cantor's world

ABOUT CANTOR'S WORLD

The actual decision-making involved in running a country is about finding the most efficient use of limited resources. The process of making a decision from the nearly infinite set of choices, with different combinations of inputs and outputs, makes it a nontrivial task. This is especially the case at the macro level where governments need to make decisions on investments for economic growth while ensuring high rates of return on these investments towards the Gross Domestic Product (GDP).

Traditionally, the focus of most governments has been to maximize GDP. Human well-being was understood as being synonymous with economic growth measured by income growth. And therefore, the question of sustainability was never an issue. This has, however, changed over the past few years. The increasing recognition of the finite nature of resources and the increasing attention to negative externalities accruing from economic activities has made it necessary for governments to address the sustainability dimension of economic activities. Equally important has been the recognition that just growth in income or GDP does not automatically contribute to well-being.

Hence, there is a need to make a distinction of what we want to measure. What do we mean when we say a country is growing? Can we say that a country is growing if the GDP is growing? Remember, GDP is the value of all final goods and services. So, it is a flow just as if an individual gets income at the end of every month if the person is working. Some might say that this is a good indicator to evaluate if the country is growing.

Are there other indicators that one can use?

The Inclusive Wealth Model (IWM) developed by Partha Dasgupta and Ken Arrow offer a viable substitute for GDP to measure progress. The underlying premise of the Inclusive Wealth Index (IWI) is that the real progress of a country should be not based on the flow of income produced by the stock of capital a country is able to accumulate. We could have an indicator based on the stock of assets a country owns. The focus shifts from flow to stock. So, the important factor here is not the income per se generated in each

time period but the asset base or stock in each time period from which the income is generated. This also shifts the focus from the present to the future.

This raises a number of interesting questions that we must find answers if sustainability is to be also addressed:

First, if GDP is the most appropriate indicator to measure the wellbeing of society?

Second, how do we ensure the sustainability of GDP if it is agreed among policymakers that it is a good measure or proxy for wellbeing?

Third, If GDP falls short of measuring wellbeing, then can the SDG's be used as a measure of wellbeing?

Fourth, do we need resources to achieve the SDG's and if yes, what measure can we use to track the use of resources?

Fifth, can the Inclusive Wealth Index (IWI) be a useful indicator to measure and track the use of resources?

Sixth, can we achieve the SDG's while at the same time ensuring a sustainable use of resources?

To answer these questions, we have...

Cantor's World, one of the many learning products developed by UNESCO MGIEP. It is a simulation based game developed to understand the Inclusive Wealth Index, and to understand the uncertainties involved in governing a complex socio-economic system of a country. The game is targeted towards master's level students of economics and sustainability studies and mid-career policy makers. The participants play the role of the sole architect of the country and decide specific targets for their respective countries. The players then make changes to the various parameters in the game through specific policy interventions that are available as either monetary investment or regulatory change or providing subsidies.

The players' decisions affect the status of resources in the country and have a cascading effect on the produced, natural and human capital. The player's objectives in the game are both personal and global wellbeing. The facilitators of the game session are able to monitor the decisions and trajectories of the players in the game. Cantor's World is supplemented with well-defined learning outcomes including a curriculum framework with eight one-hour modules to direct the flow and usage in classroom setting.

FACILITATING THE GAME

REQUIREMENTS FOR THE GAME

To play the game you'll require access to the internet and one of the following supported browsers: **Chrome** (or **Chromium**), **Firefox** or **Opera**. You will also have to enable cookies on your browser in order to play the game. We do not collect your personal information for any purpose.

Please login to the URL provided to you by the facilitator.

Welcome to Cantor's World. Please click on **Enter** to continue as shown in figure 2.1.

Figure 2.1: Landing Page

LOGGING IN AND OUT OF THE GAME

After your game facilitator has provided you with your credentials to play the game please ensure that your password is case sensitive and username in lowercase characters. In case you forget your password, please contact your administrator.

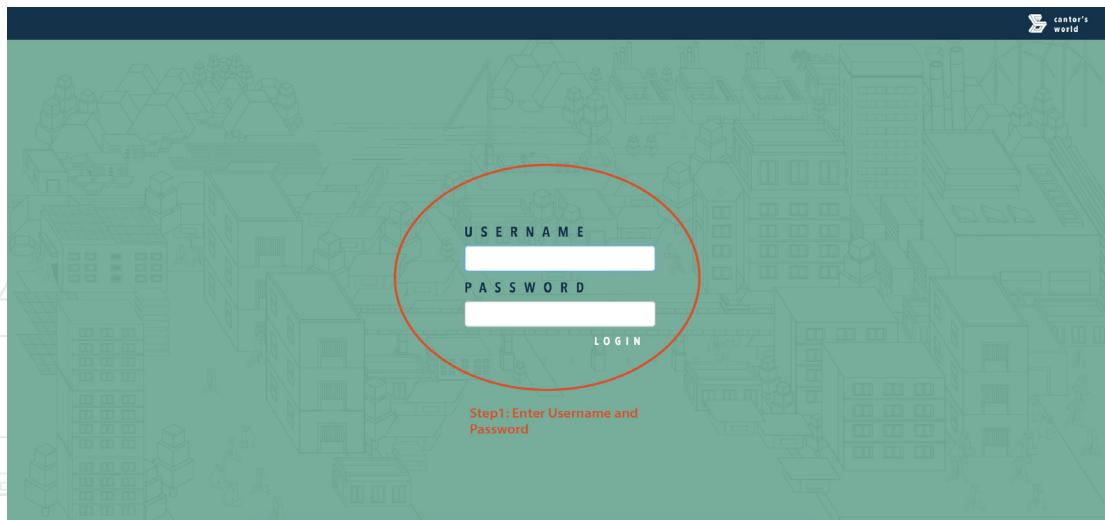

Figure 2.2: Login Page

After logging in successfully, you will see a list of instances available to you. Instances are actual games with defined set of users. As a facilitator, you need to create instances and add players to the game.

In figure 2.3, you will also notice the logout button. This button will be available in every subsequent page.

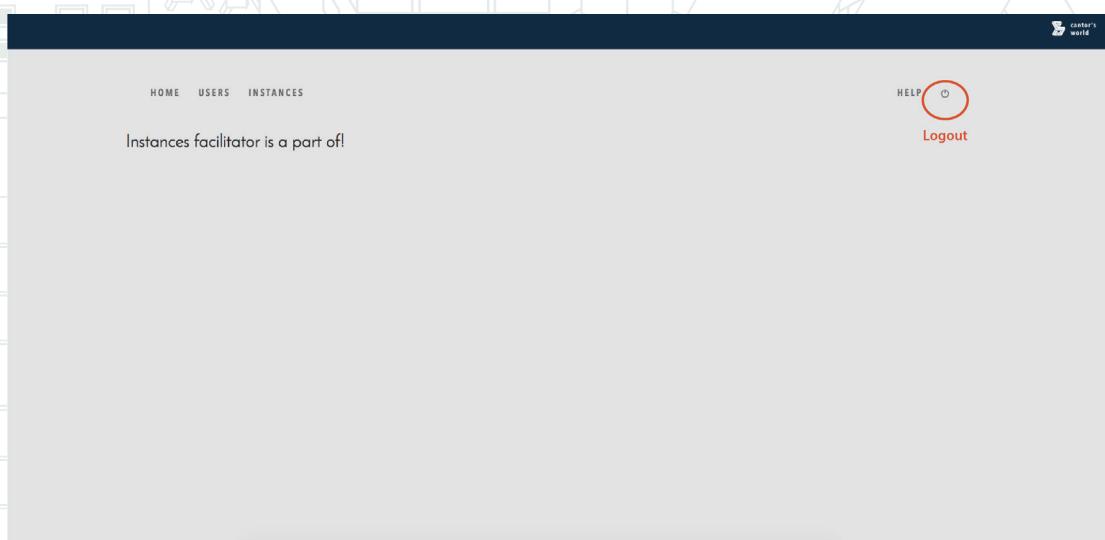

Figure 2.3: Facilitator Home Page

ADDING USERS TO THE GAME

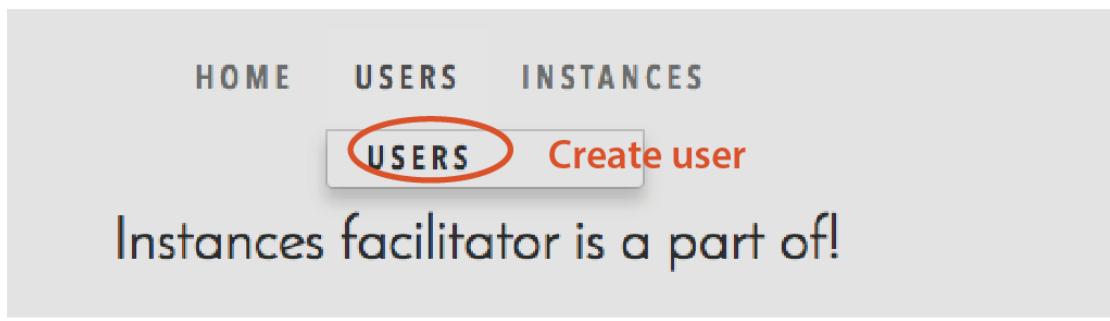

Figure 2.4: User Navigation Panel

Click on the USERS button the navigation bar as shown in figure 2.4. This will lead you to the page shown in figure 2.5. On this page, you will see a create user form on the left (as shown in figure 2.6) and the list of users on the right (as shown in figure 2.7).

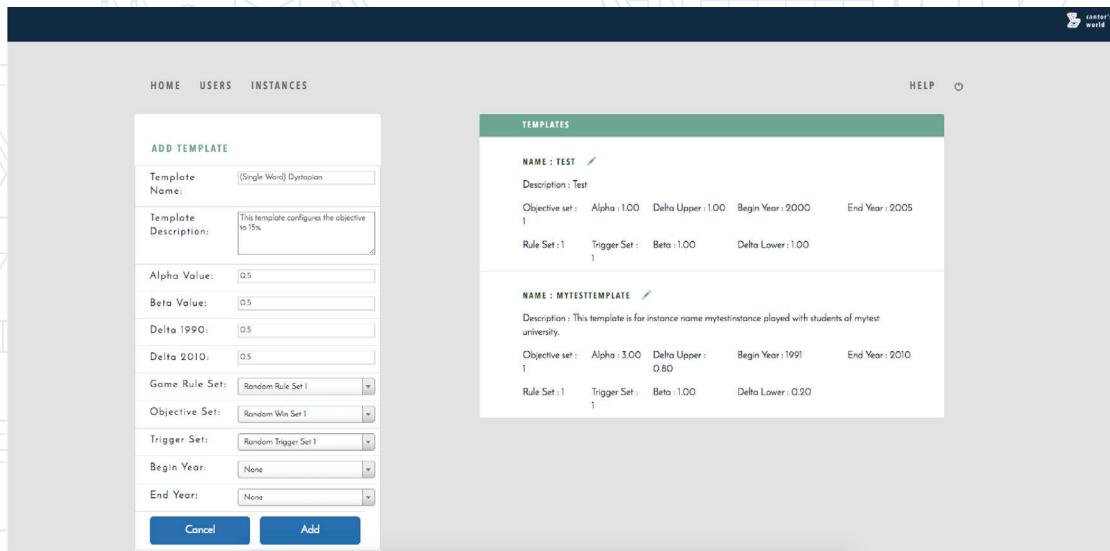

Figure 2.5: User Details Page

The image shows a 'Create User Form'. It is divided into two sections: 'step1: Create user details' and 'step2: Click to add User'. The 'step1' section contains fields for 'Username' (mytestuser), 'Email' (mytestuser@test.com), 'Password' (.....), 'Password (Again)' (.....), 'Country' (United States), 'Age' (45), 'Education background' (phd), 'Gender' (female), 'Affiliation' (mglep), and 'User Role' (player). The 'Add' button is highlighted with a red oval. The 'step2' section contains the text 'step2: Click to add User'.

Figure 2.6: Create User Form

Enter new user details and then click on the ADD button (figure 2.6). The new player will now show up in the list , as shown in figure 2.8. You may edit user details by clicking on the pencil button (figure 2.5), making changes, and then clicking on the EDIT button. If you would like to add a new user at this point, please click on the cancel button.

ADDING A TEMPLATE TO THE GAME

A new template can be created by clicking on the TEMPLATE button on the navigation bar (figure 2.9). This leads the facilitator to the TEMAPLTE page (figure 2.10) with a button to create template. The list of templates is visible on the right, as shown in figure 2.12.

Figure 2.16: Create Instance Form

ADDING AND REMOVING USERS TO THE GAME

After creating an instance, you need to add users to it. From figure 2.16, click on the button enclosed in a red circle to add players and click on the button enclosed in blue circle to remove players from the instance.

Figure 2.17: Adding Users to an Instance

Once you click on the button to add users to the instance, it appears on the left, as shown in figure 2.17. Type or select the usernames to be added to the instance. **Contact the administrator to add you to the instance created.**

Once the administrator has added you to the instance your homepage will look like figure 2.18.

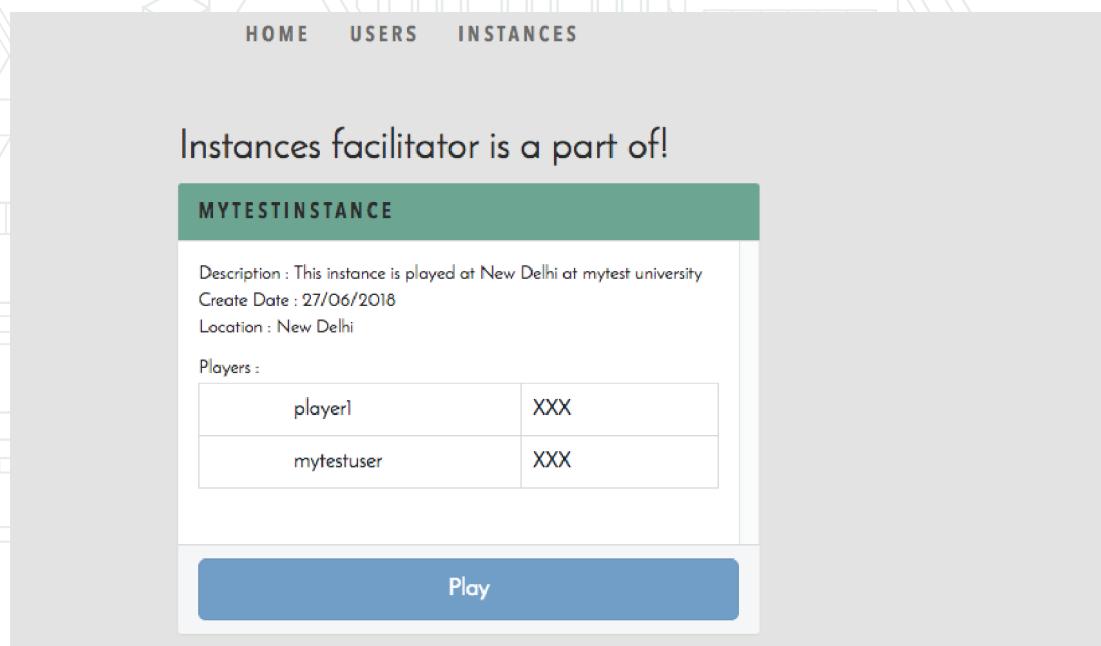

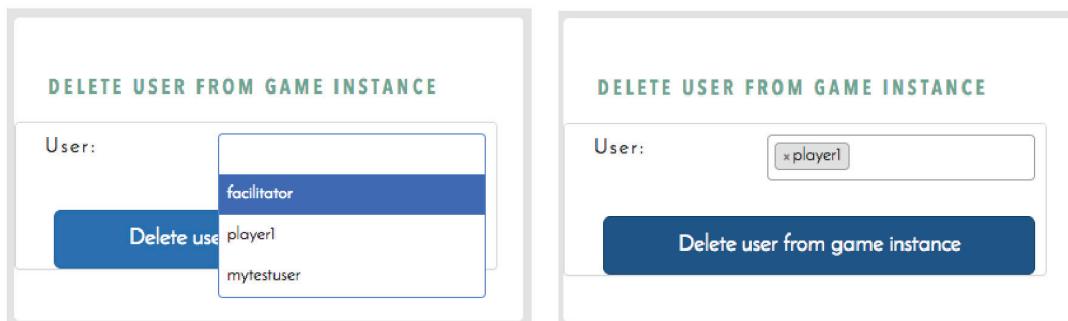

Figure 2.18: Viewing Users in an Instance

Now your players will notice this new addition on their screens as well, and you can instruct them to choose a country and set their priorities. You will also notice that the Play button has been disabled for you. This is done to ensure that all players choose their country and only then can you start playing. Each player has XXX marked next to them to indicate the country chosen by them. XXX indicates To be Decided. Each value gets updated after refreshing the screen.

If you need to remove a player from the instance, you can do so by clicking on the button enclosed in a blue circle to remove players from the instance as shown in 2.16.

If you were to remove player1 as shown in figure 2.18, navigate to the instance page and click on remove players from the instance and follow the procedure as indicated in figure 2.19.

DELETE USER FROM GAME INSTANCE

User:

Delete user

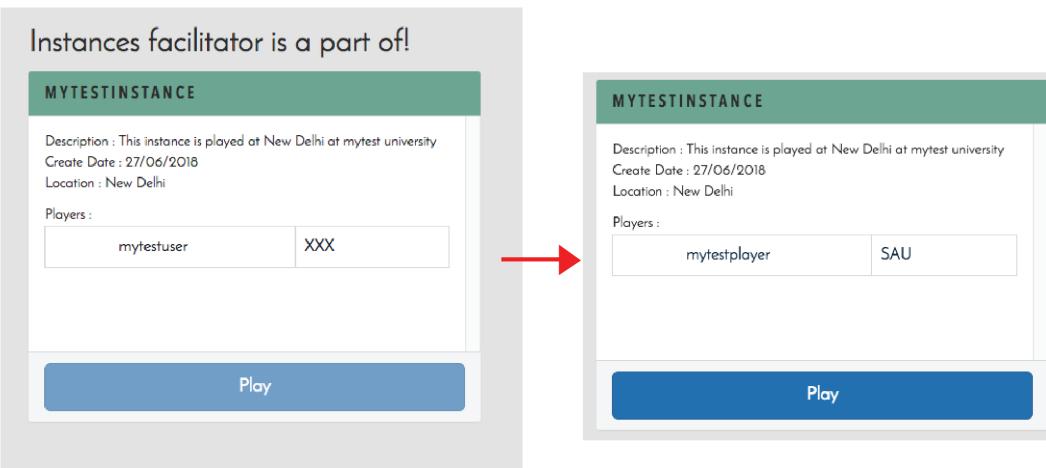

DELETE USER FROM GAME INSTANCE

User:

Delete user from game instance

Figure 2.19: Deleting a user from an Instance

After deleting a user, your homepage will now look like figure 2.20. After all players have chosen their country, the PLAY button will be enabled. You may now click on PLAY and proceed.

Figure 2.20: Player Statuses after they've chosen a country

PLAYING THE GAME

MONITORING PLAYER SUBMIT STATUSES

Welcome to your instance's Gameplay page as shown in figure 3.1. You can click on the Next Round button after all the players have submitted their policies for the year. When the game is about to end the button text will change to End Game, the game ends after this button has been clicked.

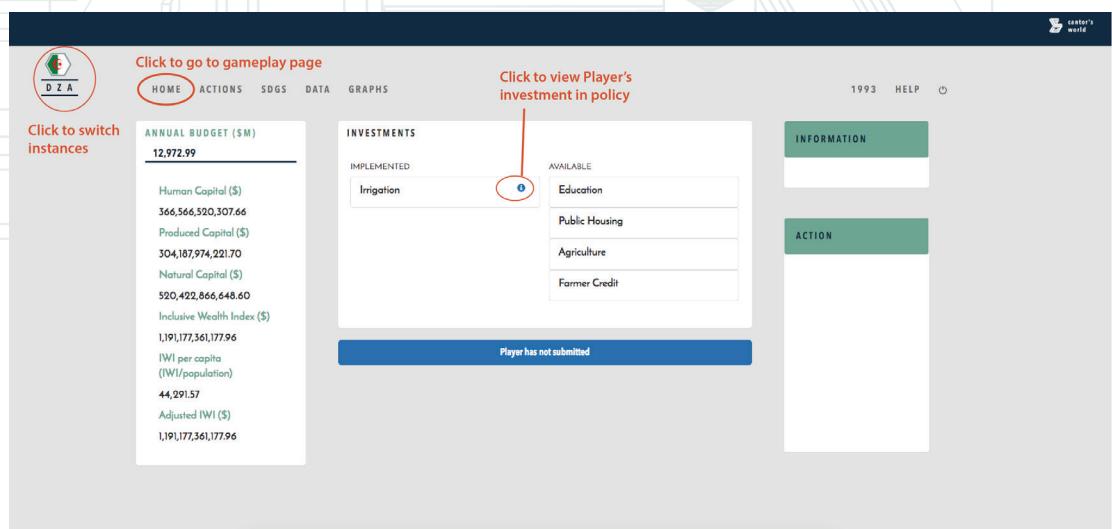

The screenshot shows the 'TEST_GAME' instance of the game. The 'NEXT ROUND' button is highlighted with a red circle and a tooltip: 'To move to next round, click after all statuses are True'. The table below lists player submissions:

Player Username	Name	Country	Status	Action
anirudh	anirudh	Algeria	False	View Player Screen
harish	harish	Saudi Arabia	True	View Player Screen
		United Kingdom	True	View Player Screen
	harish	United States of America	True	View Player Screen

Annotations: 'Name of your Instance' points to 'TEST_GAME'; 'Player Username' points to 'anirudh'; 'Country chosen by the player' points to 'United States of America'; 'Status of policy submission' points to the 'Status' column; 'View player screen to check player actions and data' points to the 'View Player Screen' link for the first player.

Figure 3.1: Gameplay screen of Facilitator

Clicking on the button "View Player Screen" takes you to the player page. You will not be able to implement or submit policies on behalf of the player but you can view all data generated by the player.

The screenshot shows the 'TEST_GAME' instance of the game. The 'INVESTMENTS' section is highlighted with a red circle and a tooltip: 'Click to view Player's investment in policy'. The 'INVESTMENTS' table shows:

IMPLEMENTED	AVAILABLE
Irrigation	Education Public Housing Agriculture Farmer Credit

Annotations: 'Click to go to gameplay page' points to the 'TEST_GAME' instance header; 'Click to switch instances' points to the instance switcher; 'Click to view Player's investment in policy' points to the 'INVESTMENTS' section; 'Player has not submitted' points to the status message at the bottom.

Figure 3.2: Gameplay screen of Facilitator

After the information icon has been clicked to view the player's policy investment, the panels to the right will be populated with information as shown in figure 3.3.

You can view the gameplay page by clicking on the Home button as shown in figure 3.2. You can check the player's progress on SDGs by clicking on the SDG button on the navigation page.

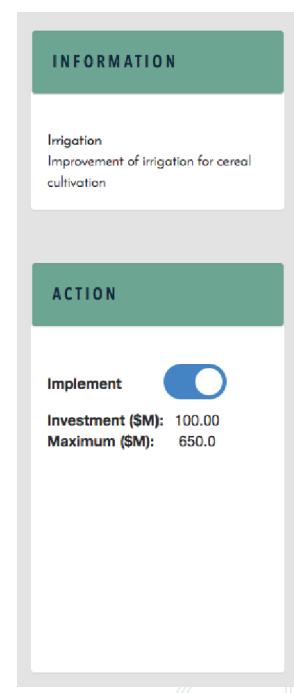

Figure 3.3: View player's policy investments

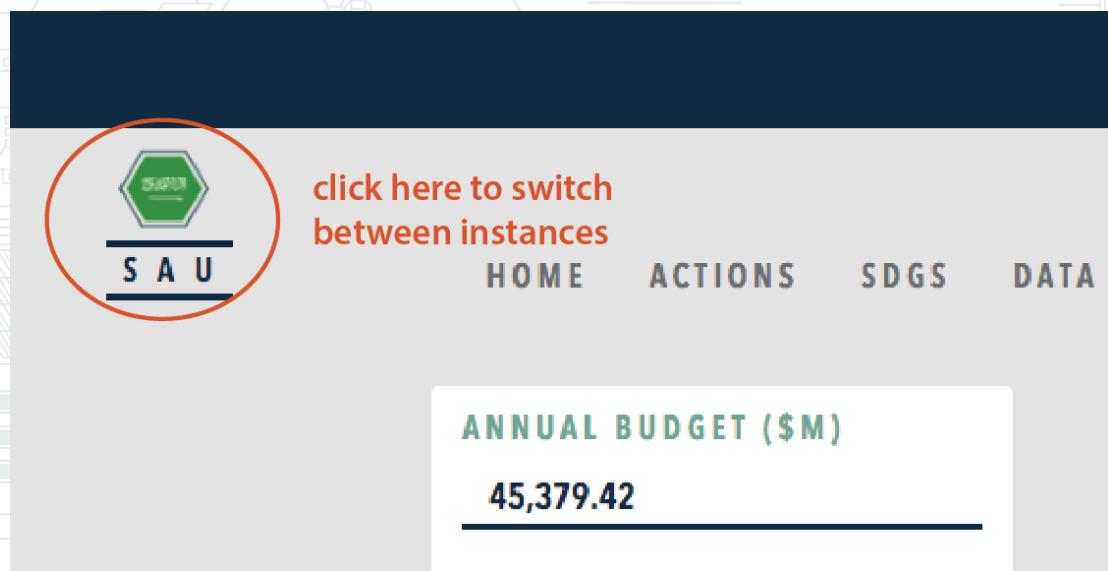

Figure 3.4: Click on the country flag to switch instances

VIEWING PLAYER DATA

To view the Data of the player's country, click on the Data tab on the navigation panel, which leads to a screen as shown in the figure 3.5. You can now select the years available to you and click on the generate button.

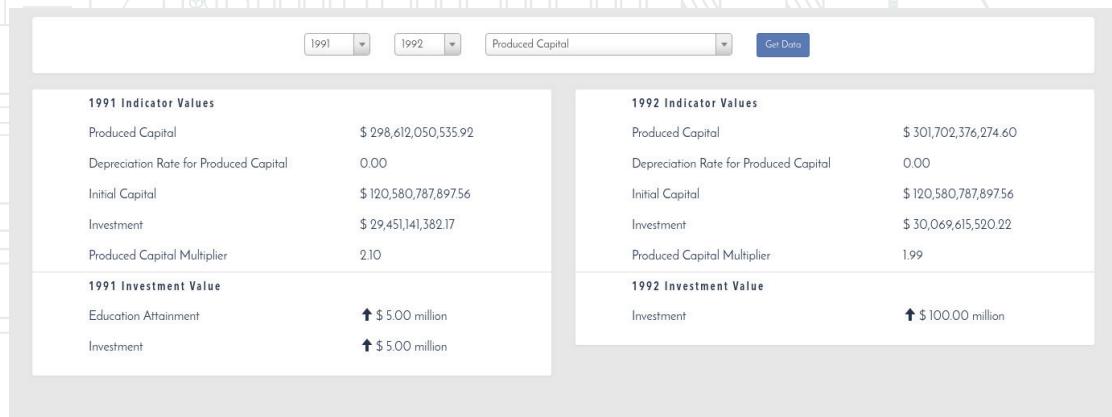

Step 2: Select starting year

Step 3: Select Category

Step 4: click to get Data.

Figure 3.5: Data form on data page

The indicator data is from the years and capital chosen and the investment data is based on the policy investments made. You will also be shown the various policies implemented by the player in different years.

1991 Indicator Values		1992 Indicator Values	
Produced Capital	\$ 298,612,050,535.92	Produced Capital	\$ 301,702,376,274.60
Depreciation Rate for Produced Capital	0.00	Depreciation Rate for Produced Capital	0.00
Initial Capital	\$ 120,580,787,897.56	Initial Capital	\$ 120,580,787,897.56
Investment	\$ 29,451,141,382.17	Investment	\$ 30,069,615,520.22
Produced Capital Multiplier	2.10	Produced Capital Multiplier	1.99
1991 Investment Value		1992 Investment Value	
Education Attainment	↑ \$ 5.00 million	Investment	↑ \$ 100.00 million
Investment	↑ \$ 5.00 million		

Figure 3.6: Data form on data page

You can check the player's progress on SDGs by clicking on the SDG button on the navigation page.

Figure 3.7: SDG page

VIEWING GRAPHS

To generate the graphs for the various capitals and indicator data, click on the graphs button on the navigation panel. This leads you to a screen as shown in the figure 3.8. Follow Steps 1-3.

You will be shown three sets of graphs, the first is a comparison of the two indicators chosen and the other two graphs display data over a time period. The legend is available on all the graphs and one set of lines is a plot of the real world data and the other is the data of the path your country has taken.

If you wish to view only one indicator, set both to view only one indicator set both characters as the same indicator.

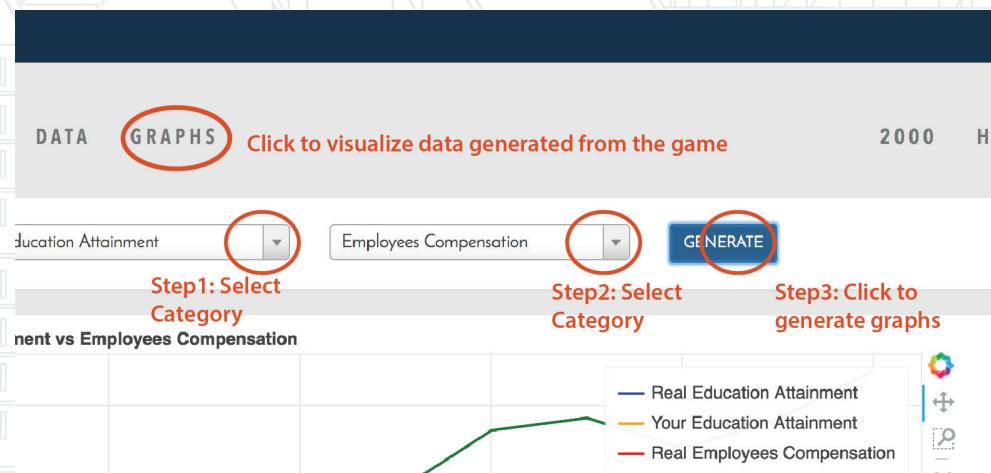

Figure 3.8: Graph page
