

COMPRESSION SPRING 2 (CNT2)

The Compression Spring 2 is used to maintain a constant tension on the electric fence wires. Wire tension on an electric fence will vary over time and the springs will maintain a constant force on the electric fence wires to keep them taut.

Features:

- A nylon plastic inner which eliminates galvanic reaction between dissimilar metals, reduces rust and increases the lifespan of the wire
- Can be used with any type of electric fence wire
- Medium tension compression spring (gold) which can tension wires up to 1.6 mm
- Stainless steel spring maintains constant tension on the fence

Specifications:

Material	Stainless steel spring UV stabilised plastic inner
Colour	Black White
Spring Tension	Medium 8kg
Operating temperature	-40 to 80°C
Operating voltage	0 - 12KV
Recycling	SPI 2

Stock Code	Description
ES-CNT2	Compression spring 2 Black
ES-CNT2W	Compression spring 2 White
