

Take and Make: Chinese Paper Lantern

Take and Make Kit Includes:

- 1 Chinese print template
- 1 flameless tealight candle

Additional Materials Needed:

- Scissors
- Tape

Instructions:

1. Use scissors to cut out the Chinese print template.
2. Fold the template in half and firmly press down to create a crease in the paper.
3. Use scissors to cut the black lines of the template while it is still folded in half.
4. Unfold the cut paper template and secure the ends together using a small piece of tape and both the top and bottom edges to create a circular lantern.
5. Gently press down on the top portion of the lantern to bend the pre-cut slits to protrude outward, allowing light to escape from the inside.
6. Turn on the tealight candle and place it in the center of the paper lantern.
