Webinar on

UIC TECHNICAL SOLUTIONS FOR THE OPERATIONAL RAILWAY

As the main technical body serving not only railway operators, but the entire community of railway stakeholders, including research centres and universities, UIC is a natural forum for bringing together all stakeholders and for developing collaborative global solutions.

"UIC Technical solutions for the operational railway", ranging from architecture to financial arrangements, provides an overview of the main achievements and developments in UIC. Depending on one's different interests, it will

give a summary description of operational solutions suited to market needs.

During this webinar, UIC will present a number of solutions with global reach, in the fields of Telecom and modelling, Passengers, Freight, Safety & Security, Sustainable Development, by inviting a UIC representative as well as giving the floor to one of UIC's Members as well as to a partner.

The webinar will be moderated by Simon Fletcher, UIC.

12:00-12:15	Introduction	Gianluigi Castelli, UIC Chairman
		Christian Chavanel, UIC Head of Rail System Department
	FRMCS and more telecom part of ERTMS	Jean-Michel Evanghelou, UIC Deputy Director Rail System Department, Head of Telecoms and Signalling (8 mn)
