

## MAKE YOUR OWN WALLACE AND GROMIT ROCKET

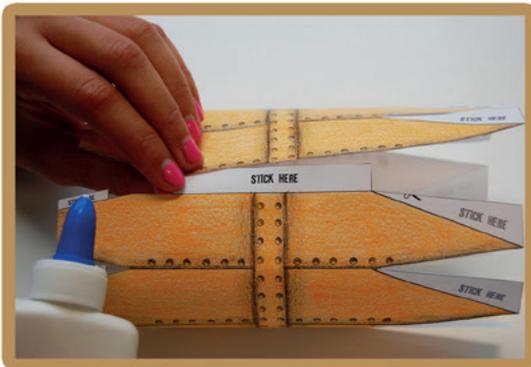

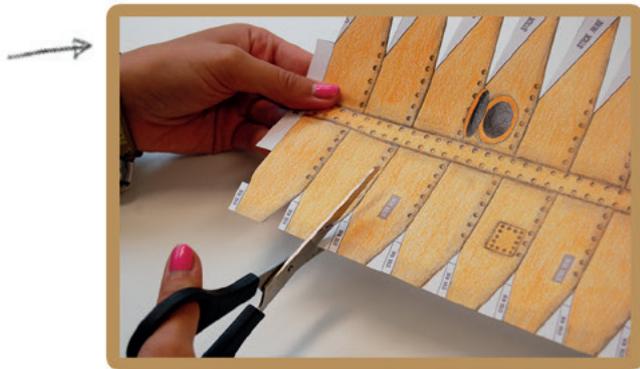

### Things you will need:

glue, scissors, colouring pencils/pens

### STEP 1

Print out the 'rocket body', 'fins' and 'Wallace and Gromit figures' pages. Colour them in any way you like, then carefully cut around the edges of the rocket.

### STEP 2

Fold the rocket into a tube and stick together with glue at the tab.

### STEP 3

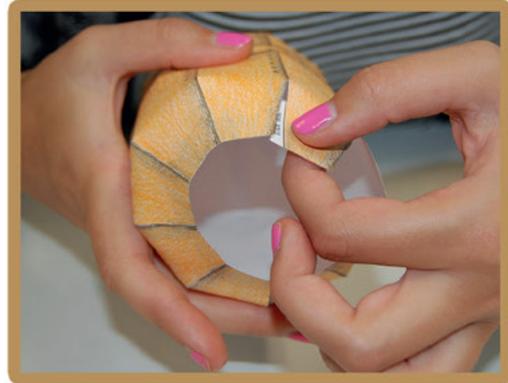

To make the pointy tip of the rocket overlap each section at the top, and glue it to the part that says 'stick here'. (The last one will be a bit tricky so tuck it underneath all the other sections)

## STEP 4

Do the same with the bottom, overlapping the sections and gluing them at the tabs.

## STEP 5

Now the body of the rocket is complete, it's time to start on the fins. Fold the fin page in half on the dotted line, then carefully cut out the fin shape.

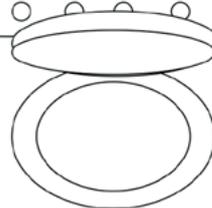

## STEP 6

Glue the fin tabs to the rocket over the 'stick here' sections (making sure the 'fold & stick' writing is on the inside so you don't see it), and then your rocket is complete!

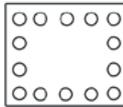

Colour in your Wallace and Gromit figures and proudly stand them with the rocket on your moon.
