

2-WAY GATE CONTACT

The 2-Way Gate Contact is used for wiring live wires in series onto a sliding gate. The robust construction using stainless steel and brass makes it suitable for outdoor use in most climates. The large location plates allow for increased tolerance and easier installation.

Features:

- Heavy duty design for all weather types
- Large location plates allow for increased tolerance
- Available with brass cable connectors or crimp lug connectors
- Available with an earth plate option with brass cable connectors
- Mounting bracket available

Specifications:
