

Release Notes

ConstructConnect Platform

- **ConstructConnect Project Intelligence and Mobile App**

Version 2019 5.0 March 14, 2019

Introduction

This document describes the features included in software version 2019.5.0.

Project Intelligence web features

This section describes the web features in this release.

Search results

- **Match Score** - The *Match Score* value indicating a match to the users' service area is now automatically displayed on the project search results page.
- **Matching Documents** – The project preview pane on the search results page now displays a count and a clickable link to the matching documents for the project. The link takes the user to the document set in the document viewer.
- **Default Document Search** – A document search is now the default setting for searching for projects.
- **Saved Sorting in Results** – The sort order applied to project or company search results is retained when the user moves back and forth between the results and a project or company listing.
- **All Saved Searches on Flyout** – All saved searches for a user are displayed on the search flyout menu.
- **Limits to Tagged Searches** – A limit of 5000 saved searches that include tags has been imposed.

Project Details

- **Contacts now include Planholders** – The contact type *Planholders* is now added to the contact section along with the option to filter by that type.
- **Updates to Project History** – The project history section has been updated and can now be sorted by date, event type and user name. **Updated MasterFormat Selection** – Users can now set their CSI code preferences for either MasterFormat 1995 or 2016.
- **Additional Notifications** – Account notifications now include updates to the Planholders List, changes to project details and new plans and specs added to a project.
- **Mobile Responsiveness** – Pages that respond to mobile actions now include both project and company details, search results, and both Task and Watch lists.

Project Intelligence mobile features

This section describes the mobile features included in this release.

- **Mobile App for Android** - The ConstructConnect Mobile App is now available in the Google Play store. Android users can now download and use the ConstructConnect mobile app.
- **SmartBid Integration** - The *Predict* section of the home page now displays a count of active SmartBid Invitations to Bid and a link to the SmartBid application.
- **Project Access from Company Contact** – Users can now access the details a project listing from the *Design Team* or *Bidder* contact on a company listing.
- **Change in Project Terminology** – The term *Building Use* has replaced *Category* in project summary section.
- **Active Calendar Sync** – Users can now add project schedule events directly to their mobile calendars that includes a link to the project listing in the mobile app.
