## How to link your Google Account to your iOS device

**Note:** The instructions below are designed specifically for Apple products only. No matter if you use iCloud, Gmail, or another email service, it's pretty easy to set up email on your Mac, iPhone, or iPad (For more information on how to link your Android device to your Google account, see the guide on "How to link your Google Account to your Android device").

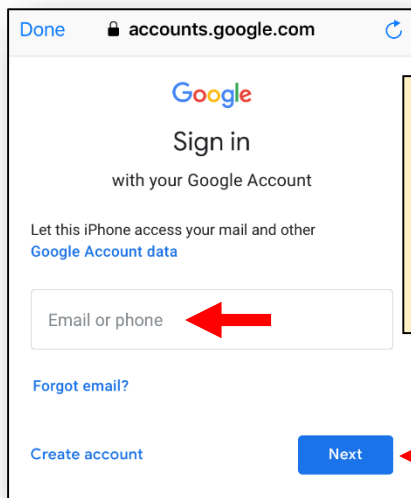

### For Students:

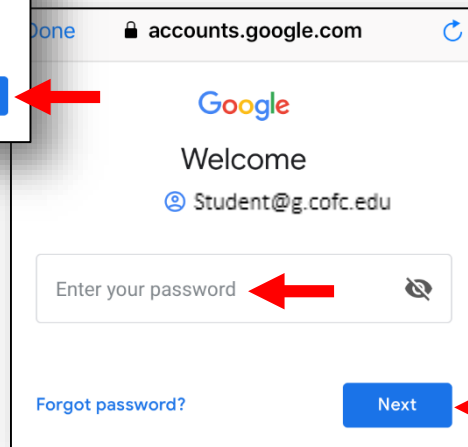

Here is how you can set up email, calendar, or contacts account on your iPhone or iPad.

While the old "Mail, Contacts, & Calendars" section of Settings is gone, having been split up into separate sections, there's still only one place you need to go to set up your email account(s).

**If you run into any issues, visit the Access & Instruction Desk located in the Addlestone Library or call IT Service Desk at 843.953.3375**

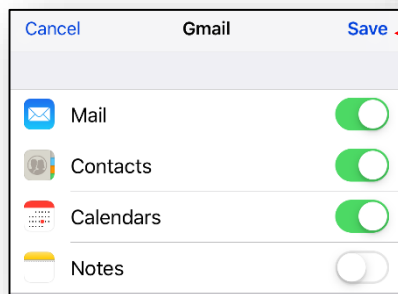

7. Enter your **g.cofc.edu** email address then click **Next**.
8. Enter your **password** then click **Next**
9. Click **Next** (Click **Forgot password** if you do not remember your password)

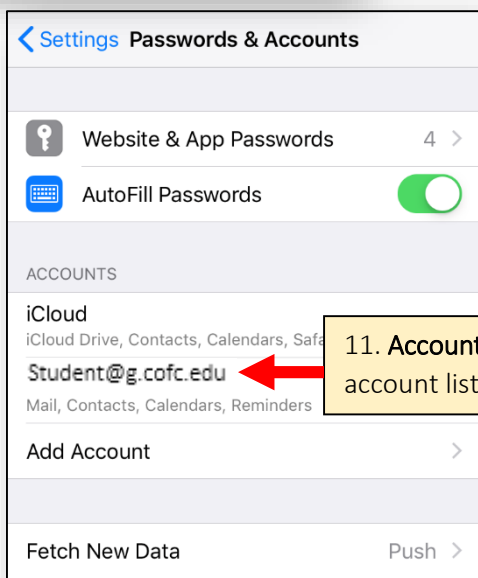

**Note:**

If you have 2-step authentication enabled for your Gmail account:

- Enter a **code** generated by Google Authenticator or received via SMS text message
- Click **Next**
- You may also receive a **push notification** from your **Gmail app** or **other Google-associated apps** to prove it is you signing in.

10. Click **Save** (To synchronize your **g.cofc.edu** account to your iOS device, enable **Mail**, **Contacts**, **Calendars** and **Notes**)

11. **Account** has been added (See added account listed under **Accounts**)
