Time to start gearing up for the holidays, whether you're decorating your home, designing a holiday quilt or making Christmas crafts. There's no reason to stick with the traditional color scheme of red and green when decorating for the holidays. Choose a personal holiday color palette for your own style and home this season.

## Color Theory Presentation

Sat 08/16 10:00-11:00am Sku: 620048

Fee: \$5 Instructor: Howard Vincent Kurtz

Color theory is the art and science of using color. It explains how we perceive color, both physically and psychologically, and how colors mix, match, and contrast with one another. We will consider the messages that colors communicate and how to use them effectively in our sewing projects. Attendees will receive a coupon for \$5 off any purchase of regular priced merchandise on the day of the presentation.

## A World of Color Presentation

Sat 09/20 10:00-11:00am Sku: 620080

Fee: \$5 Instructor: Howard Vincent Kurtz

Color is all around us. The elements of color are the most important tools a designer has to create a universal "world of color." From stage to cosplay to the runway, see how color is used to enhance the world around us. Attendees will receive a coupon for \$5 off any purchase of regular priced merchandise on the day of the presentation.

#### Foot Controller with thread trimming function

It is possible to automatically trim both needle and bobbin threads by pressing the heel side of foot controller. The foot controller is big enough and it is easy to control sewing-start and -stop.

#### LED Light

LED light brightens the needle area for better material handling.

#### Sub Tension Unit

Even if strongly twisted thread should be used, the unit will avoid "return of twist of thread" and supply needle thread to the main tension unit without thread quivering. It helps sewers create stitches with stable thread tension.

#### Maximum Sewing Speed Control

Now you can control Maximum sewing speed within the range from 200 to 1,500 SPM with this slide knob. This is ideal for free motion quilting or when a fixed sewing speed is required for your sewing techniques.

#### Predetermined Stop Position of the Needle

When you stop sewing, the machine will come to an accurate stop with the needle down. To move the needle up or down as desired, simply press the needle up/down button. When the button is pressed continuously, the machine sews stitch by stitch at low speed.

#### Knee Lifter Lever

The knee lifter lever allows you to lift/lower the presser foot without using your hands. The presser foot can be raised as high as 12mm, so that light to heavy weight materials are easily handled in and out of the sewing area with ease.

## TL-15

High Performance,  
Precision Sewing for Quilting,  
Apparel and Home Decor!

#### Drop Feed

The feed dog can be raised and lowered simply by depressing a switch. When quilting, the drop feed allows you to sew curved stitches with ease.

#### Automatic Thread Trimmer

The machine is equipped with an automatic thread trimming device that simultaneously trims the needle and bobbin threads at the sewing end by lightly pressing the push-button. It uses the thread trimming mechanism that is similar to the industrial sewing machine type, trimming thin through thick threads without fail. Auto thread trimming may also be activated by the foot controller.

#### Even Feed Foot

With its reliable feed, the even feed foot ensures the machine's ability to produce beautiful seams when sewing difficult-to-feed fabrics such as georgette and velvet, as well as heavy weight materials such as leather. The even feed foot is ideal for sewing multiple layers of fabric evenly.

#### Heavy-Weight Materials are sewn with Ease

The speed control mechanism, operated by microcomputer, allows the machine to sew materials at low speeds. This provides for accurate feed and perfect stitching when sewing heavy weight fabrics, quilting and multiple layers of materials.

#### Automatic Needle Threader

The push lever automatic needle threader easily threads the needle without eyestrain and allows you to start sewing quickly.

#### Thread Tension Scale

The machine is provided with the thread tension scale, which allows you to adjust the tension according to the thread and material to be used. Stitch length is easily adjusted with a dial.

#### Easy Bobbin Replacement

A new bobbin case latch and an enlarged bobbin case make it easier to remove and replace the bobbin. When the auxiliary table is being utilized, it is equipped with a sliding plate that allows convenient access to remove and load bobbins as well.

#### Adjustment of Presser Foot Pressure

Presser foot pressure can be adjusted according to the fabric being sewn by turning a regulator located on the top of the machine. The pressure amount can then be viewed at a pressure indicator.
