

InDesign CS6 Online Video Training Gives Learners New Tools To Build Their Design Skills

Simon Sez IT releases new Adobe InDesign training tutorials to assist with creating professional layouts for print and digital publishing

August 15, 2012—Designing high-end layouts for professional quality print and digital publication just got easier. This week Simon Sez IT (www.SimonSezIT.com), one of the web's up-and-coming providers of online learning tutorials for popular business software, announced the release of its new **Learn Adobe InDesign CS6** training course.

The new InDesign CS6 online video training adds to the company's existing library of creative suite products that includes tutorials for Photoshop, Dreamweaver, and Flash. Designed for both new users and experienced professionals, Simon Sez IT's Adobe InDesign training tutorials give learners at all levels valuable insights.

The 9 hour, 80+ video course offers expert-level instruction in key areas including:

- **InDesign Introduction:** Giving users an overview of the application and teaching them to create new documents, save preferences, use the tools panel, format text and paragraphs, and work with styles.
- **Images:** Teaching digital image format options, importing, moving, resizing, cropping, fitting to frames, and caption editing.
- **Shapes & Drawing:** Demonstrating anchor points and pen/pencil tool functions.
- **Colors:** Introducing swatches and teaching users to work with the kuler panel, tints, and gradients.
- **Objects & Effects:** Instructing on color application, stroke settings, transparency effects, flattening, and object styles.
- **Layers, Objects, & Anchoring:** Illustrating object arrangement, working with layers, grouping/locking, anchoring objects, and text wrap.
- **Tables:** Showing users how to import tables from Word and Excel as well as to add text, graphics, strokes, fills, and cell styles to tables.
- **Master Pages:** Walking users through master page set-up, editing, copying, deleting, importing, page numbering, and primary text frames.
- **Layouts:** Breaking down alternate layout options and liquid layout rules.
