

A really wild valentine

Print off and cut around the outside of the three hearts - careful not to cut in between them though, keep them joined in the middle!

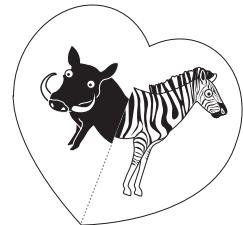

Fold the blank heart behind the middle heart and glue in place.

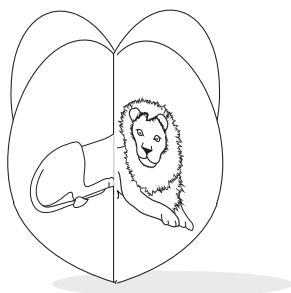

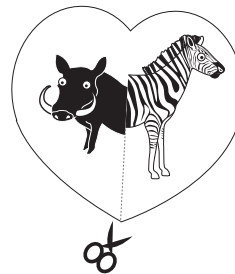

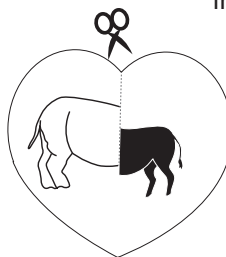

Then fold the remaining heart behind again and glue in place. You should have a single heart with animals on both sides.

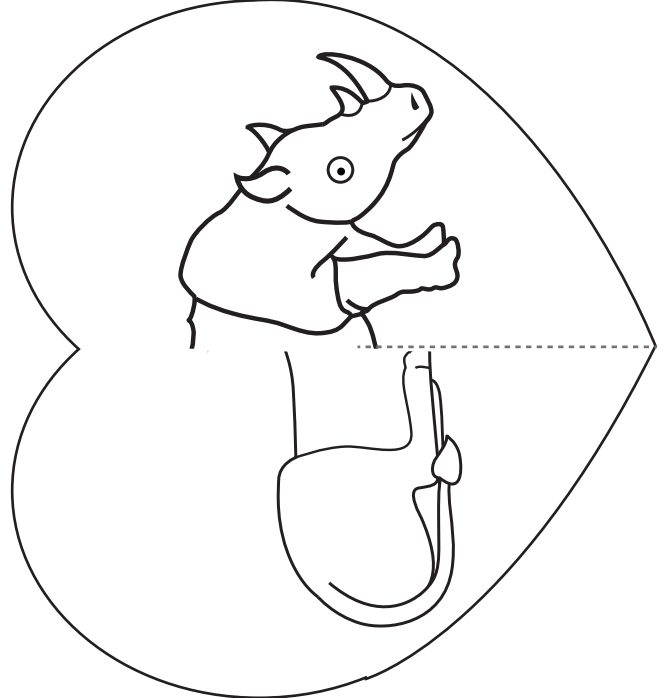

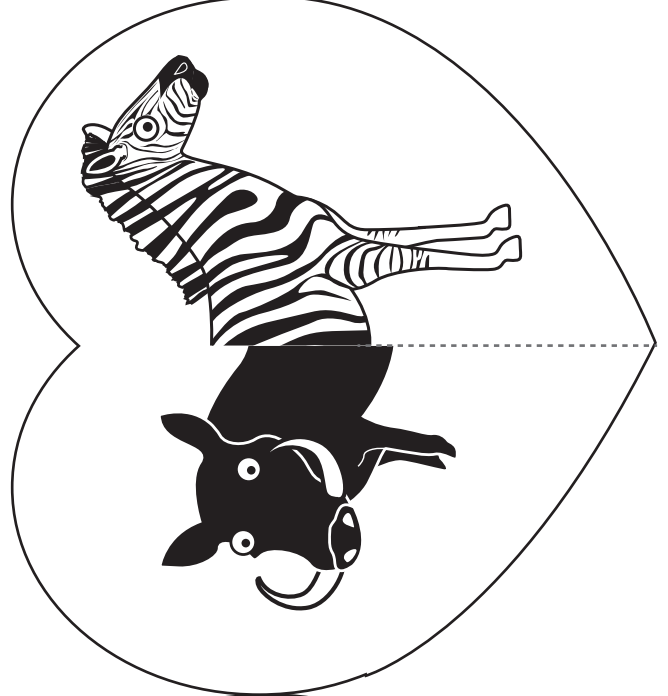

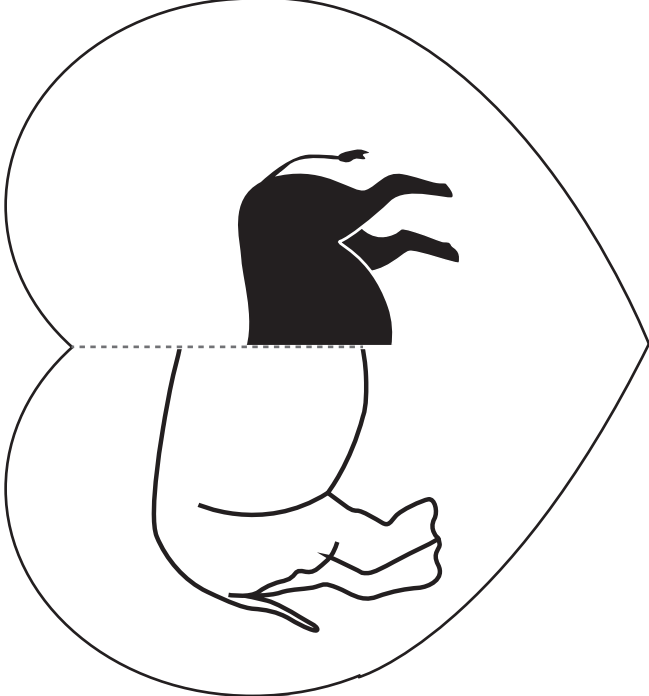

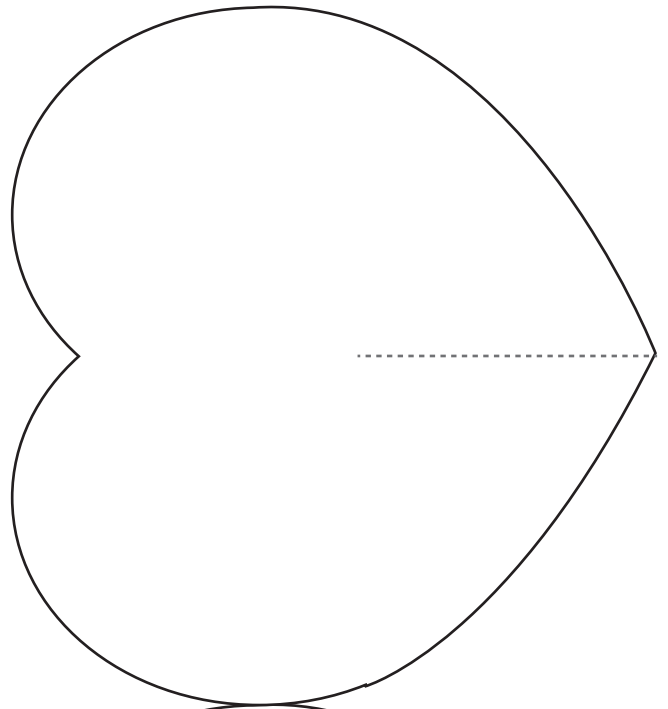

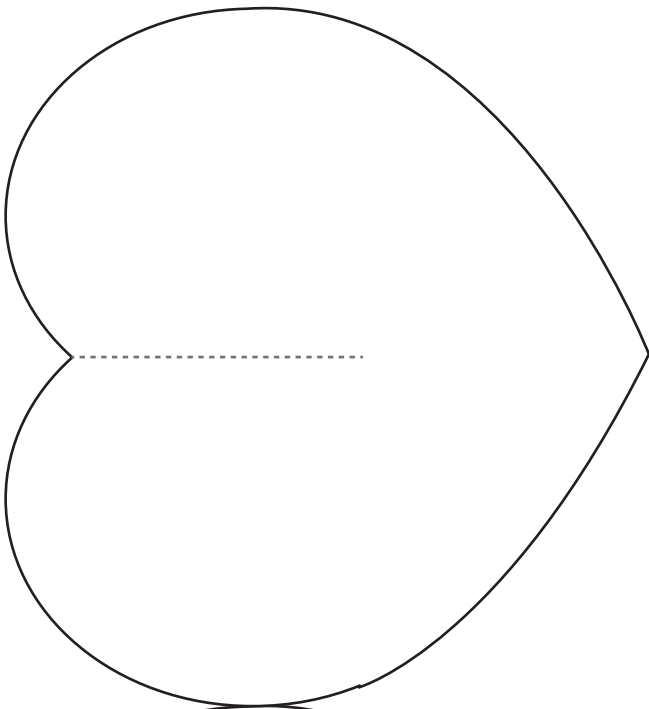

Repeat with the other strip of 3 hearts so you end up with two double sided hearts.

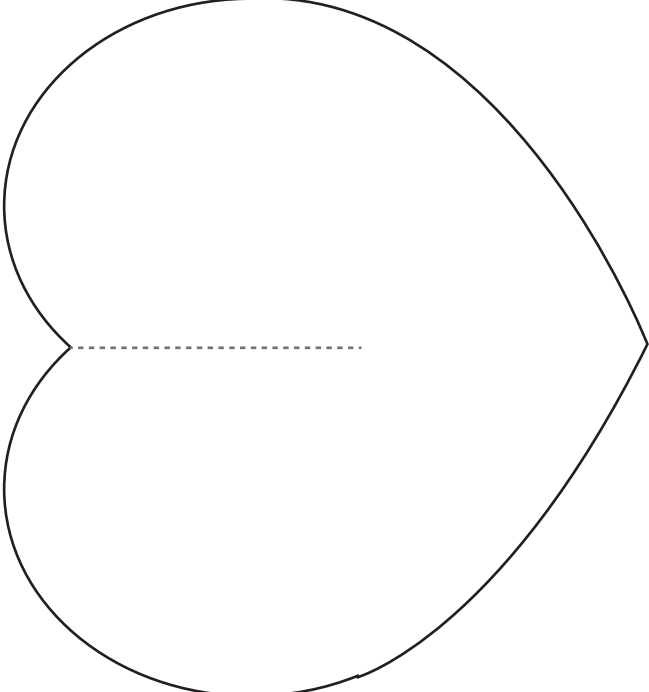

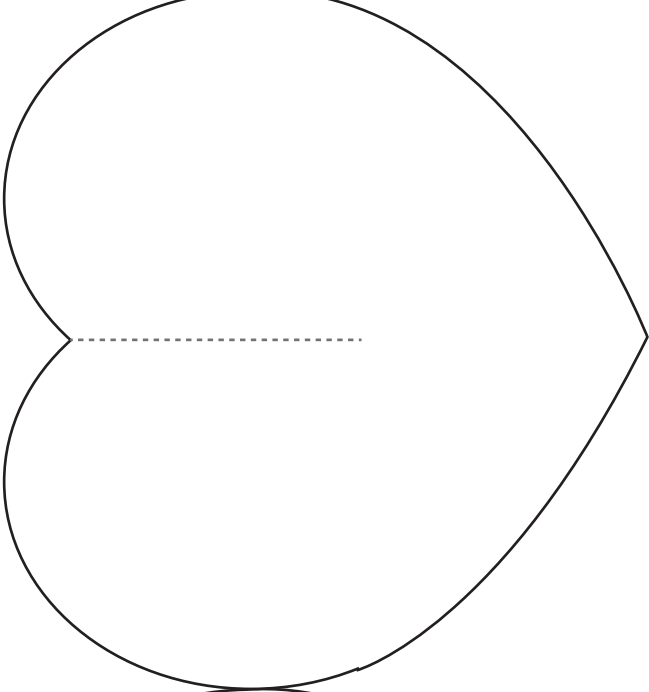

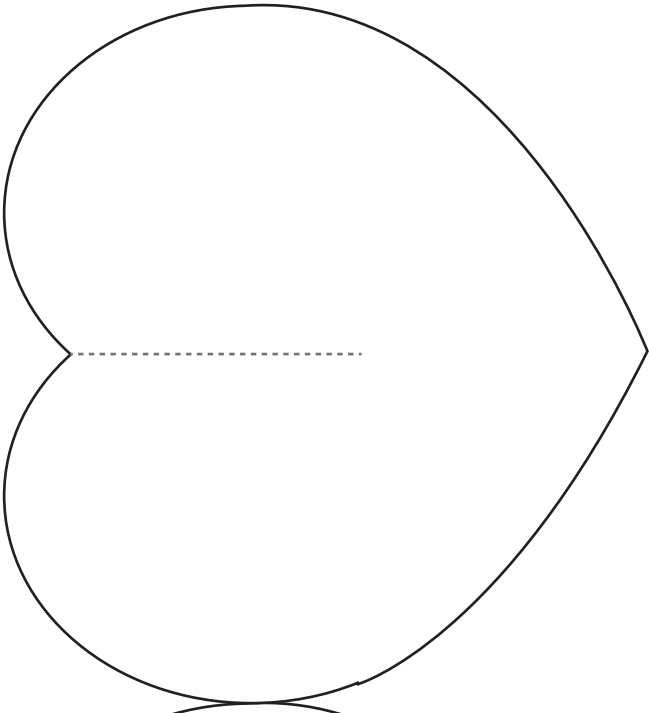

Then cut down the dotted line on one and up the dotted line on the other

Slot the two together and you've got a 3D heart shape with animals on each side!

Design your own!
