

# Sensory paper pumpkins

How to make a pumpkin

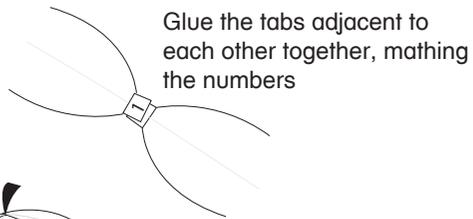

Cut out the 'flower' shape

Fold along each line and open out again

Then repeat the folds on the opposite side (so the folds go both ways)

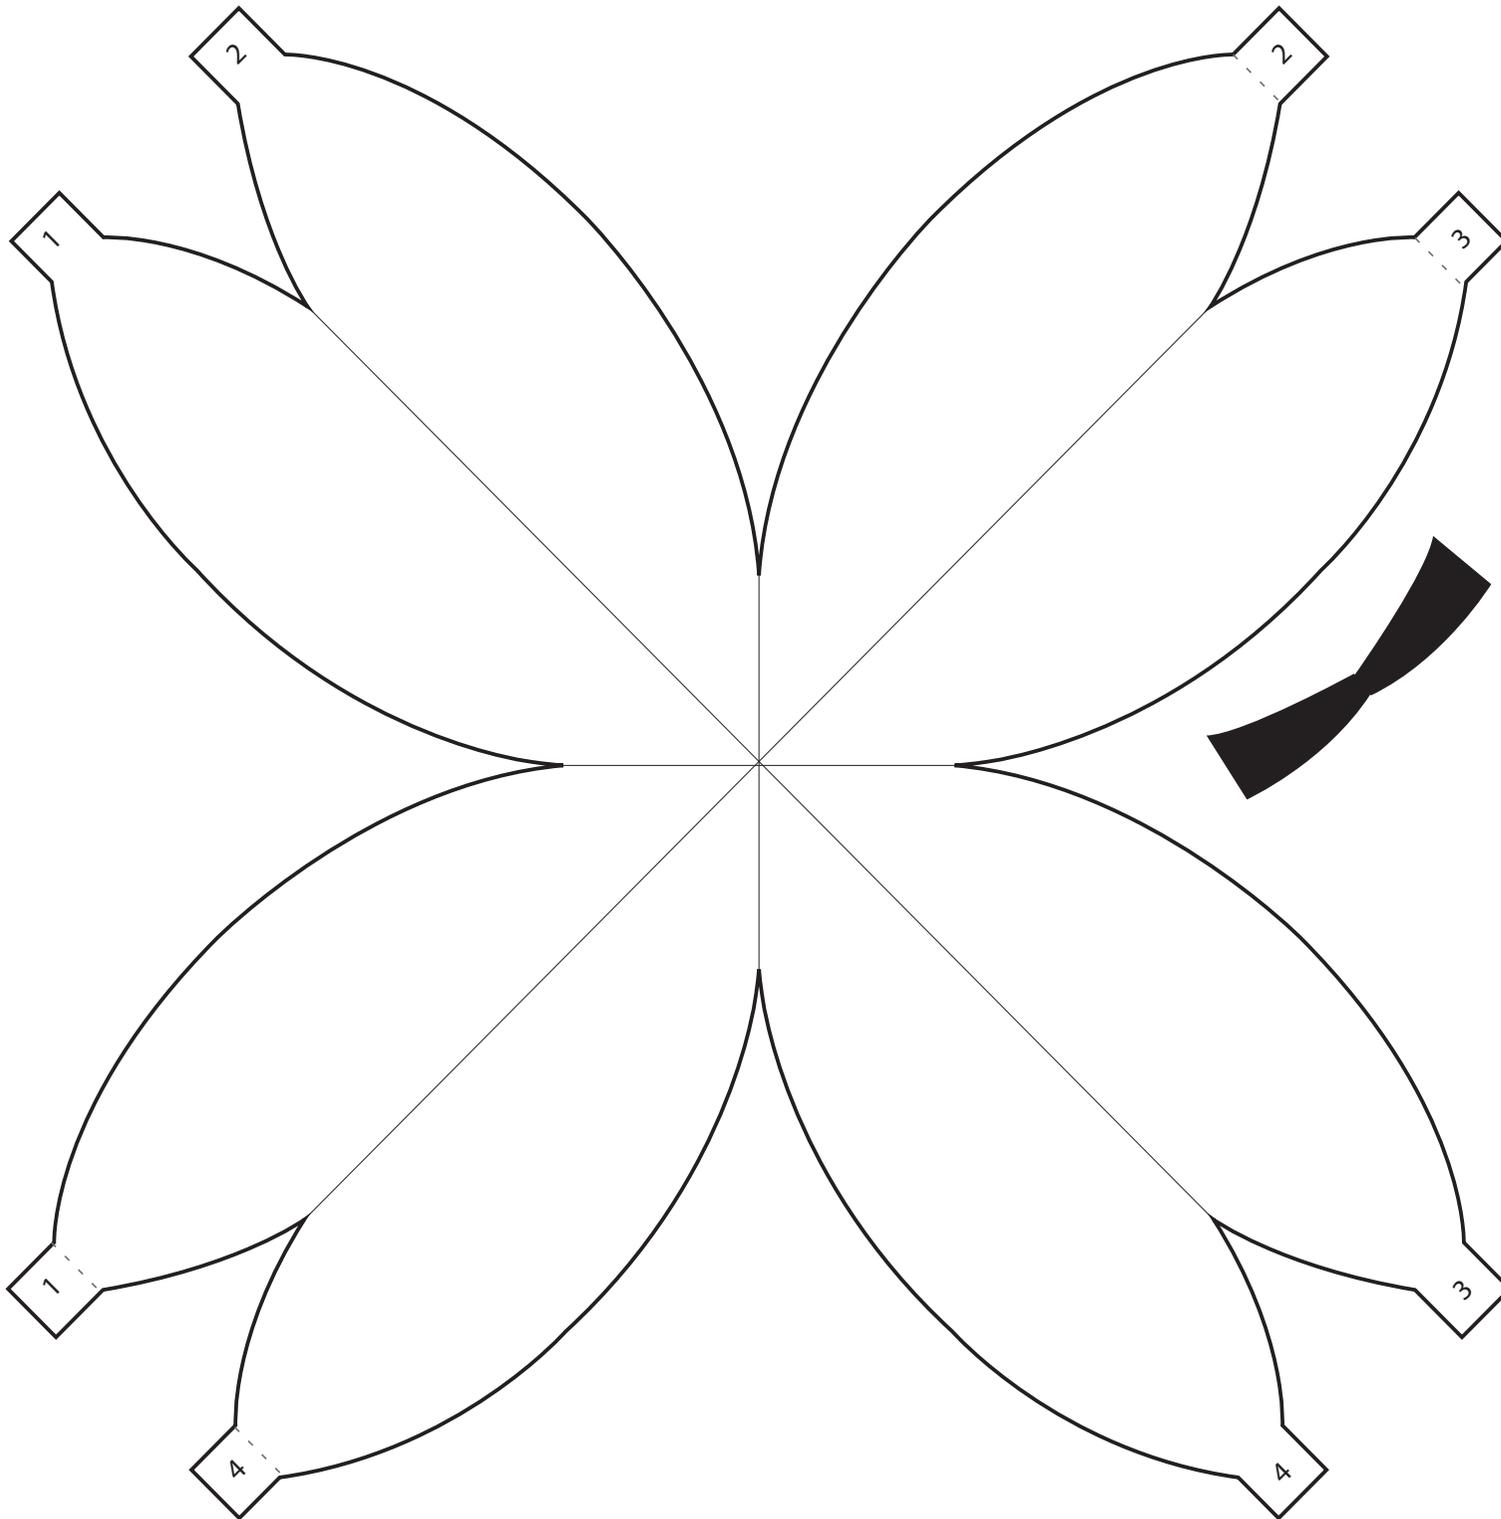

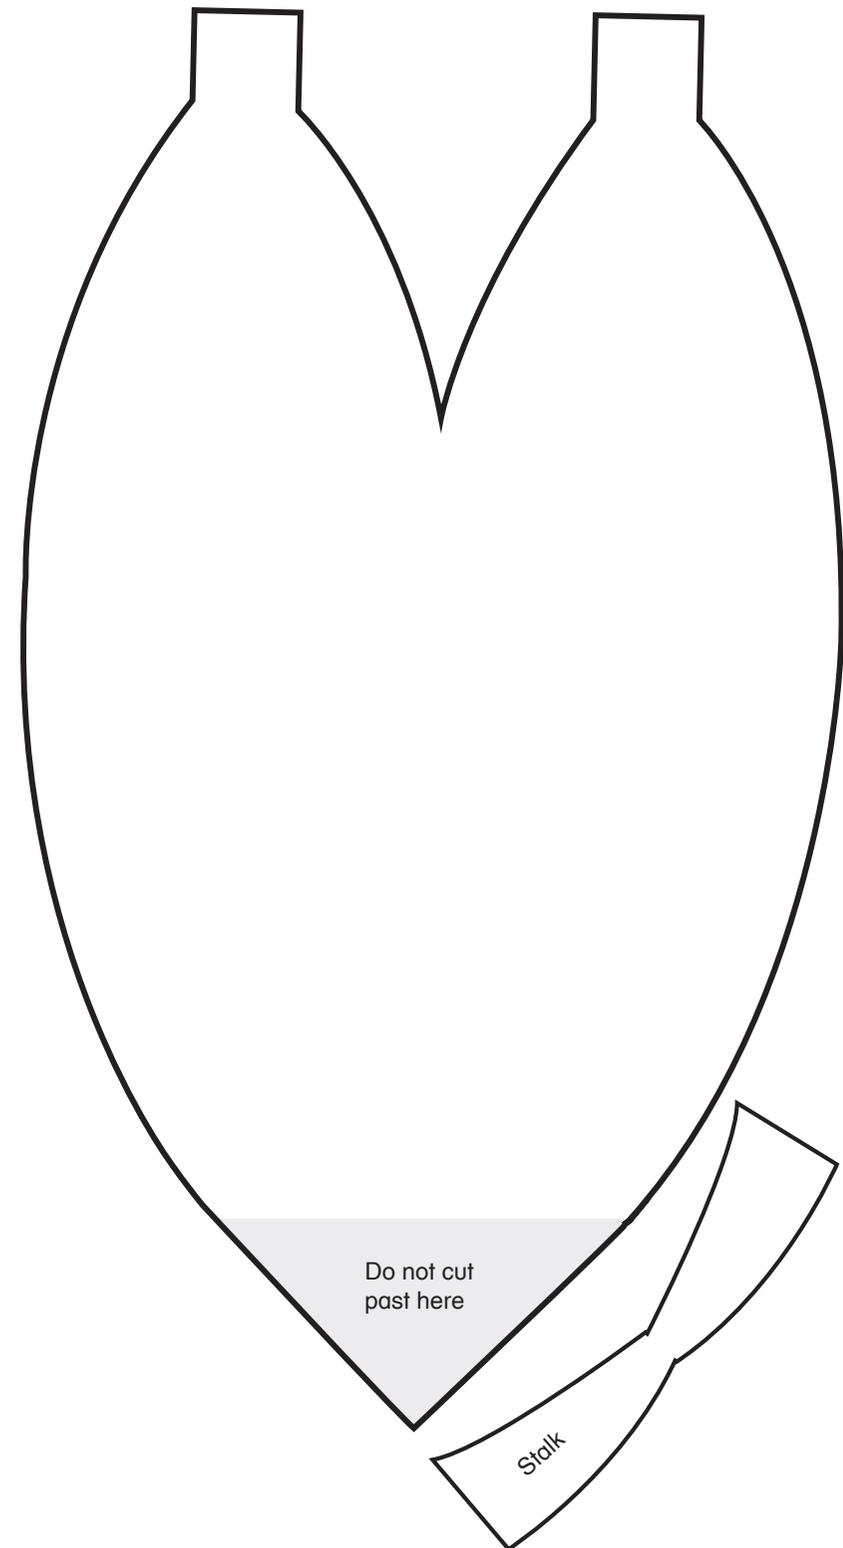

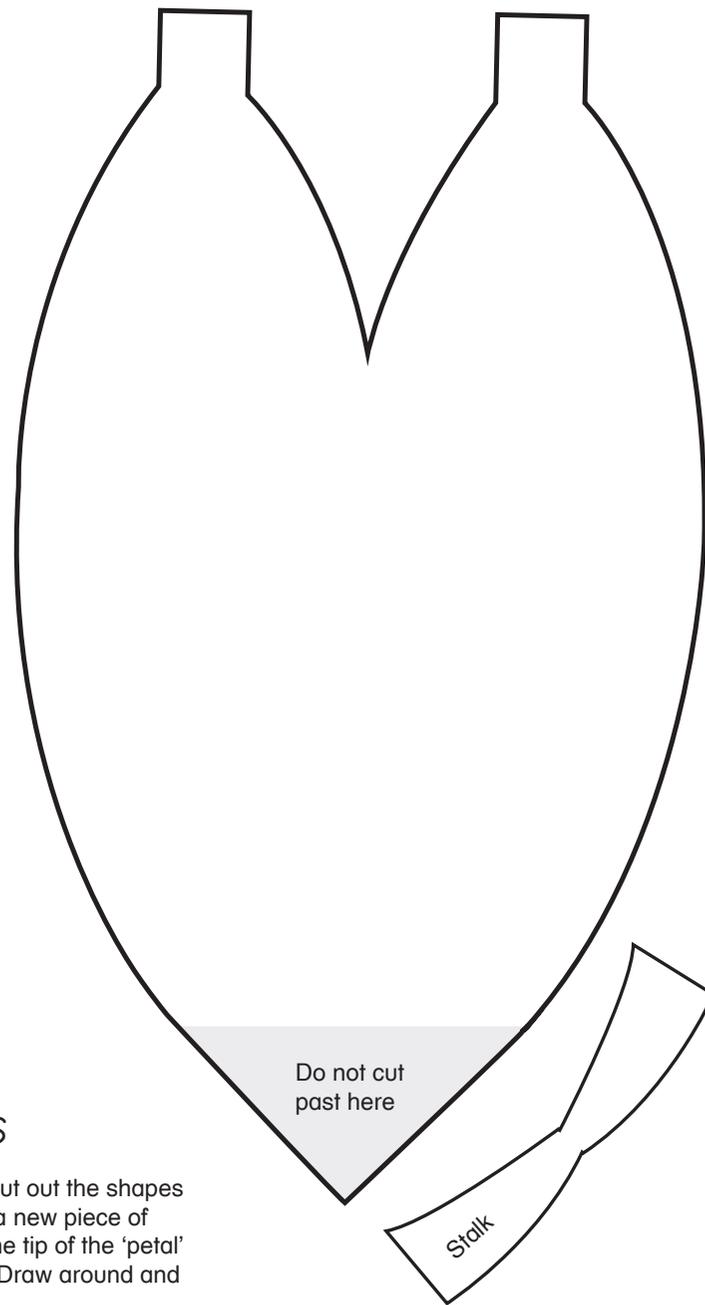

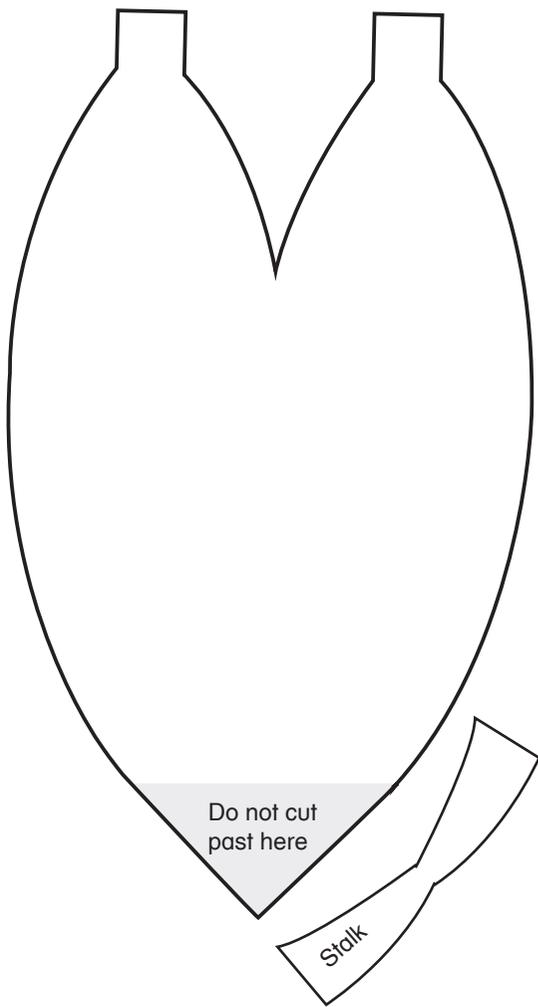

Add the tab for the stalk and use the folds to shape your pumpkin!

# Sensory paper pumpkins

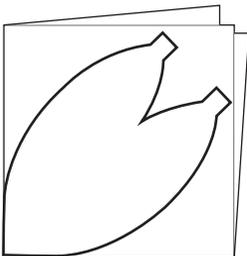

Decorate your own

## Sensory paper pumpkins

### Templates

To use the template, cut out the shapes on this print out. Fold a new piece of paper into 4 and put the tip of the 'petal' into the folder corner. Draw around and then cut out.

Do NOT cut all the way around, stop at the grey area, otherwise your petals will not be joined together.

When you unfold the paper you should have 4 identical shapes joined together. Fold and stick in the same way as the animal template.
