**Radway Meadows sits on Edge Hill, South Warwickshire.**

Find out more on this reserve [here](#).

This is part of Warwickshire Wildlife Trust's '50 nature reserves in 50 days' series, available to view on all their social media accounts @warwickshirewt.

**SIGN UP FOR  
30 DAYS WILD!**

This June, The Wildlife Trusts want you to do one wild thing a day throughout the whole month; for your health, wellbeing and for the planet. That's 30 simple, fun and exciting Random Acts of Wildness.

[Click here to get involved](#) and download your free pack.

The University is a member of the [Arden Wildlife Network](#) and their project to increase tree sparrows, a threatened species. A wildflower area and winter bird seed mix has been sown at [Wellesbourne](#) and ten tree sparrow boxes installed. A volunteer undertook four bird surveys between February and March and saw 47 species; no tree sparrows have been recorded, however their return could take time. The following are just some of the species to be seen: Brambling, Corn Bunting, Fieldfare, Linnet, Redwing, and Yellowhammer.

How much do you know about deforestation and biodiversity? Test your knowledge with [this quiz!](#)

## [Air Quality Consultation](#)

**Coventry Council needs feedback** on the latest consultation on Local Air Quality Action Plan which will help further inform what will be included in the final plan. This is due to be submitted to the Government in June and your views are important. Please fill in the survey [here](#). The deadline for responses has been extended to **Sunday 31st May**.
