

MEDICATION MANAGEMENT PACKAGE

Nurse Next Door™
home care services

Researchers at Brigham and Women's Hospital (2012) note that *half of people that go home* from the hospital have medication errors and problems within the first month of discharge. According to an article in Drugs & Aging (2005), as many as *200,000 people may die* of medication-related problems each year in the United States.

Let us handle it.

Our medication management package includes:

Registered Nurse visits weekly or biweekly so you don't have to worry about any changes

Ordering of medications because we know it can get confusing and it's easy to forget

Picking up medications or arranging for them to be dropped off at your front door so you don't have to go out

Provision of pill planners to make it easy for you to understand your medications and take them with you

A comprehensive Drug Interaction Check and education on each medication

An up-to-date medication list in your home so you don't have to memorize each medication

Medication Profile sent to all Physicians so no one prescribes the same thing

Assessment and vital signs completed regularly for peace of mind

2 extra visits as needed throughout the month for safety, education, or medication changes

You instantly have access to our 24/7 Care Services Center, an on-call RN 24/7, and **Peace of Mind**.
Each rate is fully inclusive, with no additional fees unless transportation is required or you are notified in advance.

Call **302.264.1021** to arrange for your **FREE** Caring Consult.
