

**Partnership Module
for Trusts and Groups**

Scalable strategic improvement for school trusts and groups

BlueSky Education's award-winning platform allows schools and trusts to triangulate appraisal, professional learning and quality assurance processes. Progress is easily evaluated, while staff are engaged through a rich, ongoing professional dialogue.

BlueSky is used by thousands of schools and trusts across the UK to simplify cross-school working through a robust, easy to use online platform.

Our dedicated Partnership module helps school trusts to implement consistent processes and aggregate information across schools to track professional growth, identify expertise and best practice and gain trust-wide intelligence.

"It's the best system of its type I've come across in a 30+ year career in education. No paper chase. Key metrics about the quality of education, CPD and appraisal are all available at the click of a mouse button."

"It facilitates strategic improvement planning and makes the whole appraisal process very straightforward and easy to manage."

Mike Butler, CEO, Haughton Academy

Premier partner

BlueSky Education is the only solution of its kind endorsed by ASCL and the Confederation of School Trusts

Link Appraisal, Professional Learning and Quality Assurance in one simple solution with BlueSky's talent management software

Holistic Intelligence

Instant global reports and quality assurance adapted to your trust or group. Develop your staff and support performance reviews at every level.

Collaboration

Build a culture of collaboration that facilitates coaching, research and professional learning. Identify talent and share expertise.

Instant Reporting

Evaluate all quality assurance processes with powerful insights that support department, school and trust improvement. Leaders save valuable time with live data and intelligence.

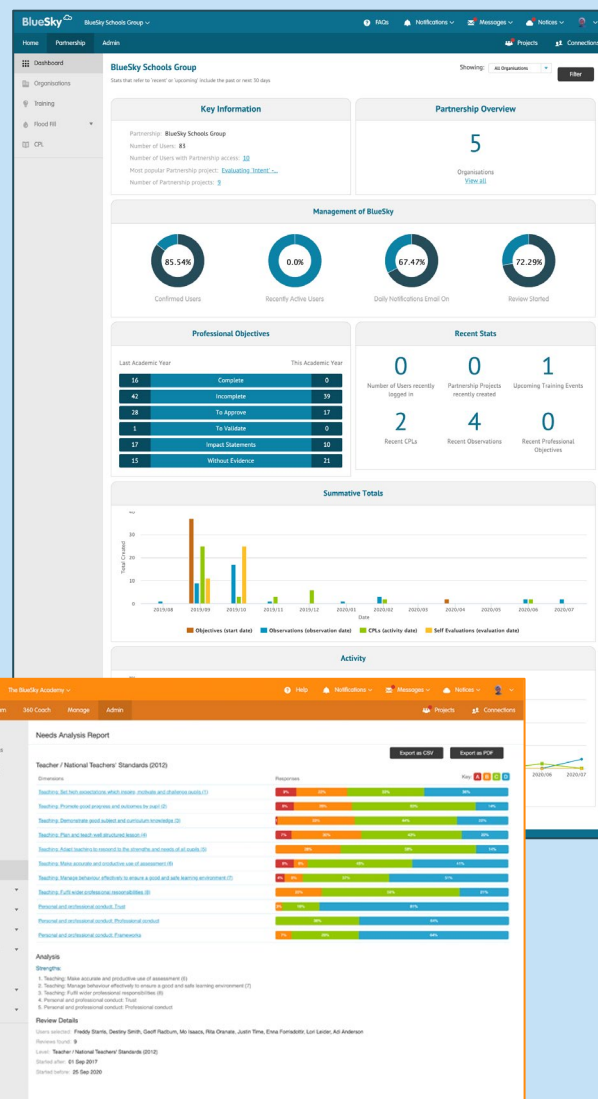

Global intelligence that supports individual growth

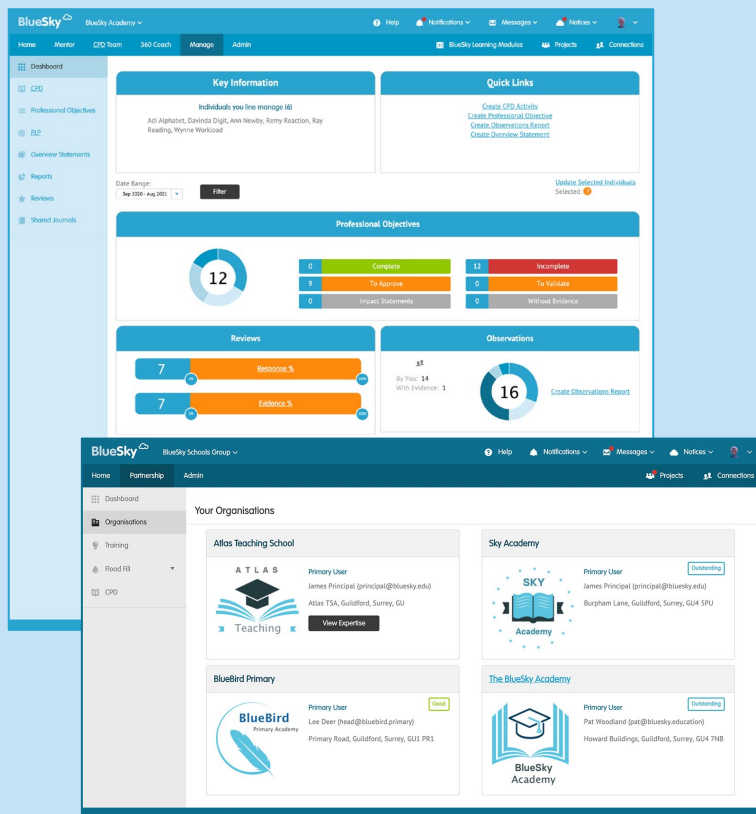

Developed by experienced educationalists, our market-leading software allows trust and group executives to organise, support and evaluate staff proficiency and school quality assurance across a family of schools.

BlueSky provides intelligence and insights to school and trust leaders that supports strategy and decision making, while also putting staff at the centre of discussions around school improvement.

BlueSky provides instant, global cross-school information, allowing for holistic analysis while highlighting trends and opportunities for collaboration within a trust. Leaders can review the impact of strategic decision-making at the touch of a button.

85% of clients say BlueSky Education saves the SLT up to 5 hours of admin every week

With BlueSky, schools within the group can maintain their autonomy of approach and process, whilst ensuring accountability and supportive structures are visible.

Staff are encouraged to engage with appraisal and professional learning objectives that allow them to develop their individual career pathways, but are also aligned with wider organisation priorities. Individual staff can retain their BlueSky portfolio if they move to another school within the trust.

We always ensure a cost-saving for trusts purchasing for a group of schools.

The Partnership Module is **free of charge** when more than one school in a group has a BlueSky Education membership.

"Staff have become so enthusiastic about using BlueSky! It makes them engage with and value the performance management process all the more. The support at every stage from BlueSky is also comprehensive."

**Claire Savory, Director of Academies,
Gloucestershire Learning Alliance Trust**

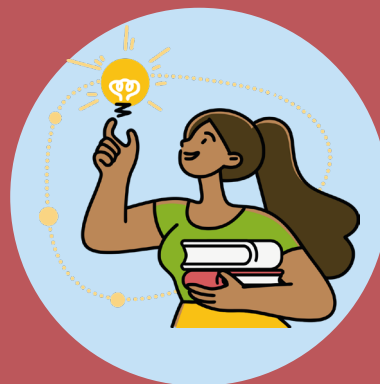

Elevate outcomes by putting people at the centre of improvement strategy

Strategic decision-making simplified

Trusts and school groups are able to build and implement standard strategic processes such as appraisal, professional learning and quality assurance, through shared frameworks and documentation such as pro formas.

Rich, granular, empirical cross-school data can be accessed by school leaders, school improvement and CPD teams to inform decision-making. Access standard reports or build bespoke dashboards with our easy-to-use reporting tools.

Empowering staff to grow

The trust's entire workforce can access their own portable career portfolio. Each individual's portfolio is personalised to their role in the organisation, supported with appropriate permissions.

Building their own portfolio empowers individual staff to define and drive their own professional development. Every member of staff can document CPD activities and add evidence throughout the appraisal cycle. The Timeline provides a simple way to view and reflect on progress.

"The support team are brilliant; the system is very user-friendly and the possibilities are endless with the fact you can make everything bespoke to your setting. The team are always on hand to help or find a clever work around that does the job better than I'd hoped."

**Deb Poole, Director of Staff Development,
City Learning Trust**
