For a comprehensive understanding of your Al Automation, refer to these pages.

- Future Reference: This page is a valuable resource for all your future orders.
- **Smooth Functioning:** Following the guidelines here ensures your AI Automation functions optimally.
- Maximize Benefits: Understand how to get the most out of your Al Automation.
- Your Success: We're committed to your success, let's make the most of your AI journey together!

S.	Action 2. Text Message *
Appa	& event
Acco	unt
Actio	n
	Data sent to OpenAl through this Zap is via API. Under OpenAl's <u>API data usage policy</u> , OpenAl will not use API-submitted data to train or improve their models unless you explicitly decide to share your data with them for that purpose (such as by opting in). For more information, please review OpenAl's article about <u>when/how data may be used to improve model performance</u> .
	This action will run for a maximum of 150 seconds for longer responses and send back to the Zap as much of the response as possible. When testing the action, it will run for 50 seconds. If the entire response is not available, the was_cancelled output field will be true.
