

NEO

MADE TO PERFORM

MatchX NEO, the next-generation multi-token mining rig. Seamless, innovative design, built-in cutting-edge Low-Scale Certification (LSC) technology, NEO revolutionizes mining. Mine multiple tokens at ease in the comfort of your own home, with almost zero operating cost, NEO is a low-power, high performance miner, operating in complete silence.

Using the DataDash App, check your activity, optimize, swap, sell, stake and compound to unlock even more benefits all on the go. MXProtocol compatibility means NEO provides unparalleled secure connectivity to local smart devices, contributing to the MXC Global Data Network, connecting & certifying the world. Join the movement!

MULTI-TOKEN MINING

Let NEO go further than ever before. Unlike other miners, NEO mines 2 cryptocurrencies - MXC and DOGE.

VERIFIED SECURITY

End-to-End, military-grade encryption means that your mining operations are safe from exploits and hacks. Moreover, obfuscation of any identifiable data allows you to contribute to the network anonymously.

MANAGE YOUR MINING, ANYWHERE, ANYTIME

NEO offers full compatibility with the DataDash smartphone app, available on both iOS and Android. Download the free app, and set up NEO within seconds, have full visibility and control of your decentralized mining operations from anywhere in the world.

NEO TAKES YOU FURTHER

Use NEO to stake mined tokens for attractive yields. As you mine more, your principal increases. You can fully utilize the tokens on DataDash, allowing you to let your mined cryptocurrencies serve your interest even further.

ENERGY EFFICIENT

With ultra energy efficiency, NEO consumes 1/40th of a standard lightbulb. This results in virtually zero operational cost and absolute silence.

FAST INSTALLATION

With automatic network sync and backend setup, you only need to scan the QR code to start mining. 100% set up in 5 minutes.

EASY USE

Plug in. Scan. Mine. Powered by USB-C and using a native smartphone app, anyone can start mining with no technical knowledge.

CONNECT.

NEO is much more than just a miner, it simultaneously provides connectivity to smart devices around you. Using Proof Of Reality, the latest in Low-Scale Certification (LSC) technology, these devices collect and transfer valuable data, composing the building bricks of our modern-day world. NEO serves as the connectivity layer for businesses, institutions, and individuals alike, with NEO we're building a more connected world, together.

CERTIFY.

NEO may be small, but it's a powerful cornerstone in certifying the authenticity of both goods and data. The MXProtocol, on which NEO runs, provides a certification layer for companies around the world in both digital and physical space to offer authentication services to their customers. Ranging from luxury goods companies issuing certificates of authenticity to exclusive NFT projects arranging a method for their NFT holders to prove the genuineness of their digital collectibles, NEO's certification power has limitless possibilities.

STRONG BUT SILENT

Making cryptocurrency mining main-stream, a miner for the community. Providing connection, certification, and collaboration to local devices.
