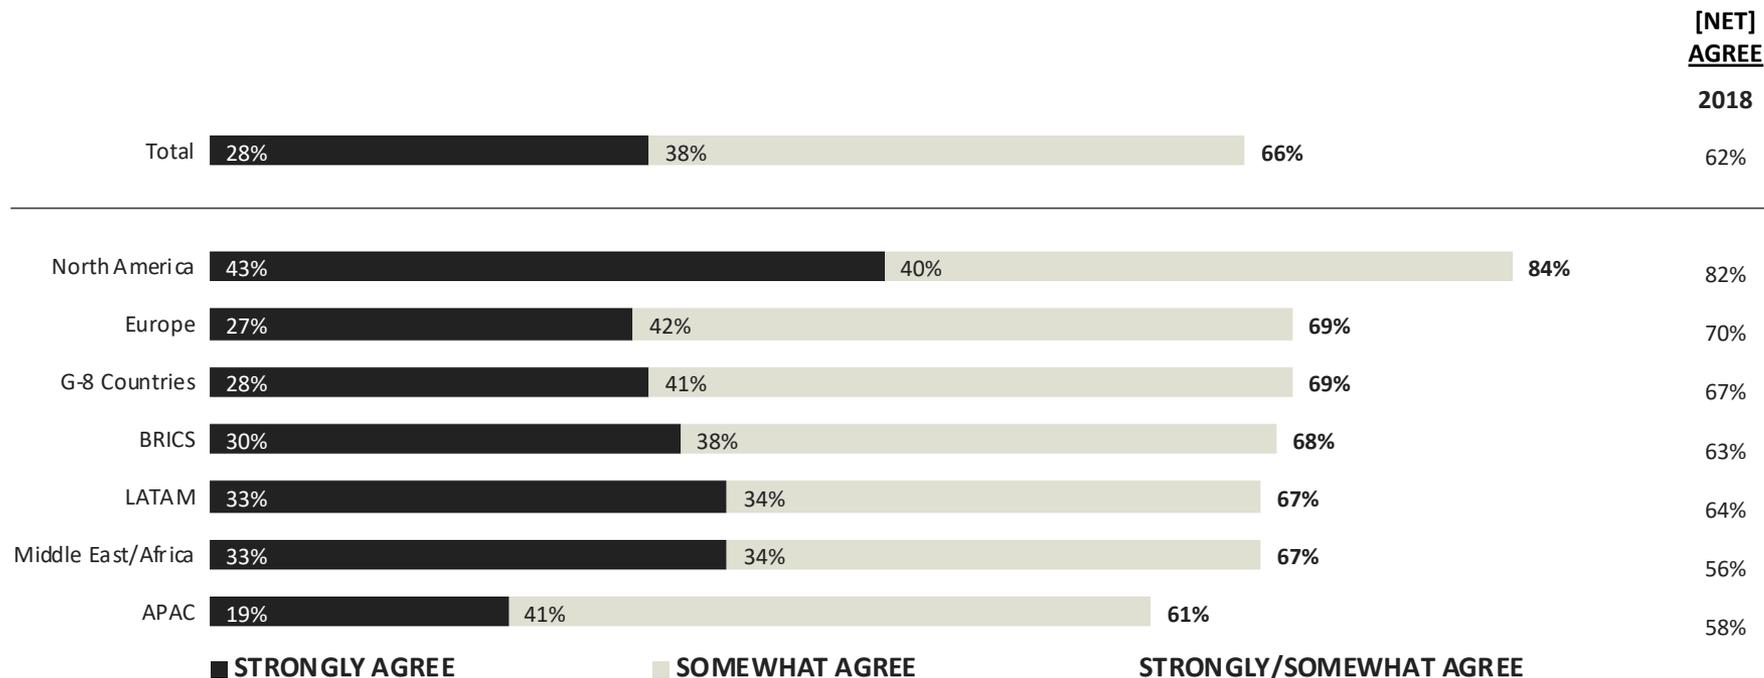

## FOREIGN GOVERNMENTS

Anglophone citizens (US, GB, Canada & Australia) continue to be among the most likely to *agree* that foreign governments contribute to their overall distrust of the Internet.

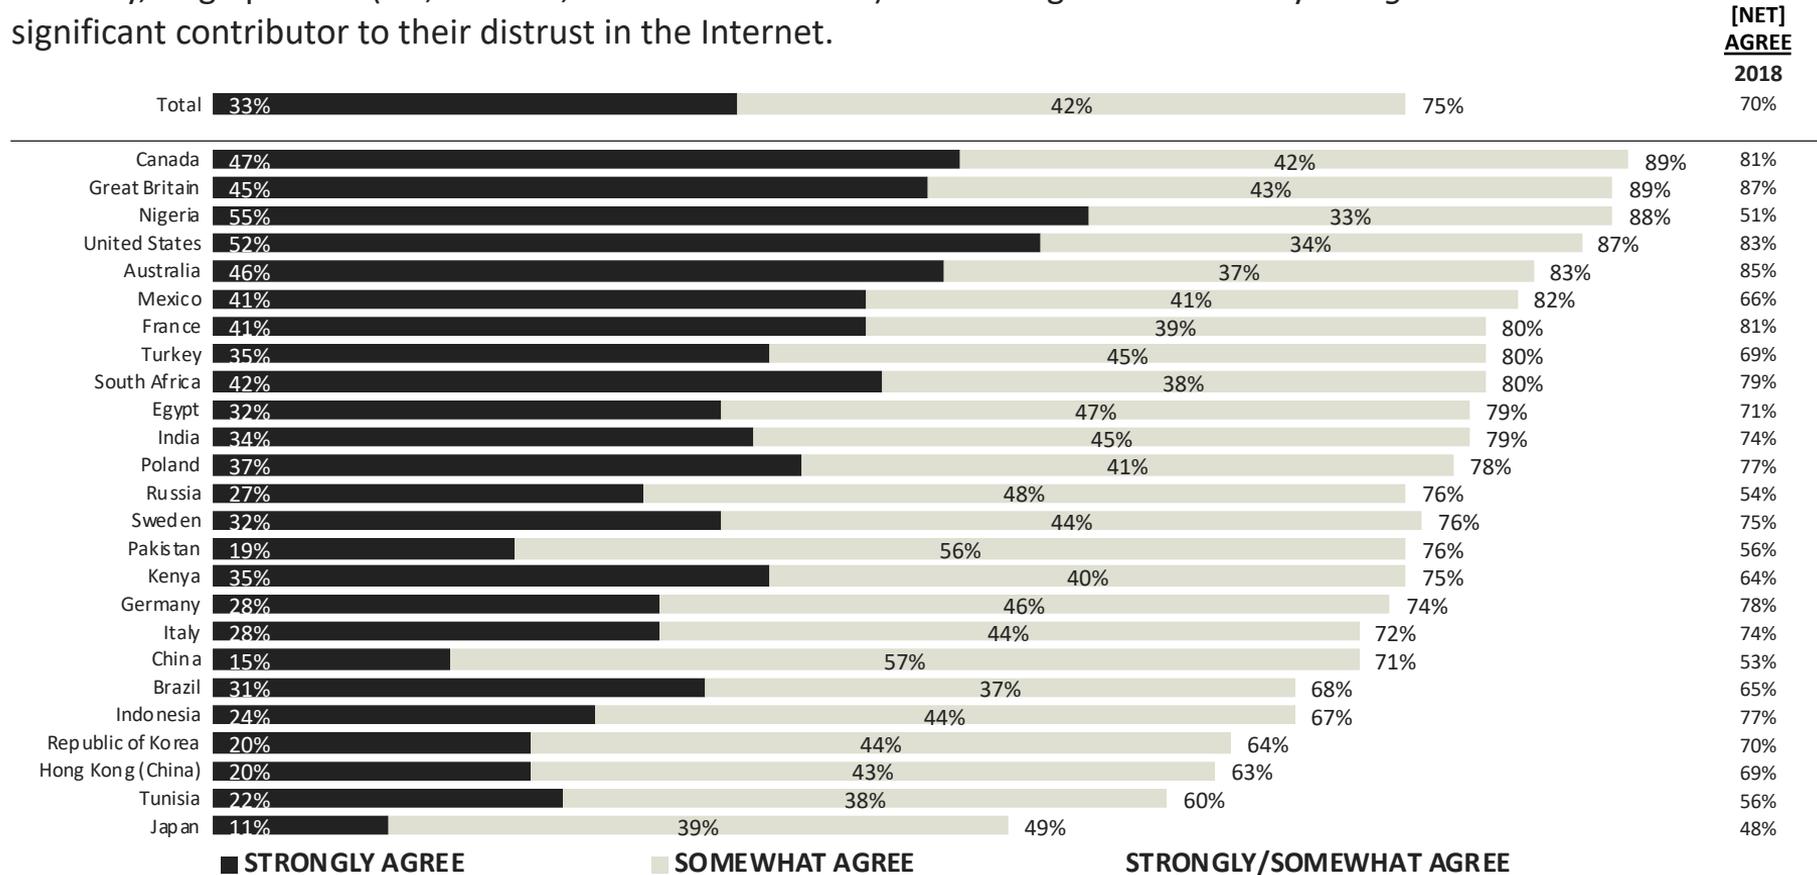

## FOREIGN GOVERNMENTS

On balance, there has been an increase (+4 pts) in the incidence of global citizens who claim that foreign governments are contributing to their distrust of the Internet, led by citizens living in the Middle East & Africa (+11).

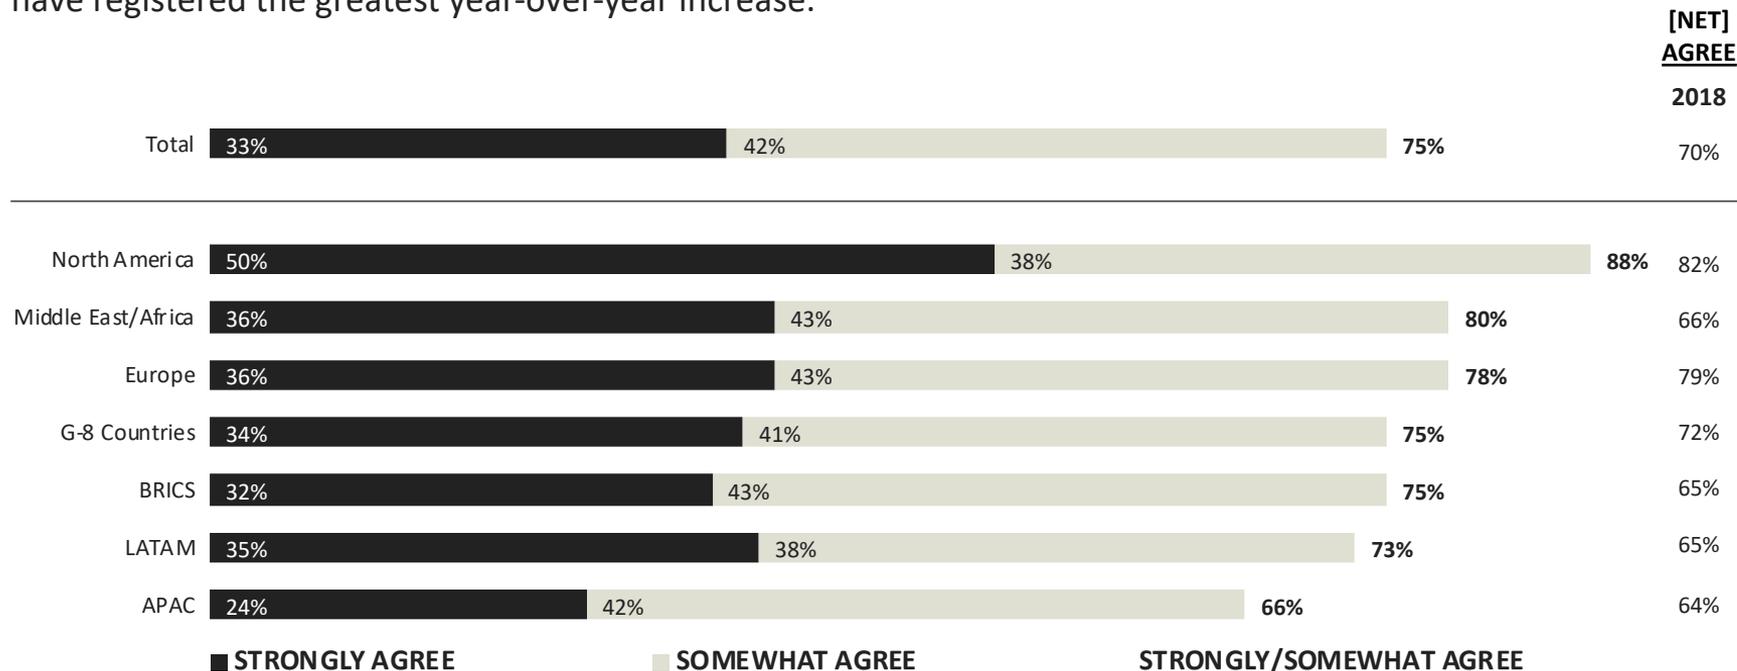

## SOCIAL MEDIA COMPANIES

Similarly, anglophones (GB, Canada, the US & Australia) are among the most likely to *agree* that social media is a significant contributor to their distrust in the Internet.

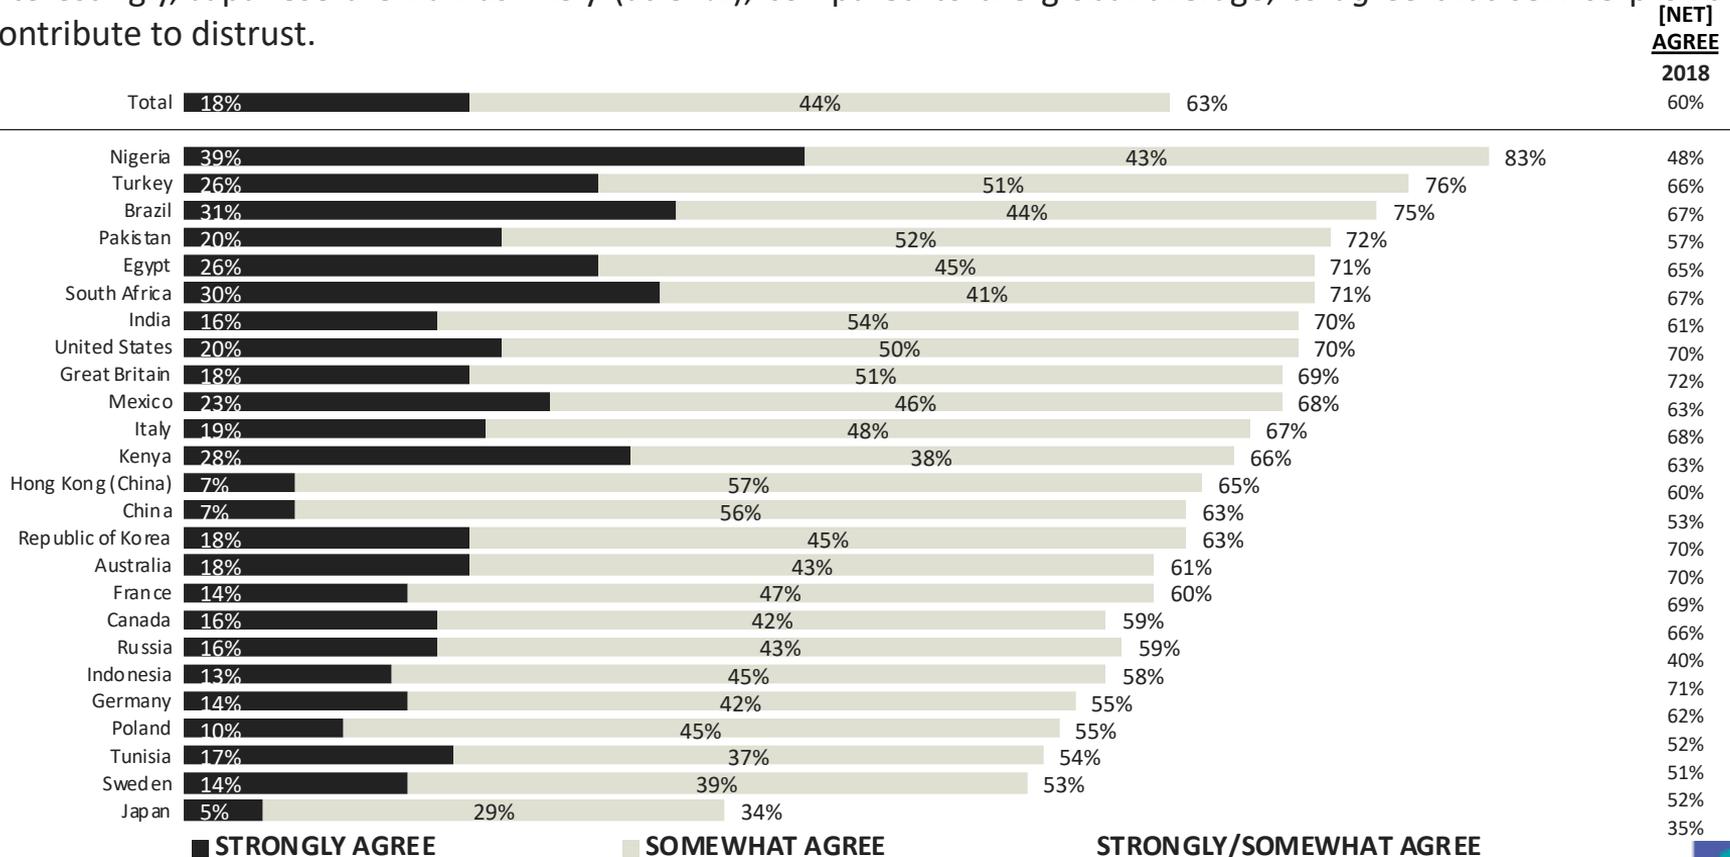

## SOCIAL MEDIA COMPANIES

Almost nine in ten (88%) North Americans who distrust the Internet *agree* that social media is responsible for this distrust, far and away the highest proportion out of all regions surveyed. However, the Middle East & Africa (+14 pts) have registered the greatest year-over-year increase.

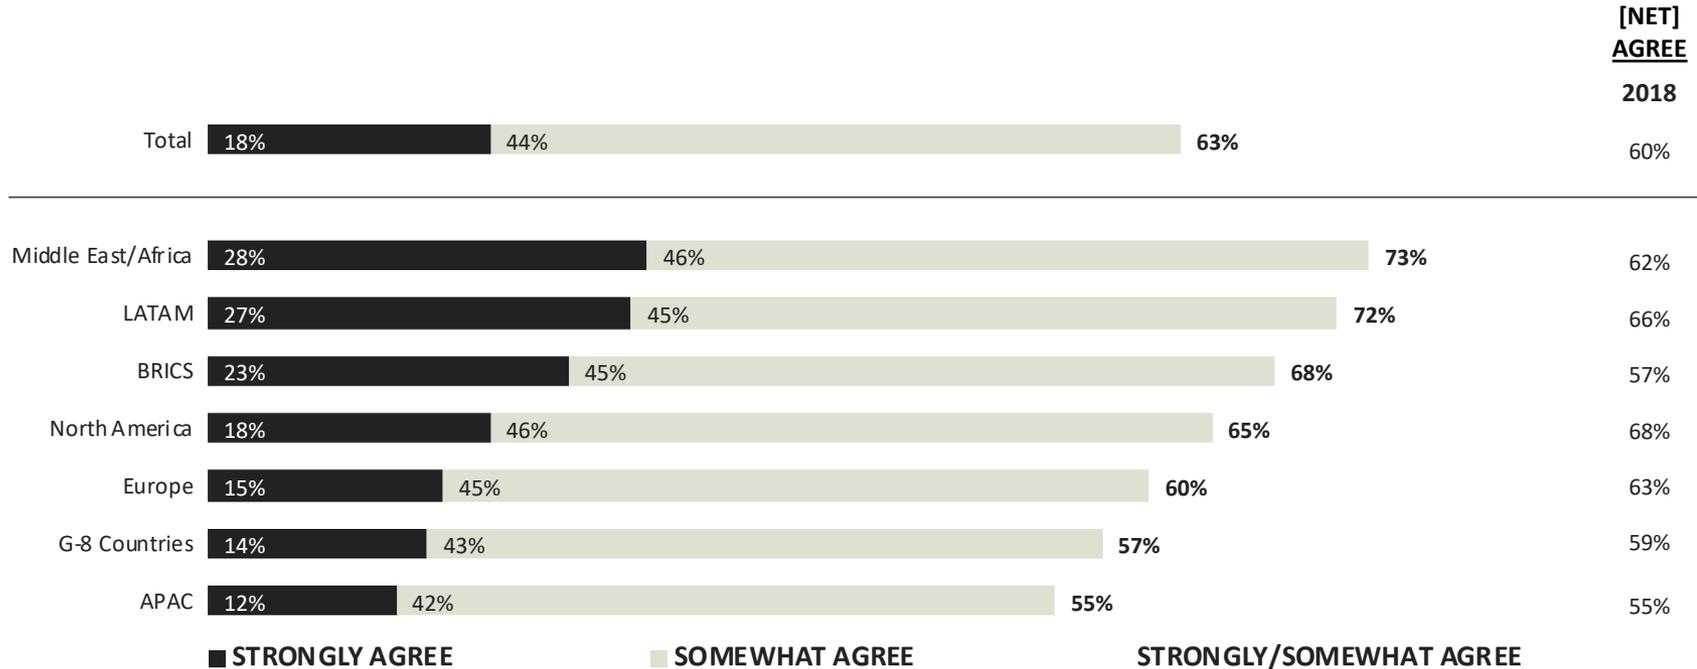

## INTERNET SERVICE PROVIDERS

Two-thirds (63%) of those who distrust the Internet *agree* that service providers are a source distrust. Somewhat interestingly, Japanese are half as likely (at 34%), compared to the global average, to *agree* that service providers contribute to distrust.

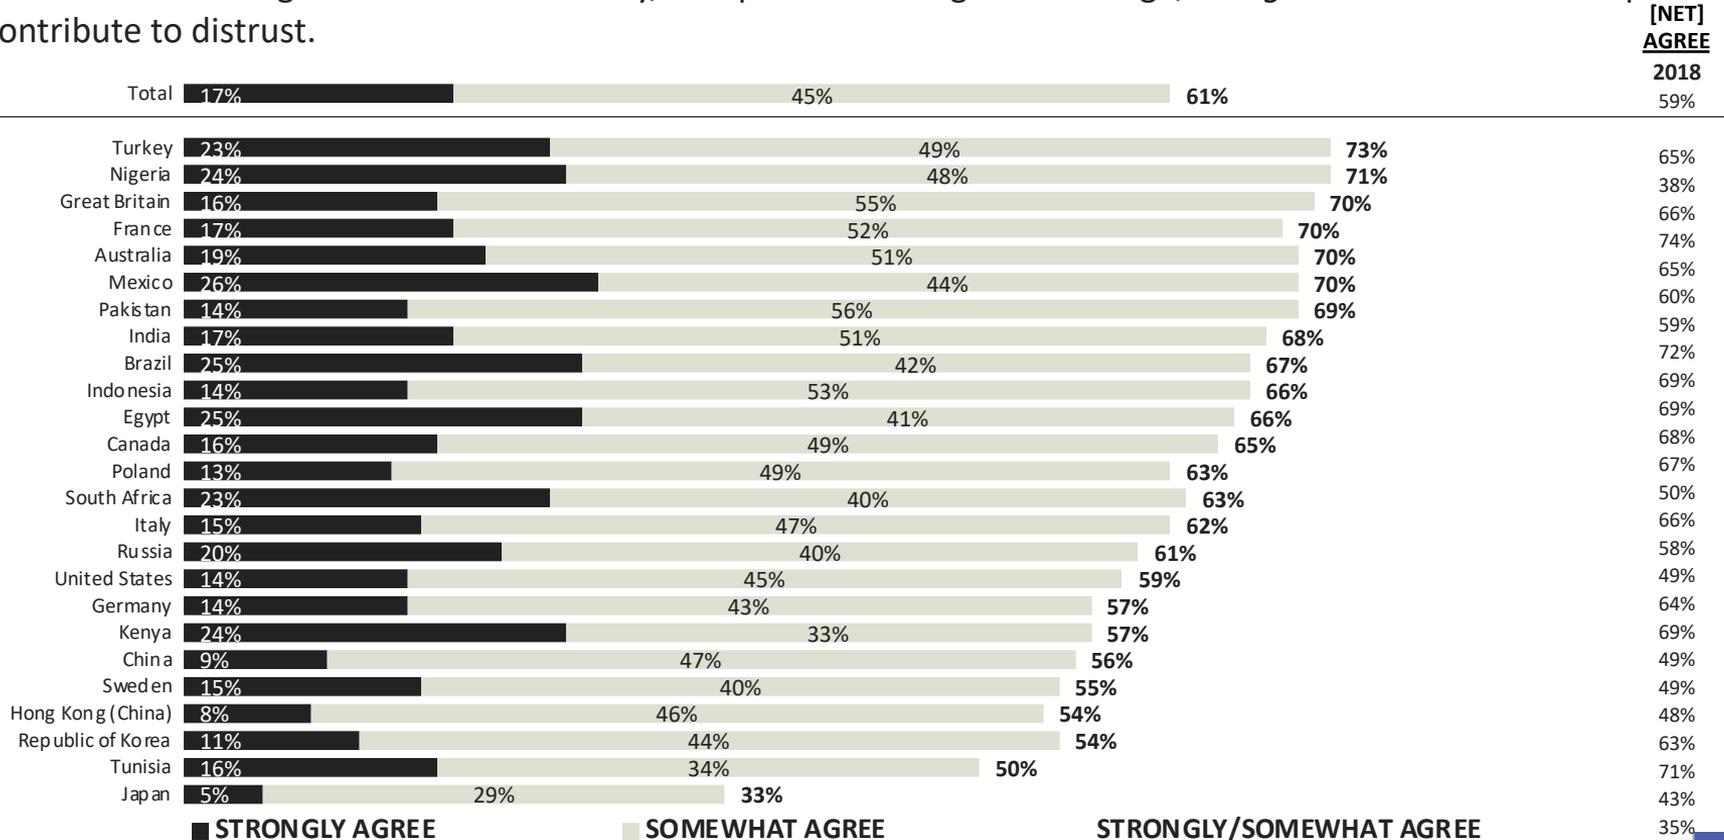

## INTERNET SERVICE PROVIDERS

Since 2018, the incidence of citizens living in the BRICS (+11 pts), Middle Eastern & African (+11) economies citing Internet service providers as sources of distrust has increased the most.

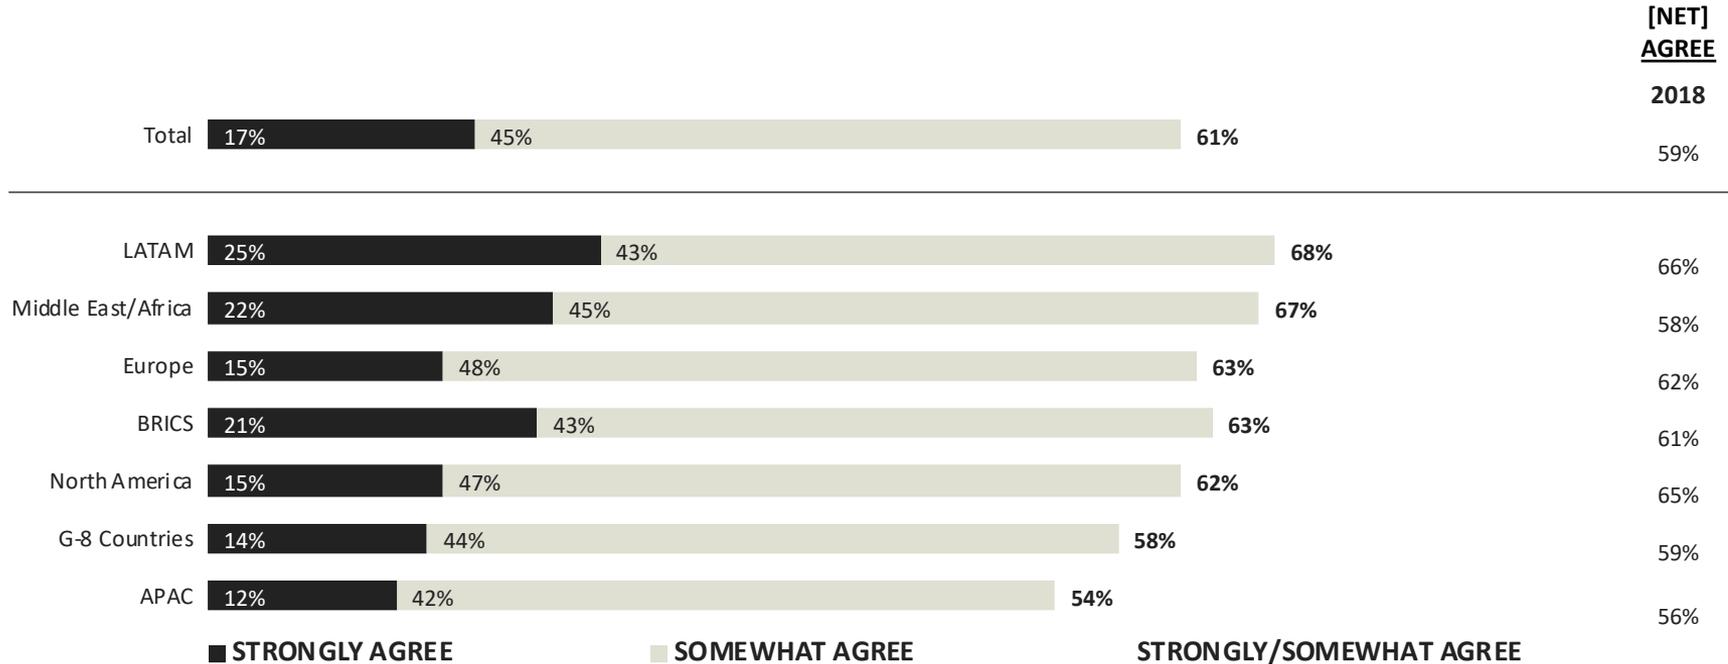

## E-COMMERCE PLATFORMS

A majority (61%) who distrust the Internet *agree* that e-commerce platforms are a contributor. At 33%, Japanese citizens are once again about half as likely, compared to the global average, to *agree* that e-commerce platforms contribute to distrust.

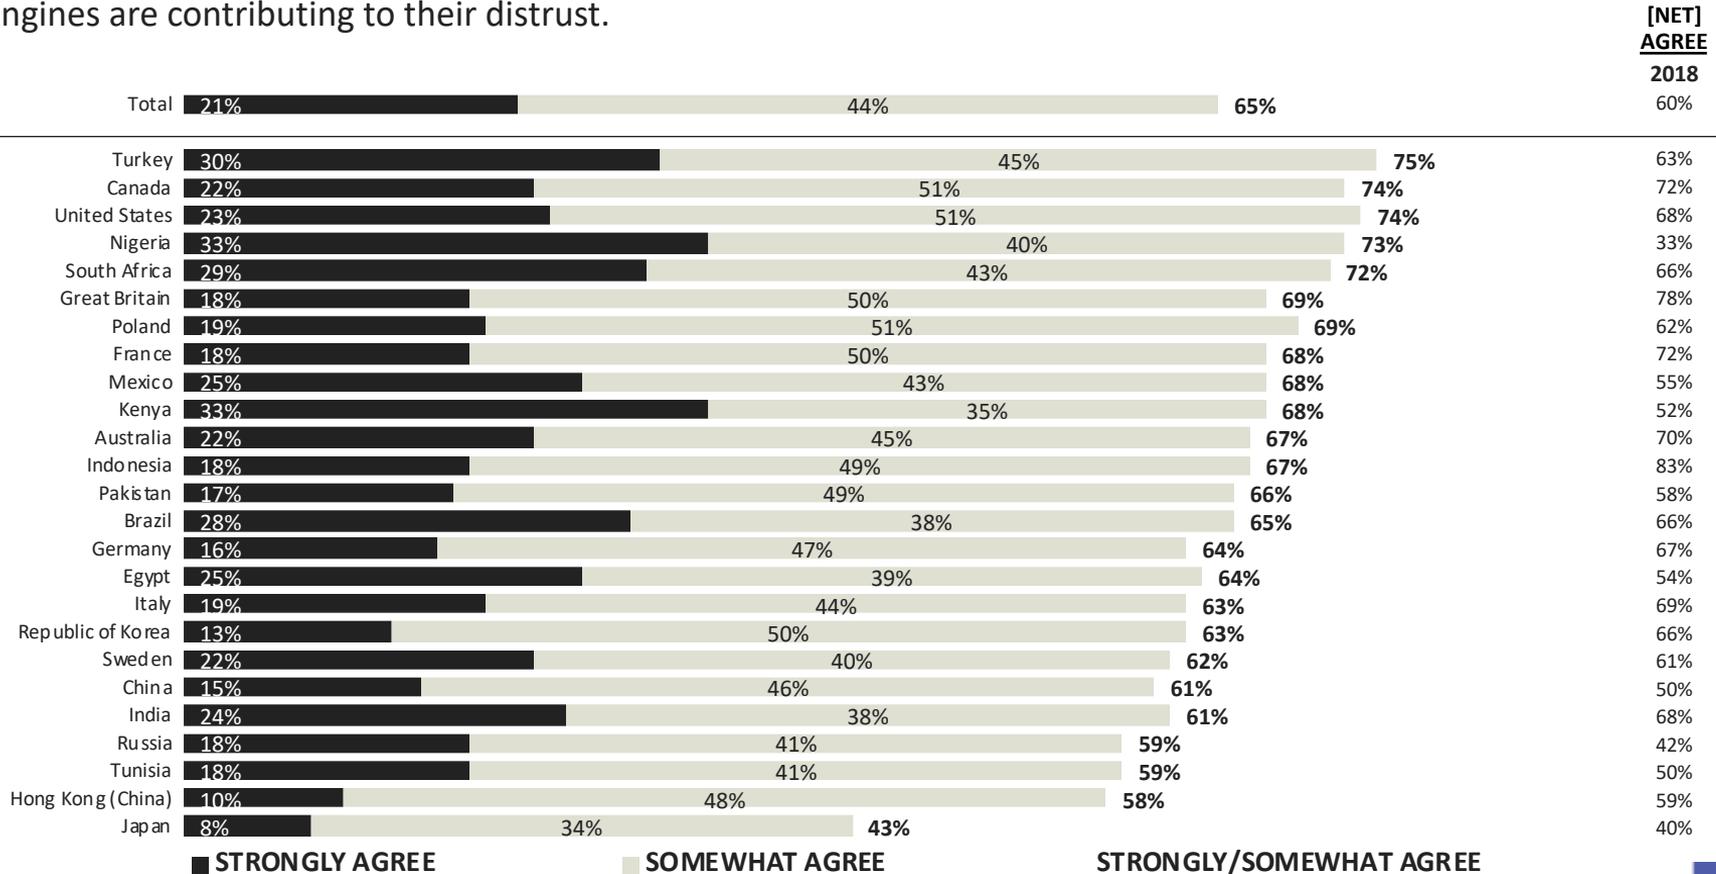

## E-COMMERCE PLATFORMS

Distrust with respect to e-commerce platforms has increased the most, year-over-year, in the Middle Eastern & African economies (+9 pts).

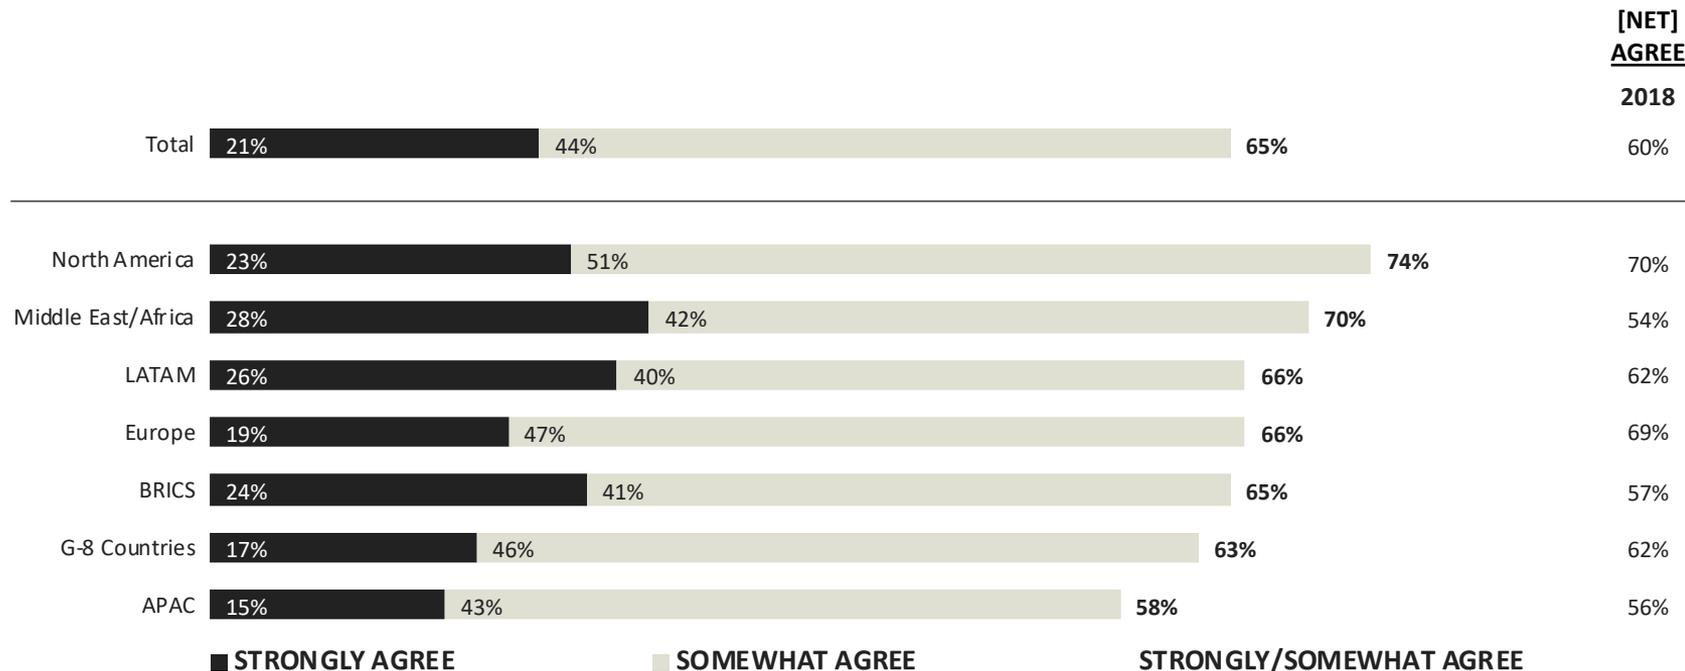

## SEARCH ENGINES

Relative to 2018, more than twice as many Nigerians (73%; +40 pts) who distrust the Internet *agree* that search engines are contributing to their distrust.

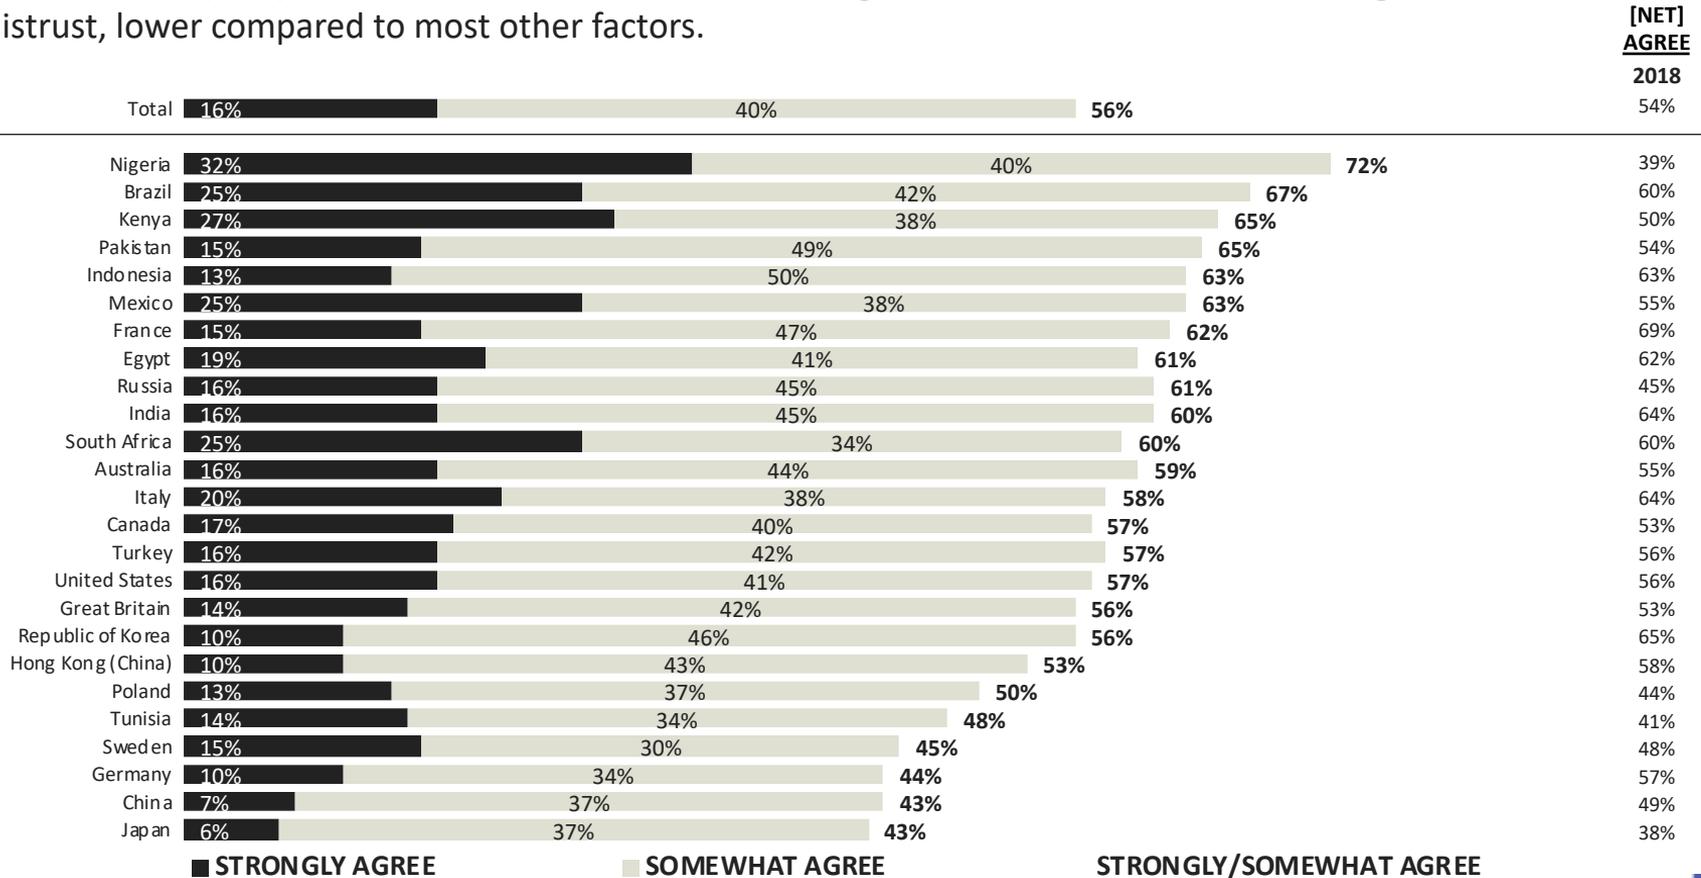

## SEARCH ENGINES

Overall, significantly more in all regions, save for Europe (-3 pts), *agree* that search engines have contributed to their distrust in the Internet.

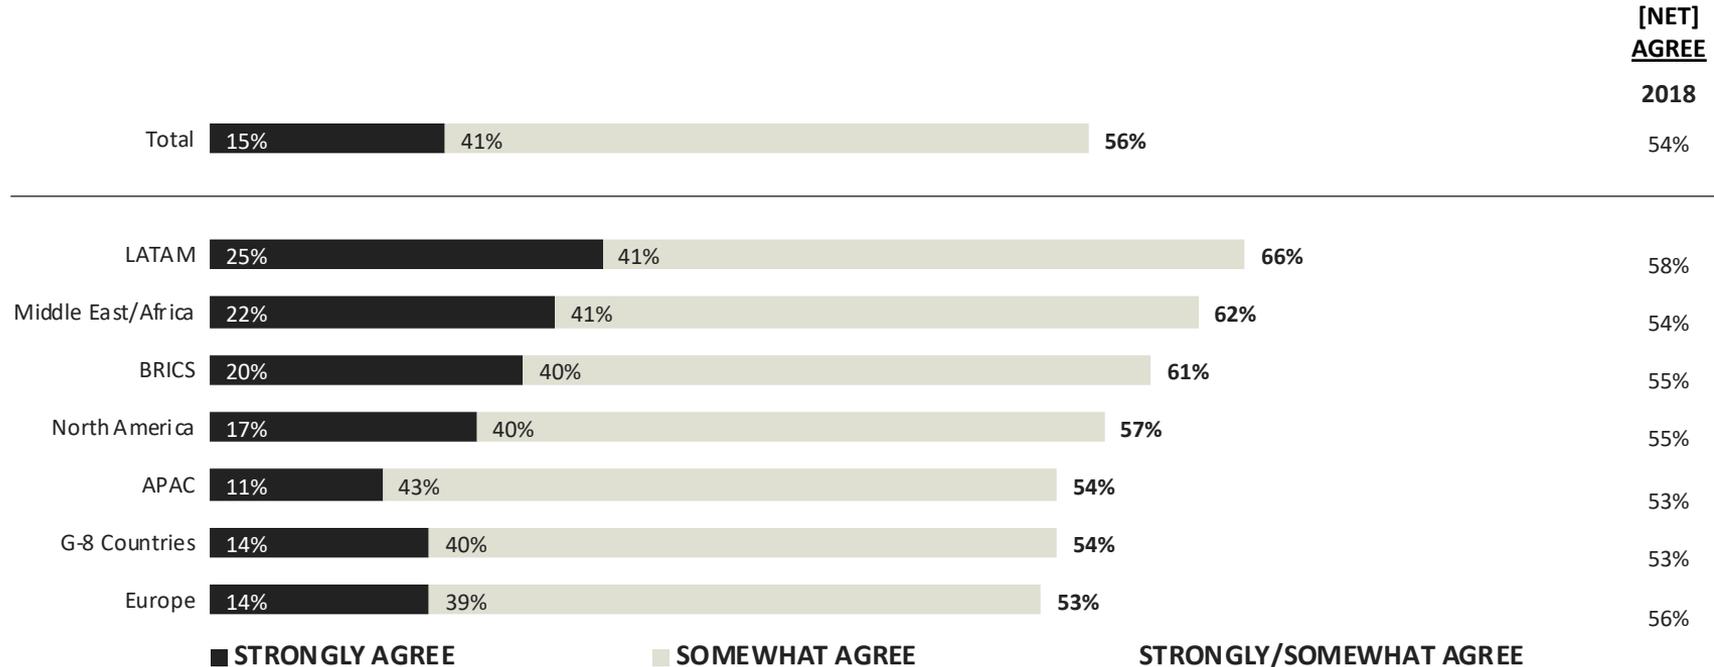

## ONLINE AND MOBILE BANKING PLATFORMS

Just over half (56%) of those who distrust the Internet *agree* that online & mobile banking has contributed to their distrust, lower compared to most other factors.

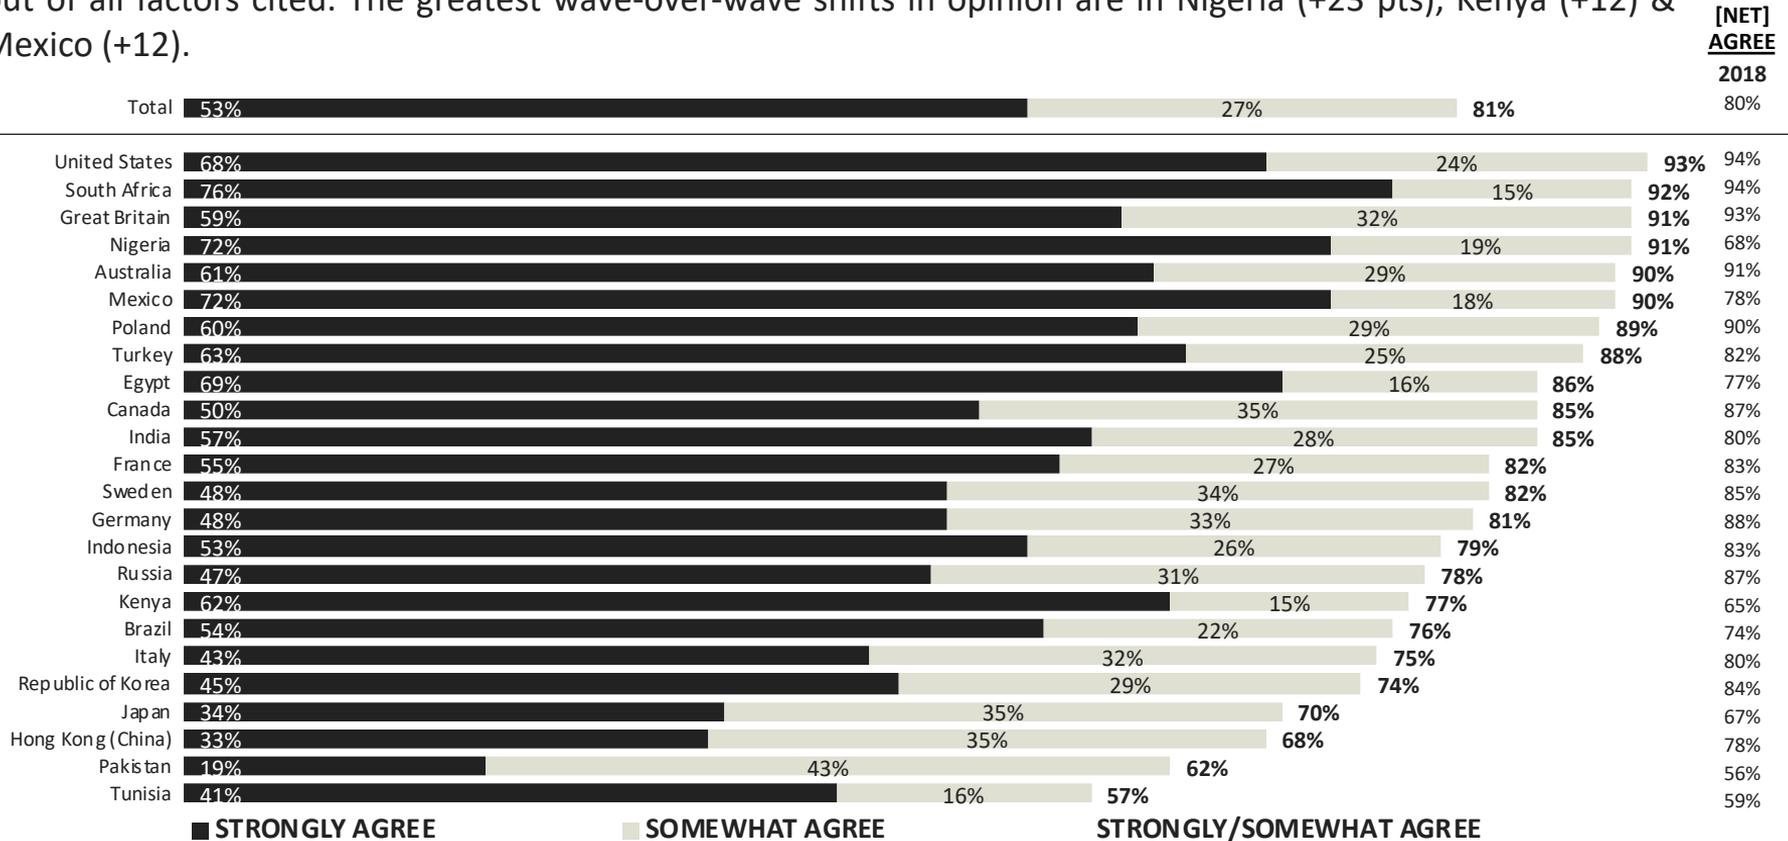

## ONLINE AND MOBILE BANKING PLATFORMS

Wave over wave, more in each of the regional economies, save for Europe (-3 pts), *agree* that online & mobile banking platforms have contributed to their distrust.

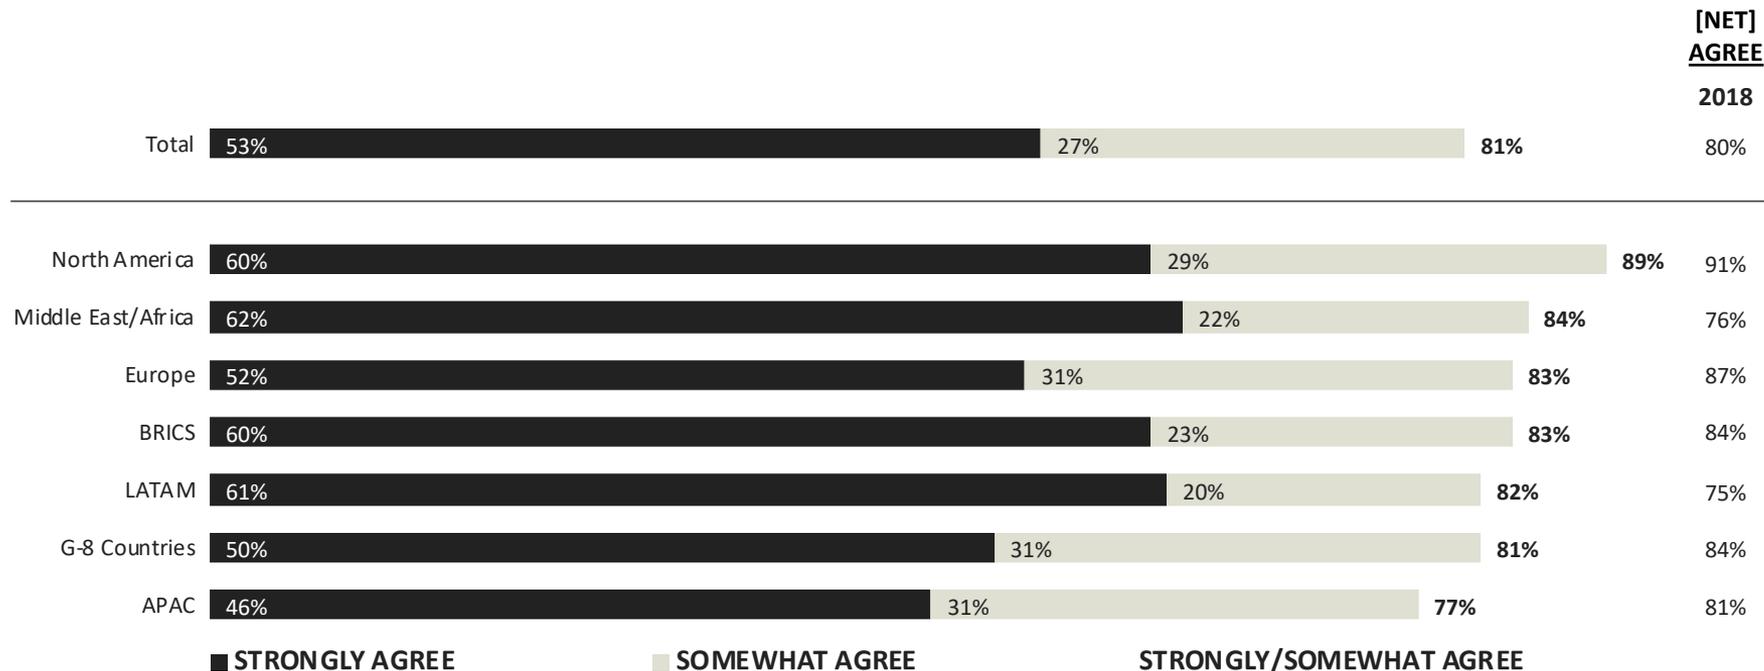

## CYBER CRIMINALS

Four in five (81%) *agree* that cyber criminals are contributing to their distrust in the Internet, by far the most out of all factors cited. The greatest wave-over-wave shifts in opinion are in Nigeria (+23 pts), Kenya (+12) & Mexico (+12).

## CYBER CRIMINALS

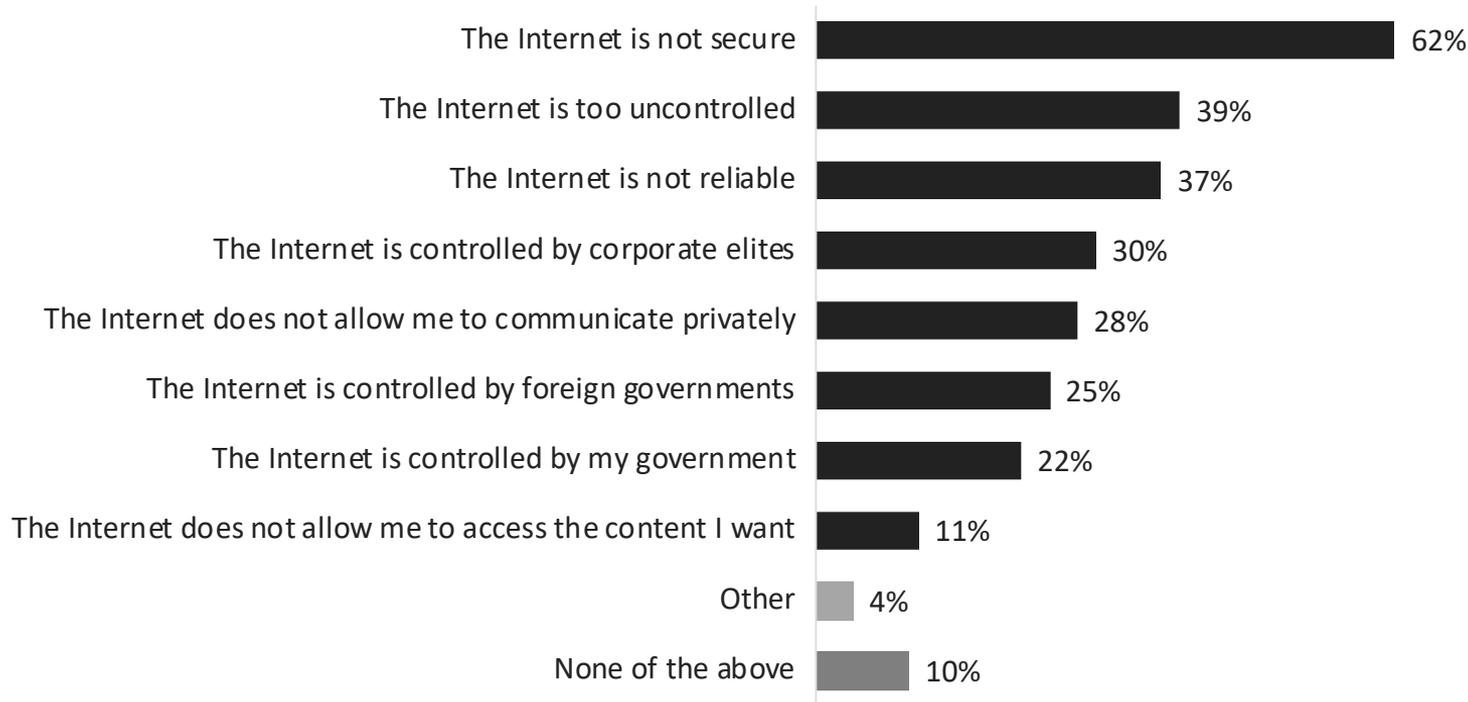

Outside of LATAM (+7 pts), the Middle East & Africa (+8 pts), there is generally a reduced tendency to blame cyber criminals for Internet distrust.

## Other Reasons For Distrust

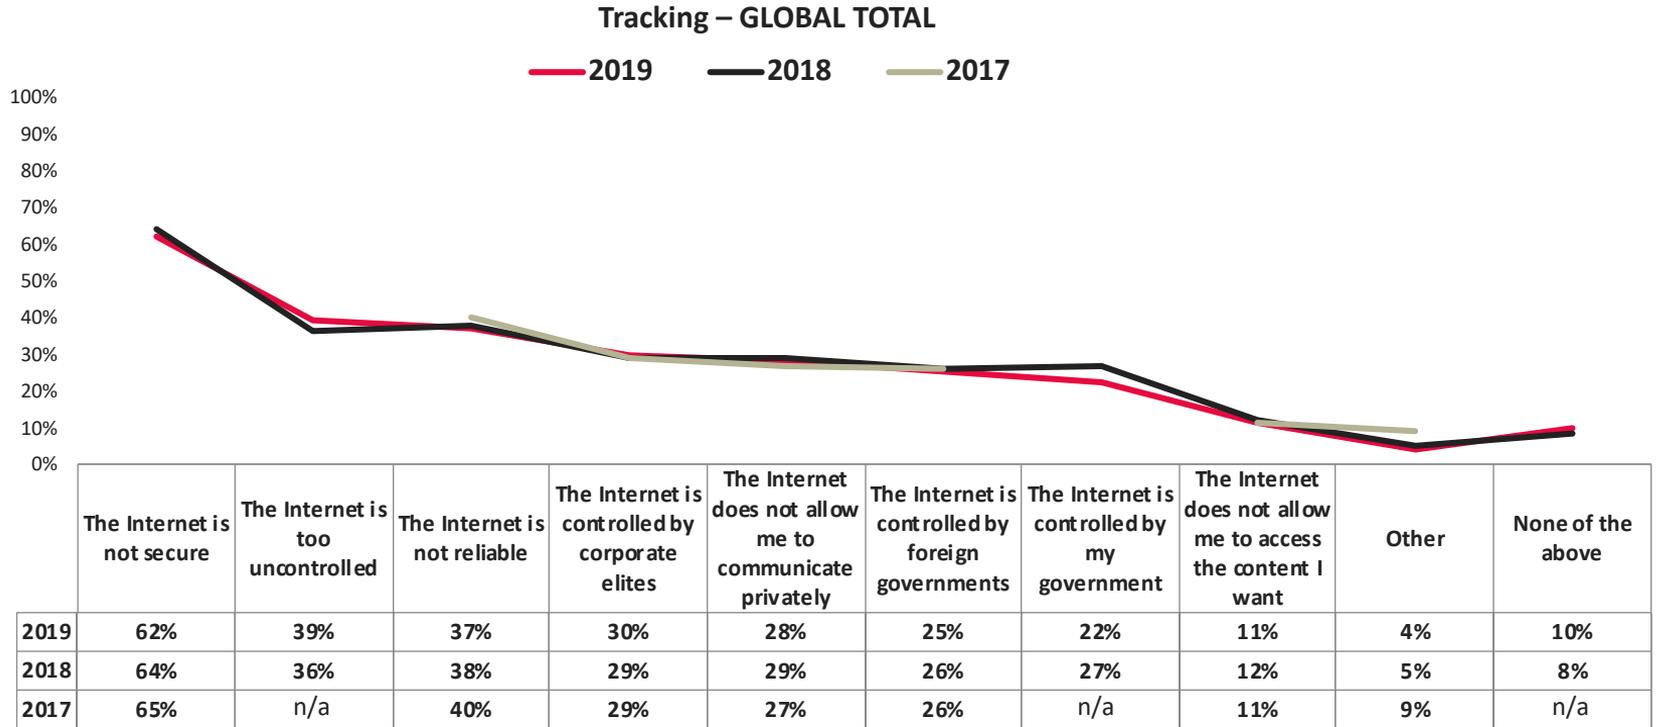

Three in five (62%) global citizens who distrust the Internet indicate that they feel this way because the Internet is not secure.

### Global Total - 2019

## Other Reasons For Distrust

Relative to 2018, there has been an increase in the proportion who perceive the Internet as being too uncontrolled (39%; +3 pts).

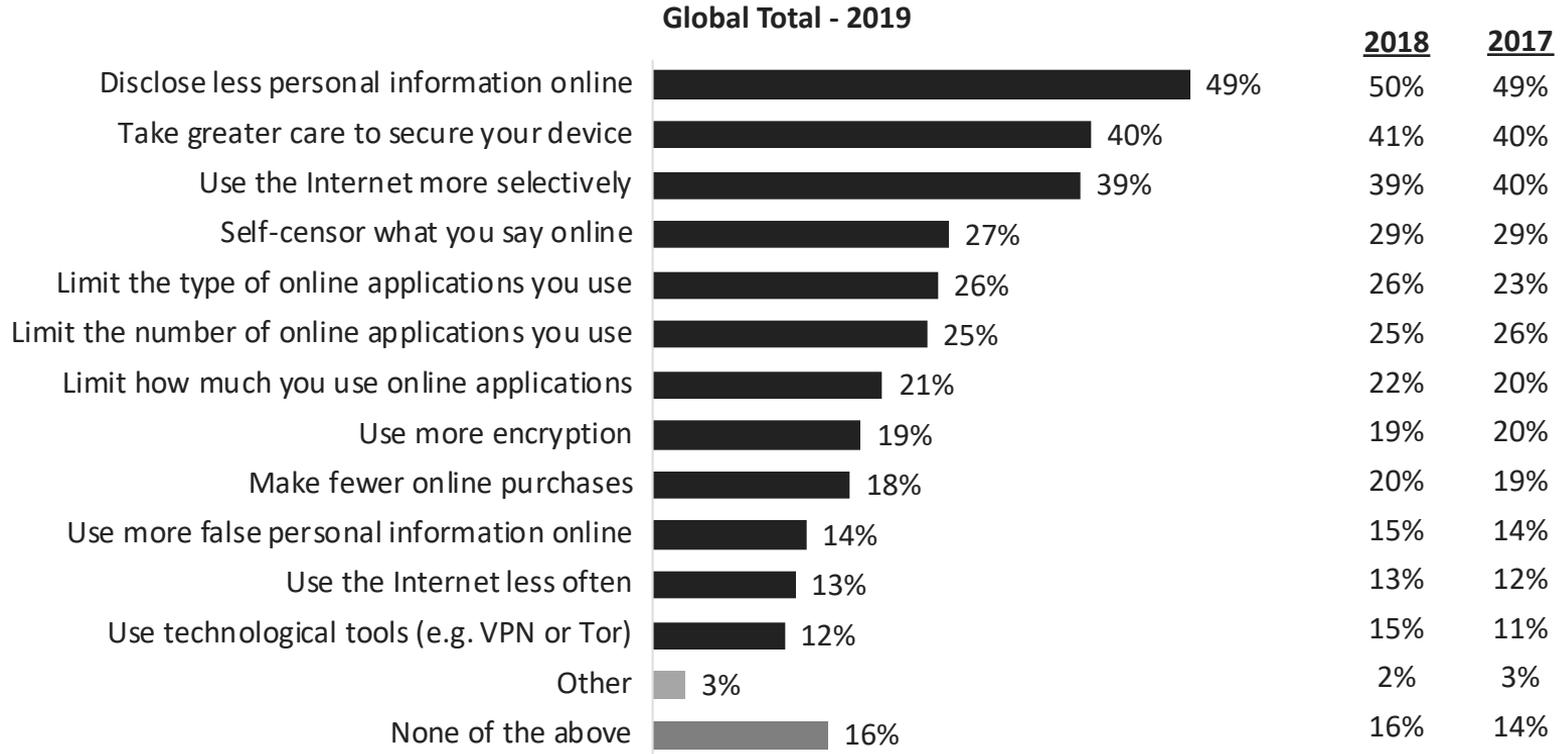

## Other Reasons For Distrust – By Regional Economy

When it comes to other reasons for distrust, there is considerable regional variation in opinion.

|   | REGIONS       |               |              |               |               |               |              |                    |
|---|---------------|---------------|--------------|---------------|---------------|---------------|--------------|--------------------|
|   | Total         | North America | LATAM        | Europe        | APAC          | G-8 Countries | BRICS        | Middle East/Africa |

| The Internet does not allow me to communicate privately     | 28%           | 31%           | 34%          | 33%           | 20%           | 27%           | 34%          | 20%                |
| The Internet is controlled by foreign governments           | 25%           | 18%           | 22%          | 21%           | 17%           | 19%           | 24%          | 33%                |
| The Internet is controlled by my government                 | 22%           | 24%           | 17%          | 20%           | 20%           | 20%           | 26%          | 20%                |
| The Internet does not allow me to access the content I want | 11%           | 4%            | 7%           | 6%            | 11%           | 5%            | 14%          | 14%                |
| Other   | 4%            | 6%            | 2%           | 4%            | 3%            | 4%            | 4%           | 6%                 |
| None of the above   | 10%           | 8%            | 5%           | 12%           | 12%           | 14%           | 6%           | 7%                 |

## Ways Lack of Trust Has Changed Internet Behaviour

Consistent with previous waves, around half (49%) of those who distrust the Internet indicate that this distrust has compelled them to disclose less personal information online. Significantly fewer (-3 pts) cite a reduced tendency to use technological tools such as VPN or Tor, relative to 2018.

## Ways Lack of Trust Has Changed Internet Behaviour – By Regional Economy

Distrusting citizens who live in developing economies tend to be more likely to have made each of the behavioural changes, with respect to Internet usage.

|   | REGIONS       |               |              |               |               |               |              |                    |
|---|---------------|---------------|--------------|---------------|---------------|---------------|--------------|--------------------|
|   | Total         | North America | LATAM        | Europe        | APAC          | G-8 Countries | BRICS        | Middle East/Africa |
| <i>Base: All Respondents</i>                    | <i>n=6608</i> | <i>n=644</i>  | <i>n=406</i> | <i>n=1812</i> | <i>n=1891</i> | <i>n=2643</i> | <i>n=959</i> | <i>n=1533</i>      |
| Disclose less personal information online       | 49%           | 53%           | 53%          | 41%           | 47%           | 41%           | 57%          | 50%                |
| Take greater care to secure your device         | 40%           | 45%           | 41%          | 32%           | 34%           | 32%           | 44%          | 44%                |
| Use the Internet more selectively               | 39%           | 42%           | 50%          | 32%           | 34%           | 32%           | 49%          | 42%                |

## ABOUT IPSOS

---

Ipsos is an independent market research company controlled and managed by research professionals. Founded in France in 1975, Ipsos has grown into a worldwide research group with a strong presence in all key markets. Ipsos ranks fourth in the global research industry.

With offices in 89 economies, Ipsos delivers insightful expertise across five research specializations: brand, advertising and media; customer loyalty; marketing; public affairs research; and survey management.

Ipsos researchers assess market potential and interpret market trends. They develop and build brands. They help clients build long-term relationships with their customers. They test advertising and study audience responses to various media and they measure public opinion around the globe.

Ipsos has been listed on the Paris Stock Exchange since 1999 and generated global revenues of €1,780.5 million in 2017.

## GAME CHANGERS

---

At Ipsos we are passionately curious about people, markets, brands and society. We deliver information and analysis that makes our complex world easier and faster to navigate and inspires our clients to make smarter decisions.

We believe that our work is important. Security, simplicity, speed and substance applies to everything we do.

Through specialisation, we offer our clients a unique depth of knowledge and expertise. Learning from different experiences gives us perspective and inspires us to boldly call things into question, to be creative.

By nurturing a culture of collaboration and curiosity, we attract the highest calibre of people who have the ability and desire to influence and shape the future.

“GAME CHANGERS” – our tagline – summarises our ambition.
