# A LETTER FROM MIKE

DEAR FRIENDS AND CUSTOMERS,

SINCE IT WAS INCORPORATED IN 1989, EXCEL BLADES' MISSION HAS BEEN SIMPLE AND DIRECT - TO PRODUCE AND DELIVER HIGH QUALITY TOOLS, AS WELL AS, UNPARALLELED CUSTOMER SERVICE TO CONSUMERS ACROSS THE GLOBE.

TOGETHER, WITH BOTH MY FAMILY AND STAFF, WE HAVE WORKED TIRELESSLY TO ENSURE THAT EXCEL BLADES CONTINUES ON THAT SAME PLEDGE; EVEN AS WE HAVE SIGNIFICANTLY GROWN AND EXPANDED INTO FURTHER INDUSTRIES AND MARKETS.

WE THANK EACH ONE OF YOU FOR YOUR CONTINUED PATRONAGE OVER THE LAST 30 YEARS. WE LOOK FORWARD TO A BRIGHT FUTURE WITH YOU ALL.

MANY THANKS,

**MIKE HAMMAM**  
PRESIDENT

## GENERAL INFO

### ORDERING

To place an order, please email us at **orders@excelblades.com**.

The minimum order value is \$100.  
All items must be purchased in case pack minimums.

### PRODUCT GUARANTEE

We manufacture and package the very best products available. If for any reason you are not happy with any excel product, full credit will be refunded. Prior factory authorization is required.

### CAUTION

All knives, blades and tools are very sharp. Goggles should be worn when using any tools. Not for use by children under 14 years of age. Children should ask parents or professionals for supervision while using Excel products.

Images, products, descriptions, and colors are subject to change without prior notice.

# BLADES

Excel Blades, proudly manufacturing in New Jersey, delivers precision-engineered blades designed to meet the highest standards of performance and durability. Our commitment to innovation is reflected in our specialized offerings, including titanium nitride and zirconium nitride coated blades. These advanced coatings enhance the longevity and cutting efficiency of our products, ensuring that our customers receive the best tools for their needs.

With a focus on quality and reliability, Excel Blades continues to set the benchmark in the industry.

Excel Blades' Light Duty Blades are precision-manufactured with quality control ensuring clean and accurate results every time. These blades are compatible with Excel's K1, K3, K17, K18, K26, and K71 light-duty knives.

Coating blades with titanium nitride offers several significant benefits that enhance its performance and longevity. Titanium nitride is known for its exceptional hardness and wear resistance, which helps the blade maintain a sharp edge for a longer period, reducing the need for frequent replacements or sharpening. Additionally, the coating provides a smooth, non-stick surface that minimizes friction during cutting, allowing for cleaner, more precise incisions.

Zirconium nitride is highly resistant to wear and corrosion, which helps maintain the blade's sharpness and prolong its lifespan, reducing the frequency of replacements or sharpening. This coating also contributes to a smoother cutting action, allowing for precise and clean incisions with less friction, making it particularly beneficial in utility and crafting applications.

Excel Blades’ self healing cutting mats, available in a wide range of sizes, are 3mm thick, about twice as thick as many other cutting mats on the market today, and are extremely sturdy and pliable. They have soft self-healing PVC layers on both sides and a durable hard PVC center layer, making them one of the best self-healing cutting mats available to crafters and hobbyists.

Third-hand and extra-hand tools are invaluable for enhancing your workflow and simplifying tasks, particularly when precision and stability are crucial. These tools act as additional sets of hands, providing secure support for holding, clamping, or stabilizing materials while you work. Whether you're soldering delicate components, gluing intricate pieces, or assembling complex parts, they ensure you can focus on the task at hand without the frustration of juggling materials. By offering consistent positioning and reducing the likelihood of errors, third-hand and extra-hand tools not only make your projects easier but also improve the overall quality of your work.

Pliers are indispensable tools across a wide range of industries, each type tailored to specific needs. Needle-nose pliers are a favorite among jewelers, electricians, and network engineers for their ability to reach into tight spaces with precision.

Wire cutters are essential for electricians and artisans working with wiring or crafting intricate designs while sprue cutters are ideal for model builders and miniature enthusiasts who need clean, precise cuts on plastic components. Flat-nose and bent-nose pliers find their place in jewelry-making and small assembly tasks, offering control and accuracy.

Excel Blades Corp pliers enhance these applications with soft-grip handles, providing exceptional comfort and control for professionals and hobbyists alike, even during extended use.
