Movement is a human right.

SIT LESS. WALK MORE.

The average human sits for more than 11 hours per day. In comparison to our evolutionary history sitting is a very recent phenomenon, or a glimpse of the eye.

We sabotage ourselves, when we are sitting down at work — the one place, where cognitive power is most decisive and we risk our health. Sitting all day not only increases the risk for back pain, but also for diabetes, heart disease, stroke, cancer, depression and many other, actually highly avoidable disease.

We have a single goal at Walkolution. To create the perfect workplace and to offer people a real alternative to sitting. A workplace for humans.

We are very proud that the Walkolution concept has been awarded the prestigious German Design Award 2021.

SITTING IS THE NEW SMOKING.

When comparing against the grand scale of human existence on earth, it is only in the past 150 years or so in which sedentariness rapidly became the unquestioned status quo. This period of time feels insignificant when considering the big picture in which the human genetic setup developed.

Nevertheless, each cell in our body still contains the very same genetic code as our ancestors, which has prepared us for an entirely different existence: that of an active mover.

The widespread belief is that going for a run a couple of times per week puts you off the hook. If it were only so simple!

Medical research shows, that prolonged sedentary time is associated with health risks. Regardless of the amount of time an individual spends engaged in physical activity otherwise.

Sitting too much, is not the same as moving too little.

WALKOLUTION MTD700R „WANDERLUST“

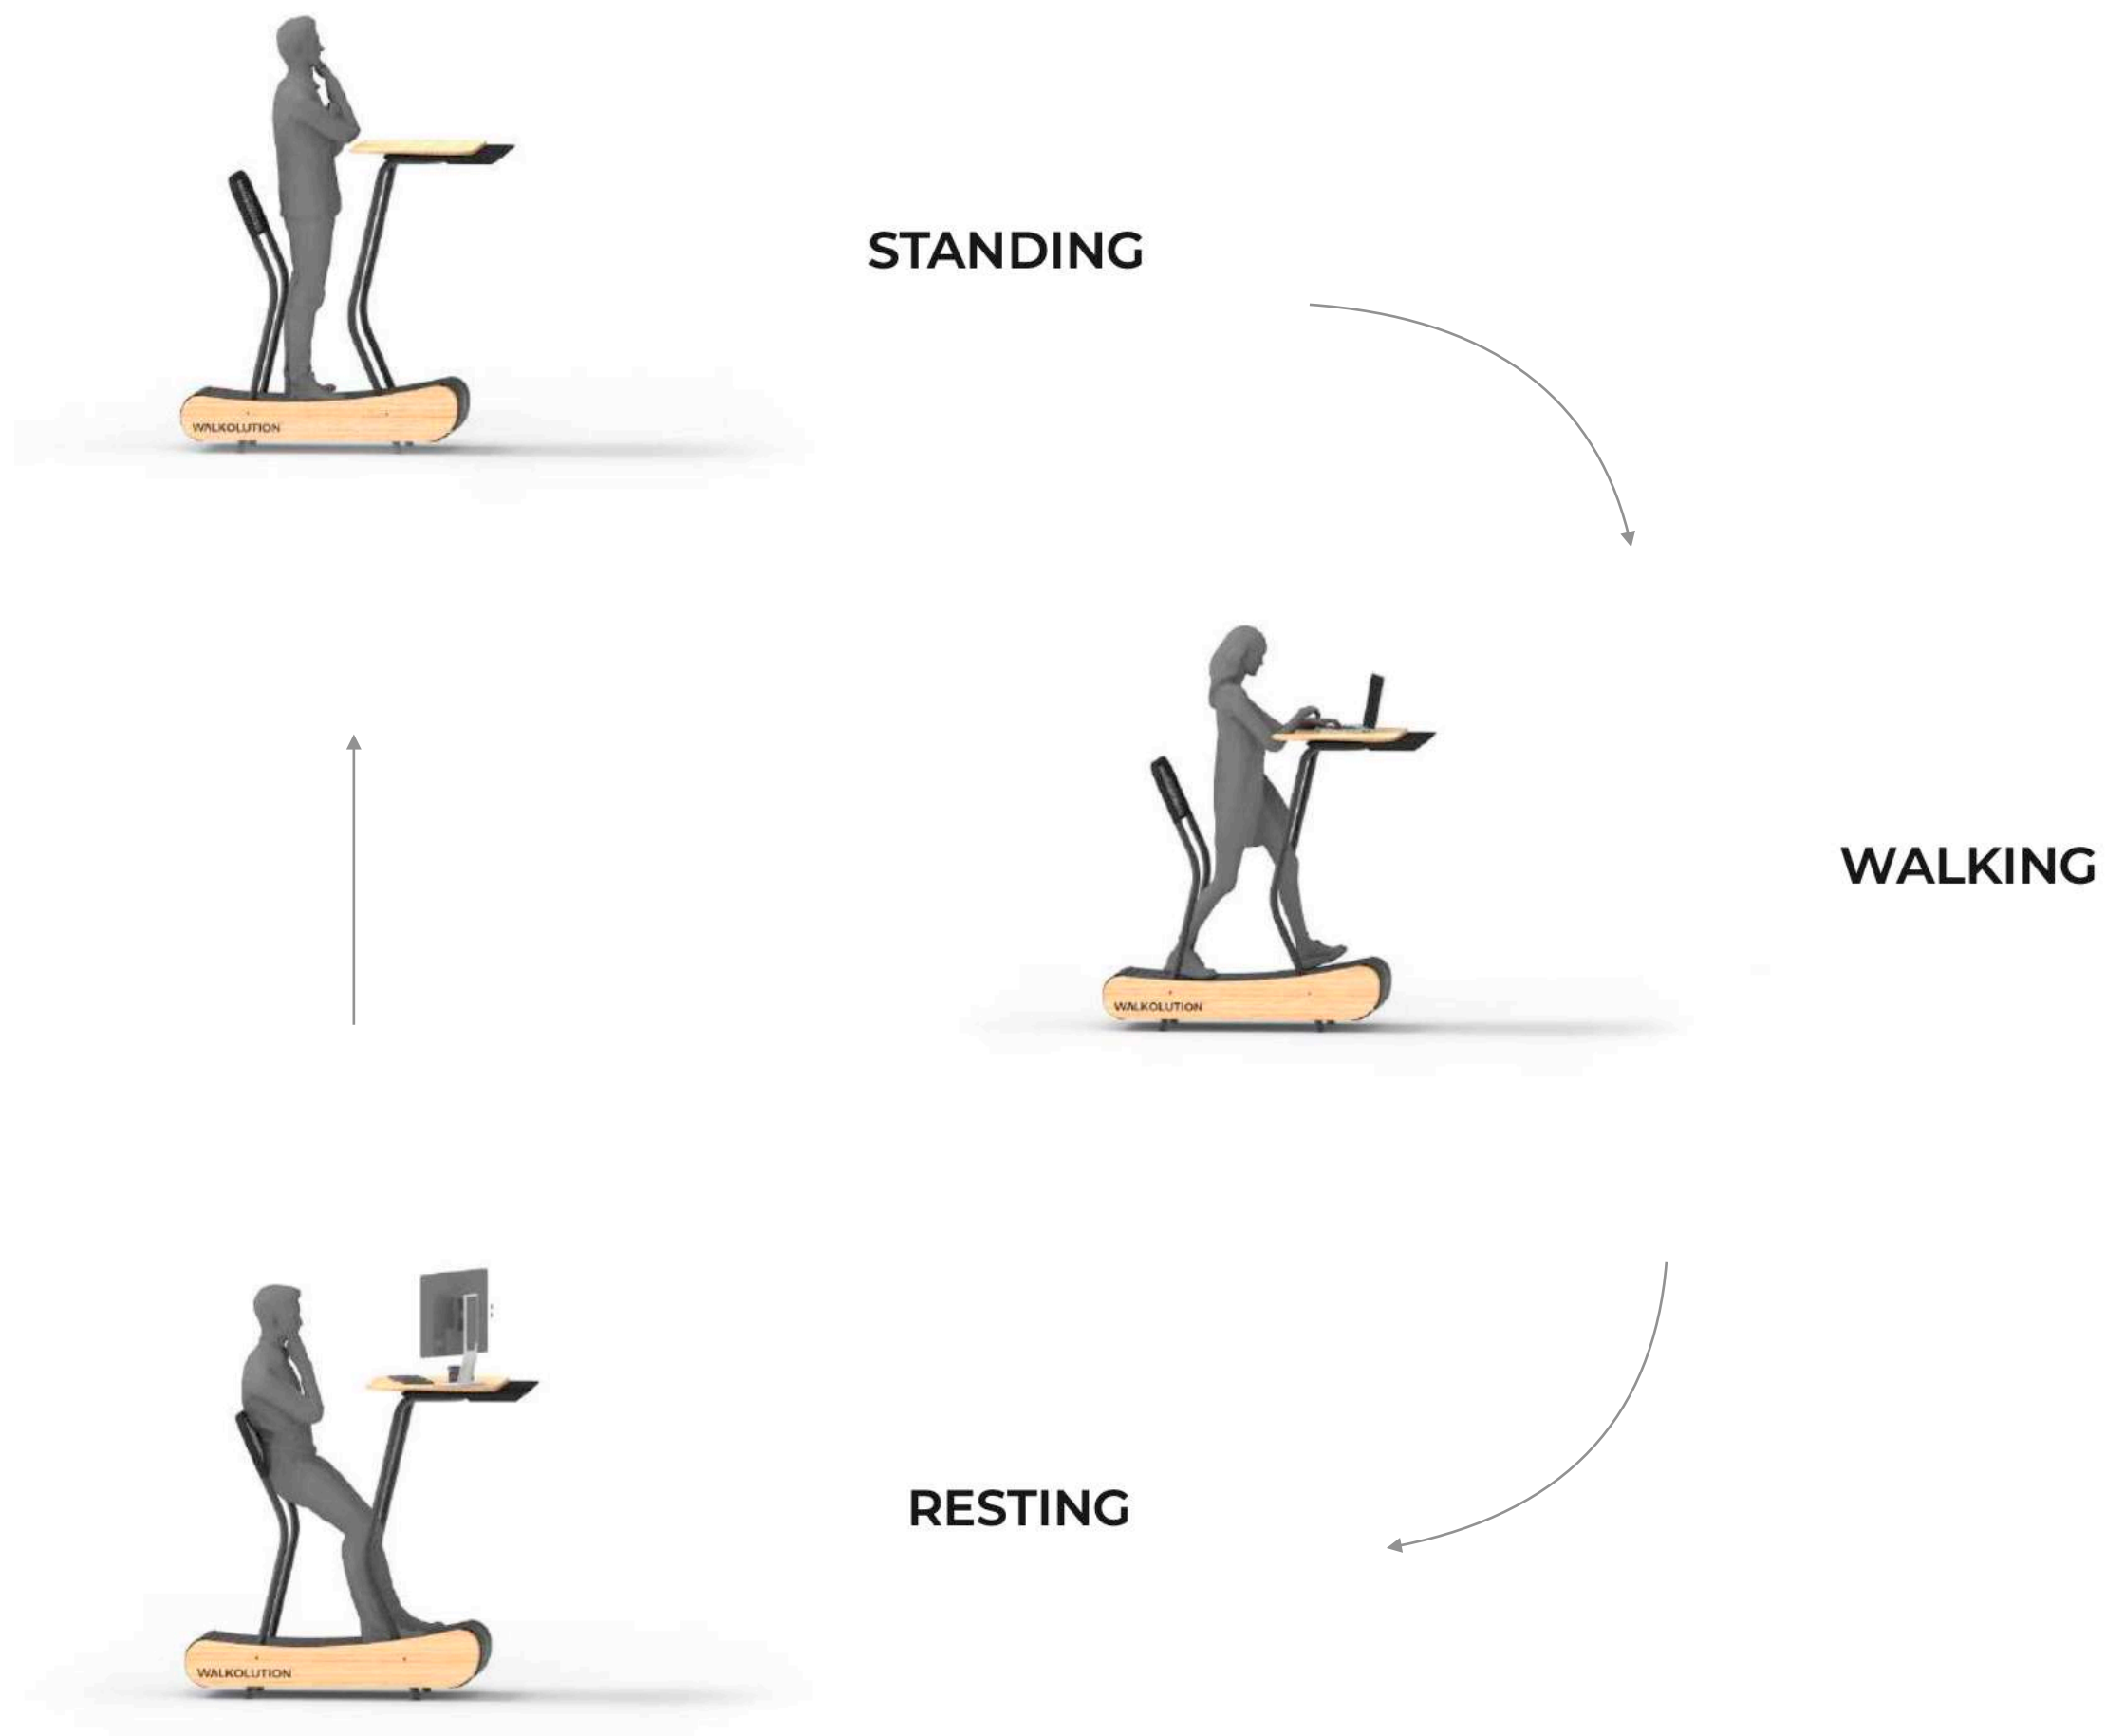

REMOTE WORK

THE BEGINNING OF A NEW ERA

Walkolution's treadmill desks lets you enter a new dimension of creativity and vitality at work, while allowing you to explore new work environments.

In the comfort of your own home, the perfect working environment can be designed according to your own individual needs. The Walkolution system offers you exactly the flexibility you require. For example, to be able to easily move to another room when the conditions require it or why not even working outside on the terrace or balcony.

The home office is here to stay.

STAND. WALK. LEAN BACK. REPEAT.

THE WALKOLUTION PRINCIPLE

The best position at work does not exist. It works best when you can change your posture intuitively and frequently. Working while walking is no different. Every monotonous movement inevitably leads to strain and fatigue on the long run. An electrically driven treadmill is therefore not suitable for true ergonomic use.

The body needs variety.

Our treadmill desk concept has therefore been designed around the concept of intuitive and spontaneous posture changes.

Unlike switching between sitting and standing at a conventional stand-up desk, the change at a Walkolution system is smooth and occurs subconsciously.

HIGH-TECH MATERIAL WOOD

In our state-of-the art manufacturing facility in Bavaria we combine German craftsmanship with high-technology production machinery.

The wood we use is eco-certified and harvested from sustainable local forestries. Before shipping to customers in meanwhile more than 32 countries, all parts are hand assembled, ensuring highest quality and the unparalleled longevity of our products.

The Walkolution treadmills are built for maximum durability so you can use them daily for decades. Wood is not only used decoratively with Walkolution, but is also built into the walking surface. This gives you a naturally springy walking feeling.

ADJUSTABLE

FOLLOW YOUR INTUITION.

Walkolution systems adapt to you. Not the other way around. The built-in sliding mechanism in the table of the MTD700R allows for an intuitive and distraction-free use while you can focus on your work.

COLLABORATIVE SPACES

A HUMANIZED MEETING EXPERIENCE

In 2020, working environments have changed more than ever before. What remains is the creative and formative power of people interacting with each other, which nothing can surpass, and movement is the catalyst for these processes.

INTUITIVE & ECOLOGICAL

A DESK WITH A TREADMILL. BUT WITHOUT A MOTOR.

Not having a motor in the treadmill brings many advantages: There is no annoying noise, no risk of motor damage, it is possible to intuitively adjust the speed with each step, and it makes the treadmill maintenance-free. And best of all, there is also no power consumption and no burden on the environment.

NO DISTRACTION

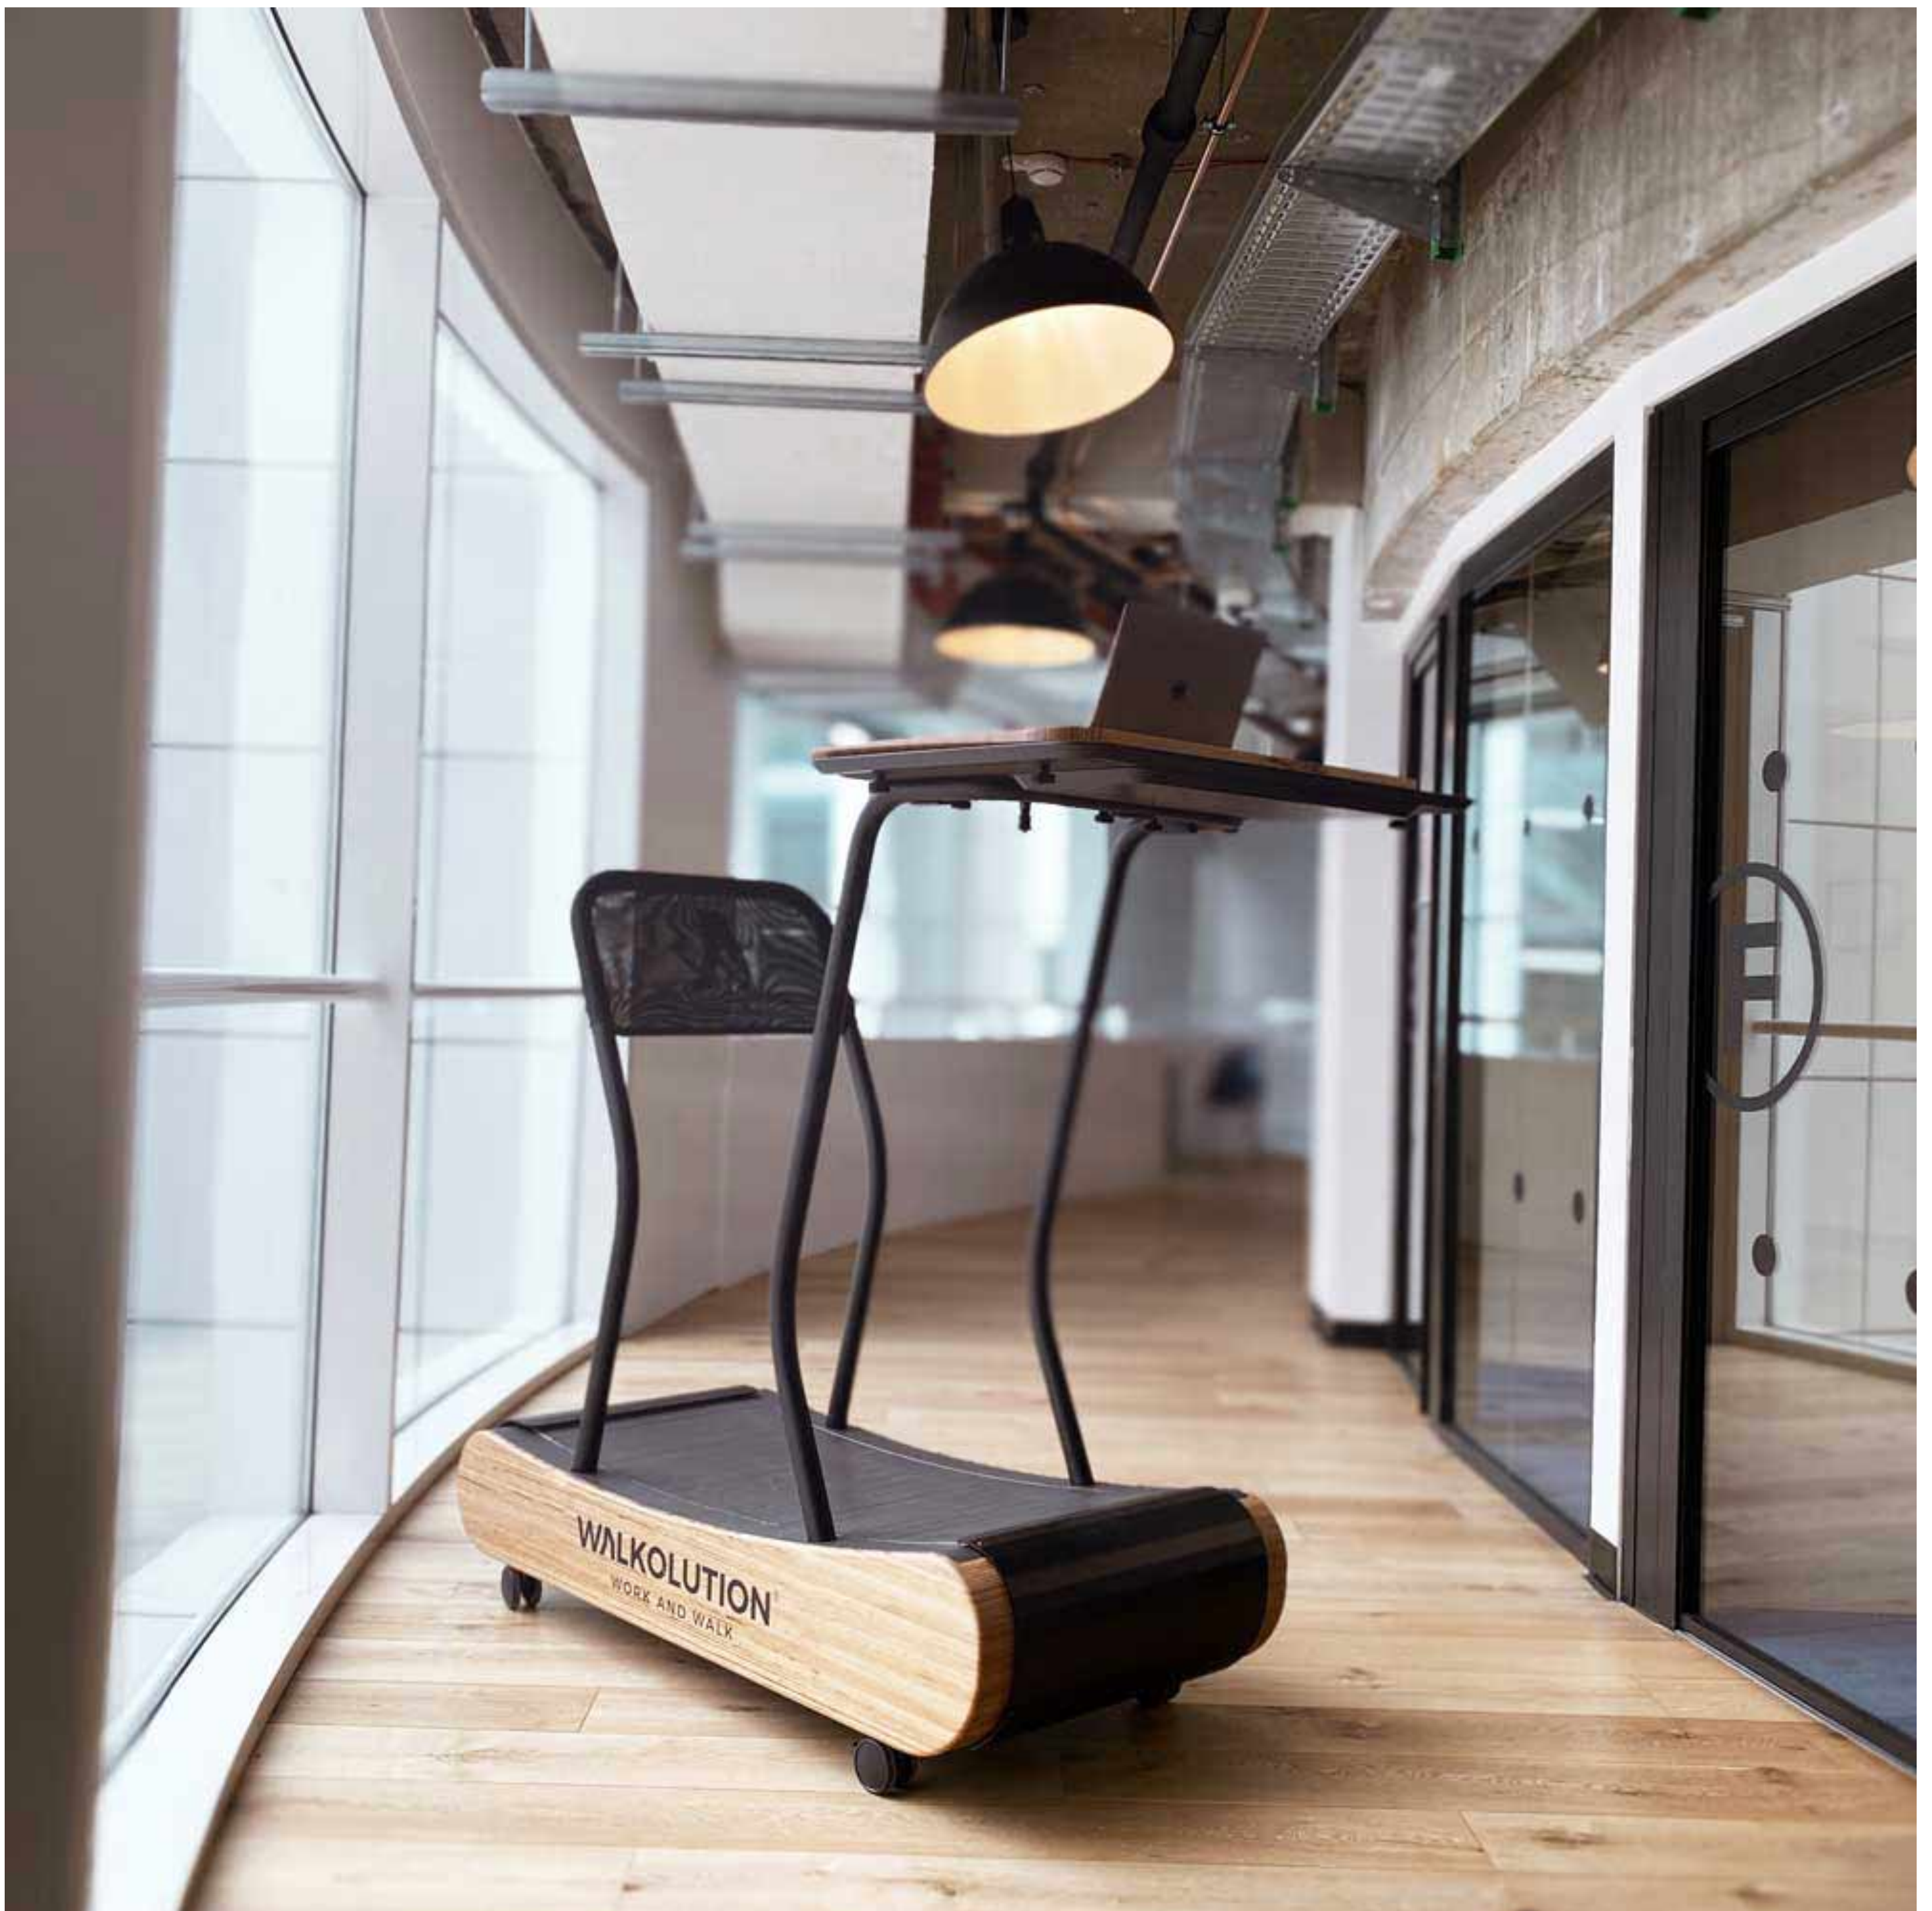

EMBRACING THE SILENCE

While the inner mechanism of the treadmill is specially designed for noiseless operation, the use of specially selected elastic wood components ensures a wonderfully quiet and pleasant walking experience in the MT300, MT500 and MT700 series. In the MT900 series, we are using a an elastic springy material that is optimized for barefoot walking and running.

MOBILITY

WORK WHERE YOU LIKE

Thanks to the mobile design, your workstation follows you wherever you want. The dimensions are also designed so that the Walkolution also fits through doors or in elevators.

WALKOLUTION MTD700R „WANDERLUST“

HARMONY

FITS WELL WITH YOUR OTHER FURNITURE

Minimalist Scandinavian design and a balanced use of well proportioned shapes combine harmoniously in a piece of furniture that feels just as at home in a living room as it does in an office environment.

THE MT300 SERIES „NEW WORK“

A STRONG FOUNDATION

The MT300 manual curved treadmill provides the basis and can be combined with your own height-adjustable desk. It is available with and without the backrest.

YOU HAVE A STANDING DESK?

BUILD YOUR OWN TREADMILL DESK

You can combine your own height-adjustable desk with the Walkolution manual treadmill. Since the treadmill has wheels, you can move it without effort and use it alternately with a chair.

MODULAR

ADD COMPONENTS AS YOU NEED THEM

You can easily upgrade all Walkolution products with a few simple steps and without tools. The treadmill comes with the hidden attachment points for components such as the standing.

THE MTD500 SERIES „CAMPUS“

A SPACE FOR VISIONARIES

The MTD500R "CAMPUS" manual treadmill desk allows you to stay actively in motion during your working day and offers a holistic and professional workplace with its stable freestanding desk.

A WINNING TEAM

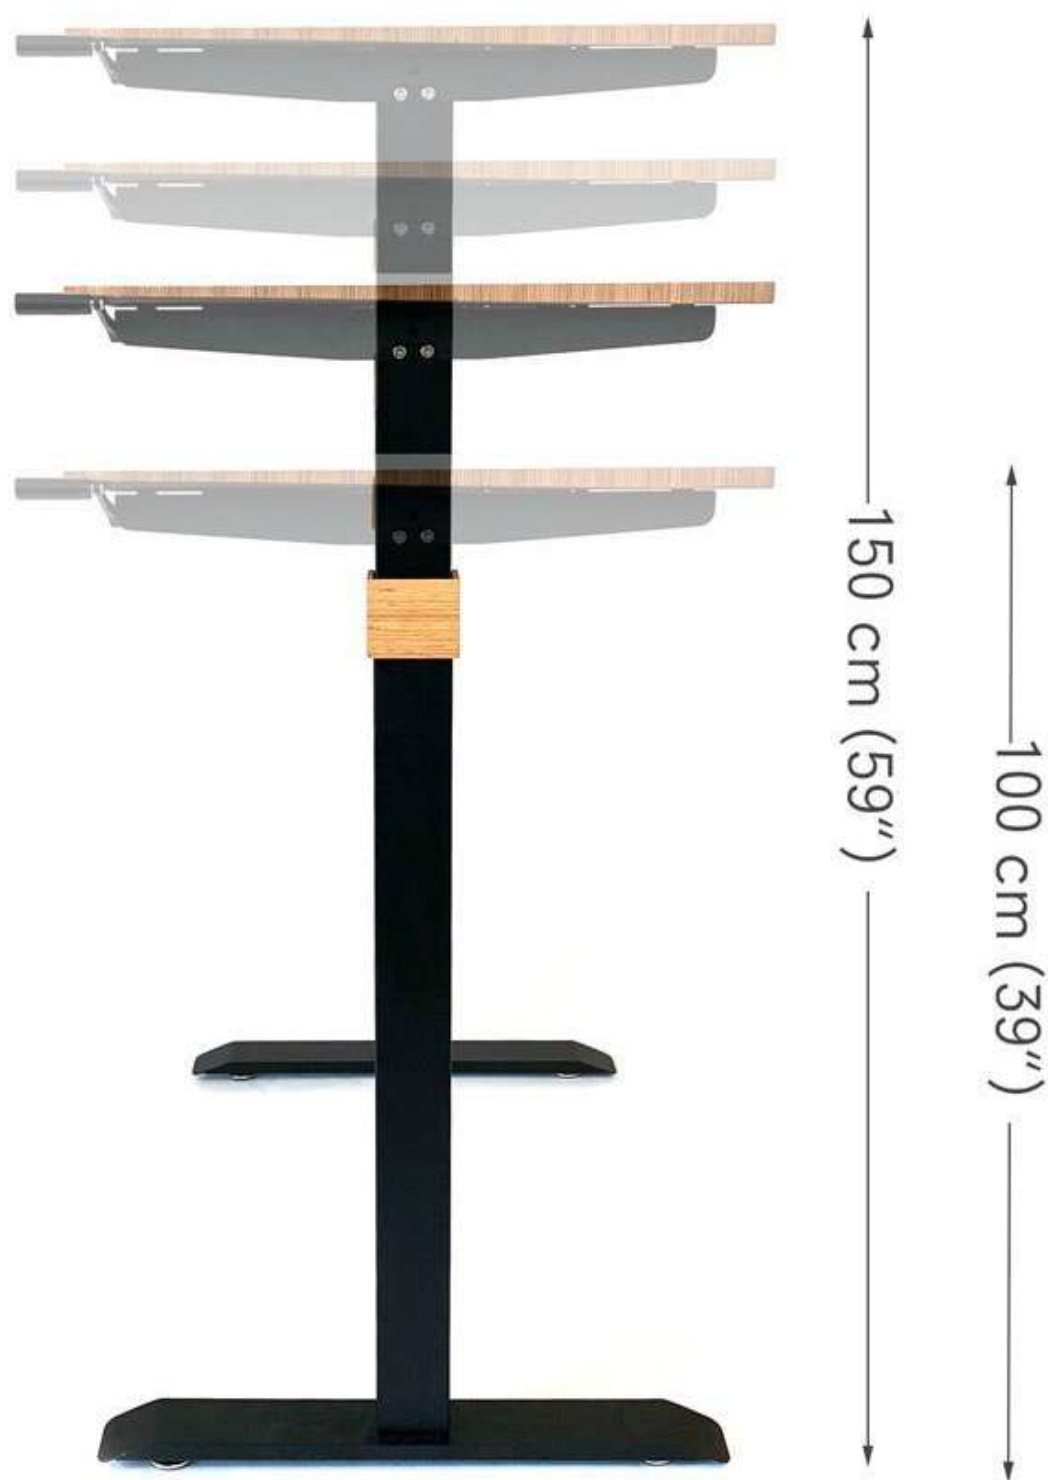

THE WALKOLUTION TREADMILL AND THE CAMPUS DESK

The MTD500R "CAMPUS" manual treadmill desk will inspire you every day and will make your workday easier. The combination of the silent manual treadmill with the stable height-adjustable table in 110 cm or 140 cm widths, which has an extra large adjustment range, complements each other perfectly.

We recommend the MTD 500 for people who use several large screens or also when different people, with different heights, use the workstation.

EXTRA HIGH HEIGHT RANGE

DESK WIDTH 110

DESK WIDTH 140

THE MTD700 SERIES „WANDERLUST“

THE ALL-IN-ONE GENIUS

Awarded for its excellent product design with the prestigious German Design Award, the MTD700 series defines a whole new category of furniture and is used by world-known corporations and home office enthusiasts all over the world.

WORKPLACES - REIMAGINED

Staying effortlessly in motion throughout the day and thus keeping the body healthy is the key to productivity in our modern working world. Having already covered 10,000 steps at lunch time is a wonderful feeling. Throughout the day, you burn an average of 800-1000 extra calories, about as much as a normal meal. And in the evening you have the good feeling of having been active all day, which also has a positive effect on sleep.

WALKOLUTION®
WORK AND WALK

APPLIED ERGONOMICS

HOW DO YOU LIKE TO WORK?

Your answer might be: Sometimes this way, sometimes that way. What is important is that the change is effortless. In contrast to the often rather laborious switching between sitting and standing, the motorless design of Walkolution allows you to switch fluently and intuitively between standing, walking and leaning back. The standing aid allows you to achieve a comfortable relaxation position, while the desk slides backward. Moments later, you can continue to walk whenever you feel like.

DESK WIDTH 77 CM CM

DESK WIDTH 110 CM CM

185-200	6'1" - 6'7"	XL
170-185	5'7" - 6'1"	L
155 - 170	5'1" - 5'7"	M
140 - 155	4'7" - 5'1"	S

DESK FRAMES ALLOW FOR
A FINE ADJUSTMENT
OF +/- 6 CM (2.36")

THE MTD900 SERIES „KYBUN“

„LIKE WALKING ON A SOFT FOREST FLOOR“

The MTD900 „Kybun“ marks the pinnacle of the treadmill landscape and combines the perfected art of Walkolution manufacture with the most innovative materials in the fitness industry.

IN COOPERATION WITH

kybun 
Switzerland

THE KYBUN EFFECT

WALK AND RUN ON AIR

The impulse-active compression zone of the Kybun material allows the foot to sink in to different depths from slat to slat on impact, ensuring optimal springback and a constantly slightly changing load. You walk or run as if on a soft forest floor.

IMPULSIVE

A GIFT FOR YOUR FEET

The treadmill adapts optimally to your running style, continuously and without time delay. You can train barefoot, with socks or with shoes. The rebound effect and the varying degree of hardness cause alternating muscle tension and relaxation.

LIFE LONG FITNESS

From a leisurely walk to an intensive HIIT sprint, everything is possible. The surface ensures that the entire musculature of the lower extremities is activated during running or walking and must be slightly stabilized at all times. This improves proprioceptive and sensomotoric abilities as well as inter-/ and intramuscular coordination.

The elastically springy walking and running sensation is an incentive for people who normally avoid both treadmills and jogging to move more and thus get back into shape.

STAY ACTIVE ALL DAY

WORK AND WALK

Like all WALKOLUTION products, the MTD900R allows you to remain active during your working day in gentle motion. You can do everything you would normally do while sitting at your desk.

The optional table is available as a freestanding version or as an integrated version in various sizes.

SMART ERGONOMICS

LIKE SITTING, ONLY HEALTHIER

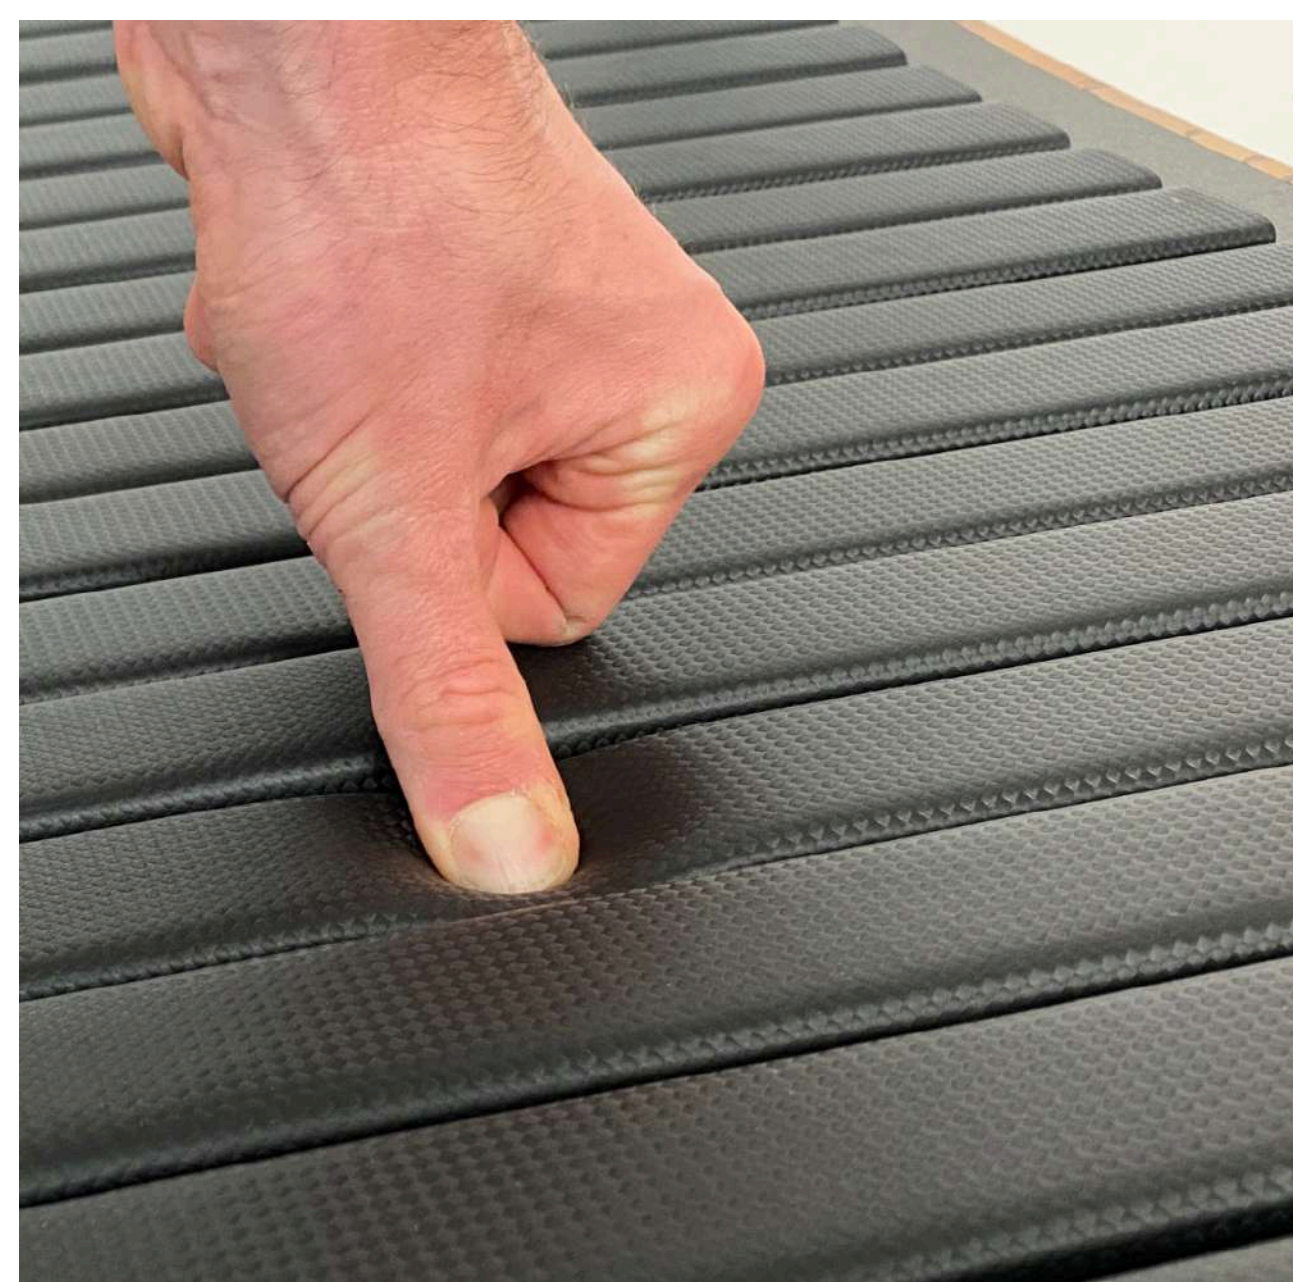

The special design also allows you to intuitively switch between walking, standing and leaning back. This gives you another relaxing working position in addition to walking and standing, while you remain active.

PATENTED SWISS TECHNOLOGY

WALK AND RUN ON AIR

Anyone who is on the move a lot every day due to an active life or who suffers from degenerative joint diseases has a great interest in protecting the joints. The MTD900 spares your joints like no other treadmill on the market and trains your fine motor skills while improving your performance .

MODULAR

A MASTER IN MANY DISCIPLINES

The MTD 900R is a master of transformation and flexibly adapts to your changing needs. Turn a workstation into a full-fledged fitness machine in the blink of an eye. All this without tools and in the appearance of a noble piece of furniture.

MT900 KYBUN

Incl. hidden attachment points for optional backrest. Detachable frontal frame with anchor points for optional desk.

MTD900R KYBUN & INTEGRATED DESK

Incl. easily removable desktop (available in 4 heights and 2 widths) and standing aid (not interfering while running.)

MTD900R KYBUN & FREE DESK

Infinitely height adjustable stable desk (Available in 2 widths.) Incl. hidden attachment points for optional frontal frame.

MT900R KYBUN

Detachable frontal frame with anchor points for optional desk.
