# **WINCHESTER® :** **A BRAND THAT IS SO OLD** **WHILE STAYING SO YOUNG!**

**W**INCHESTER® is an iconic and global brand that has shaped History with a capital «H». From the vast wilderness of the American West to the snowy forests of Scandinavia passing through the plains of France, WINCHESTER® has a special meaning for every one of us. Deeply rooted in history, WINCHESTER® is nonetheless a forward-looking brand, always moving towards progress and innovation.

This year sees a considerable increase in our range of clothing. The new WINCHESTER® outfits are technical, resistant and elegant. And there's something for everyone's tastes! The posted hunter will appreciate the warmth of the Iceland parka and trousers. Trackers will be won over by the ruggedness of the Track Raccoon series. As for the Orion series, it is ideal for all your active hunts.

WINCHESTER® knows how much the .22 caliber is a vector of pleasure but also a formidable caliber for training and varmint control. The XPERT® rifle offers unmatched accuracy. This rifle is designed to meet the expectations of shooters and hunters thanks to its adjustable cheek piece, Picatinny rails and threaded barrel. Its semi-automatic big sister, the Wildcat, is not left out since three new versions are available.

Several 12-gauge cartridges expand the catalog of the world's largest manufacturer of small caliber ammunition. In order to make it as easy as possible for customers to understand our range, we have also modified the packaging of several products.

I invite you to browse through these pages to discover all our new products!

# XPERT®

4

**XPERT®**

Lightweight, rugged and accurate, the XPERT® 22LR bolt action rifle is built to give you pleasure. This gun with its resolutely modern look offers a significant number of customer benefits. The bolt slides easily in the semi-match chamber, allowing a rapid succession of shots. The M.O.A. trigger is adjustable and especially precise. Ergonomics have not been overlooked since the magazine release is ambidextrous. Many accessories are available for sale while two Picatinny rails are directly mounted on the gun.

	 cm	 mm			 kg				End-user*

# .22LR BOLT ACTION RIFLE

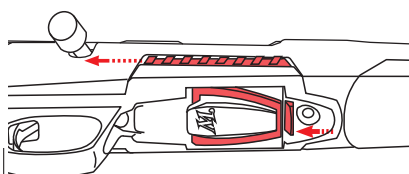

STAY TRUE

## ADJUSTABLE MOA TRIGGER GROUP

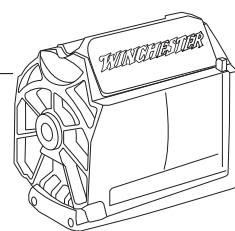

Rimfire MOA precision trigger with a three-lever design guaranteeing the principle of triple zero: zero take-up, zero creep, zero overtravel. This makes the firing pin release crisp and very fast.

Adjustable trigger pull-weight.

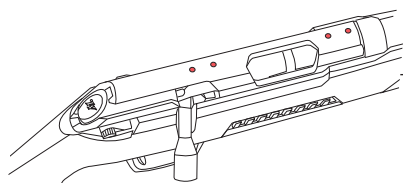

## ERGONOMIC

The magazine release system is totally ambidextrous and easily accessible via the 2 catches on either side or via the catch directly under the magazine. The magazine drops straight into your hand! The stock is skeletonized to reduce weight and always fits the shoulder perfectly.

## ROTARY MAGAZINE

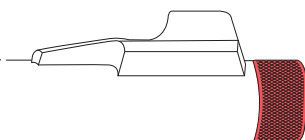

Detachable 10 round rotary magazine. Compatible with 10/22® magazines. Easy to load and unload.

## ACCESSORIES

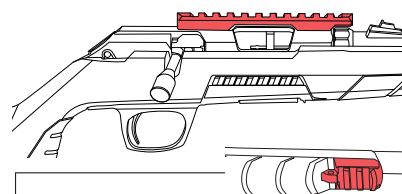

Many optional accessories are available.

- Optical sight mounting system with 30mm rings
- Cheek piece
- Interchangeable butt plate (25mm)
- Picatinny Rail

## THREADED BARREL

The barrel is threaded at the muzzle ( $\frac{1}{2}$ "x20 UNF) to attach a sound moderator\*\*. A removable protective ring covers the thread when the rifle is used without a sound moderator. The muzzle has a recessed crown to protect the rifling which guarantees that accuracy always remains perfect.

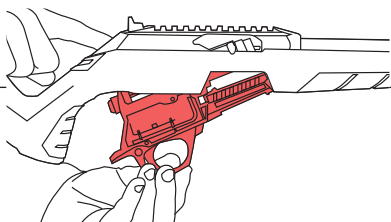

## PICATINNY RAILS

A first integrated rail on top of the receiver allows you to easily fit an optical sight (\*\*).

To complete your rifle with a bipod, a sling mount, a torch or any other accessory, a picatinny rail is positioned in front of the fore-end.

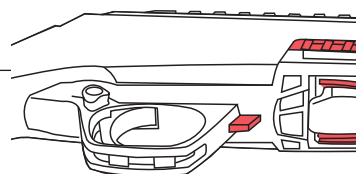

A rail cover will protect your hands when no accessories are attached.

### REMOVABLE ACTION

The lower part of the receiver, with the bolt and the trigger, are easily removed from the upper part by simply pressing with your finger on a button at the rear of the receiver. No tools are needed! The manual safety catch is simple to reverse for easy use by any shooter, right-handed or left-handed.

### SLIDE LOCK

The slide lock button is positioned on the front of the trigger guard. You can manually lock the mechanism in the open position for maximum safety during storage or transport.

# WILDCAT™

## WILDCAT STEALTH™

NEW

Pleasure, efficiency and accuracy best describe the Wildcat. The Wildcat Stealth is offered in hunting green. Like all Wildcats, it is as efficient as it is easy to handle. Note in particular its removeable trigger group, ideal for cleaning the gun. Extremely reliable, its ergonomic stock fitted with a cheek piece gives maximum shooting comfort.

# SXR<sup>2</sup>

## SXR<sup>2</sup> STRATA FLUTED

LIMITED SERIES

The SXR<sup>2</sup> has all the features you dream of. Reliable, accurate and pleasant to shoot, this semi-automatic rifle is also very safe. Its slide stop allows the breech to be locked open when you are not actually hunting. The Strata camo highlights the lines of this rifle which is focused on ergonomics and performance.

# NEW PACKAGING

NEW

THE QUALITY OF WINCHESTER® AMMUNITION NO LONGER NEEDS TO BE DEMONSTRATED. FOR MORE THAN 150 YEARS IT HAS EXCEEDED THE EXPECTATIONS OF MILLIONS OF HUNTERS AND SHOOTERS AROUND THE WORLD

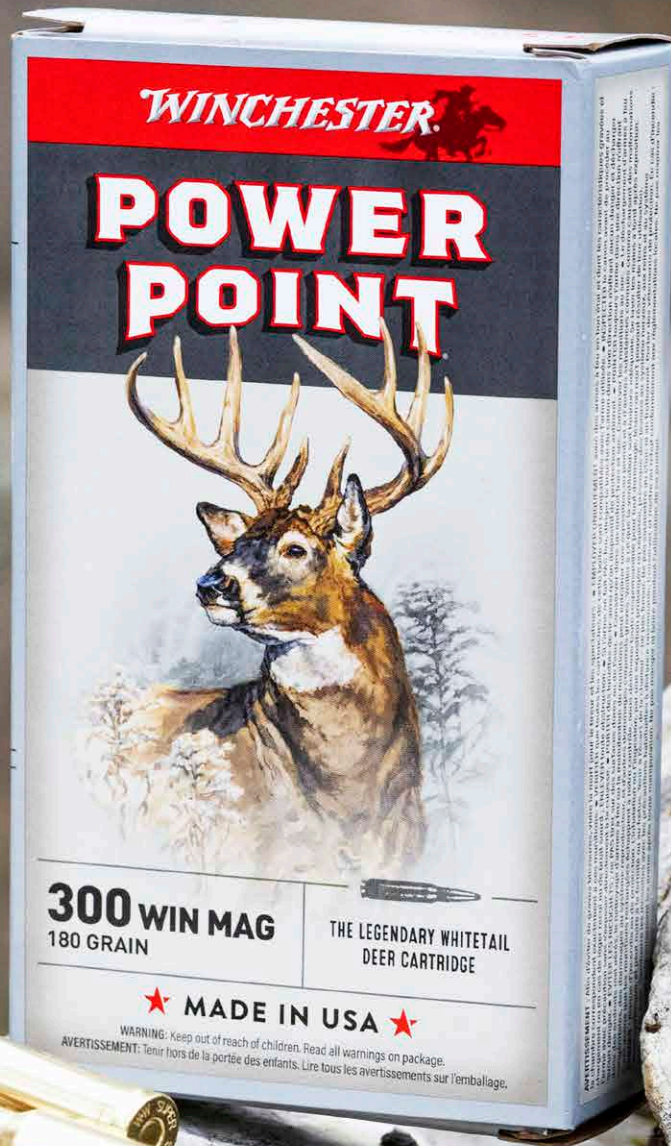

**W**INCHESTER®, the world's leading manufacturer of small caliber ammunition, offers a catalog as wide as it is deep.

In order to make it easier to read our catalog, and to stay in tune with the tastes of our customers, we have modified the packaging of several products. This project, already completed for shotgun shells, is now continuing with metallic cartridges.

But don't worry: your favorite ammo remains unchanged! Discover them at your preferred gun shop over the course of this year.

14

# BISMUTH

NEW

## EXTREME LETHALITY AT VERY LONG RANGE

The bismuth pellets are tin coated and are loaded along with a fine protective powder that acts as a buffer ensuring that the pellets remain totally spherical.

The result is a greater number of impacts on the target and maximum lethality up to 50 m. For perfect functioning in all situations, the watertight seal of the cartridge is guaranteed by the varnished primer and the special wad. Bismuth is more elastic than steel, so it can be fired in any shotgun, without special proofing.

- Skirted wad + protective powder (*buffer*)
