CASE STUDY

HOW THIS AMERICAN DISPENSARY SAVED $5,500 WITH TIME TRACKING

5,500
Hours saved annually
on scheduling and payroll

30
Hours saved monthly
on a full-time accountant

Extra
Cash saved yearly
with time tracking technology

Kansas City Cannabis Co. Dispensary in Missouri, USA.

Introducing Kansas City Cannabis Co. dispensary. The dispensary operating out of Missouri, USA, that is dedicated to offering medical marijuana patients a carefully curated, and reasonably priced selection of the top Missouri-grown cannabis flowers, extracts, and infused goods.   We sat down with Corey, the chief of staff, and Janet, administrative director to learn more about running a cannabis store.

With the expansion of the cannabis industry, and the opening of new locations the team realized there was a need for a stronger management plan to keep up with the increased number of staff and customers. They decided that it was time to implement an effective human resource management strategy as the company grew in size.

Scaling in the cannabis retail business, as well as streamlining HR, payroll, and personnel management systems, became a daunting task as a result of this expansion.

> "
> *The goal was to spend less time on data processing, and employee management systems to keep the dispensary compliant.*

Life before using the KayaPush system.

Before KayaPush, employees who were frequently clocking in early, or late, were a regular source of frustration and were costing the Kansas City Cannabis Co. team a lot of time in lost labor.

The need for a system that will simplify the process of managing staff while enhancing efficiency became paramount. Staffing, scheduling, and time monitoring became difficult tasks for those in charge, resulting in poor data management.

Before using KayaPush, it was a major challenge manually handling activities like:

- Payroll
- Time Tracking
- Hiring & Onboarding
- Scheduling
- Managing Employees Data
- Reporting

Taking care of business.

Thanks to KayaPush software, the dispensary can now allow their employees more freedom to work efficiently and autonomously. Janet says she has noticed that now they are spending less time scheduling, which is ultimately the goal.

> " The KayaPush software program helps me maximize my profits. One of the most important benefits of KayaPush in my dispensary is the ability to view all activities on one screen and see how much we're spending on labor.
>
> - Janet "

It's the things you can't measure.

Janet shared how using a system to manage staff aids on maximizing firm profit. Because it provides clear insights on how much is being spent on labor and how many hours each employee works. This helps save money by removing excesses. It also makes creating schedules more enjoyable overall.

> *KayaPush made creating the schedule and applying different tags to the scheduling, for example, a lot of fun and easy.*

Crushing business goals.

Corey likes the KayaPush application because it allows keeping track of how many hours each person works and whether or not one of them is working excessively long hours.

> *"By consolidating, we save money, and money saved is money earned in the business."*

Using this system, the team now only has to approve time clocks once a week, and the system is very user-friendly.

> *"We've saved a lot of time, and we've been able to delegate a lot of this to our store manager. It's quite simple to use now that we've got everything set up and dialed in."*
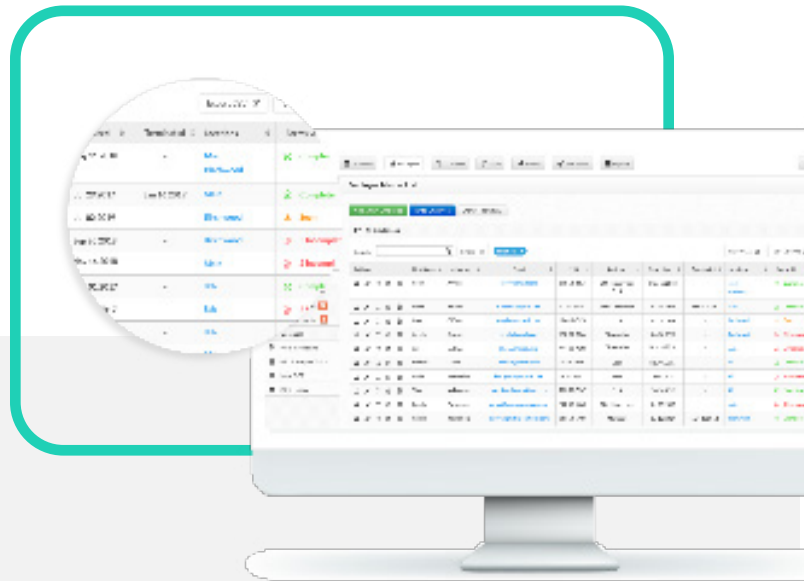

Would you recommend Push?

The team was kind in sharing that they believed that any dispensary in the United States that wants to stay in business for a long time should use KayaPush's reliable services.

It took us two weeks to get used to it, but it was less time than not having it, and it quickly became one of our most valuable scheduling and reporting tools.

"

Every dispensary that wants to make money while being compliant needs the KayaPush software application.

"

The End Result

Challenges

Full time manual payroll would take too much time

Managing a store with staff was tricky.

Software solutions seemed daunting and complex.

Solutions

Straightforward solution.

Easy to use payroll.

Integrated scheduling and time tracking to streamline operations.

Compliant software to ensure store compliance.

Results

Up to date employees' hourly data.

Accurate reporting and transparent bookkeeping solutions.

Up to date employee payment and pay structure.

Credible employee attendance, punctuality, uneven tax details.

Easy streamlining of all dispensary management operations systems.
