**metallic**®
A Commvault Venture

**Metallic® Backup for Microsoft 365** delivers enterprise-grade data protection, with simplicity and savings of SaaS. With Metallic®, you get cost-effective protection without the expenditures, overhead and IT burden typically associated with self-managed solutions.

See the infographic below for more details. And for a more personalized look, check out our Microsoft 365 TCO calculator to see just how much Metallic™ SaaS data protection can save you.
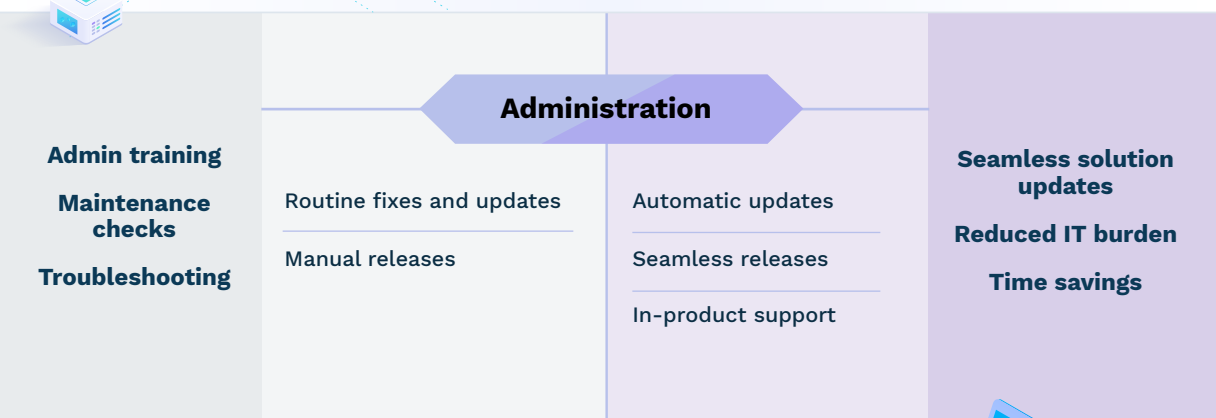

**VS**

| | SELF-MANAGED SOFTWARE | METALLIC® SaaS | |
|---|---|---|---|
| **CONSIDERATIONS** ▼ | **Initial expenditures** | | **BENEFITS** ▼ |
| Equipment failure | Large capital expenditures (such as hardware and servers) | Fully-hosted protection | Reduced startup costs |
| Hardware upgrades | Time-consuming configuration and deployment | Rapid/easy config wizard | Rapid deployments |
| Licensing fees | **Network & Compute** | | No sunk costs |
| | Bandwidth and monitoring | Vendor-managed | |

For every dollar spent on updating data center infrastructure, **companies expect to pay roughly $2 to manage, maintain, and secure it.**[1]

| | SELF-MANAGED SOFTWARE | METALLIC® SaaS | |
|---|---|---|---|
| Storage limitations | **Storage** | | Ultimate scalability |
| Managing storage capacity | Purchasing storage | Azure storage included | Extended retention built-in |
| | Egress charges | No egress or hidden fees | |

**70%**
of CIOs have a cloud-first strategy[2]

| | SELF-MANAGED SOFTWARE | METALLIC® SaaS | |
|---|---|---|---|
| Admin training | **Administration** | | Seamless solution updates |
| Maintenance checks | Routine fixes and updates | Automatic updates | Reduced IT burden |
| Troubleshooting | Manual releases | Seamless releases | Time savings |
| | | In-product support | |

IDC projects **DPaaS will surpass traditional DRP** in 2021 or 2022
SaaSPath 2Q20, April 2020, IDC
