

THE ISLAND FOUNDATION

Yayasan Peduli Kepulauan Riau

THE ISLAND FOUNDATION IS...

A Singapore-registered international charitable organisation, operating as a Yayasan (not-for-profit foundation) in Indonesia.

We work with remote small island and coastal communities in Bintan Regency, Riau Islands, Indonesia that are underserved and have sustainable development challenges.

Children in these communities face a range of barriers to accessing quality learning that often result in low learning outcomes and children dropping out of school, setting them up for futures with limited self determination fuelled by systemic inequities.

OUR VISION

Is for childhood learning be a force to serve and sustain small island communities in a rapidly changing world.

OUR MISSION

Is to transform the learning ecosystem in Indonesia's small island communities through a community-based learning for sustainability program.

Growing up free from poverty, healthy and educated, feeling happy and being safe, is the foundation for becoming adults that contribute to the economy, a sustainable environment and a socially cohesive society. Sustainable development ultimately begins with children - UNICEF.

HOME LEARNING

STAKEHOLDER ENGAGEMENT

SURVEYS

2020 HIGHLIGHTS

- 248 students supported with weekly home learning
- 248 students and families supported with free learning materials
- Eight communities provided with Covid-19 interventions
- Installation of internet connection and computers in three communities
- 20% of parents surveyed on engagement with learning and sustainable development

IMPACTS OF COVID-19

Students in Bintan Regency have been hard hit by the Covid-19 pandemic. Schools were closed in March 2020 and only partially returned to at-school teaching in January 2021.

School teachers have struggled to stay engaged with students, and students have faced barriers to online learning including financial and technological barriers.

Missing a year of school can have long-term effects on children's lives, from poor learning outcomes to low psycho-social development outcomes.

LEARNING FOR SUSTAINABILITY

Background to our
program.

BARRIERS TO ACCESSING QUALITY LEARNING IN BINTAN REGENCY

- Indonesia ranks in the bottom eight of 78 countries across all areas of the Program for International Student Assessment (PISA).
- **Only 23% of students from poor, remote or rural households complete school.**
- School teachers are vastly underqualified with little to no professional development opportunities, resulting in teacher-centred learning.
- **Primary school students are promoted from one grade to the next without having mastered curricular competencies.**
- **31% of parents did not complete primary school, leading to parents struggling to help their children with learning.**
- Teachers are not trained to support children to develop key life and higher order thinking skills.
- **Smaller, remote and marginalised communities are overlooked by development programs, resulting in issues of learning poverty.**
- Children's values, experiences, perspectives and languages are excluded from the national curriculum and learning materials.

OUR SOLUTION

A bespoke Learning for Sustainability program that develops critical thinking, collaboration, confidence and creativity through locally relevant content, outdoor and experiential learning and content-based language learning.

- Designed by professional educators and our own local learning facilitators to include the values, experiences and languages of children who live in remote small island and coastal communities.
- Incorporates education for sustainable development, outdoor learning and the development of higher order thinking and life skills to complement schools and prepare students for growing up in a rapidly changing world.

OUR STUDENTS

Currently, 248 primary school age students across Grades 1-6 attend our Learning Centres on a regular basis.

Why primary school students?

Primary schools students are the largest and most engaged cohort of students in the Indonesian education system, and research shows that ability gained during primary education leads to a higher chance of post-primary school completion.

OUR LEARNING CENTRES

We operate Learning Centres in eight remote small island and coastal locations in Bintan Regency, Riau Islands.

Why these locations?

Bintan Regency is recognised by the Indonesian government as a remote island, with four sub districts designated as priority development locations – we operate Learning Centres in these locations only. Here, schools are under resourced, students experience barriers to accessing quality learning, and sustainability challenges are widespread.

LOCAL TEACHER TRAINING

For many teachers in Bintan Regency, continual professional development opportunities are limited. Not only does this affect teachers, a lack of quality ongoing training adversely impacts students.

We are supporting teachers by providing high quality, multi-day training sessions that are designed and delivered in collaboration with local partners.

Local teacher training sessions focus on:

- Building core teaching competencies
- Promoting student-centred learning
- Expanding understanding of developing students' life skills and higher order thinking skills
- Improving engagement in the classroom through creative, interactive and practical lessons and activities
- Addressing inequities in the classroom and promoting inclusivity.

ORANG SUKU LAUT

The waters and coasts of the Riau Islands are home to Orang Suku Laut – an indigenous roving fishing community.

Orang Suku Laut are keen seafarers and fishermen and are new to living on land. Children are often excluded from learning at school because of language and cultural barriers, severe under resourcing and systemic bias.

Tintin (right), leader of the Orang Suku Laut in Panglong, is working with The Island Foundation on community and student engagement. He is passionate about improving the futures of Orang Suku Laut children.

We are committed to supporting Orang Suku Laut students and communities through incorporating language and culture into our curriculum for all of our students to experience and learn.

LEARNING PRINCIPLES

ALL OF OUR LESSONS ARE...

FUN!

We make sure that students and our facilitators have fun during lessons. Learning is about trying, doing and experiencing.

INTERACTIVE!

We promote interaction among students, and between students, facilitators and the environment – meaningful interaction supports learning.

INCLUSIVE!

We include diverse local perspectives and students' voices and experiences as a source for learning.

AND WE PRIORITISE...

ENGLISH LANGUAGE LEARNING

Content based language learning allows for English language learning to be incorporated in all aspects of the program.

LIFE SKILLS DEVELOPMENT

Critical thinking, collaboration, confidence and creativity (Four Cs) are linked to improved learning outcomes and brighter futures.

OUTDOOR LEARNING

Outdoor learning promotes active lives and engagement in learning, and supports the integration of seasonal lessons and local content.

INFORMED BY PARENTS

93.3% of parents
support English
language learning

84.4% of parents
support practical,
outdoor and
interactive learning

81.8% of parents
support the
development of
the Four Cs

89.3% of parents
support the
Learning for
Sustainability units

SUPPORTING COMMUNITIES

We participate in and supports a range of sustainable community development initiatives and activities as part of the learning program, and as an engaged community stakeholder.

We support local authorities, communities, families and individuals to reduce vulnerabilities and improve climate mitigation and other efforts to support sustainable development, including:

- Beach clean ups
- Mangrove planting
- Covid-19 prevention
- Promoting local culture, language and customs

LONG TERM IMPACT: KENNY

Kenny joined The Island Foundation at nine years old and stayed until she graduated primary school.

Kenny loved attending the program – she had fun learning to make crafts out of recycled materials and bamboo, making music, going to the beach for learning about marine ecosystems and learning English.

She says, ***“I definitely prefer experiential and practical learning, even now as an adult – I learn best that way.”***

Now, Kenny is in her second year of a bachelor’s degree in business management – the first person in her family to attend university.

In the months before the Covid-19 pandemic hit, Kenny was volunteering with The Island Foundation.

Kenny says that volunteering, ***“was improving my confidence through public speaking, and taught me about NGOs and working with children – I really enjoyed story telling with the students.”***

FROM ALL OF US AT
THE ISLAND FOUNDATION, THANK YOU!
