Why Exhibit at Downstream 2018

Downstream 2018 is expected to be the biggest edition yet, with more exhibitors, attendees and exhibition features than ever before.

With dedicated networking spaces, meeting concierge services, live demonstration areas and emerging technology showcases, the show floor has been designed to provide your company with a high-traffic platform to showcase your latest products, services and technologies.

As an exhibitor, your company will be positioned amongst the most influential and important services providers and technology innovators. Downstream 2018 provides your company with the opportunity to secure new business, service your existing clients and engage in industry dialogue.

New Exhibition Features for 2018:

Downstream meetings lounge

Positioned on the exhibition show floor, attendees can use the Global Meetings Service – the event's structured business-to-business meetings program – to book meetings with attendees, then have them hosted in the Downstream 2018 Meetings Lounge.

Live Demonstration Zone

Will provide attendees the opportunity to get up close with the latest in downstream industry technology as well as featured technical sessions from a host of industry experts.

Private meeting rooms

As the most significant meeting place where the downstream industry gathers to do business, hosting a private meeting room is an essential aspect to participating. Downstream 2018 provides a limited number of private meeting rooms, strategically located outside the exhibition and close to the main conference hall.

The Venue

Galveston Island Convention Center, is one of the largest purpose-built, state-of-the-art exhibition and conference centers in the Gulf Coast. The venue boasts a column free 43,100 square foot exhibition hall. What's more the location of the convention provides easy access and proximity to the Gulf Coast's major downstream plants and facilities, not to mention the energy hub of Houston less than an hour's drive away.
