

FORKLIFT HALO

Forklift Halo is a cutting-edge LED lighting system that significantly enhances workplace safety. When installed, it projects a brightly colored line around vehicles, defining a highly visible "exclusion zone." This zone serves as a clear visual indicator for workers, pedestrians, and drivers, making safety a top priority in any environment.

Key Features:

- **Protecting Pedestrians:** The safety of pedestrians near vehicles and heavy machinery is paramount. Forklift Halo prevents inadvertent intrusions, establishes secure working spaces for both pedestrians and machinery, and ultimately, saves lives.
- **Versatile Integration:** Designed with adaptability in mind, Forklift Halo seamlessly integrates into diverse environments, including construction sites, logistics hubs, quarries, and waste plants. Its versatility ensures effortless integration into your safety-conscious operation.
- **Innovative Safety:** Forklift Halo's LED lighting kit defines danger and exclusion zones around vehicles, where safety is crucial. Workers can now confidently navigate these areas, even when vehicles are in motion, ensuring safety in close proximity to moving machinery.

Enhance workplace safety, eliminate guesswork, and prioritize lives with Forklift Halo from Bear Safety.
