

Material of the future, improving health as well as freshness!

A next-generation anti-bacteria fiber, ATB®-UV+, is an advanced fiber aiming for refreshing feel as well as health through its 99.9% anti-bacterial function by silver element and sweat absorption/evaporation mechanism of fast absorbing/drying yarn

ATB®-UV+

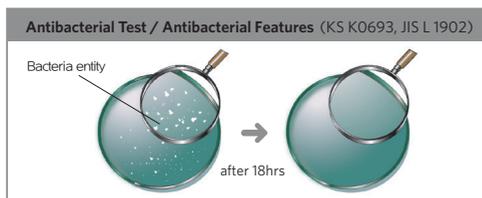

Comfortable and Healthy life!

ATB®-UV+!

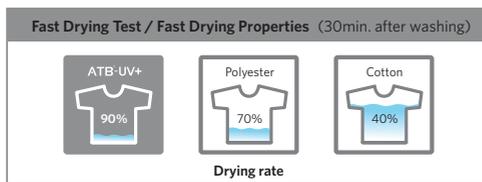

Excellent anti-bacterial function

- ⊙ The excellent anti-bacterial function of ATB®-UV+ comes from the silver element it contains
- ⊙ Unlike the chemically treated fabrics, the fabrics containing ATB®-UV+ have permanent function after many times of washing
- ⊙ ATB®-UV+ is safe for health and environment as it adopts a silver-based anti-microbial material approved by FDA
- ⊙ ATB®-UV+ prevents odor by suppressing the proliferation of microorganisms

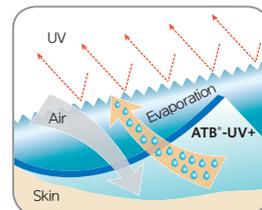

Rapid absorption / Evaporation

- ⊙ With a uniquely designed fiber cross section, ATB-UV+ evaporates and dries sweat rapidly
- ⊙ ATB®-UV+ helps stay cool in the hot summer and also keeps warm in the winter by drying sweat quickly

UV protection

- ⊙ It blocks ultraviolet rays including UV-B (290-320nm) as well as UV-A (320-400nm)

Application : Under Wear, Bed clothes, Sportswear, Uniform, Golfwear etc
