

**90MM ROUND DOWNPIPE POPS PUNCH AND DIE SET**

**ATTENTION ALL ROOFERS AND TRADIES!**

Check out Specialised Force game-changing solution for installing 90mm Round Downpipe POPs, used in the majority of new constructions.

With our DAIA 88.8mm punch and die set, combined with the Greenlee manual draw stud, you can now install a POP in under 60 seconds!

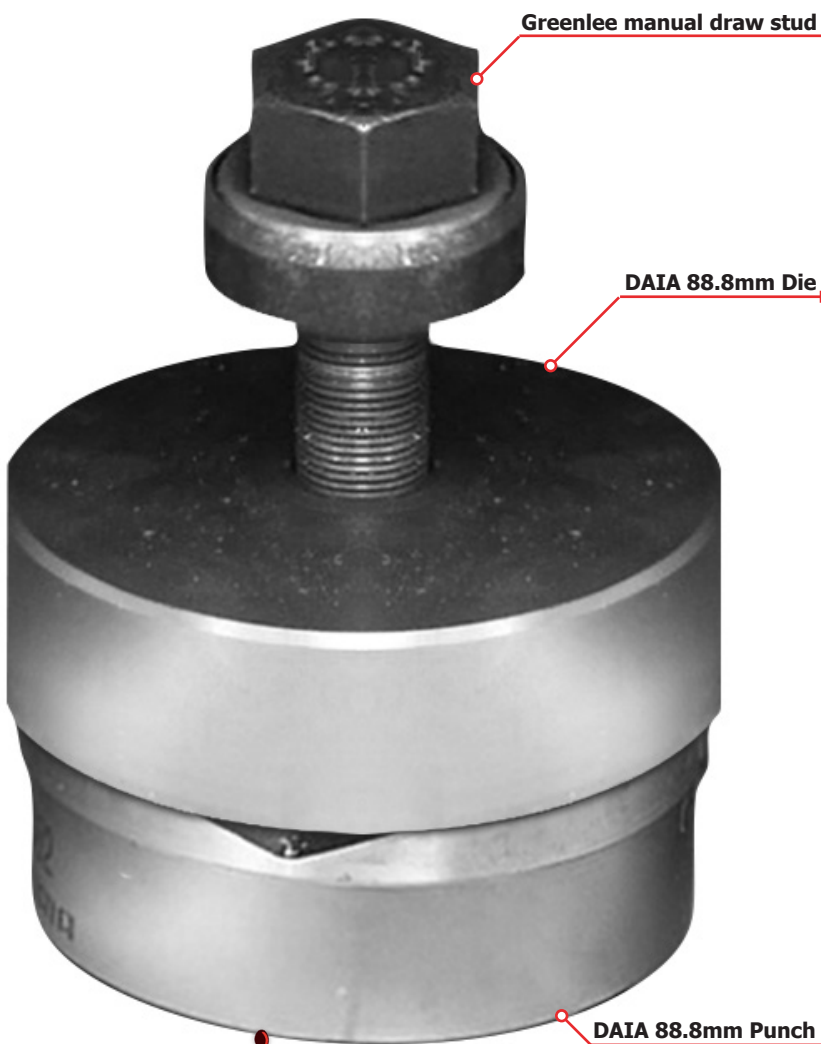

DAIA premium-grade punches and dies, made in Japan from high-grade tool steel, ensure accurate holes and long-lasting performance.

Don't wait! Visit our website or contact one of our nationwide network branches to speak with our friendly experts and order this amazing kit for yourself. We also offer many other punches in different shapes and sizes.

**KIT DETAILS**

- DAIA 88.8mm punch and die set (Made in Japan) – Part Number: 82
- Greenlee manual draw stud – Part Number: 04042

**Note:** Step drill and 1" socket are not supplied.

**3-STEP POP INSTALLATION**

1. Drill the guide hole using a step drill.

2. Position the punch, die and stud, then tighten the stud screw using a 1-inch socket, driven by a manual or battery wrench.

3. Insert the POP — and that's it!
