

JURASSIC INSULATOR

The Jurassic Insulator is used with square tube brackets, and square or round fencing posts. Available in feed-through or slotted.

Features:

- Large electrical tracking distance to reduce arcing in areas where there is pollution and salt build up
- Feed-through option for maximum security
- Slotted clip option available for a quicker wire placement
- Self Tapper Hooks are used to fasten the Jurassic insulator to the bracket or post and is available in two sizes
- Easy to change and maintain

Specifications:
