ECONO

Why ECONO

For cycling and e-mobility enthusiasts, we have developed and produced batteries for excellent electric bicycles for commuting to work, shopping, cycling in nature and long journeys. We offer the following e-bike models:

ECONO Apes
is suitable for commuting around town and to work.

ECONO Navis
is suitable for transportation around town and to work.

ECONO Pantera
is suitable for cyclists who are eager for adventure in the mountains, off-road and for whom nature comes first.

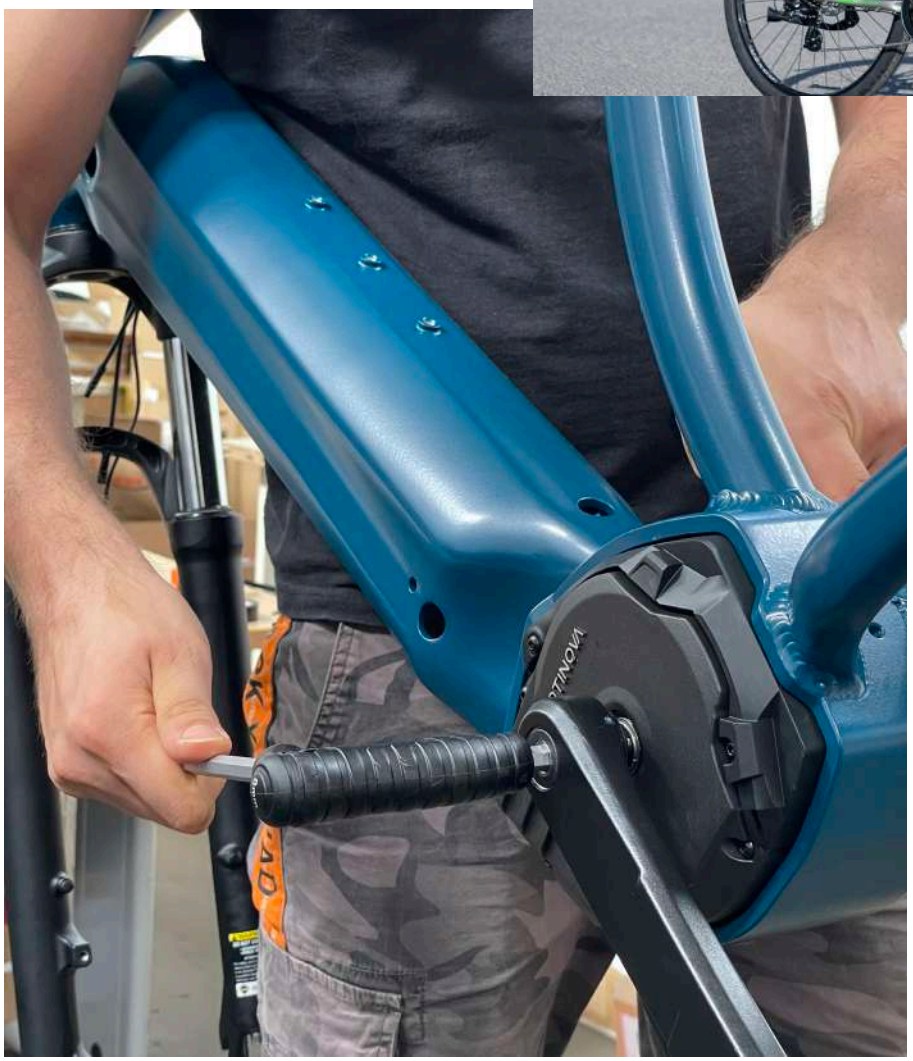

ECONO Equus
are suitable for longer journeys on different surfaces.

ECONO Mare
is a new generation of e-bikes that connect an active lifestyle and are suitable both for commuting to work and for sports activities.

ECONO
Electric bikes

Designed and assembled in Slovenia

Flawless operations of the e-bike is ensured by our experts. They test each component of the e-bike (motor, controller, display and battery) before installing it on the bike. When bike is essembled we make final inspection and tests.

Only such approach allow us to ensure best possible quality of our e-bikes.

E-CITY

APES SERIES

Apes is an urban bee that will take you safely and easily on your routes to work and shopping.

ECONO

ECONO InTube L
With 48V 820Wh (17Ah). Range up to 200km. Made in Slovenia.

For all occasions

DOMEL

Domel RS Motor
With power 250W and tourqe 112 Nm. Made in Slovenia.

Battery development and production

Quality Assurance

We guarantee fast and flexible delivery combined with your own transport and storage requirements.

We are constantly monitoring the entire battery production process to ensure the delivery of the highest quality products.

Development and production takes place in the production plant at our location Tržaška cesta 23, 2000 Maribor, Slovenia.

SAMSUNG

We are assembling only rank A battery cells from the Samsung brand.

Smart BMS has benefits for both the customer and the seller. It allows the customer more complete overview of the battery state of charge, also can show the range based on assistance. Main benefit for the seller is an insight into the battery history.

Notes

Partner:

Fast, efficient and environmentally friendly mobility.

New approaches to e-mobility, with advanced technology, help you reach new heights, spend your free time creatively and provide you with cheap and environmentally friendly transport for everyday tasks with a great deal of comfort.

We are a team of passionate cyclists and professionals, enthusiastic about e-mobility, environmentally friendly transport and a healthy lifestyle. We develop and create products and services that offer users of bicycles and electric bicycles a complete solution. Our work combines clean transport, enjoyment of movement and health promotion. This ensures environmentally and health-friendly mobility. We encourage the use of e-bikes as a means of transport and at the same time encourage active free time. We are engaged in the retail and wholesale of bicycles, electric bicycles and bicycle components and equipment related to electric bicycles. We are also engaged in the development and manufacture of electric bicycles and rechargeable Li-ion batteries for e-bikes and with services for bicycles, e-bikes, batteries and bicycle suspension.
