

*Thank you for purchasing from us!*

*We hope you make beautiful products with our files!*

Wright House Digitals is one of three Wright House Design Co branded shops. Since 2019, we have been making a variety of physical products and digital files. We work hard to create original hand-drawn and handcrafted designs and products. Your support is sincerely appreciated. For inquiries, questions, or additional assistance, contact us via email and follow our social media platforms listed below.

## **ABOUT THE FILES/HOW TO USE THEM:**

Our files are meant to be used for laser cutting machines only. Our files have not been tested using vinyl cutting machines. Each file has been hand drawn, designed, vectored by us and tested using Glowforge lasers. Our digital files are predominantly meant for Glowforge Basic, Glowforge Plus, and Glowforge Pro lasers. Our files can be used with other laser software that runs using SVG or PDF files. If you are using a laser other than Glowforge, please be sure you understand your laser software, we are not responsible for user error. Our files have been known to work with programs such as Inkscape, Affinity Designer, Adobe Illustrator, Lightburn, Silhouette, Corel using SVG or PDF file formats. If you need an additional file format please let us know and we will try our best to assist but we cannot guarantee success.

All files are ready to open and run right on your laser workspace unless you would like to add your own welded fonts. When you download the file it will come zipped, simply move the file to the destination folder on your computer and right click, and select unzip.

Inside the zip file you will find the SVG containing the design along with a cut outline of the design and the engrave (if applicable depending on the file purchased), and a PDF containing design mock ups for color ideas, placement assist, and file organization, applicable font names, and helpful project information as well as contact information and our socials.

Each SVG file is made to open directly on your workspace. For each of our files, open on your laser and follow the instructions as stated on each workspace. A PDF file with additional information and assistance is also provided. Some files may contain accents that can be scored or engraved, be sure to select your settings accordingly or use the recommended settings we provide in the PDF. For most of our designs, Red or black lines are for cut, pink lines for score and blue or teal for engrave. If you are unable to see the color code on the workspace, we recommend opening the file on your chosen software first. We use Inkscape and Affinity designer.

Included on the design space of our round files is a circle to use as a backer or to use as a helpful tool to assist in resizing your full design. Simply move the circle to your design, select the entire piece, and change the size to whatever size you desire while being sure to keep your aspect ratio locked. All signs come sized at 9.5 inch – 10.5 inch. Ornaments come presized 3.75, or 4-5 inches. All files can be resized to suit your needs. Most of our files are made as single line designs to ensure the design cuts perfectly and precise every time. Please move the design around the workspace with caution so the design maintains the exact cut lines. Most of our designs can be resized for very large workspaces but

may be limited on smaller workspaces such as the Glowforge basic. We presize all of our files to be 3-4 inches for ornaments or 9.5-10.5 inches for round signs for this purpose.

Each file is set up to fit on a 12x20 work space, you are welcome to move the files around just be sure to maintain aspect ratio to avoid accidental resizing which could result in pieces not fitting together properly. To provide you with multiple sign design options, Some sign files MAY have one of two design options included:

- A 2D interlocking design that the accent pieces that are made to puzzle piece together flush with the background but with the option of adding an extra 3D image This method will make the design level and smooth. This design can have a difficulty level of beginner to expert level.
- A 3D layered design that the accent pieces do not interlock but are placed in layers on top of a solid backer. This method is great for depth and dimension and are genuinely the easier and faster assembly of the two. This design can have a difficulty level of beginner to intermediate level.

For all other files such as coasters, craft supplies, project accents and designed files, each file will have unique instructions included on the workspace.

For most projects we like to use masked 1/8 inch and 1/4 inch MDF draft board and birch wood. Be sure to revert back to you own laser for the proper cutting settings for your desired material.

## ADDITIONAL FILE INFORMATION:

- Our files do not contain a stand or hanging hardware unless noted.
- Our files are meant to be used for laser-cutting machines only.
- All files are generally ready to load and cut directly on your laser workspace. Some files may require adding personalizations; access to external design software may be necessary to adjust your project sizes or add custom personalizations. General resize information is included in each instructional PDF.
- We create our designs using Procreate, Inkscape, and Affinity Designer.
- All files are tested using Glowforge C02 lasers.
- Please be advised, that files are made and tested using GLOWFORGE PRO. Files may be used for other laser brands and machines, it is not a guarantee that they will be formatted or work without edits using an outside design program.
- Editable fonts will never be included with our designs due to commercial licensing, the buyer must hold a commercial license for all fonts used in your work and may obtain one by purchasing the fonts from the designated websites. As of 2024, We do not include the name of our fonts but you may send a message for any font inquiries.
- Wright House Design Co is NOT responsible for user error. When you purchase our files you agree to take full responsibility for your materials and machines. When using these files, be sure you are using software that is compatible with these files.

## TERMS AND CONDITIONS:

- Please be aware, that you are purchasing and downloading a digital listing, No physical items will be delivered to you. Upon purchase completion, you will receive an email with your download links or you can visit your purchase history and download from there. Upon downloading, You will receive 1 ZIP file including the project design in an SVG format for laser cutting, an image JPEG guide for color suggestions and file organization, a PDF with file instructions, and setting recommendations, and a PDF with licensing and general information.
- When purchasing from our online stores, you agree and understand that you are buying a digital download and there are no refunds for those by typing "yes" upon adding the listing to your cart. By typing yes you agree to the terms and conditions.

- All sales are final. Refunds on all digital files are not available. If you have any questions or concerns, contact us; we will do our best to assist. Please refer to our policies on our website for information regarding orders, order changes, shipping profiles, cancellations, returns, and exchanges.
- By purchasing this design(s), you have read the item's full description, agree to the licensing restrictions and terms of use provided herein, and accept all terms and conditions.

## PERMISSIONS:

- The purchased ZIP file and its contents are intended for the file purchaser only. All licensing covers only one user per purchase, additional users must purchase their copy of the file and licensing.

### With these files YOU CAN:

- Use our files for personal projects.
- Use our files for small business projects.
- Use our files to make a physical product to resell online, for in-person events, and wholesale.
- Use any design accents in other physical laser projects, provided you do not claim the designs as your own or attempt to sell any part of our digital designs.
- Download files up to 5 times.

### With these files, YOU CANNOT:

- Claim the original designs and concept as your digital designs. Reselling, sharing, or distributing any or all parts of our designs and files as your digital intellectual property is prohibited.
- Upload and attempt to sell any part of our designs as part of a clipart or digital file on any online sales platform.
- Change, alter, modify, or resize the file and relist it for sale as a new digital file.
- Buyers DO NOT have permission to use our photos from our listings or images in the purchased file. All pictures on our listings or included in the downloaded files are for example purposes only. You may not share, distribute, manipulate, or use as personal or commercial advertising for in-person events or on any website or social media outlets.
- Do not attempt to remove watermarks. All images remain the intellectual property of the Wright House Design Co.

When purchasing digital files from our etsy store, you understand that you are purchasing a digital file for laser cutting, as well as understanding that reselling any and all parts of our digital files as a digital file is strictly prohibited. By typing yes at checkout, you agree to the terms and conditions and understand that there will be no refunds, exchanges, or credits granted on any and all digital files. While we do not allow refunds on any and all purchases of our files, if you have any troubles please contact us with any questions and we can assist to our best abilities. Please refer to our policies on our website for information regarding ordering, order changes, shipping profiles, cancellations, returns and exchanges.

## LICENSING TERMS AND AGREEMENT:

Upon purchase and download of this digital file, provided all terms and conditions are followed by the original buyer, the client with the user name and address from which the file was purchased holds the official license to each file legally purchased and may create and sell the physical products made using our file. Only one license is granted per file per purchase and cannot be duplicated, shared, or split. Please see the terms and conditions for a breakdown of what is considered prohibited. No current restrictions on how many times a file is used or sold as a physical product.
