A similar diamond enters the market  
once every **16 to 20 years**

## GEMOLOGICAL CHARACTERISTICS

Market Distribution Percentage

MAY 29th 2023

Report #FC1685351756491

Fancy Color Diamond appreciation revolves around beauty and rarity. The Rarity Report illustrates the market prevalence of a polished diamond. Whether a diamond is one of several hundred or is introduced to the market once a decade, rarity was, and always will be, a part of the epic story of a fancy color diamond.

### 1 In 36,000,000

Only **1 in ~ 36,000,000** diamonds will have similar characteristics

The pink hue of your Fancy Vivid Pink/Purple/ish Pink 10.57 carat diamond is caused by a fascinating geological phenomenon that occurs when certain diamonds undergo more forcible pressure and heat than others. Diamonds that are exposed to 900° Celsius and manage to withstand the immense pressure underground experience a unique change in their atomic alignment. That's when the magic happens! Scientists believe that when light enters your Fancy Vivid Pink/Purple/ish Pink Round diamond and crosses its special atomic distortion, the light rays bend at an angle and absorb the green light, creating light waves ranging from red to violet and purple color.
