

WYBOT

It's time to forget about pool cleaning

Intelligent Cordless Pool
Cleaners of 2025

www.wybotpool.com

Company Profile

WYBOTICS Co, Ltd., established in 2005, is a leading company in pool cleaning industry.

WYBOTICS is committed to providing the best solution for global customers through its continuous innovation and cutting-edge technologies integration, leading the future of pool cleaning.

We develop and manufacture a broad range of pool cleaning products, covering handheld vacuum cleaners, corded robotic pool cleaners, and cordless robotic pool cleaners.

Until now, WYBOTICS, whose headquarter is located in Tianjin China, has established a complete research and development, manufacturing, sales, and service network in the industry, comprising 4 subsidiaries and branch offices globally, to ensure quick responses to the needs of customers, users and partners.

1st COMPANY TO INTRODUCE CORDLESS ROBOTIC POOL CLEANERS IN THE MARKET

About WYBOT

The pool is an oasis on your patio, where you shed fatigue and embrace coolness in the blazing summer. Hassle and troublesome pool cleaning should not be your burden. Thus, WYBOT pool cleaning robots have entered the pool cleaning market, pursuing effortless pool cleaning, and freeing pool owners from laborious maintenance tasks.

Today, WYBOT features high intelligence and industry game-changer, offering an effortless pool maintenance experience, and earning unanimous praise from users for their ultimate autonomous cleaning methods and simple, convenient operation design.

INTERNATIONAL AWARDS

R&D Team and Core Technology

We are a professional team that dares to innovate and embrace challenges. We dedicate ourselves to developing cutting-edge technologies in the industry, breaking through multiple underwater technical barriers. To date, we have pioneered applications such as underwater debris recovery, underwater V slam, underwater wireless charging technologies, underwater communication technology, underwater dock-to-charge technology, and underwater visual assistance cleaning technologies.

Our pool cleaning robots integrate multiple high-precision sensors and utilize advanced algorithmic technology developed by our team, innovating highly autonomous pool cleaning capabilities. Currently, the cleaning robots achieve comprehensive coverage and shorter cleaning wait times, allowing users to check and modify cleaning settings at any time.

WYBOT S3

The era of Pool Cleaning 3.0 has arrived. WYBOT S3 can keep your pool clean for up to one month with zero intervention. It's time to forget about pool cleaning. WORLD'S FIRST!

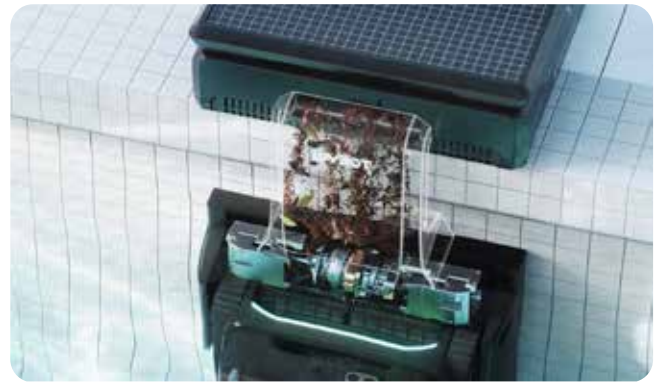

WORLD'S FIRST SELF EMPTYING POOL CLEANING ROBOT

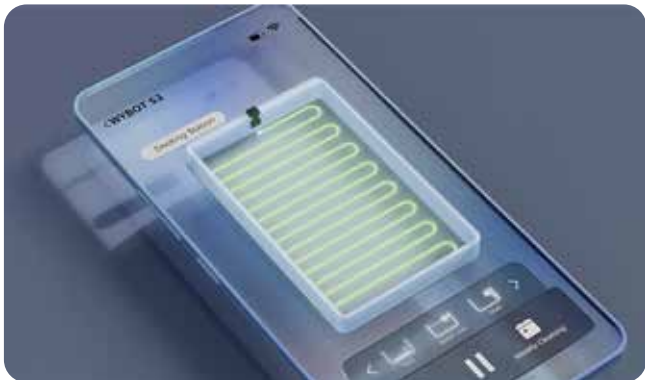

The world's first robotic pool cleaner with underwater 3D mapping and positioning

Complete a 3D map of your pool at the first cleaning, and as for the 3D map, the robot fully understands its environment and automatically plans the most efficient cleaning route.

The world's first robotic pool cleaner with automatic charging and self-cleaning capabilities

With an exclusive self-cleaning function, the robot transfers all debris from the filter basket to an onshore dustbin, completing its self-cleaning process and extending cleaning cycles for up to one month. Even while you're on vacation, rest assured that your pool will remain clean and worryfree.

Real-time Positioning

With underwater communication and cloud connectivity, you can track the robot's cleaning progress in real-time via your mobile device, and remotely direct it to focus on specific areas. No matter where you are, your pool's cleanliness is always in your control.

Large-capacity and Self-sanitizing Dirt Collector

The 10L ultra-large capacity dirt collector ensures up to a full month of cleaning cycles. Equipped with internal filtration and self-sanitizing systems, it performs secondary cleaning of dirt, guaranteeing worry-free pool water quality*.

Advanced Cleaning Management System

Equipped with an advanced cleaning management system, it follows preset schedules and provides real-time progress updates.

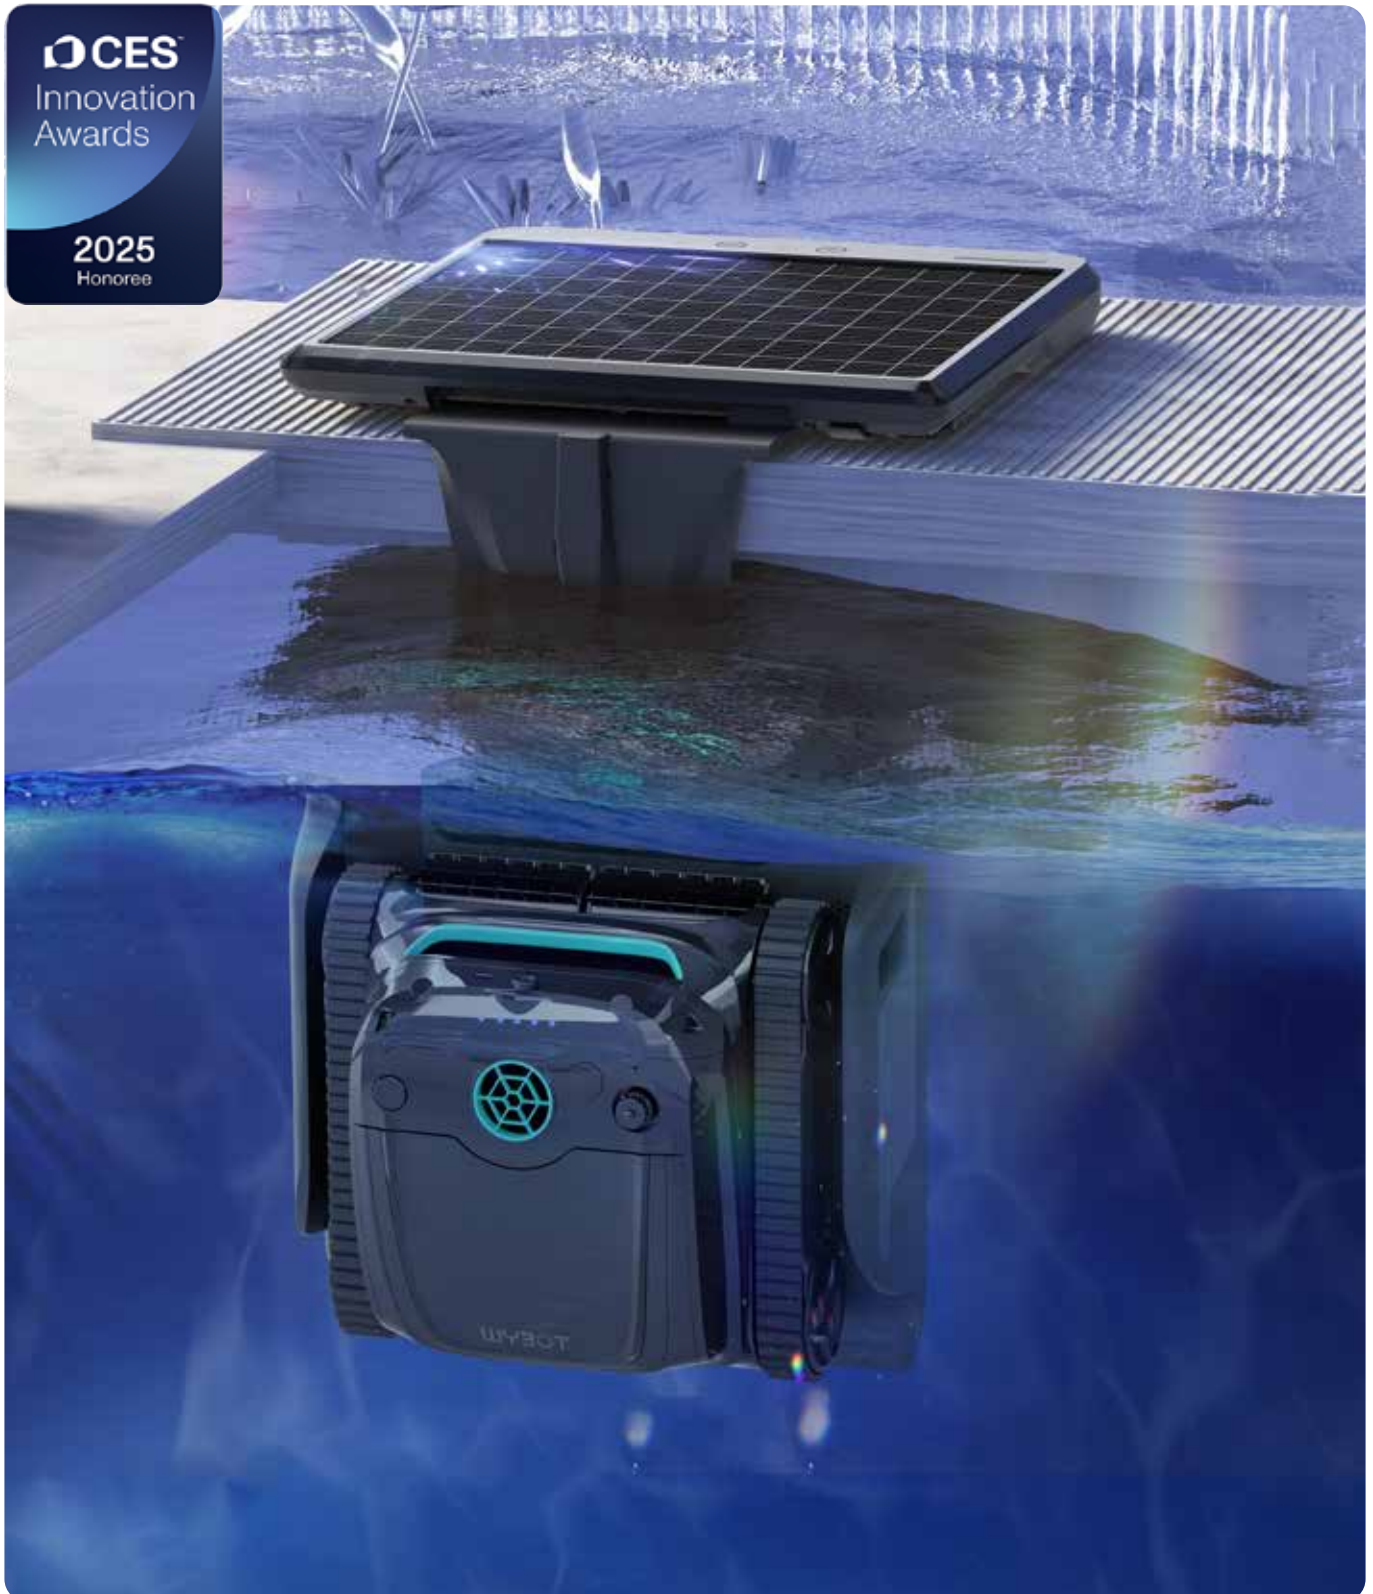

Solar Charging & DC charging

Support solar charging and DC charging, keeping the robot energetic all the time in any way.

*The effectiveness and capacity of the product may vary depending on the level of debris or contamination present in your pool.

WYBOT S2 SOLAR VISION

With vision technology and solar panels, the WYBOT S2 Solar Vision redefines pool cleaning work and splashing happiness. Fully autonomous cleaning and underwater recharging will free you from the hassle of pool work and enable a greener summertime.

Docking Station

The world's first underwater-docking and wireless-charging pool station innovates a new trend in patio cleaning work.

Solar Charging

Support solar charging and DC charging, keeping the robot energetic all the time in any way.

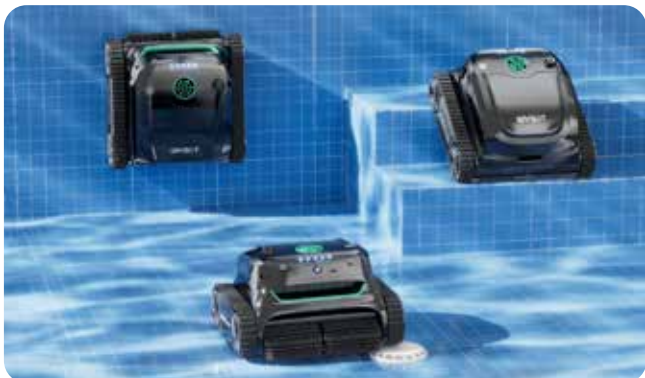

High-efficiency Cleaning

Visual assistance cleaning technology sets a new standard for rapid cleaning. A 'visible' machine for visible efficiency.

Underwater Communication

Break through the restriction of deep water and notify you of each cleaning movement. At your fingertips, every pool cleaning setting can be tailored at any time.

Versatile Cleaner

Cover every corner of all types of pools, leaving no dirty uncleaned.

8 Cleaning Modes & 7 Cleaning Paths

Easy to choose your cleaning area through your robot or the APP, and pair the best path for a full cleaning.

WYBOT S2 SOLAR

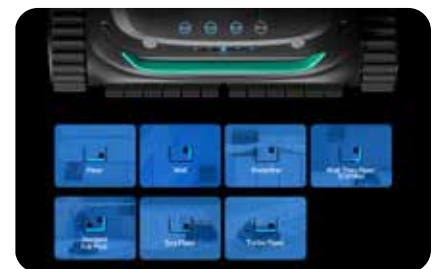

Solar Charging

Support solar charging and DC charging, keeping the robot energetic all the time in any way.

Versatile Cleaner

Cover every corner of all types of pools, leaving no dirty uncleared.

7 Cleaning Modes & 7 Cleaning Paths

Easy to choose your cleaning area through your robot or the APP, and pair the best path for a full cleaning.

WYBOT S2 VISION

High-efficiency Cleaning

Visual assistance cleaning technology sets a new standard for rapid cleaning. A 'visible' machine for visible efficiency.

Versatile Cleaner

Cover every corner of all types of pools, leaving no dirty uncleaned.

8 Cleaning Modes & 7 Cleaning Paths

Easy to choose your cleaning area through your robot or the APP, and pair the best path for a full cleaning.

WYBOT S2 PRO

Waterline Docking Station

Automatically return to the docking station for inductive charging, keeping standby for the next cleaning.

Remote Control Underwater

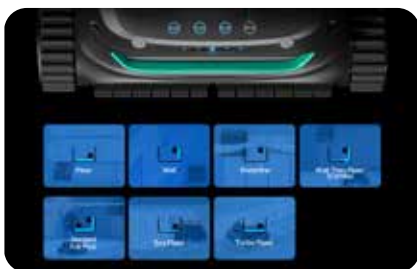

Penetrating the barrier of water, remotely control the cleaner while underwater.

Highly Intelligent Navigation

High-precision sensors guarantee a smarter and thorough cleaning for floors, walls, and waterlines of all types of pools.

WYBOT S2

7 Cleaning Modes

Preset your cleaning mode via App. Customize for the utmost suitability.

Extraordinary Cleaning

Features a brushless motor for improving suction and scrubbing, and double-level filtration for eliminating ultrafine debris.

Highly Intelligent Navigation

High-precision sensors guarantee a smarter and thorough cleaning for floors, walls, and waterlines of all types of pools.

WYBOT M2

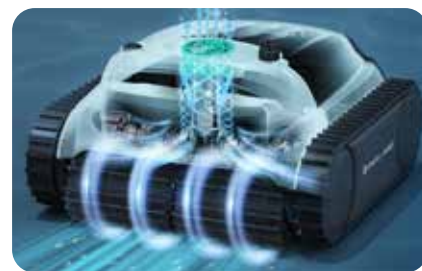

High-efficiency Cleaning

Visual assistance cleaning technology sets a new standard for rapid cleaning. A 'visible' machine for visible efficiency.

8 Cleaning Modes

Preset your favorable cleaning mode via the App. Customize for the utmost suitability.

Extraordinary Cleaning

Features a brushless motor for improving suction and scrubbing, and double-level filtration for eliminating ultrafine debris.

WYBOT C2 PRO VISION

High-efficiency Cleaning

Visual assistance cleaning technology sets a new standard for rapid cleaning. A 'visible' machine for visible efficiency.

Versatile Cleaner

Cover every corner of all types of pools, leaving no dirty uncleared.

Sonar technology

Built-in sonar sensor guides six cleaning paths, tailoring the best cleaning for different pool shapes.

WYBOT C2 VISION

High-efficiency Cleaning

Visual assistance cleaning technology sets a new standard for rapid cleaning. A 'visible' machine for visible efficiency.

Versatile Cleaner

Cover every corner of all types of pools, leaving no dirty uncleared.

All Week Clean Keeper

3 hours of runtime, keeping your pool all week clean with 4*45-min. floor cleaning cycles.

WYBOT C2 PRO

Versatile Cleaner

Cover every corner of all types of pools, leaving no dirty uncleared.

Sonar technology

Built-in sonar sensor guides six cleaning paths, tailoring the best cleaning for different pool shapes.

All Week Clean Keeper

3 hours of runtime, keeping your pool all week clean with 4*45-min. floor cleaning cycles.

WYBOT C2

Versatile Pool Cleaner

Be able to cross obstacles and climb slopes and steps, ensuring every corner of the pool be cleaned.

Extraordinary Cleaning

Features a brushless motor for improving suction and scrubbing, and double-level filtration for eliminating ultrafine debris.

All Week Clean Keeper

3 hours of runtime, keeping your pool all week clean with 4*45-min. floor cleaning cycles.

WYBOT C1

Versatile Pool Cleaner

Be able to cross obstacles and climb slopes and steps, ensuring every corner of the pool be cleaned.

Intelligent Navigation

Multiple high-precision sensors integration guarantee a smarter and more thorough cleaning for all types of pools.

All Week Clean Keeper

2 hours of runtime, keeping your pool all week clean with 4*30-min. floor cleaning cycles.

WYBOT F1

Edge Cleaning

Built-in sensors assist with rapid cleaning of debris accumulation along the surface edges. The unique edge cleaning mode ensures a completely clear pool surface.

Cloud Connectivity

Select your skimming modes through the robot and the app, and remotely control its running at your fingertips.

Solar power & DC charging

Two charging methods ensure your skimmer works all the time with no influence from the weather.

WYBOT A1

Patented Edge Cleaning

Always concerned about the dirtiest parts of your pool, the patented edge cleaning tech strengthens its cleaning there.

Compact Design

Light weight design eases transportation around and removal from the pool.

All Week Clean Keeper

2 hours of runtime, keeping your pool all week clean with 4*30-min. floor cleaning cycles.

WINNY 200

Compact and easy to operate

The lightweight body makes transportation effortless, while the one-button start simplifies the cleaning process.

Multi-level filtration

The ultra-fine filtration system captures even the smallest debris on the floor, purifying your pool in a single pass.

Full-coverage cleaning

The flexible cleaning path ensures full floor coverage, efficiently cleaning pools of any shape.

HYSON 100

High-power suction

The powerful suction effortlessly captures all types of debris in the pool.

Corner cleaner

The small suction head is designed for cleaning hard-to-reach corners and shallow areas.

Easy to operate

One-button start for cleaning, with LED lights for easy monitoring of cleaning status.
