

Permobil Mattresses, Therapeutic Surfaces & Beds Guide

Retail Price List

About our offering

Permobil has mattresses, therapeutic surfaces, and beds to meet an even wider variety of client needs - including different widths, lengths, and features! Our newest offering is a line of APEX powered active air surfaces for complex needs. The Pro-Care Turn actually rotates the clients at set intervals for the caregivers! We also have a new hybrid foam surface called the Atlas that can be used with/without a pump. You'll see we've expanded our Permobil Modular Systems with a 42" wide Adapt 2. These customizable mattresses provide the optimal experience for each client. 5MM is well-known for its foam mattresses, now available with 84" length options.

Any of these mattresses or surfaces can be placed on our popular Tröst bed for long-term care clients or Hälsa bed for home care. We even have new personal beds for home with the Resten Hi-Lo and Select models. You can trust in our bed solutions to provide safety and comfort! For more information, please contact your local sales representative or our customer service team.

ROHO® mattress section

We have expanded our line of ROHO compatible mattresses to give you even more options. These clinically proven, non-powered, and adjustable pressure relieving mattress sections can be inserted into our: Adapt and Adapt 2 Series, Acute, Original Snap Series, and leveling pads. These mattress sections are flame and fluid resistant and can be used in a number of configurations - whatever best suits your needs!

To Place Your Order

To place your order, please contact our Customer Experience team at sales.ca@permobil.com or 800-265-9830.

Key terms

Shear Reduction Technology (SRT)

5MM's patented SRT is an innovative solution designed to address shearing forces present during client movement in bed, or when raising the head or foot section of the bed.

Low friction material separates two layers of foam - effectively moving the shearing to the core of the mattress and away from the client.

Gel swirl foam

Gel swirl foam provides enhanced comfort while reducing motion transfer across the mattress surface for an undisturbed sleep. The open cell structure promotes airflow allowing for excellent cooling. Gel swirl foam particles also:

- promote a cool, comfortable sleep
- ensure better heat conductivity than traditional visco elastic foam
- are non-toxic and hypo-allergenic

Recovery 5 covers

All modular foam bases and inserts, some MOXI surfaces, as well as the 5MM foam mattresses come standard with a Recovery 5 anti-microbial cover which provides incontinent protection and aids in keeping skin cool and dry.

It is removable, machine-washable, fluid-proof and fire-retardant. This material helps wick away moisture and increases air flow and breathability. The nylon bottom under the mattress includes handles.

UPGRADE to the R5 Ultra! The new Recovery 5 Ultra is an additional zippered enclosure cover for the full mattress surface (and inserts) with 4-way stretch, is machine washable, and provides up to 6X more incontinent protection.

Note: For all modular surfaces, zippered top covers are required and sold separately.

ZIPPERED ENCLOSURE: OSS and Adapt 2 mattresses have zippered enclosure cover options in either Recovery 5 or R5 Ultra material. This removable top cover with its 360° zipper must be ordered separately.

For the Acute mattress, you can add a coverlet which has stretchy corners and fits over the entire mattress and inserts (shown above).

Foam - High resiliency & Visco

High resiliency foam is a versatile foam used in many 5MM mattresses. It is considered to be a highly tensile surface, and can be cut to any size.

Visco elastic foam, also known as memory foam, is a man-made substance that reacts to body temperature and weight, conforming to the shape of your body. This is used in our Original Snap Series mattress inserts.

Firm borders

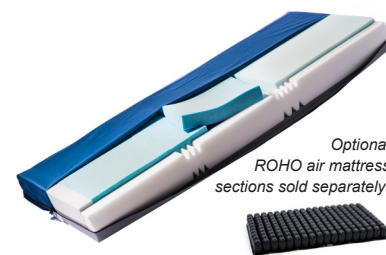

Firm perimeter borders ensure a solid transfer edge complete with accordion cuts to allow proper articulation of the surface during bed frame repositioning.

Mattresses

5MM Adapt mattress

The Adapt modifiable foam surface with SRT addresses shearing forces present during client movement in bed or when raising the head or foot section of the bed, at the same time ensuring proper pressure redistribution. This mattress comes complete with three removable Gel swirl foam inserts, but allows for the addition of up to two ROHO air mattress sections (sold separately). It comes with firm borders and a raised sleep surface.

Note: Custom sizes and raised bolsters available, please call for details.

5MM Allay mattress

The Allay Gel swirl foam replacement surface with SRT is our premium option for the client wanting optimal pressure redistribution and comfort. The cooling benefit of the gel-infused Visco foam top combined with a supportive core make this the best option for users not requiring ROHO air mattress sections. It is reversible, has firm borders, and a raised sleep surface.

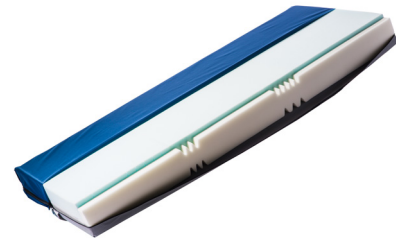

Note: Custom sizes and raised bolsters available, please call for details.

5MM Align mattress & Align Bariatric

The Align surface with SRT comes with firm borders and a raised sleep surface. It is also a unique multi-zone surface that provides differing immersion levels that match the contours of the body. There is one piece of HR foam at the torso, with 4" square cuts in the foam under the sacrum, and 2" square cuts at the foot to release the surface tension and ensure excellent envelopment (see pics below). The foam density and weight capacity are the differences for our Align & Align Bariatric options. **Note:** Custom sizes and raised bolsters available, please call for details.

Permobil Signature mattresses

Permobil's newest Signature mattresses - the Sömn and Koppla - are customizable foam mattresses are specifically engineered to provide improved performance using pressure-reducing materials. We also offer the Optima and Optima Symmetry.

Sömn and Koppla premium mattresses are ideal for long-term care with their 3" wide transfer edges on both sides that help reduce the risk of falls. Each is comprised of a layered foam surface: Sömn has a 4" base layer and 2" top layer with Serene™ foam at the heel, while Koppla has 2" thick foam base, plus a 2" middle and a 2" top layer of foam with decreasing density. Sömn and Koppla both come with fluid-resistant Startex full enclosure covers.

Optima mattresses focus on comfort, safety, durability, and budget. They come with a Recovery 5 anti-microbial cover which provides incontinent protection, and a foam core constructed of 100% medical grade environmentally friendly non-allergenic foam. Mattress is reversible for longer product life and includes a fire barrier sock fabric to meet full-scale fire retardant standards. The Optima Symmetry has all the key features of the Optima but also includes firm side borders.

Domus 4

Low Air Loss Alternating Pressure Therapy system

New air surface option!

At a glance

- Suitable for clients with medium to high risk for pressure injuries
- Low Air Loss for microclimate control
- Cell-on-Cell bladder to avoid bottoming out
- Fluid-resistant and breathable quilted cover
- Zippered cover allows for one-step removal
- Visual and audible alarm enhances clients' safety & security
- Maximum client weight of up to 450 lb
- 35.5"W x 79"L x 8"H

NOTE: Not available in Quebec.

Domus 4 Alternating Pressure Therapy system has a 10-minute operating cycle that allows the bladders to inflate/deflate to offload and transfer body pressure. Functions include Alternating Pressure Therapy and Constant Low Pressure (static), and the system also features max inflate and seat inflation for the Fowler position.

Client weight references are incorporated into the control panel so caregivers can easily find the correct level of comfort and firmness needed for optimum comfort and healing. To protect your clients, the Domus 4 has a number of added safety features like an accessible and highly visible CPR release valve, and an auto-lock on the settings after five (5) minutes.

Serene Air

True Low Air Loss Alternating Pressure Therapy & Pulsation system

New air surface option!

At a glance

- Suitable for vulnerable clients with high to very high risk for pressure injuries
- True Low Air Loss for microclimate control
- High performance blower offers >120 L/min of air loss for effective microclimate control
- Fluid-resistant and breathable quilted cover
- Zippered cover allows for one-step removal
- Maximum client weight of up to 920 lb (on 48" mattress)
- 3 widths: 36" / 42" / 48" x 79"L x 8"H

NOTE: Not available in Quebec.

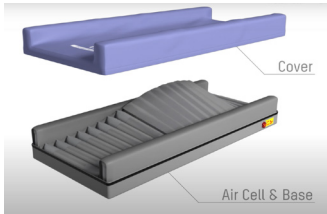

Serene Air is a dual mode system with Alternating Pressure Therapy (APT) or Pulsation options. APT modes assist in wound healing and prevention and there are four operating cycles (5/10/15/20 min.) based on therapy requirements. The Pulsation mode increases and decreases the surface's air volume every 15 seconds. Serene Air also has a Constant Low Pressure (static) option, as well as a max inflate and seat inflation for the Fowler position. It also includes a zippered full-length pocket with a 1" high foam base.

Initial inflation takes less than three (3) minutes, and the surface also has a quilted top cover with high moisture vapor transmission rate (MVTR). Serene Air has a number of added safety and convenience features: auto-lock on the settings after five (5) minutes, accessible and highly visible CPR release valve at the control pump, plus a handy carrying bag for compact storage and transport.

Part Number	Description	Retail Price
SERA36	SERENE AIR 36" SYSTEM: AIR SURFACE, PUMP, T&B COVERS, CARRYING BAG; 400 LB WEIGHT CAPACITY	\$5,995.00
SERA42	SERENE AIR 42" SYSTEM: AIR SURFACE, PUMP, T&B COVERS, CARRYING BAG; 650 LB WEIGHT CAPACITY	\$6,995.00
SERA48	SERENE AIR 48" SYSTEM: AIR SURFACE, PUMP, T&B COVERS, CARRYING BAG; 920 LB WEIGHT CAPACITY	\$7,995.00

Pro-Care Turn

Continuous Lateral Rotation Technology (CLRT)

New air surface option!

At a glance

- Suitable for clients with high to very high risk for pressure injuries
- 30° of bilateral rotation therapy to enhance pressure relief
- 3-in-1 therapy available with effortless client repositioning
- Fluid-resistant and four-way stretch cover
- Zippered cover allows for one-step removal
- Visual and audible alarm enhances clients' safety & security
- Maximum client weight of up to 395 lb
- 35.5"W x 79"L x 5"H, with 10" H side bolsters

Bilateral turning can significantly reduce pressure on a client's body while increasing capillary circulation. For immobile or unconscious clients, caregivers must turn them up to 10x/day to achieve this. With the Pro-Care Turn surface, it saves caregivers' time, resources, and health while maintaining quality care for their clients. The 30° degrees of turning not only complies with clinical guidelines, but also provides optimal comfort.

There are three therapies available: CLRT, Alternating Pressure (APT), and Continuous Low Pressure modes, and they can be tailored to individual pressure care plans. The Turning dwell time can be selected between 10, 20, 30, and 60 minutes. APT mode that assists in wound healing and prevention is available in four operating cycles (10/15/20/25 min.) based on therapy requirements.

The high side bolsters reduce the risk of bed entrapment and accidental falling out of bed, and they support the client's arms while in turning therapy. The system also features seat inflation for the Fowler position, and single air-cell deflation for the vulnerable heel section allowing them to float with zero pressure.

To protect your clients, the Pro-Care Turn has a number of added safety features like a rotation pause function to allow caregivers to stop a turn right away, transport mode that maintains static pressure relief for six hours during transport or a power failure, plus an accessible and highly visible CPR release valve.

Part Number	Description	Retail Price
PCTURN	PRO-CARE TURN: AIR SURFACE, PUMP, TOP & BOTTOM COVERS; 395 LB WEIGHT CAPACITY	\$9,995.00

MOXI eMotion

APT Series

At a glance

- 3-in-1 alternating pressure provides a more comfortable, effective therapy
- 8" heel section and head pillow for comfort
- Interchangeable air cell design for easy cleaning
- Variable cycle times and comfort settings
- Top zippered cover is anti-microbial, fluid resistant and breathable
- Maximum client weight of up to 440 lb
- 36"W x 80"L x 8"H

The eMotion surface provides active pressure redistribution by using a 3-in-1 alternating pressure cycle. The effective micro Low Air Loss also addresses moisture management. Surface has 8" air bladder with cell-on-cell to provide therapeutic alternating pressure and allows it to stay inflated in a power outage. Fowler Boost feature adds extra air pressure when clients are sitting up and prevents bottoming out. Caregiver friendly, the eMotion is an affordable, therapeutic surface solution for any clinical care setting.

Part Number	Description	Retail Price
EMOT80	EMOTION SYSTEM: AIR SURFACE, TOP & BOTTOM COVERS; 440 LB WEIGHT CAPACITY	\$4,285.00
EMOT80-PUMP	EMOTION PUMP/CONTROL UNIT	\$2,290.00

MOXI SelectAir Max

Low Air Loss Therapy System

At a glance

- Low Air Loss for microclimate control
- Protects against pressure, shear and friction
- Auto Comfort takes the guesswork out of programming; surface sets optimal pressure according to client's weight distribution
- Top nylon cover is anti-microbial, fluid resistant and breathable
- Maximum client weight of up to 500 lb
- 6 widths: 35" / 39" / 42" / 48" / 54" / 60"
- 35" x 80" or 35" x 84" for footed version
- Foot pillow aids in preventing skin breakdown due to patient migration

Portable, lightweight, and very reliable, SelectAir surfaces provide a cost effective alternative to other pressure management systems. Pulsating Pressure provides three cycle settings that continually readjust the system to ensure client comfort. Firm Mattress Mode helps facilitate nursing care during dressing changes and client repositioning. Upright Patient Mode adds support when the head of the bed is elevated. System Lock helps prevent accidental adjustments. System comes with pump, zippered cover, and 1" high foam pad.

MOXI Fusion 2K

At a glance

- Hospital grade Low Air Loss therapy designed to last for years
- Air, not foam, supports the majority of the load
- Firm foam borders for ease of transfer and safety
- Recovery 5 zippered top cover is anti-microbial, fluid resistant and breathable
- Maximum client weight of up to 500 lb
- 4 widths: 35" / 39" / 42" / 48"

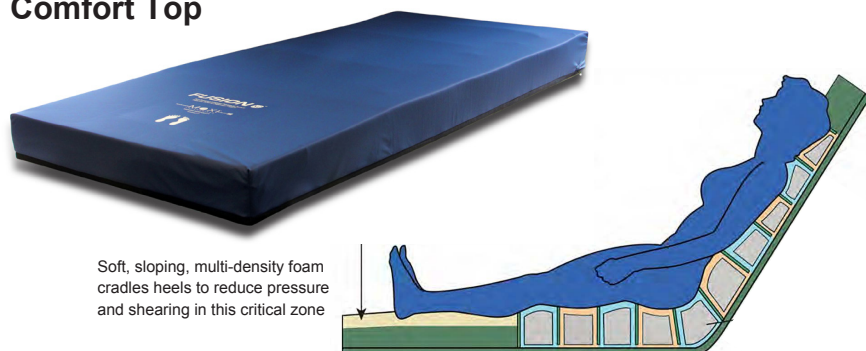

Fusion 2K provides low air loss pulsation (active therapy) for clients that are immobile to provide movement and therapy for comfort and increased healing. Immersion and envelopment into the mattress reduces the peak pressure points by pressure redistribution. It is designed to minimize the effects of shear and friction during patient movement and bed articulation. Advanced microprocessors continually monitor client's immersion. New! 84" lengths are now available, please call for a quote.

MOXI Fusion XC

Comfort Top

Soft, sloping, multi-density foam cradles heels to reduce pressure and shearing in this critical zone

At a glance

- Closed mattress system with exceptional pressure redistribution
- Firm perimeter support for ease of transfer and safety
- Recovery 5 top cover is anti-microbial, fluid resistant and breathable
- Maximum client weight of up to 500 lb
- 35"W x 80"L

Complete mattress system featuring dynamic dispersion where each air and foam filled cell communicates to create exceptional pressure redistribution. The "closed" system envelopes and redistributes pressure similar to other cellular-based technologies. Since the air is supporting the majority of the load, as opposed to the foam, the system is designed to last years beyond the competition. System comes with a full 1" visco topper.

FUSXCCOMFORTOP	COMFORT TOP 35" x 80" SYSTEM: SURFACE, R5 TOP COVER; 500 LB WEIGHT CAPACITY	\$2,505.00

5MM Atlas

Hybrid powered air surface with Alternating Pressure Therapy

At a glance

- Suitable for vulnerable clients at risk for pressure injuries
- Interconnected chambers and valves for pressure redistribution
- Converts to a powered air surface with APT
- Sloped foot section helps reduce pressure from heels
- 4" wide firm borders for safe transfers
- Startex fluid-resistant, four-way stretch cover
- Maximum client weight of up to 700 lb
- Atlas is 7"H, available in six widths: 35" / 39" / 42" / 48" / 54" / 60" & two lengths: 80" / 84"; custom sizes are available

The Atlas is a non-powered, self-adjusting mattress that utilizes equalization technology to provide maximum pressure redistribution for the prevention and treatment of pressure injuries. Starting at the head, the convoluted high resiliency foam improves client upper body mobility. Next is a cool climate visco gel swirl foam top layer at the torso and middle section for immersion and heat dissipation, followed by a 5-degree sloped foot section made with Serene™ foam to help transfer excess pressure from the heels. Beneath the top layer, interconnected chambers provide pressure redistribution, and there are 4" wide firm borders to ensure a solid transfer edge.

The Atlas is also convertible to a powered air surface that uses Alternating Pressure Therapy (APT) with the addition of the digital pump that is sold separately. When the pump is not being used, a valve closure kit is recommended and can be used to adjust the softness/firmness. A manual air pump can also be used to set the firmness of the chambers. Both the closure kit and manual pump come included with the Atlas.

Part Number	Description	Retail Price

ATLPUMP	ATLAS DIGITAL PUMP	\$379.00

What's going on underneath?

- The 4" high interconnected chambers offer great pressure redistribution under the 2" high visco gel swirl foam and 1" standard foam top layers
- These chambers measure 30" wide by 52" long and fit within the cutout starting under the head area, continuing under the full torso, and stopping at the foot section
- When attached to the pump, you can see the alternating therapy provided by the foam/air chambers
- Chambers are held in place with a PU fabric and the tubing for the pump runs along the side
- A valve closure kit can be used to keep the system closed when not attached to the digital pump
- The entire mattress is encased in a fire barrier sock fabric to meet fire retardant standards, and then a Startex cover to protect the foam from fluids

Note: Adapt 2, Acute, and Original Snap Series modular systems have their covers listed on their product pages.

Adapt 2 Series modular system

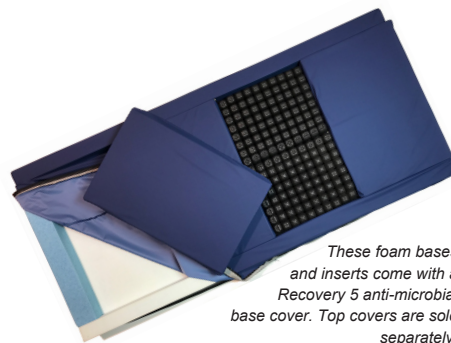

36" x 80"

The Adapt 2 mattress with SRT is an innovative way to reduce the effects of pressure, friction and shear within the body of the mattress. The 3" wide firm perimeter borders and 4" permanent gel foam foot border hold the inserts in place without the need for snaps. The surface inserts can be configured based on the individual client's needs.

The removable top cover with its 360° zipper must be ordered separately.

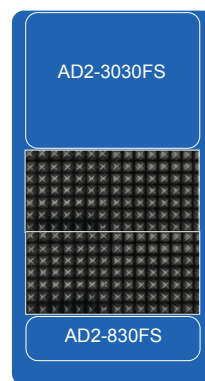

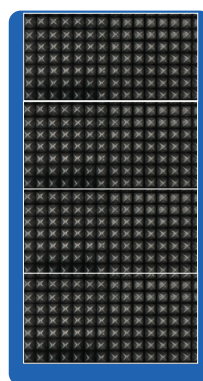

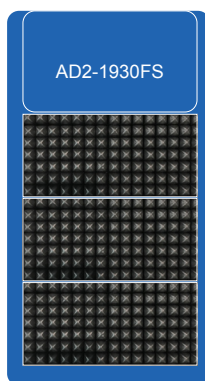

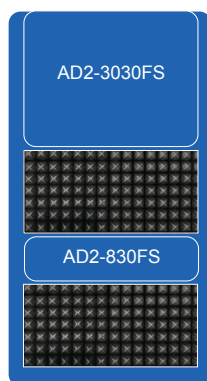

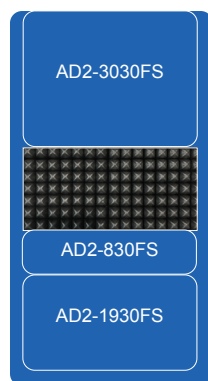

Weight capacity: 350 lb

Note: Adapt 2 base and inserts include a fire barrier sock fabric to meet full-scale fire retardant standards (not pictured).

Beds

Tröst & Tröst Plus

Adjustable long-term care bed

At a glance

- Standard and Plus sizes available
- Trendelenburg/reverse Trendelenburg and Comfort chair positioning
- 12-button hand pendant
- Low position: 6.75"; High position: 30"
- Flip down directional caster locks at head end, plus swivel locking caster
- Centre step safety lock at foot end
- Mattress retainers and wall bumpers included
- Standard size: 36" x 80"; Plus size: 39" x 80" or 42" x 80" and length extension to 84"
- Maximum client weight of up to 600 lb

The Tröst Bed is an electric, adjustable bed ideal for the long-term care setting and community. It offers a low height of 6.75" and a high height of 30" to meet all your caregiving and client needs. Tröst Bed has a 12-button hand pendant and optional footboard attendant controls, so customized comfort is an easy adjustment. The Trendelenburg (and reverse Trendelenburg) feature comes standard and allows clients to lay flat on their back on a 15–30 degree incline with their feet elevated above the head. Available in a natural or wine colour head/footboard (*sold separately, except when bought as a package*), that are easy to use with quick release hardware.

Optional features:

- Plus model expandable to 39" and 42"
- Length extension from 80" to 84" (added at foot end only)
- Embedded footboard attendant controls
- Half side rails, interchangeable between head and foot sections
- Assist bar, interchangeable between head and foot sections
- Tall half side rails (head section only)
- Trapeze bar
- Battery backup
- Transport trolley

The **Tröst Bed standard** package includes: 36" head and footboard, and a set of half side rails. The **Tröst Plus Bariatric Bed** package options includes: 36", 39" or 42" head and footboard, and a set of half side rails. Please indicate your choice of natural or wine colour head/footboards.

Hälsa & Hälsa Plus

Adjustable home care bed

At a glance

- Standard and Plus sizes available
- Trendelenburg/reverse Trendelenburg
- Dual posts on each side increases stability at all heights
- Low position: 9.875" (12.125" with large caster)
- High position: 25.625" (27.875" with large caster)
- Disassembles into four section for easy transport or storage
- Standard size: 36" x 80"; Plus size: four width options - 36", 39", 42", and 48"
- Maximum client weight of up to 375 lb for standard and 500 lb for Plus/bariatric model

The Hälsa Bed is an electric, adjustable home care bed available in standard and Plus sizes and includes a 10-button hand pendant. The Trendelenburg (& reverse Trendelenburg) feature comes standard and allows clients to lay flat on their back on a 15–30 degree incline with their feet elevated above the head. Additionally, it offers the capability of moving both the head and foot sections simultaneously, an upgraded large caster option, and easy disassembly for transportation and storage.

Hälsa & Hälsa Plus bed standard features:

- Natural or wine colour head/footboard
- Hooks for incontinence bag
- 3 locking casters & 1 directional locking caster
- Side and foot mattress retainers
- Receptacle for trapeze bar
- 2 receptacles for IV holder stems
- Virtually noise-free with low electrical consumption
- DC Linak motors

Optional features:

- Assist bar, interchangeable between head and foot sections
- Half side rails, interchangeable between head and foot sections
- Full side rails
- Trapeze bar
- Battery backup
- Upgraded large caster option

The **Hälsa Bed Half Side Rail (HSR)** package includes: 36" head and footboard, and a set of half side rails. The **Hälsa Bed Full Side Rail (FSR)** package includes: 36" head and footboard, and a set of full size rails. The **Hälsa Plus Bariatric Bed HSR** package includes: 36", 39", 42" or 48" head and footboard, and a set of half side rails. Please indicate your choice of natural or wine colour head/footboards. Wine colour option only available in the 36" wide head/footboard.

New!

Overbed tables

Two new options for overbed tables! Each includes a rubberized border to reduce spillage, a powder-coated metal stand with adjustable height, and two locking casters.

Tilting table (shown at the right) has a high-density laminate top and the pivot stops at 15°/30°/45°/90°. It comes fully assembled and the base is foldable for storage.

Composite table has an injection-molded top with a built-in cupholder (shown below), and comes flat packed with tools and hardware for assembly.

Part Number	Description	Retail Price
UNITYTILTOV New!	TILTING OVERBED TABLE WITH HIGH-DENSITY LAMINATE TOP	\$219.00
UNITYCOMPOV New!	COMPOSITE OVERBED TABLE WITH CUPHOLDER	\$219.00
